University Foundations

HISTORY

Loma Linda University has grown out of the institution founded at Loma Linda, California, by the Seventh-day Adventist church in 1905. The original schools—Nursing and Medicine—have been joined by Allied Health Professions, Dentistry, Public Health, the Graduate School, and the Faculty of Religion.

The University, operated by the Seventh-day Adventist church, is committed to the vision of its founders and is sustained by its close association with the church.

Loma Linda University is a Seventh-day Adventist coeducational, health-sciences institution located in inland southern California. It is part of the Seventh-day Adventist system of higher education. Professional curricula are offered by the Schools of Allied Health Professions, Dentistry, Public Health, Medicine, and Nursing. Graduate programs in various biomedical sciences are offered by departments of the schools. The professional curricula of the University are approved by their respective professional organizations.

The most current campus census figures (2000-2001) indicate that the core of the combined faculties consists of 1,023 full-time teachers. Part-time and voluntary teachers, largely clinicians in the professional curricula, bring the total to 2,199. Men and women from 96 nations are represented in the 2000-2001 enrollment of 3,325.

PHILOSOPHY

As implied by its motto, “TO MAKE MAN WHOLE,” the University affirms these tenets as central to its view of education:

God is the creator and sustainer of the universe.

Mankind’s fullest development entails a growing understanding of the individual in relation both to God and society.

The quest for truth and professional expertise, in an environment permeated by religious values, benefits the individual and society and advances the ministry of the Seventh-day Adventist church.

Our Mission

Loma Linda University, a Seventh-day Adventist Christian health-sciences institution, seeks to further the healing and teaching ministry of Jesus Christ “to make man whole” by:

Educating ethical and proficient Christian health professionals and scholars through instruction, example, and the pursuit of truth;

Expanding knowledge through research in the biological, behavioral, physical, and environmental sciences and applying this knowledge to health and disease;

Providing comprehensive, competent, and compassionate health care for the whole person through faculty, students, and alumni.

In harmony with our heritage and global mission:

We encourage personal and professional growth through integrated development of the intellectual, physical, social, and spiritual dimensions of each member of the University community and those we serve.

We promote an environment that reflects and builds respect for the diversity of humanity as ordained by God.

We seek to serve a worldwide community by promoting healthful living, caring for the sick, and sharing the good news of a loving God.

To achieve our mission we are committed to:

OUR STUDENTS

Our primary responsibility is the education of students, who come from diverse ethnic and cultural backgrounds, enabling them to acquire the foundation of knowledge, skills, values, attitudes, and behaviors appropriate for their chosen academic or health care ministry. We nurture their intellectual curiosity. We facilitate their development into active, independent learners. We provide continuing educational opportunities for our alumni and professional peers. We encourage a personal Christian faith that permeates the lives of those we educate.

OUR FACULTY, STAFF, AND ADMINISTRATION

We respect our faculty, staff, and administration who through education, research, and service create a stimulating learning environment for our students. They contribute to the development of new understandings in their chosen fields. They demonstrate both Christian values and competence in their scholarship and professions.

OUR PATIENTS AND OTHERS WE SERVE

We provide humanitarian service through people, programs, and facilities. We promote healthful living and respond to the therapeutic and rehabilitative needs of people. We seek to enhance the quality of life for individuals in local, regional, national, and world communities.

OUR GOD AND OUR CHURCH

We believe all persons are called to friendship with a loving God both now and throughout eternity. We support the global mission of the Seventh-day Adventist church by responding to the need for skilled Christian health professionals and scholars. We seek to honor God and to uphold the values of the Seventh-day Adventist church and its commitment to awakening inquiry. We are drawn by love to share the good news of God expressed through the life and gospel of Jesus Christ and to hasten His return.

Nondiscrimination Policy

The University was established by the Seventh-day Adventist church as an integral part of its teaching ministry. It is committed to equal education and employment opportunities for men and women of all races and does not discriminate on the basis of handicap, gender, race, color, or national origin in its educational or admissions policies, financial affairs, employment programs, student life and services, or any University-administered program.

To this end, the University is in compliance with Titles VI and VII of the Civil Rights Act of 1964 as amended, and in substantial compliance with Title IX of the Education Amendments of 1972 (34 CFR 106 et seq.), Sections 503 and 504 of the Rehabilitation Discrimination in Employment Act of 1967, and Section 402 of the Vietnam Era Veterans Adjustment Act of 1974; and does not discriminate against any employees or applicants for employment on the basis of age or because they are disabled veterans or veterans of the Vietnam era. In addition, the University administers student programs without discrimination on the basis of age, except in those programs where age is a bona fide academic qualification for admission in accordance with the provisions of the Age Discrimination Act of 1975.

The University reserves constitutional and statutory rights as a religious institution and employer to give preference to Seventh-day Adventists in admissions and employment, including but not limited to 42 USC Secs. 2000e-1, 2000e-2; Sec. 6-15 of Federal Executive Order 11246; 41 CFR Sec. 60-1.5(5); 20 USC Sec. 1681 (a)(3); 34 CFR Secs. 106.12 (a)(b), 106.21, 106.31, 106.39, 106.40, 106.51, and 106.57; California Government Code Sec. 12926(d)(1); Title II, Division 4, Chapter 2, Sec. 7286.5 of the California Code of Regulations; the First Amendment to the United States Constitution; and Article I, Sec. 4, of the California Constitution. The University believes that Title IX regulations are subject to constitutional guarantees against unreasonable entanglement with or infringements on the religious teachings and practices of the Seventh-day Adventist church. The University expects students and employees to uphold biblical principles of morality and deportment as interpreted by the Seventh-day Adventist church. The University claims exemptions from the provisions of Title IX set forth in 34 CFR Secs. 106.12 (a)(b), 106.21, 106.31, 106.39, 106.40, 106.51, and 106.57.

Affirmative Action

The University routinely monitors its educational and employment practices regarding women, minorities, and the handicapped to ensure compliance with the law and University policy. The University's affirmative action policy is to provide equal access to admissions, educational programs and activities, financial aid, student services, and employment.

In compliance with Title IX of the Educational Amendments of 1972 and Section 504 of the Rehabilitation Act of 1973, a grievance procedure has been established to process student complaints alleging violation of these regulations or of the University's policy of nondiscrimination based on gender or handicap. Inquiries concerning Title IX may be directed to the affirmative action officer. Employment-related discrimination complaints, including those filed by student employees, are processed in conformity with the provisions outlined in existing staff personnel policies. Complaints related to discrimination in academic areas are reviewed in conformity with the procedures established by the academic administration.

Karen Reiley provides callers assistance when Mel Sundean, director of marketing, is on the road visiting college campuses throughout the country.

Mission and Goals

General Information

Admissions Information

Student Life

Policies and General Regulations

Financial Information

We at the School of Allied Health Professions, Loma Linda University, thank you for your interest in our programs. The faculty and students believe we offer a quality education in all of the allied health professions, and we trust you will consider joining us in pursuit of a career in one of them.

We are dedicated to providing opportunity for academic excellence and development of clinical competence. Our close and effective connection with Loma Linda University Medical Center enables both students and faculty to stay on the cutting edge of health care. Additionally the School maintains clinical affiliations with more than 1,300 health care facilities throughout the United States, affording a wide variety of experience options.

At Loma Linda University we believe you will find a caring faculty, an attractive setting, excellent academic and clinical facilities, and a stimulating spiritual environment.

A handwritten signature in cursive script that reads "Joyce W. Hopp".

Joyce W. Hopp, Ph.D., M.P.H.

Dean

School Foundations

The School of Allied Health Professions was established in 1966 (under the name School of Health Related Professions, 1966-1971) to consolidate the administration of individual curricula initiated in the University earlier: medical technology, 1937; physical therapy, 1941; medical radiography, 1941; occupational therapy, 1959; health information management (formerly medical record administration), 1963. Curricula added since the School was established are nuclear medicine technology, 1970; radiation therapy technology, 1970; cardiopulmonary sciences (formerly respiratory therapy), 1971; nutrition and dietetics, 1972; medical sonography, 1976; special imaging technology, 1976; cytotechnology, 1982; coding specialist, 1987; occupational therapy assistant, 1988; physical therapist assistant, 1989; emergency medical care, 1993; surgical technology, 1995; physician assistant, 2000. The curriculum in speech-language pathology and audiology, initiated in 1965 under the auspices of the College of Arts and Sciences of La Sierra University (formerly Loma Linda University, La Sierra campus), was transferred to the School of Allied Health Professions in 1987. Particulars governing each program are detailed in the departments in division III of this BULLETIN.

Director of development, Renate Krause, has the pleasure of accepting donations from sponsors in order to help promote activities and to augment the funding of many scholarships within the School of Allied Health Professions.

Mission and Goals

OUR MISSION

The School of Allied Health Professions is dedicated to fulfilling the mission of Loma Linda University through academic and clinical training of allied health professionals. The School prepares competent health professionals in a Christian environment that emphasizes the healing and teaching ministry of Jesus Christ “to make man whole.”

To meet local, national, and international allied health-care needs, we seek to serve:

1. Students choosing to become health care professionals.
2. Individuals in need of medical care or health-promotion programs.
3. Faculty and staff committed to working with students in a Christian educational setting.

OUR GOALS

The goals of the School of Allied Health Professions are as follow:

1. To provide an environment in which the student may develop responsibility for integrity, ethical relationships, and empathic attitudes that contribute to the welfare and well-being of patients.
2. To help the student accept responsibility for integrity, ethical relationships, and empathic attitudes that can contribute to the welfare and well-being of patients.
3. To help the student develop a background of information and attitudes conducive to interprofessional understanding and cooperation.
4. To encourage the student to cultivate habits of self-education that will foster lifelong growth.
5. To engender and nurture in the student the desire to serve mankind, and in particular to serve as needed in the medical centers sponsored by the Seventh-day Adventist church both in this country and elsewhere.

The goals for the ideal graduate of an entry-level bachelor’s, master’s, or doctoral degree program within the School of Allied Health Professions are for an individual to:

1. Demonstrate clinical competence in his/her chosen profession.
2. Operate from a foundation of personal and professional ethics that incorporates the fundamental values espoused by Loma Linda University.

3. Demonstrate compassion for others in the manner of Christ.
4. Clarify his/her values and attitudes of human worth in relationship to his/her understanding of God.
5. Perform effectively within a team setting.
6. Communicate effectively with peers, supervisors, patients, family, and the community—orally and in writing—with sensitivity to nonverbal communication.
7. Analyze and respond to the changing field of health care.
8. Critically analyze data.
9. Read and interpret research papers.
10. Contribute to the chosen health profession through participation in professional organizations.
11. Utilize a theoretical foundation as a basis for treatment or management.
12. Incorporate wholeness into all aspects of personal and professional life.
13. Use sensitivity to accommodate diversity among individuals.
14. Commit to lifelong personal and professional learning.
15. Demonstrate basic skills in personal financial management and, where appropriate, in practice management.

Dr. Joyce Hopp takes a moment with her dean's office staff, Beverly deForest and Andrea Walker, to plan her always busy schedule.

General Information

ACCREDITATION

The programs are approved by the appropriate accrediting agencies, and graduates are eligible to take the qualifying examinations of the respective state and national licensing or registration bodies and to join the professional organizations. Details of accreditations are given in the individual sections.

ADMINISTRATION

The dean, the chief administrative officer of the School, presides over the Administrative Council, which meets regularly during the school year. The chairs of the departments direct the teaching of the several programs. Advisory committees of outstanding professionals in the fields of education and the allied health professions assist the department chairs in the continuing study of the curricula and in the preparation of recommendations.

INSTRUCTIONAL FACILITIES

The academic resources and the affiliated clinical facilities of the University constitute a rich educational environment for the health-professions student, both in classroom instruction and in guided experience in hospitals and clinics. Major facilities utilized for clinical affiliations and internships include the University Medical Center; the Jerry L. Pettis Memorial Veterans Medical Center; and other hospitals and community agencies located in the Redlands, San Bernardino, Riverside, and Los Angeles areas, as well as throughout the United States.

Admissions Information

In selecting students, the Admissions Committee of the School of Allied Health Professions looks for evidence of self-discipline, personal integrity, and intellectual vigor.

The committee also looks for evidence that students possess the capabilities required to complete the full curriculum in the allotted time and to achieve the levels of competence required. Acceptance of the applicant into any program is contingent on the recommendation of the department conducting the program.

An interview with faculty is required by most programs. Loma Linda University was established to provide education in a distinctively Christian environment, and its students are expected to adopt Christian ethical and moral standards as a basis for their conduct. It must be understood further that, in harmony with the University's emphasis on health and the health professions and the practices of the supporting church, applicants who use tobacco, alcoholic beverages, or narcotics should not expect to be admitted.

Loma Linda University is committed to equal opportunity and does not discriminate against qualified persons on the basis of handicap, sex, race, color, or national or ethnic origin in its educational and admissions policies, financial affairs, employment programs, student life and services, or any University-administered program. It does, however, retain the right to give preference in student admissions to qualified Seventh-day Adventist applicants. While this right is retained, it should be emphasized that admissions are not limited exclusively to Seventh-day Adventist applicants.

APPLICATION AND ACCEPTANCE

Where to write

Correspondence about admission to all programs and requests for application information should be addressed to:

Office of Admissions and Records
School of Allied Health Professions
Loma Linda University
Loma Linda, CA 92350

Apply early

One class is admitted annually to most of the professional programs. Most programs begin with the Autumn Quarter. Exceptions are noted in the respective departmental sections of this BULLETIN.

Late applications are considered as long as space is available. Notifications generally are sent between January 1 and May 15, depending on the completeness of information provided and the date of application. Applicants should inquire at the Office of Admissions and Records if notice of action is not received by April 15 for occupational therapy and physical therapy, and by May 15 for other programs.

Application review process

All completed applications are first reviewed by the department chair and faculty. A recommendation on each application is then submitted to the School's Admissions Committee, which makes the final decision regarding acceptance.

Procedure

The procedure for application and acceptance is given below. All correspondence and documents are to be sent to the Office of Admissions and Records, School of Allied Health Professions, Loma Linda University, Loma Linda, CA 92350.

1. File the complete application form (including recommendations, if received), accompanied by the \$50 application fee.
2. Request that transcripts of all college course work be sent to the School. High school transcripts are required of all applicants in order to verify graduation and completion of high school mathematics.
3. Upon receipt of the notice of acceptance, return the required deposit and the card provided to confirm acceptance.
4. Provide health records or certificates as required.

Applicant's records

The application and all records submitted in support of the application become the property of the University.

Veteran's benefits

A student eligible to receive veteran's benefits under the 1966 enactment should immediately after registration contact the Office of University Records at Loma Linda University to make arrangements for the transfer of records to the Veterans Administration Regional Office. Further information may be requested from the Office of University Records.

If a VA student's cumulative grade point average (G.P.A.) remains below the graduation requirements for the program in which s/he is enrolled for more than three consecutive terms, the student **will not be certified for VA educational benefits** until his/her academic status is restored to good standing.

ENTRANCE REQUIREMENTS

Subject/diploma requirements

High school and college subject requirements for each program are outlined in the respective departmental sections of this BULLETIN. Students are required to furnish evidence of completion (official transcript) of high school to be granted admission to undergraduate programs in schools of the University. A high school diploma or its equivalent, the GED, is required.

Grade requirement

Eligibility for consideration by the Admissions Committee is based on a grade point average of at least 2.0 (on a 4.0 scale) for all course work (science and nonscience subjects computed separately) presented in fulfillment of entrance requirements for all programs in the School. A grade point average considerably higher than the minimum is expected because of the nature of the studies in many professional programs and the competition for the limited number of openings. In general, grade point averages between 2.5 and 3.0 are considered minimal, depending on the program. A minimum grade of C (2.0) is required for all college transfer courses.

Transcripts

Transcripts (the documents by which institutions officially convey the grades and credits earned in specific subjects and the stage of completion of curriculum requirements) are accepted only when sent directly to the University by the issuing institution. Transcripts received by the University become the property of the University and will not be released to the student or forwarded to any other institution upon request of the student.

Test requirement

Upon acceptance, a self-study syllabus will be sent to the student in preparation for a mathematics screening examination that will be given immediately following registration. Those scoring below the acceptable minimum will be required to do remedial work and retake the test.

A writing skills pretest is also administered. The scores for the Wholistic Grading Rubric (WGR) are shown below. Any student not scoring 5 or better will be required to do remedial work during program and retake the test. The pretest is graded on the following criteria:

- 6= Demonstrates clear competence in writing on both the rhetorical and syntactic levels, though the essay may have occasional errors.
- 5= Demonstrates competence in writing on both the rhetorical and syntactic levels, though the essay will probably have occasional errors.
- 4= Demonstrates minimal competence in writing on both the rhetorical and syntactic levels.
- 3= Demonstrates some developing competence in writing, but the essay remains flawed on either the rhetorical or syntactic level, or both.
- 2= Suggests incompetence in writing.
- 1= Demonstrates incompetence in writing.

Immunizations

New students are required to have certain immunizations before registration. Forms for providing documentation of the required immunizations will be provided for the physician in the acceptance packet sent to the student by the School. It is expected that necessary routine dental and medical care and elective surgery will have been attended to before the student registers.

Pre-entrance health requirement (Immunization/Skin test)

1. Read carefully, complete, and return to the Admissions Office the pre-entrance health requirement form.
2. Have immunizations updated as necessary.
3. Students residing in the area can have their immunizations updated for the following costs at Student Health Service (ext. 88700) in the Center for Health Promotion:
 - \$ 4.00 MMR—measles (rubeola), mumps, German measles (rubella)
 - 10.00 PPD (TB) skin test

- \$10.00 **Tetanus/Diphtheria booster**
- 105.00 **Hepatitis-B vaccine** (3 @ \$35.00 ea.)*
Students who know themselves to have had hepatitis-B in the past should employ extra protection when involved in direct patient care and may request a modified curriculum if necessary.
- Chickenpox:**
If no known history of chickenpox, then student may choose *blood test* (which may reveal pre-existing immunity) and/or *immunization*.
- 40.00 Blood test for chickenpox immunity; or
- 120.00 Chickenpox immunization (if no immunity)
(2 @ \$60.00 ea.)

*The series can be completed at this University after admission, even if it was begun elsewhere. In order to avoid having a hold placed on the registration packet, students are encouraged to return the documentation forms to the Office of University Records in the provided envelope **no later than six weeks prior to the beginning of classes.**

Re-entrance

A student who discontinues a program of studies at the University must meet the entrance requirements in force at the time of re-entrance.

TRANSFER CREDIT

Applicants must file with the Office of Admissions and Records of the School of Allied Health Professions complete records of all studies taken on the high school and college levels. The University reserves the right to require of an applicant satisfactory completion of written or practical examinations in any course for which transfer credit is requested. Remedial and high school-level courses are not accepted for transfer.

Junior college

A maximum of 70 semester units or 105 quarter units of credit is accepted from accredited junior colleges. Subject and unit requirements for admission to a professional curriculum are outlined in the respective departmental sections.

International, unaccredited

Credits submitted from a college outside the United States or from an unaccredited college are evaluated on an individual basis and are recorded only after the student has earned at least 12 units of credit, with a grade point average of 2.0 or higher, at this University.

Professional

Credits earned in a professional school are accepted only from a school recognized by its regional or national accrediting association and only for a course that is essentially the equivalent of what is offered at the University or is substantially relevant to the curriculum.

Military schools

Credit for studies taken at a military service school is granted to veterans according to recommendations in the *Guide of the American Council on Education* and/or recommendation of the California Committee for the Study of Education.

CLEP

The College Level Examination Program (CLEP), a national program of credit by examination, offers persons of all ages and backgrounds new opportunities to obtain recognition for college-level achievement, no matter how acquired. Credit is granted for scores at or above the 50th percentile for the subject examinations; and at the 65th percentile for general examinations in the humanities, natural sciences, and social sciences/history. No credit is granted for the CLEP general examinations in English composition, mathematics, or science courses requiring a laboratory.

INTERNATIONAL STUDENTS

International applicants must provide suitable recommendations, give evidence of ability to meet all financial obligations, and furnish English translations of all transcripts. Regardless of nationality or citizenship, an applicant whose native language is not English is required to pass the Michigan Test of English Language Proficiency (MTELP), or the Test of English as a Foreign Language (TOEFL) and the Test of Written English (TWE); or their equivalents. Prior to admission, all of the School's professional programs require any applicant whose native language is not English to pass the Test of Spoken English-A. If satisfactory results are not achieved on all of the tests, remedial course work should be taken and the appropriate test repeated until a satisfactory grade is achieved. A personal interview is also encouraged to verify acceptable verbal and written skills. An applicant must successfully pass all components of this process prior to acceptance into a professional program.

The MTELP requirements are as follows: undergraduate, a score at the 90th percentile; graduate (humanities and social sciences), 90th percentile or above; graduate (science), 85th percentile or above; professional graduate, 90th percentile or above. A minimum score is 550 (paper based) or 213 (computer based) on TOEFL.

Applicants with scores below 550 (paper based) or 213 (computer based) on TOEFL must complete an English-as-a-second-language program before enrolling in the professional program.

Foreign transcripts

Foreign transcripts must be sent to an approved evaluation center of the National Association of Credential Evaluation Services, Inc. Results must be sent directly from the center to Loma Linda University, School of Allied Health Professions.

Study load

A person entering the United States on a student visa (F-1) must carry successfully a full study load during each quarter of each academic year (12 units for the undergraduate, 8 units for the graduate student).

Finances, employment

The applicant must be prepared to provide an advance deposit, as required by the University, and must give assurance that additional funds will be forthcoming to meet school expenses. Scholarships and assistantships available to international students are scarce, and employment is limited by regulations of the Immigration and Naturalization Service to no more than twenty hours per week.

Exchange visitor

Through the U. S. Information Agency, the University has a program for exchange visitors. A person entering the United States on an exchange visitor visa (J-1) is subject to the same regulations of study load and work limitations as is the F-1 student. Further information may be obtained

from the international student adviser in the Student Affairs Office.

Visa forms

The international student adviser in the Student Affairs Office will provide visa forms for either the F-1 or the J-1 status after the applicant's acceptance and after financial arrangements have been made.

EXTENDED-CAMPUS PROGRAM

The School currently operates extended-campus programs. The master's degrees in occupational therapy and in physical therapy are offered in Mayaguez, Puerto Rico. A B.S. degree in health science is offered in Yokkichi, Japan. An A.S. degree in occupational therapy assistant and a B.S. degree in emergency medical care and in radiation technology are offered in Fresno, California.

Probably the first staff any applicant to the School of Allied Health Professions sees are Office of Admissions personnel: (left to right) Shirley Sing, Leah Natividad-Beck, Helen Greenwood (director), Kay Ceithamer, and Valerie Nusantara.

Student Life

The information on student life contained in this BULLETIN is brief. The *Student Handbook* more comprehensively addresses University and School expectations, regulations, and policies and is available to each registered student. Students need to familiarize themselves with the contents of the *Student Handbook*. Additional information regarding policies specific to a particular school or program within the University is available from the respective School.

FROM UNIVERSITY TO STUDENT

Loma Linda University was established to provide education in a distinctively Christian environment. Students are expected to respect the standards and ideals of the Seventh-day Adventist church. Prospective students have the freedom to choose or reject University or School standards, but the decision must be made before enrollment. Application to and enrollment in the University constitute the student's commitment to honor and abide by the academic and social practices and regulations stated in announcements, bulletins, handbooks, and other published materials; and to maintain a manner that is mature and compatible with the University's function as an institution of higher learning.

It is inevitable that the student will come under question if:

- his/her academic performance is below standard;
- s/he neglects other student duties;
- his/her social conduct is unbecoming; or
- his/her attitudes demonstrate deficiencies such as poor judgment, moral inadequacy, or other forms of immaturity.

Procedures for evaluation of student academic and nonacademic performance—as well as for the student to exercise his/her right of appeal—are described in each School's section of the *Student Handbook*. Grievances regarding both academic and nonacademic matters must be processed in accordance with the grievance procedures set forth in the *Student Handbook*. Subsequent to a student's filing an appeal or grievance, the faculty assesses the student's fitness for a career in the chosen profession and recommends to the dean appropriate action regarding the student's continuance or discontinuance.

Prospective students who have questions concerning the University's expectations should seek specific information prior to enrollment.

WHOLE-PERSON HEALTH

The University regards the student from a cosmopolitan and comprehensive point of view—

- cosmopolitan, in that historically the University's global mission has promoted bonds and opportunities in education and service without regard to sex, national or racial origin, or geographical origin; and
- comprehensive, in that the University's concern for the welfare of the student traditionally has been an integrated concern for assisting the student in balanced development.

Loma Linda University offers opportunities for students to complement their formal learning through participation in a wide variety of recreational, cultural, and other activities which can enrich their group interaction and leadership experiences, increase their interests in fields outside their profession, develop their talents, and enhance wholesome and memorable association with others.

Students from all schools of Loma Linda University may congregate and participate in the multifaceted programs offered that involve the holistic concept of social, intellectual, physical, emotional, and spiritual wellness. These programs support Loma Linda University's motto, "To make man whole."

SPIRITUAL HEALTH

Opportunities for personal development and spiritual enrichment are provided in the regular schedule of religious exercises and activities and in informal association with others who cherish spiritual values.

SOCIAL HEALTH

Situated within easy access of the ocean, mountains, and desert, the University provides numerous opportunities for social and recreational activities. A variety of University-, School-, and group-sponsored events encourage students to relax and become better acquainted with one another.

PHYSICAL HEALTH

The University promotes physical fitness by encouraging recreational interests and by providing courses in field exercises, body building, and health instruction. An effort is made to interest each student in some recreational and health-building activity that may be carried over to enhance future life.

The Drayson Center

The Drayson Center, Loma Linda University's recreation and wellness center, provides state-of-the-art fitness facilities. The center includes a

21,000-square-foot multipurpose gymnasium, which may accommodate three full-size basketball courts or five volleyball courts or nine badminton courts. Circling the gymnasium's inside perimeter is a three-lane, elevated, rubberized running track. The facility also includes five racquetball courts with viewing areas, and fully equipped men's and women's locker rooms. Aerobics studios and cardiovascular and fitness areas are equipped for strength training, sports conditioning, body building, and power lifting. A large, ten-lane lap pool is designed to accommodate scuba diving classes. A 22-foot-high, 150-foot water slide ends in the nearby recreational pool. This shallow pool is wheelchair accessible. An outdoor jacuzzi is also available as well as indoor saunas in the men's and women's locker rooms. Included in the complex are a lighted, six-court tennis facility; a 400,000-square-foot multi-use recreational area with four softball fields; a half-mile-long track; and picnic and game areas.

The Drayson Center offers lifetime leisure classes (noncredit), such as low- and high-impact aerobics, scuba diving, tennis, weight training, karate, Tai-chi, and wilderness survival. Physical assessments are also available.

UNIVERSITY STUDENT/FAMILY COUNSELING CENTER

The University Counseling Center offers a variety of confidential services to students and their families, including: individual, premarital, marital, family, and group counseling regarding issues of adjustment, anxiety, depression, etc.; skills in time management, studying, and test-taking; and 24-hour emergency crisis intervention. The center is located at 11374 Mountain View Avenue, Loma Linda. Full-time students may receive up to nine free visits. Call 909/558-4505 (or, on campus: 66028) to schedule an appointment or for more information.

STUDENT ASSISTANCE PROGRAM

The Loma Linda Student Assistance Program (LLSAP) provides professional and caring assessment and treatment for a variety of personal, family, work, and school-related issues. LLSAP clinicians will develop a treatment plan that may include free short-term counseling. If more extensive treatment is appropriate, clients are referred to a community therapist who specializes in the student's area of concern and who is covered by the student's health plan. All information is confidential. LLSAP clinicians will not release information without the written consent of the student, with the exception of matters that fall under mandatory reporting laws.

LLSAP, the only nationally accredited student assistance program in California, has provided state-of-the-art services to students since it was established in 1990.

Appointments may be scheduled during office hours: Monday through Wednesday 8 a.m.-5 p.m.; Thursday 8 a.m.-8 p.m.; Friday 8 a.m.-1 p.m. Additional appointments times may be available upon request.

All LLSAP services are free of charge.

TEACHING LEARNING CENTER

Academic life at this University is rigorous, and inefficient study skills can add to the stress and strain. The Teaching Learning Center works with students to develop the reading, writing, analytical, and study skills needed to succeed in professional education. The center offers three ABL programs that will help students face academic challenges by:

- A ssessing learning style and reading skills.
- B reaking through in reading speed and comprehension.
- L earning analytical and memory techniques and skills.
- E nhancing ability to take tests and examinations.

If a student is having scholastic difficulties, the center will assess the student and tailor a program designed to increase and/or improve his/her reading speed and comprehension, writing clarity, analytical abilities, and other study skills—using the student's own course materials.

The center is located on campus in Evans Hall, Room 207. There is no charge to the student for assessment and evaluation. The regular student tuition package does not include the TLC tuition. However, TLC tuition is lower than regular tuition. For additional information, please call 909/558-8625.

THE STUDENT HEALTH PLAN

Because the health, vitality, and welfare of its students and their dependents are of major concern to the University, Loma Linda University sponsors and funds the Student Health Plan, a health care plan that provides health service and medical coverage to all eligible students. It includes the following benefits: Student Health Service, 24-hour coverage, and generous coverage through preferred providers. The Student Health Plan provides a broad range of medical coverage but does not provide dental or vision coverage.

Student Health Service

Professional services are rendered by the Student Health Service, which provides basic care to students. The Student Health Service is located in the Center for Health Promotion in Evans Hall, corner of Stewart and Anderson streets. The hours are 8 A.M.–5 P.M. Monday through Thursday and 8 A.M.–2 P.M. on Friday.

Supplementary medical-coverage policy

The Student Health Plan is an “excess” policy and only supplements other medical plans that provide benefits to the student. The student first

obtains direct-provider payment, or reimbursement for out-of-pocket payments, from all other medical plans that provide benefits for the student; only then does the student submit bills to the Student Health Plan for any remaining balance not covered by the other plans. The student must, therefore, follow all rules of his/her primary insurance in obtaining medical treatment. The student should contact the primary carrier to determine what procedure to follow.

Eligibility

The Student Health Plan automatically covers all full-time students at Loma Linda University in any clinical or academic program. Students are covered when enrolled for 7 units or more per quarter (or clock-hour equivalent, as defined by each School) for which Loma Linda University is receiving tuition and applicable fees (excluding load validation, “in progress” [IP] units, “employee tuition benefit” units, and “audit” units). Students enrolled for field practicum are eligible for coverage if registered for at least 240 hours per quarter.

Coverage during clinicals/rotations

Students who are accidentally injured while performing their clinical rotation duties do not have to pay their co-payment. If a covered student is doing a school-sponsored clinical or rotation out of the area and becomes ill or injured, any health service and medical care received that is covered by the Student Health Plan will still be covered as if the student were in the Loma Linda area.

Effective coverage date

An eligible student's coverage becomes effective on the day of orientation or the first day of class. Any purchased benefits will become effective on the day the Department of Risk Management receives the health plan application and payment within the open enrollment period, which is only the first two weeks of each calendar quarter.

Buy-in provision only during open enrollment

Eligible students are themselves automatically covered by the plan; however, noneligible students—those on summer break and part-time students (e.g., in a clinical program but enrolled for fewer than 7 paid units)—may, if they wish, purchase coverage at the Department of Risk Management.

Those wishing to buy in may enroll in the Student Health Plan only during the first two weeks of each new calendar quarter, that is, during the first two weeks of January, April, July, and October.

An eligible student may buy Student Health Plan coverage benefits for his/her spouse and/or dependent child(ren). Eligible dependents are the spouse (residing with the insured student) and his/her never-married child(ren) under nineteen years of age, or never-married child(ren) under twenty-four years of age who are full-time student(s), or never-married children under twenty-seven years of age who are full-time graduate student(s).

If a new spouse or eligible dependent is added to the household of a covered student after the two-week enrollment period, then the student has a thirty-day grace period (after the wedding or after the birth, etc.) in which to buy coverage for the new spouse or new dependent; however, the coverage must be purchased for the entire quarter in which this new status occurred.

Buy-in rates per quarter are:

\$250	Part-time student
\$320	One dependent
\$600	Two or more dependents

Neither Student Finance nor the Department of Risk Management bills the student's account or sends out reminders. Funds received for buy-in coverage must be in the form of a check or money order (payable to the Department of Risk Management).

Coverage exclusion for "pre-existing" condition

If a student or patient has not maintained a continuous "creditable coverage" under another health plan during the twelve months prior to the coverage effective date, the following pre-existing-condition exclusion will apply:

This plan will not cover any medical condition, illness, or injury for which medical advice, diagnosis, care, or treatment was recommended or received by the student or patient during the six months prior to the effective date of health plan coverage. This exclusion will apply for twelve months from the student's coverage effective date, unless such an individual remains treatment free during the six-month term beginning with the effective date of coverage. If the individual remains treatment free during the six-month term, the pre-existing-condition exclusion will apply only during that six-month period. This exclusion will not apply to pregnancy-related medical expenses or to medical treatment for a newborn or adopted child.

Preferred-provider plan, prescriptions, annual term, benefit limits

The Student Health Plan is a preferred-provider plan. A list of preferred physicians and preferred medical facilities is available from Risk Management.

For local students the Student Health Plan covers only those prescriptions purchased through the Loma Linda Campus Pharmacy and/or the Loma Linda University Medical Center Pharmacy. The student co-pays \$10 for generic or \$20 for brand-name prescriptions; the Student Health Plan covers the balance for up to a thirty-day supply per prescription.

The annual benefits apply per academic year, July 1 through June 30.

The Student Health Plan will pay medical expenses incurred subject to plan parameters to an annual limit of \$100,000.

Benefits are limited by the terms and conditions set forth in the Student Health Plan booklet. The booklet is available from the Loma Linda University Department of Risk Management. For additional health plan information, phone the Department of Risk Management at 909/558-4386.

MALPRACTICE INSURANCE

Students are covered by malpractice insurance while acting within the course and scope of any approved clinical assignment. All full-time students at Loma Linda University in any clinical educational program are covered by the Student Health Plan. This plan provides coverage twenty-four hours per day while the student is enrolled at the University. The Student Health Plan waives the deductible and co-payment for accidental injury for students in clinical rotation.

GOVERNING PRACTICES

Residence hall

The School is coeducational and accepts both single and married students. Any single student who prefers to live on campus may do so.

Students are expected to live on campus unless they are:

- married,
- twenty-one years of age or older,
- in a graduate program, or
- living with their parents.

Students who wish to live off campus but who do not meet one of the foregoing requirements may petition the dean of students for an exception. This should be done well in advance of registration to allow the student adequate time to plan. Additional information about campus housing can be obtained from the University's dean of students.

The student must keep the Office of the Dean of the School informed of his or her current address and telephone number and other contact numbers.

Marriage

A student who marries or changes marital status during the academic year must give the Office of the Dean advance written notice in order to keep the School's records correct and up to date.

Professional apparel

Student uniforms are distinctive articles of dress specified by the department or School and are to be worn only in the manner prescribed and under the conditions specified. Students are to maintain their uniforms in clean, presentable condition. Information on the required professional apparel is furnished by the School.

Personal appearance

Students in the classroom or clinical environment must exhibit personal grooming consistent with expectations of the health care institution, the profession, the School, and the University. Specific guidelines are provided by the School.

Personal property

The School assumes no responsibility for the loss of the student's personal property, instruments, or other items by theft, fire, or unknown causes. The student is expected to assume responsibility for the safekeeping of personal belongings.

Cars and transportation

Students are responsible for transportation arrangements and costs for off-campus assignments and clinical affiliations. All vehicles used to transport fellow students for off-campus assignments must be registered with Campus Safety and must have adequate public liability insurance—a minimum of \$100,000 bodily injury and property damage liability.

Student identification card

All students will be assigned University ID numbers and issued student ID cards. The University student ID card will be used for library, health, and other services.

In some cases, students are also required to have Medical Center ID badges. Information regarding this requirement can be obtained from the Office of the Dean of the School.

Substance abuse

Loma Linda University is committed to providing a learning environment conducive to the fullest possible human development. Because the University holds that a lifestyle that is drug, alcohol, and tobacco free is essential for achieving this goal, it maintains policies that seek a campus environment free of these substances. Students are expected to refrain from substance abuse while enrolled at the University. Substance abuse is considered to be any use of tobacco, alcohol, prescription or nonprescription drugs, or other mood-altering substance that

impairs the appropriate functioning of the student. The School offers counseling and other redemptive programs to assist in the recovery from substance abuse. Continuation with the University will be dependent upon the abuser appropriately utilizing these programs. Failure to comply with these policies will result in discipline up to and including expulsion and, if appropriate, notification of law-enforcement agencies for prosecution.

Sexual harassment

Sexual harassment is reprehensible and will not be tolerated by the University. It subverts the mission of the University and threatens the careers, educational experience, and well-being of students, faculty, employees, and patients.

Because of the sensitive nature of situations involving sexual harassment and to assure speedy and confidential resolution of these issues, students should contact one of the School's designated, trained sexual harassment ombudspersons.

A more comprehensive statement of the policy regarding sexual harassment can be found in the University *Student Handbook*, pp. 95-99.

Dismissal, grievance

Students who are involved in dismissal proceedings or who wish to file a grievance are referred to the grievance procedure as outlined—

- in the Student Life section of this BULLETIN (see FROM UNIVERSITY TO STUDENT, par. 3);
- in the School section of the *Student Handbook*.

Employment

It is recommended that students refrain from assuming work obligations that divert time, attention, and strength from the arduous task of training in their chosen career. A student wishing to work during the school year may petition for permission from the Office of the Dean. The decision of the Office of the Dean regarding such an employment request will be based on grades, class load, health, and School policy.

Policies and General Regulations

Students of the School of Allied Health Professions are responsible for informing themselves of and satisfactorily meeting the policies and regulations pertinent to registration, matriculation, and graduation.

ACADEMIC AUTHORITY

The Office of the Dean is the final authority in all academic matters, with the exception of General Education requirements, and is charged with the interpretation and enforcement of academic requirements. Any exceptions or changes in academic requirements, graduation requirements, or grades are not valid unless approved by the dean. Any actions taken by individual faculty members with regard to these matters are advisory only and are not binding on the School or the University unless approved by the dean.

ACADEMIC INTEGRITY

Acts of dishonesty—such as but not limited to theft; plagiarism; knowingly giving, obtaining, or falsifying information during examinations or other academic or professional practice assignments—can be cause for dismissal from the School. Instructors and students are charged with the responsibility of reporting instances of such behavior to the department chair for investigation. Substantiated violations are to be brought before the dean for disciplinary action.

The minimum disciplinary actions to be taken for plagiarism include:

- first offense—a failing grade on the assignment;
- second offense—failure in the course without possibility of withdrawal.

Cheating will result in failure in the course without possibility of withdrawal and may result in dismissal from the program.

REGISTRATION AND ATTENDANCE

Registration

The student must register on the dates designated in the *Loma Linda University Course Schedule and Registration Instruction* booklet published each quarter, as well as on dates designated in the quarterly Student Information Sheet available from the Office of University Records. Autumn Quarter registration procedure includes recording information on forms furnished by the Office of University Records, clearing financial arrangements with the Student Accounting Office, and having a student identification picture taken.

A late-registration period of five days is provided to accommodate students who have been unable to return to campus by the beginning of the term. A late-registration fee of \$50 will be

charged during this period. The student may not attend class without being registered.

Course changes

A student may add courses that follow the general University calendar during the first seven calendar days of the quarter. Courses that follow the general University calendar may be dropped during the first fourteen days of the quarter without academic or financial penalty. Course changes after the fourteenth day of the quarter affect the permanent grade record. A Change of Program form must be filed.

Withdrawal from school

A student who withdraws from a program of study must file a Withdrawal from All Classes form. Tuition is refunded according to the practice outlined in the Financial Information section of this BULLETIN.

Study load

Usually an academic study load is defined in terms of credit units. A full undergraduate load is considered to be 12 or more units per quarter; a full graduate load is considered to be 8 units per quarter. Professional programs, however, require considerable clinical experience, for which only partial academic credit is given at times. Consequently, a full study load often is not reflected by the number of academic credit units carried.

To be considered a full-time student, an undergraduate student must be registered for at least 12 units of course work per quarter, and a graduate student must be registered for at least 8 units. A registration of 400 clock hours per quarter is also considered to be full-time for any student. This is based on forty hours per week for a ten-week quarter.

The normal course load, including all course work for which a student may be registered at this or another institution, is 16 quarter units for an undergraduate student and 12 quarter units for a graduate student. Full-time study loads are those specified by the departments for each program. Students of exceptional ability may register for additional course work upon recommendation of the department and consent of the dean.

Correspondence, extension, independent study, and course work taken at any other institution constitute part of the student's study load. Only courses taken at La Sierra University **through cross-institution registration** will count in the student's total load for financial aid and loan deferment purposes.

A person who is not enrolled in regular classes but who is occupied in research, dissertation, or thesis, is classified as a student. By filing an Academic Load Validation form every quarter at registration, the academic load may be validated for loan deferment and immigration purposes. The student must be carrying IP (in progress) units or registered for a minimum of 1 new unit of research, dissertation, or thesis for the quarter. The academic work load is counted as follows:

- full load—minimum of 36 clock hours/week
- three-quarter load—minimum of 27 clock hours/week
- one-half load—minimum of 18 clock hours/week
- one-quarter load—minimum of 9 clock hours/week.

A student may simultaneously earn more than one baccalaureate degree, provided there is a minimum of 20 units unique to each degree and provided all other degree requirements are met.

Graduate-level courses

Seniors who meet prerequisites may, with approval of the instructor and consent of the dean of the School of Allied Health Professions and the dean of the school offering the course, enroll for a limited number of graduate-level courses (500-level or above). Only with special permission may credit be applied to the undergraduate degree, in which case the credit will not apply toward a graduate degree.

Attendance

Regular attendance at all appointments (class, clinical, laboratory, special assignment, chapel) is required beginning with the first day of each term. Voluntary absences from laboratory assignments are not permitted.

Special examination

It is expected that the student will take quizzes and examinations at the regularly scheduled time. To take an examination at a time other than when it is scheduled, the student must secure the consent of the instructor and the chair of the department and must file with the instructor a permit obtained from the Office of the Dean. A fee is charged for a special examination. (See the Schedule of Charges in the Financial Information section of this BULLETIN.)

Academic residence

In order to graduate from Loma Linda University with the bachelor's degree, a student must complete at least 32 of the last 48 units, or a minimum of 45 total units of course work, at this University. A minimum grade of C (2.0) or better is required for all B.S. and postbaccalaureate degrees.

Leave of absence

A student who requires a temporary discontinuance of studies must request in writing a leave of absence after one quarter's absence. The maximum term for a leave is one year. A student

who is not registered after one quarter's absence (summer excluded in most cases) and has not requested a leave of absence will be considered no longer in the program. In this case the student who seeks re-entry must meet the entrance requirements in force at the time of re-entrance and will enter under the new BULLETIN.

SPECIAL COURSE WORK / CREDIT

Correspondence

As a general rule, the student may not register for a correspondence course that duplicates a course offered at the University. If the student is a candidate for graduation, the course must be completed a month before graduation. Information and application forms for Griggs University Home Study International (the Seventh-day Adventist correspondence school) in Washington, D.C., may be obtained at the Office of University Records.

Extension study

To be acceptable for credit, an extension course must be evaluated as to its equivalence to an accepted course. Registration for it requires the approval of the department chair and the consent of the dean.

Independent study

Independent study may be undertaken subject to the consent of the department chair. The student is responsible for the completion of the Directed/Independent Study Title Request form in addition to the regular registration. Credit is normally limited to 2 units during the program of study. Under special circumstances, more than 2 units may be taken. The work is to be completed in adequate time before graduation to allow recording in the Office of University Records.

Waiver/Equivalency

A requirement may sometimes be waived on the basis of prior course work, experience, or licensure. If certain conditions are met, credit may be given. In either case, an examination may be required.

An examination in a given subject may be taken only once. The grade for any credit granted is recorded as an S after the student has earned at least 12 units of acceptable credit at this University. Credit cannot be earned in this way to make up for a course in which an unsatisfactory grade was received. All examinations must be taken before the last quarter of the program of study.

Requests are made to the dean on the Petition to Obtain Credit by Examination form. There is a fee for an examination. (See Schedule of Charges in the Financial Information section of this BULLETIN.)

REGISTRATION CLASSIFICATIONS

Regular

A regular student has satisfied all entrance requirements and is registered for a standard course of study leading toward a degree or certificate in one of the schools of the University.

Provisional

An applicant who is accepted for entrance into a School of Allied Health Professions program and permitted to remove quantitative and/or qualitative deficiencies in order to qualify for regular standing is classified as a provisional student during the transition period.

Probational

A student whose academic and/or clinical performance does not meet the minimum standards of the program in which s/he is enrolled is classified as a probational student.

Special

A qualified individual who may enroll for selected courses is classified as a special student. Consent for enrollment as a special student is granted by the department, with the endorsement of the dean, and is subject to classroom and laboratory space. Tuition is paid at the applicable rate.

Audit

Certain courses (excluding laboratory courses) may be audited. Consent for enrollment as an auditor is granted by the department, with the endorsement of the dean, and is subject to classroom space. Change of classification from audit to credit or from credit to audit may be done only during the first seven calendar days of the quarter for courses following the general University calendar. For other courses, the change may be made with the consent of the dean. (For tuition rates, see the Schedule of Charges in the Financial Information section of this BULLETIN.)

Academic standing

A student's standing in the School is classified either as regular standing or academic probation, depending on his/her scholastic performance.

Student level

Students enrolled in a professional program in which they are classified as freshman, sophomore, junior, or senior will be classified according to the level of the course work they are taking (e.g., a student with a previous baccalaureate degree pursuing a degree in nursing will be classified as a sophomore while taking sophomore-level courses, etc.).

Students enrolled in block programs are classified according to the level of the block in which they are enrolled (e.g., master's—1st, 2nd, or 3rd year; certificate—1st, 2nd, or 3rd year; as well as freshman, sophomore, junior, senior, as is appropriate for the degree program.)

SCHOLASTIC STANDING

Grades and grade points

The following grades and grade points are used in this University. Each course taught in this School has been approved for either a letter grade or an S/U grade, and deviations from this are not allowed.

A	4.0	Outstanding performance.
A-	3.7	
B+	3.3	

B	3.0	Very good performance for undergraduate credit; satisfactory performance for graduate credit.
B-	2.7	
C+	2.3	
C	2.0	Satisfactory performance for undergraduate credit.
C-	1.7	Unsatisfactory performance for nursing courses and named cognates.
D+	1.3	
D	1.0	Minimum performance for which undergraduate credit is granted.
F	0.0	Failure, given for not meeting minimal performance.
S	none	Satisfactory performance, counted toward graduation. Equivalent to a C grade or better in undergraduate courses, or a B grade or better in graduate courses. An S grade is not computed in the grade point average. A student may request a grade of S in only a limited amount of course work as determined by the school. This is done by the student's filing with the Office of University Records the appropriate form prior to fourteen calendar days before the final examination week. Once filed, the grade is not subject to change.
U	none	Unsatisfactory performance, given only when performance for an S-specified course falls below a C grade level in an undergraduate course or a B grade level in a graduate course. Similar filing procedures as given above are required. The U grade is not computed in the grade point average.
S/N	none	Satisfactory performance in a clock-hour course. Not included in total units. Same grading criteria as the S grade given for a credit hour course.
U/N	none	Unsatisfactory performance in a clock-hour course. Not included in total units. Same grading criteria as the U grade given for a credit hour course.
CR	none	Credit earned for Credit by Examination. Counted toward graduation/units earned, but not units attempted. Such credit cannot be counted for financial aid purposes.
NC	none	No credit for unsatisfactory performance for a Credit by Examination. Does not count for any purpose.

Notations

- W** Withdrawal, given for withdrawal from a course prior to fourteen calendar days before the final examination week. Withdrawals during the first fourteen calendar days of a quarter or the first seven calendar days of a summer session are not recorded if the student files with the Office of University Records the appropriate form prior to the cut-off date. Withdrawals outside this time frame, upon recommendation of the dean, may be removed at the discretion of the vice president for academic affairs. In the case of nontraditionally scheduled courses, W will be given for withdrawal from a course prior to completion of 80 percent of the course, excluding the final examination period. Withdrawals during the first 20 percent of a course, excluding the final examination period, are not recorded if the student files with the Office of University Records the appropriate form prior to the date when this 20 percent of the course is completed.
- UW** Unofficial Withdrawal, indicates that the student discontinued class attendance after the close of registration but failed to withdraw officially.
- I** Incomplete, given when the majority of the course work has been completed and circumstances beyond a student's control result in the student being unable to complete the quarter. An I notation may be changed to a grade only by the instructor before the end of the following term (excluding the summer sessions for those not in attendance during that term). Incomplete units are not calculated in the grade point average. By the use of the petition form, the student requests an I notation from the instructor, stating the reason for the request and obtaining the signatures of the instructor, the department chair, and the associate dean. The form is left with the instructor. The instructor will then report the I notation on the grade-report form, as well as the grade which the student will receive if the deficiency is not removed within the time limit. The petition form is then filed with the Office of University Records along with the grade-report form.
- IP** In Progress, indicating that the course has a duration of more than a single term and will be completed by the student no later than the final term of the course, not to exceed five quarters for independent study and research courses (original quarter of registration plus four additional quarters). The student's final grade will be reported on the instructor's grade report at the end

of the term in which the course is completed. If the course work is not completed within the five-quarter time limit, a grade of U will be given.

- AU** Audit, indicating registration for attendance only, with 80 percent class attendance considered a requirement. A request to change a credit course to audit or an audit course to credit may be made no later than the fourteenth calendar day after the beginning of a quarter or the seventh calendar day after the beginning of the summer session. (This does not address short summer courses lasting only a week or two.)
- AUW** Audit Withdrawal, given for withdrawing from the course or to indicate that the 80 percent class attendance requirement was not observed.

Repeating

A student who receives an unsatisfactory grade in a required course and is required by the faculty to do additional work may pursue, on the recommendation of the chair of the department and the consent of the dean, one of the following plans. In either plan the student must register and pay the applicable tuition.

1. Review the course work under supervision and take a make-up examination (usually not given before a minimum of two weeks of study). A passing grade resulting from a repeat examination will be limited to a C (2.0). (See the Schedule of Charges in the Financial Information section of this BULLETIN for the tuition rate for tutorial course work.)
2. Repeat the course, attend class and/or laboratory, and take the final course examination. Full tuition will be charged whether regular or occasional attendance is required. (See the Schedule of Charges in the Financial Information section of this BULLETIN for the tuition rate.)

A student who receives an unsatisfactory grade in a required clinical experience course and is required by the faculty to do additional work must reregister and pay the applicable fee. (See the Schedule of Charges in the Financial Information section of this BULLETIN for the fee for repeat of clinical experience.)

Both the original and repeat grades are entered in the student's permanent academic record, but only the repeat grade is computed in the grade point average. A course may be repeated only one time.

Promotion and probation

Each student's record is reviewed quarterly by the faculty. Promotion is contingent on satisfactory academic and professional performance and on factors related to aptitude, proficiency, and responsiveness to the established aims of the School and

of the profession. As an indication of satisfactory academic performance, the student is expected to maintain the following grade point average:

- | | |
|-----|---|
| 2.0 | Associate and baccalaureate degree programs |
| 2.5 | Master's degree program |
| 3.0 | Doctoral degree program |

A student whose grade point average in any term falls below the minimum required for the degree, or who receives in any professional or required course a grade less than a C (2.0), or whose clinical performance is unsatisfactory is automatically placed on academic probation. Continued enrollment is subject to the recommendation of the department. If continued enrollment is not recommended, the case is referred to the Administrative Council of the School for final action.

If continued enrollment is recommended, the student will be required to institute a learning assistance plan within the first two weeks of the following quarter and meet regularly scheduled appointments with the academic adviser. The learning assistance plan should: identify the problem, identify and list the goals, state the time frame, and include student and adviser signatures and date.

A student who is on academic probation and fails to make the minimum required grade point average the following quarter or fails to have an overall minimum grade point average after two quarters will have disqualified him-/herself from the program.

Standard of student progress (time framework)

Students must complete their degree programs within the following maximum time frameworks from their initial enrollment in the program:

- | | |
|-----------------|---------|
| A.S. degree | 3 years |
| B.S. degree | 5 years |
| Master's degree | 5 years |
| Doctoral degree | 7 years |

Dismissal, grievance

A student who is involved in dismissal proceedings or who has an academic or clinical grievance may proceed as follows:

1. The student should first discuss the problem or grievance with the instructor. If, following discussion with the instructor, the student is not satisfied and continues to believe that s/he has not been dealt with fairly, the student may discuss the grievance with the chair of the department or with the program director involved.
2. If the matter is not resolved at this level, the student has recourse to the Office of the Dean.
3. As a final appeal, the student may request the dean to appoint a faculty review committee to evaluate the situation and make a recommendation to the dean. This request should be presented in writing and include pertinent information regarding the situation. The student may request to meet with the review committee for discussion of the case. The

student must file for the grievance proceeding within one quarter following the alleged grievance. A grievance is ineligible for review if not filed within this time frame.

GRADUATION REQUIREMENTS

A candidate for a degree shall have met the following conditions:

1. Completed all requirements for admission to the respective program, as well as all General Education requirements of the University.
2. Completed all requirements of the program, including specified attendance, level of scholarship, and number of credit units.
3. Completed a minimum of 96 quarter units for the associate degree or 192 quarter units for the baccalaureate degree, with a minimum grade point average of 2.0 (2.5 for the Master of Physical Therapy degree) and with no grade less than C (2.0).
4. Given evidence of moral character, of due regard for Christian citizenship, and of consistent responsiveness to the established aims of the University and of the respective discipline.
5. Discharged financial obligations to the University.

GRADUATION CEREMONIES

Graduation events include formal ceremonies identified as conferring of degrees, awarding of diplomas, and recognition of candidates for degrees. Other related graduation events include the baccalaureate and vesper services. The conferring of degrees ceremony(ies) occurs at the close of the Spring Quarter and includes an academic procession, the formal conferring of degrees by the president, and the presentation of diplomas by the dean of the school. Candidates who complete the requirements for degrees and certificates are invited, with families and friends, to attend and participate in these colorful events.

To be eligible to participate in graduation events, candidates must have completed all requirements for the degree, including prerequisites/corequisites, as specified by the School. In certain degree programs, upon authorization of the dean, exceptions will be made for candidates who:

- have only clinical experience requirements to complete and can project completion by the end of the calendar year;
- can complete remaining degree requirements by the end of the Summer Quarter; or
- are in a block program.

The course work may not exceed 8 units for graduate students or 12 units for undergraduate students.

A student who completes the requirements for a degree or certificate (other than clinical experience) at the end of the Summer, Autumn, or Winter Quarter is invited to participate in the subsequent June commencement events. The official date of graduation on the diploma is ordinarily the last day of the term in which the requirements for a degree are completed.

Superior academic performance and achievement in scholarship and leadership are recognized in the printed graduation program. Superior academic performance is recognized for persons who complete their baccalaureate degree and who at the end of the quarter preceding their final term have acquired a cumulative grade point average for all college work (includes course work taken at other colleges/universities, except for remedial courses) as follows:

3.5	Graduation cum laude
3.8	Graduation magna cum laude
3.9	Graduation summa cum laude

Although the official commencement program indicates names of graduates who qualify for honors on the basis of their grade point average as of the end of the quarter preceding their final term, the subsequently issued diploma and transcript may indicate graduation with honors if the student's final quarter's record has increased the grade point average sufficiently to qualify for honors at that time.

TRANSCRIPTS OF CREDIT

The University provides transcripts to other institutions or to the student or graduate only on the written request of the student or graduate (\$2 per copy). Transcripts, statements of completion, diplomas, and certificates are issued only when financial obligations to the University have been met.

AWARDS AND SCHOLARSHIPS

Awards for scholastic attainment and leadership ability have been made available to students whose performance and attitudes reflect well the ideals and purposes of the School.

CARDIOPULMONARY SCIENCES

The **Robert Calhoon Memorial Award** is given to a student who demonstrates exceptional clinical skills and knowledge in the care of respiratory patients.

The **Lou Jezerinac Cardiopulmonary Scholarship Award** is given to a student whose patient care exemplifies the qualities of compassion and dedication.

The **Faculty Award** is presented to a student who has shown promise of outstanding professional achievement and whose performance is in harmony with the objectives and goals of the University.

The **Chair's Scholarship Award** is given for highest scholastic attainment in professional studies and performance in the Christian context.

CLINICAL LABORATORY SCIENCES

The **Chair's Scholarship Award** is given to a senior medical technology student and to a cytotechnology student in recognition of outstanding scholarship and leadership qualities that are in harmony with the objectives and goals of the University. Selection is based on the recommendation of the faculty.

The **Faculty Award** is presented to a senior medical technology student and to a cytotechnology student who have shown promise of outstanding professional achievement and whose intent it is to pursue a career in the area of medical technology or cytotechnology. Selection is based on recommendation of the faculty.

The **Robert and Jaqueline Moncrieff Scholarship Award** is presented annually to a medical technology student who has demonstrated superior scholarship; professional dedication; financial need; and such personal attributes as dependability, integrity, and initiative.

The **Walsch-Loock Scholarship Award** is presented annually to a medical technology student on the basis of scholarship, promise of professional achievement, and financial need.

HEALTH INFORMATION MANAGEMENT

In the interest of promoting student involvement in the international mission of Loma Linda University, the **Audrey Shaffer Endowment** provides travel expenses for student clinical and affiliation experiences in health care facilities outside the United States. Candidates must demonstrate academic excellence and leadership qualities. Recommendations from department faculty and students are required.

The **Faculty Award** is presented to students who have shown promise of leadership, scholarship, and potential contribution to their chosen profession. One award is given annually to students graduating from the programs in health information administration and health information systems.

The **Health Information Management Student Awards** are given by classmates to the graduating students who have shown promise of leadership, scholarship, and potential contribution to their chosen profession. One award is given annually to students graduating from the programs in health information administration and health information systems..

The **Margaret B. Jackson Scholarship Award** is presented by the department to a senior on the basis of scholarship, promise of outstanding professional achievement, and financial need.

The **Smart Corporation Scholarship Award** is presented to a student in the Health Information Administration Program on the basis of scholarship and financial need.

The **Sally Jo Davidson Scholarship** is presented to a student who demonstrates professionalism, leadership potential, scholastic achievement, and financial need. Preference is given to single mothers returning to college.

NUTRITION AND DIETETICS

The **Ruth Little Nelson Scholarship Award** is presented to selected students in the junior year. Selection is based on scholarship; leadership; financial need; and such personal attributes as integrity, dependability, and initiative.

The **Lydia Sonnenberg Scholarship Award** is presented annually to selected junior students. Selection is based on academic performance as well as demonstrated skill and interest in publishing nutrition information for the public.

The **Fred Lambert Memorial Scholarship Award** is given annually to a junior who has demonstrated outstanding potential for success as an administrative dietitian. The award will be given based on academic success, involvement in social and professional activities, personal promotion of the profession and image of the administrative dietitian, and submission of an essay discussing how the food-service administrator can contribute to the mission of the Seventh-day Adventist church.

The **Kathleen Keen Zolber Scholarship Award** is given by the department to selected juniors in recognition of scholarship and promise of outstanding professional achievement.

The **Nutrition and Dietetics Alumni Association Scholarship Award** is given annually to a senior student who has demonstrated outstanding academic performance and promise of expertise in professional achievement.

The **Nutrition and Dietetics Faculty Award**, presented to selected junior students, is based on scholarship, promise of professional achievement, and demonstrated financial need.

The **Martha Miller Scholarship Award** is given annually to a sophomore or junior student in the Autumn Quarter and is based on scholarship, demonstrated financial need, and promise of outstanding professional achievement.

OCCUPATIONAL THERAPY

The **Faculty Award** is presented to a senior occupational therapy student and to an occupational therapy assistant student who have shown promise of outstanding professional achievement and whose performance is in harmony with the objectives of the University.

The **Inland Counties Occupational Therapy Association of California Award** is presented to senior occupational therapy and occupational therapy assistant students in recognition of excellent academic and clinical performance.

The **Occupational Therapy Alumni Association Award** recognizes outstanding scholastic and professional achievement in occupational therapy. The award is presented to a senior occupational therapy student and an occupational therapy assistant student.

The **Southern California Consultants Scholarship Award**, presented annually to two occupational therapy assistant students, is based on scholastic achievement and financial need.

PHYSICAL THERAPY

The **Faculty Award** is presented to a senior who has shown promise of outstanding professional achievement and whose performance is in harmony with the objectives and goals of the University.

The **Fred B. Moor Award** is presented to a senior who has demonstrated exceptional clinical skills and knowledge in the care of physical therapy patients.

The **Physical Therapy Alumni Association Achievement Award** recognizes outstanding scholastic attainment and active participation in physical therapy student activities and community involvement.

The **Physical Therapy Alumni Association Scholarship Award** recognizes the student with the highest scholastic attainment in professional studies.

The **Thomas G. Burke Memorial Scholarship Award** recognizes the outstanding student in the pursuit of and dedication to a second career.

RADIATION TECHNOLOGY

The **Walter L. Stilson Award** is given to a student in each clinical facility who has shown promise of outstanding professional achievement and whose performance is in harmony with the objectives of the University.

The **Faculty Award** is given by the department in recognition of superior scholarship.

SPEECH-LANGUAGE PATHOLOGY AND AUDIOLOGY

The **Outstanding Senior Award** is given to a student who has performed well academically, developed good clinical skills, and contributed to creating a positive learning environment within the department.

The **Evelyn Britt Promising Student Award** is presented to students preparing for graduate work in speech-language pathology and audiology. It recognizes students who show promise of scholastic and professional achievement.

DEAN'S AWARD

The **Dean's Award** is made annually in recognition of academic excellence and commitment to the objectives of the School.

CHANCELLOR'S AWARD

The **Chancellor's Award**, established in 1960, is made annually in recognition of superior scholastic attainment and active participation in the student community, within the framework of Christian commitment. A recipient is selected from each school of the University.

Financial Information

The Office of the Dean is the final authority in all financial matters and is charged with the interpretation of all financial policies. Any exceptions to published policy in regard to reduction or reimbursement of tuition must be approved by the dean. Any statement by individual faculty members, program directors, or department chairs in regard to these matters is not binding on the School or the University unless approved by the dean.

GENERAL PRACTICES

The student is expected to arrange for financial resources to cover all expenses before the beginning of each school year. Accounts with other schools or with this University must be settled prior to registration.

Advance payment and refunds

Tuition and fees are payable in full at the beginning of each term. If the student withdraws from a course or all courses up to the 60 percent point (in time) of the quarter, tuition will be refunded on a pro-rata basis with refunds of not less than the portion of tuition assessed equal to the remaining portion of the enrollment period as of the last day of attendance (rounded down to the nearest 10 percent of that period.)

To withdraw from a course(s), the student must complete a Change of Program form; or a Total Withdrawal form to completely withdraw from School. The date the properly completed form is submitted to the Office of University Records will be the date of withdrawal used in calculating tuition refunds. These forms should be completed and submitted on the last day of class attended.

Monthly statement

The monthly statement is sent to the student. The student may request that an additional statement copy be sent to a parent or sponsor monthly. The amount of the monthly statement is due and payable in full within thirty days after presentation. An account that is more than thirty days past due is subject to a service charge of .833 percent per month (10 percent per year). Failure to pay scheduled charges or to make proper arrangements, which is reported to the Office of the Dean, may cause the student to be considered absent/discontinued or ineligible to take final examinations.

Financial clearance

The student is expected to keep a clear financial status at all times. Financial clearance must be obtained—

- each term;
- before receiving a certificate or diploma;
- before requesting a transcript, statement of completion, or other certification to be issued to any person, organization, or professional board.

To obtain financial clearance from the Student Finance Office, the student must have a zero (-0-) balance due on account. To obtain financial clearance from the Student Loan Collection Office, the student must be current on all loan-account payments and must have fully completed a loan exit interview after having ceased to be enrolled for at least half time.

Checks

Checks should be made payable to Loma Linda University and should indicate the student's social security number to ensure that the correct account is credited.

Acceptance deposit

Upon notification of acceptance, the applicant makes a deposit with the Office of Admissions and Records in order to hold a place in the class. This amount is deducted from the tuition and fees due at the initial registration. The deposit is nonrefundable.

Room and key deposit

Residence hall room and key deposits are required by the residence hall dean and must be forfeited after August 15 if occupancy does not follow for the Autumn Quarter. At the close of the term of residence, both the room deposit and the key deposit are refunded after the dean's inspection and clearance and the student's return of the key.

International students

International students must be prepared to provide an advance deposit as required by the University and must provide documentation that additional funds will be forthcoming to meet school expenses. The deposit will be held by the University during the program of study and will be applied to the last quarter's tuition charge.

Scholarships and assistantships for international students are scarce, and employment is limited by regulations of the Immigration and Naturalization Service to no more than twenty hours per week. Unless special permission is given by immigration authorities, international students are restricted to employment on campus.

Veteran's educational benefits eligibility

If a student receives educational assistance from the Department of Veterans Affairs and the cumulative grade point average (G.P.A.) remains below the graduation requirements for more than the equivalent units of three consecutive terms, the student will not be certified for veterans educational benefits until his/her academic status is restored to regular standing.

Health service

All full-time students taking at least 7 paid units who have enrolled in the Student Health Plan through Risk Management are automatically covered by health service provisions. Students enrolled for fewer than 7 units per quarter may request and pay for health service coverage. Hospital and medical expenses outlined in the *Student Health Plan* booklet are covered. Items not covered by the terms of the plan are payable by the student in all cases, and payment is expected at the time these services are given. Students may purchase family coverage through the Department of Risk Management. (See also Student Health Plan paragraphs in the Student Life section of this BULLETIN.)

SCHEDULE OF CHARGES (2001-2002)

(Subject to change by Board of Trustees action)

NOTE: Tuition rates are effective Summer Quarter through the following Spring Quarter.

TUITION

	Associate degrees
\$294	Per unit for the first 8 units
176	Per unit for 9 units and above
147	Per unit for audit and tutorial study

	Bachelor's degrees
	Master's degrees
	Entry-Level Occupational Therapy
	Entry-Level Physical Therapy
	Progression Physical Therapy
	Doctoral degree
	Entry-Level Physical Therapy
	Certificate programs
	Special student
\$420	Per unit for the first 8 units
252	Per unit for 9 units and above
210	Per unit for audit and tutorial study

Master's degrees

Health Information Systems
Post-Professional Occupational Therapy
Post-Professional Physical Therapy
Physician Assistant
Speech-Language Pathology (through Graduate School)

Doctoral degrees

Post-Professional Physical Therapy
Post-Professional Physical Therapy Science

\$420	Per unit for all units
\$210	Per unit for audit and tutorial study

SPECIAL TUITION CHARGES

\$250	Per quarter for advanced clinical experience
125	Per course to remove an Incomplete in a clinical-experience course
50	Per course to repeat a clinical-experience course when the program of study is not extended
50	Per eighty clock hours (\$125 minimum) to repeat a clinical-experience course when the program of study is extended

SUPPLIES

Estimated annual expense of \$600-1,500 for supplies (textbooks, professional apparel, materials), depending on program and year of study

SPECIAL CHARGES

\$ 50	Application
25	Reapplication
100	Acceptance deposit, nonrefundable (applied on tuition)
200	Acceptance deposit, M.P.T/D.P.T. degrees, nonrefundable (applied on tuition)
200	Acceptance deposit M.P.A. degree, nonrefundable, (applied on tuition)
200	Acceptance deposit, emergency medical care-B.S. degree, nonrefundable (applied on tuition)
50	Late registration (beginning first day after the published first day of each quarter)
50	Late-payment charge if loan funds are not received by registration and loan application was made less than thirty days before registration; if check is returned by bank (in addition to \$10 charge); or if student gives a post-dated check at registration
25	Credit by examination (per unit of credit)
50	Examination other than regularly scheduled; waiver examination (per course)
25	Food laboratory fee
25	Microscope rental, per quarter (clinical laboratory science and cytotechnology students)

- 15 Book usage and replacement fee per quarter (cytotechnology students)
- 2 Transcript of credit (\$5, rush; \$10, FAX)
- 10 Returned-check charge
- cost Professional pin
- cost CPR certification

EXAMINATION AND MEMBERSHIP FEES

- National and state fees**
- \$ 80 California Interim Permit for Physician Assistants (initial application and fingerprint fees)
- \$105 Cytotechnology, ASCP Board of Registry
- 80 Dietetic Technology, American Association Registration
- 125 Dietetics, American Association Registration
- 175 Health Information Management, AHIMA Registry Examination (member)
- 225 Health Information Management, AHIMA Registry Examination (nonmember)
- 195 Health Information Management Certified Coding Specialist (CCS) (through AHIMA)
- 105 Medical Technology, ASCP Board of Registry—National
- 89 Clinical Laboratory Scientist License—California
- 145 Clinical Laboratory Scientist License—National
- 325 National Board for Certification in Occupational Therapy (NBCOT)
- 325 National Board for Certification in Occupational Therapy Assistant (NBCOT)
- 425 National Commission on Certification of Physician (NCCPA)
- 687 Physical Therapist Assistant, California State Board and License
- 701 Physical Therapy, California State Board and License
- 125 Radiation Technology, American Registry
- 50 Radiation Technology, California License
- 190 Respiratory Therapy, NBRC National Certification
- 416 Respiratory Therapy, California State Certification.

NOTE: Fees are set by national and state organizations and are subject to change.

- Student membership fees**
- 15 American Health Information Management Association (AHIMA) student membership
- 10 California Health Information Association (CHIA) student membership

MISCELLANEOUS EXPENSES

- Estimated living expenses**
- \$8,010 On-campus, single student: nine months (dormitory fee, food, clothes, personal items, recreation, transportation)
- \$5,900 Off-campus, single student living at home: nine months
- \$10,800 Off-campus, single student providing own housing: nine months
- cost Transportation for off-campus assignments (University-sponsored)
- cost Membership fees
- cost Health care items not covered by health insurance
- cost Breakage, damage, loss of University equipment

STUDENT AID

For all allied health professions programs, inquiries about loans and other student financial matters should be made to the Office of Financial Aid. The new or returning student must file the following completed documents with the Office of Financial Aid:

1. Undergraduate LLU financial aid application.
2. Photocopies of parents' and student's most recent federal tax return(s).
3. Financial aid transcripts from each institution previously attended since high school, regardless of whether or not aid was received.
4. Income Tax Affirmation (ITA)/Statement of Registration Compliance (SRC).
5. Other documents as requested, if
 - the student or the student's parents receive nontaxable income,
 - the student is self-supporting, or
 - the student is a permanent resident.

Applicants anticipating need of financial assistance should apply for aid early. It is not necessary to have received an acceptance before applying. Priority will be given to those applicants whose completed applications are received by March 15 of each year. Late applications will be funded as long as aid is available.

Financial assistance is determined without regard to gender, race, religion, national or ethnic origin, age, or physical disability. Only U.S. citizens and permanent residents qualify for financial aid.

Financial aid applications

Loma Linda financial aid applications for the 2001-2002 academic year (Summer through Spring Quarters) are available in the Office of Financial Aid in January. They are also available on line at www.llu/ssweb. FAFSA applications are available on line at www.fafsa.edu.gov. Financial aid applications must be renewed annually. Cal Grant deadline is March 2.

Special grants (WICHE)

The University participates in the student exchange program of the Western Interstate Commission for Higher Education. Eligibility requirements vary among states. Interested students should apply to their state's certifying officer for further information. The name and address of the certifying officer can be obtained from the Western Interstate Commission for Higher Education, P.O. Drawer P, Boulder, CO 80302.

Inquiry also may be made at the Office of Student Financial Aid. The application deadline is October 15 prior to the year aid is needed.

Loans

The University participates in a number of government loan programs. Loan funds, in limited amounts, are also available for senior students in the final two quarters of the program, upon the recommendation of the dean. Limited scholarship funds are available from the School's Scholarship Endowment Fund. Students who complete the Loma Linda University financial aid application will be considered for all available funds.

The Student Loan Collection Office reserves the right to invoke the student-loan promissory note collection-cost clause on student-loan accounts, both federal and private, sent to an outside agency for collection. The collection clause states:

"If action is instituted on this note, the undersigned promises to pay all attorney's fees and other costs and charges necessary for the collection of any amount not paid when due."

Assistant dean of finance, Kent Chow, runs a tight ship with the help of secretary Carol Mattson.

III

THE DEPARTMENTS

General Information

Cardiopulmonary Sciences

RESPIRATORY CARE—Certificate; Bachelor of Science; Post-Professional Bachelor of Science

EMERGENCY MEDICAL CARE—Progression Bachelor of Science; Bachelor of Science

PHYSICIAN ASSISTANT—Master of Physician Assistant

SURGICAL TECHNOLOGY—Associate in Science

Clinical Laboratory Science

PHLEBOTOMY—Certificate

CYTOTECHNOLOGY—Certificate; Bachelor of Science

CLINICAL LABORATORY SCIENCE (FORMERLY MEDICAL TECHNOLOGY)—Bachelor of Science

CLINICAL LABORATORY TECHNICIAN (FORMERLY MEDICAL LABORATORY TECHNICIAN)—Associate in Science

Health Information Management

HEALTH INFORMATION SYSTEMS—Master of Health Information Systems

HEALTH INFORMATION SYSTEMS—Post-Master's Certificate in Health Information Systems

HEALTH INFORMATION ADMINISTRATION—Certificate; Bachelor of Science

CODING SPECIALIST—Certificate

Nutrition and Dietetics

DIETETIC TECHNOLOGY—Associate in Science; Certificate

NUTRITION AND DIETETICS—Progression Bachelor of Science; Bachelor of Science; Certificate

Occupational Therapy

OCCUPATIONAL THERAPY ASSISTANT—Associate in Arts

OCCUPATIONAL THERAPY—Entry-Level Master of Occupational Therapy; Post-Professional Master of Occupational Therapy

Physical Therapy

PHYSICAL THERAPIST ASSISTANT—Associate in Science

PHYSICAL THERAPY—Entry-Level Master of Physical Therapy; Progression Master of Physical Therapy; Post-Professional Master of Physical Therapy

PHYSICAL THERAPY—Entry-Level Doctor of Physical Therapy; Post-Professional Doctor of Physical Therapy; Post-Professional Doctor of Physical Therapy Science

Radiation Technology

MEDICAL RADIOGRAPHY—Associate in Science

RADIATION SCIENCES—Bachelor of Science

RADIATION THERAPY TECHNOLOGY—Bachelor of Science; Certificate

DIAGNOSTIC MEDICAL SONOGRAPHY—Certificate

NUCLEAR MEDICINE TECHNOLOGY—Certificate

SPECIAL IMAGING TECHNOLOGY: CT/MRI (COMPUTED TOMOGRAPHY / MAGNETIC RESONANCE IMAGING)—Certificate

Speech-Language Pathology and Audiology

SPEECH-LANGUAGE PATHOLOGY—Certificate

SPEECH-LANGUAGE PATHOLOGY AND AUDIOLOGY—Bachelor of Science

General Information

The sections that follow provide information regarding codes and terms; educational experiences as applied in the laboratory, practicum, and/or affiliation; continuing education; conjoint and cognate courses; the Bachelor of Science degree in health science; and the portfolio practicum, which—over a one-to-two year period—documents growing competence in the chosen profession while helping the student evaluate and integrate personal goals with the wholistic mission and goals of the University and School.

CODES AND TERMS

Unit of credit

Credit is granted in terms of the quarter unit, which represents 10 to 12 class hours together with the requisite study, preparation, and practice; or a minimum of 20 laboratory hours; or the equivalent in pre- and/or post-laboratory studies.

Continuing education unit

A continuing education unit (CEU) is defined as 10 contact hours in lecture, conference, or a combination of laboratory practice and administration.

Course number

Ordinarily, course numbers reflect the year in which the courses are taken:

001-099	remedial
101-199	freshman
201-299	sophomore
301-399	junior
401-499	senior
501-599	graduate

Code letters

The subject areas are indicated by code letters as follows:

ACCT	Accounting
AHCJ	Allied Health Conjoint
ANAT	Anatomy
BCHM	Biochemistry
BIOL	Biology
CHEM	Chemistry
CLSC	Cytotechnology
CLSM	Clinical Laboratory Science
DTCH	Dietetic Technology
DTCS	Nutrition and Dietetics
EDCI	Curriculum and Instruction
EDFO	Educational Foundations and Research
EDPC	Educational Psychology and Counseling
EMMC	Emergency Medical Care
ENGL	English
HLCS	Coding Specialist
HLIN	Health Information Management
MATH	Mathematics
MGNT	Management
OCTA	Occupational Therapy Assistant
OCTH	Occupational Therapy
PAST	Physician Assistant

PATH	Pathology
PHRM	Pharmacology
PHSL	Physiology
PHTH	Physical Therapy
PMPT	Progression Physical Therapy
PSYC	Psychology
PTAS	Physical Therapist Assistant
RELB	Biblical Studies
RELE	Christian Ethics
RELR	Professional Ministry
RELF	Theological and Historical Studies
RSTH	Respiratory Therapy
RTCH	Radiation Technology
RTMR	Medical Radiography
RTMS	Medical Sonography
RTNM	Nuclear Medicine
RTSI	Special Imaging
RTTH	Radiation Therapy
SPPA	Speech-Language Pathology and Audiology

The schools are indicated by code letters as follows:

AH	School of Allied Health Professions
GS	Graduate School
SD	School of Dentistry
SM	School of Medicine
SN	School of Nursing
PH	School of Public Health
FR	Faculty of Religion

APPLIED EDUCATIONAL EXPERIENCES

The following terms are used to describe the applied educational experiences during the course of professional training.

Laboratory

A laboratory is an application of theory and principles to real-life situations to develop skill and proficiency and a deeper understanding of the workings of theory.

Practicum

A practicum is a supervised practical application of theoretical studies to the clinical situation. Practica may occur concurrently with specific courses or may follow the completion of one or more theory courses.

Affiliation

An affiliation is a full-time experience in a clinical setting in which the student functions as a junior staff member with supervised, assigned responsibilities. The affiliation usually comes after the completion of all theoretical or preclinical studies; but in some instances, affiliations may also occur at the end of the junior year.

CONTINUING EDUCATION

The School of Allied Health Professions offers continuing education. Information is available from the appropriate department.

CONJOINT COURSES**AHCJ 031 Communication Skills Development I (1)**

Pronunciation, spoken-language usage, vocabulary, and grammar skills assessed. Instructors and advisers interviewed regarding classroom and/or clinical needs. Diagnostic experimentation used to identify the best method of instruction for the student. Course may be repeated. (Course not taught every year.)

Prerequisite: Consent of instructor. Offered for students, faculty, and staff who have learned English as a second language and are having difficulty communicating in spoken English. Due to limited enrollment, first preference will be given to students.

AHCJ 032 Communication Skills Development II (1)

Pronunciation, spoken-language usage, vocabulary, and grammar skills assessed. Instructors and advisers interviewed regarding classroom and/or clinical needs. Diagnostic experimentation used to identify the best method of instruction for the student. Course may be repeated. (Course not taught every year.)

Prerequisite: Consent of instructor.

AHCJ 033 Communication Skills Development III (1)

Pronunciation, spoken-language usage, vocabulary, and grammar skills assessed. Instructors and advisers interviewed regarding classroom and/or clinical needs. Diagnostic experimentation used to identify the best method of instruction for the student. Course may be repeated. (Course not taught every year.)

Prerequisite: Consent of instructor.

AHCJ 034 Communication Skills Development IV (1)

Pronunciation, spoken-language usage, vocabulary, and grammar skills assessed. Instructors and advisers interviewed regarding classroom and/or clinical needs. Diagnostic experimentation used to identify the best method of instruction for the student. (Course not taught every year.)

AHCJ 105 Procedures in Phlebotomy (3)

Designed for individuals who are interested in laboratory medicine and would like to become certified phlebotomists. Students trained in venipuncture and skin puncture. Medical terminology, laboratory safety, CPR, basic anatomy and physiology, specimen-collection techniques, hazards/complications, quality-assurance methods, and medicolegal issues of phlebotomy. Clinical rotation arranged at Loma Linda University Medical Center. CPR training and certificate arranged for students who are not already certified.

Corequisite: Current CPR certificate.

AHCJ 131 Communication Skills (1)

Advanced ESL oral communication designed to provide students with the opportunity to develop and practice basic oral communication techniques in professional and academic contexts, e.g., research and case presentations. Additionally, overall non-native speech patterns facilitated within these contexts to increase speech intelligibility. (Course not taught every year.)

Prerequisite: AHCJ 031, 032, and 033; or equivalent.

AHCJ 235, 235L Essentials of Human Anatomy and Physiology, Lecture and Laboratory (4, 1)

Study of the structure and function of the human body, including organ systems. (Prerequisite to many certificate and associate degree programs, e.g., coding specialist/certificate, occupational therapy assistant/A.A.). Lecture and laboratory required.

AHCJ 240 Microbiology (4)

Designed for students in the health sciences. History, classification, morphology, growth, control, transmission, and pathology of selected bacteria, viruses, fungi, rickettsia, and parasites. Host defenses against microbial pathogens, including specific and nonspecific immunity. Lecture, thirty hours; laboratory, thirty hours. Course covers two quarters.

Prerequisite: A college-level chemistry course.

AHCJ 250, 251 Anatomy and Physiology (4, 4)

An 8-unit (4 units Winter Quarter plus 4 units Spring Quarter) course that covers structure and function of human biology. For students entering two- and four-year health professional programs such as physical therapy, occupational therapy, cardiopulmonary sciences, speech-language pathology and audiology, radiation technology, nursing, and other programs with an anatomy and physiology prerequisite.

AHCJ 252 Human Anatomy and Physiology (4)

Function of enzymes; cell respiration and metabolism; secretion and action of hormones; circulatory and respiratory systems. Lecture and laboratory. Riyadh, Saudi Arabia.

Prerequisite: AHCJ 251.

AHCJ 305 HIV/AIDS and the Health Provider (1)

Current issues related to HIV/AIDS, with special emphasis on the epidemiology and etiology of the disease. Psychosocial, economic, ethical, and legal concerns. Education for prevention. Impact on the health care worker. Resources available. Risk factors and precautions for blood-borne pathogens, HIV, hepatitis, and tuberculosis.

AHCJ 308 Professional Communications (1-2)

Forms of written and verbal communication routinely required in the performance of the health care-manager's duties. Projects include memos, letters, confidential FAX cover design, short reports, meeting notices, minutes, and creation of an agenda.

AHCJ 311 Medical Terminology (2)

Language of medicine, including word construction, word analysis, definitions, and the use of terms related to medical science. Course organized by body systems.

AHCJ 312 Anatomy (9)

Gross and microscopic anatomy of the human body. Lecture, laboratory, dissection, demonstration, and slides. Orientation to the structure of various systems of the body. Basic medical terminology.

(Successful completion of this course is essential for continuation in the program.)

AHCJ 318 Physiology I (4)

Physiology of the human body, including cellular, neuromuscular, cardiovascular, respiratory, gastrointestinal, renal, and endocrine physiology.

AHCJ 321 Dynamics of Communication (2)

Survey of communication skills, including group dynamics, self-awareness, interpersonal relationships, learning styles, problem solving, listening skills, and body language. Systematic observation, patient-interviewing techniques, and objective medical documentation. Problem identification and goal setting in a multiperson health care-delivery system.

AHCJ 324 Psycho-Social Models and Interventions (2)

Orientation to the major models in psychology and how they relate to medical care. Development of a psychological model for interpretation of needs of the person in crisis. Understanding the roles of psychiatrists, psychologists, social workers, and family therapists. Suicide intervention. Critical-incident debriefing. Support factors in providing temporary, adequate psychological care for all involved in medical crisis.

AHCJ 326 Patient-Care Methods (2)

Foundation of basic patient-care information and skills for allied health professionals entering the clinical environment. Integrated basic-care knowledge and skills required by each profession.

AHCJ 328 Portfolio Practicum I(1)

Introduction of SAHP goals for graduates. Students demonstrate progression towards effective communication, teamwork, support of diversity, ethical behavior, appreciation of human worth, balanced work-rest-leisure within a spiritual atmosphere, and commitment to long-term personal and professional growth.

AHCJ 329 Organic Chemistry, with Laboratory (5)

Study of carbon chemistry as related to organic compounds found in the human organism.

AHCJ 331 Human Resource Management (3)

Theory and practice of the management of people at work. Organizational behavior concepts and the problems of employee procurement, training, and motivation. Job evaluation, wage administration, employee benefits, and negotiating with labor unions. Preparation both for managing people and directing a department in a complex organization.

AHCJ 334 Biochemistry (5)

Chemistry and metabolism of carbohydrates, lipids, nucleic acids, and proteins. Chemical basis of life processes. Lecture and laboratory demonstrations to support student competency.

AHCJ 351 Statistics for the Health Professions (3)

Fundamental procedures in collecting, summarizing, analyzing, presenting, and interpreting data. Measures of central tendency and variation, probability, binomial and normal distribution, hypothesis testing and confidence intervals, t-tests, chi-square, correlation, and regression. Introduction to SPSS statistical package for computer data analysis.

AHCJ 402 Pathology I (4)

Fundamental mechanisms of disease, including cell injury; inflammation, repair, regeneration, and fibrosis; vascular, cardiac, respiratory, gastrointestinal, hepatobiliary, urinary, reproductive, endocrine, and integumentary pathologies.

AHCJ 403 Pathology II (3-4)

Fundamental mechanisms of disease, including the central and peripheral nervous systems; bone and joint, skeletal muscle, developmental, genetic, infectious, and parasitic pathologies; and neoplasia. Additional unit requires two autopsy viewings and written report.

Prerequisite: AHCJ 402.

AHCJ 404 Pharmacology (1)

Introduction to pharmacology, including study of pharmacokinetics, pharmacodynamics, and actions of pharmaceuticals commonly encountered in various allied health professions.

AHCJ 405 Dynamics of Learning and Teaching (1-3)

2 units: Examination of the theories of learning applied to teaching process. Includes evaluation of current research and methods of instruction.

3 units: Includes requirements for 2 units plus a referenced research paper.

AHCJ 407 Financial Management (2)

Financial aspects of health care involving prospective reimbursement system, analysis of various health-care reimbursement schemes, and hospital financial disbursements. Budget variance analysis, analysis of cost components, operating statements, and productivity related to a department budget. Special projects may be assigned as needed.

AHCJ 408 Health Care Management (4)

Management theory: planning, organizing, directing, and controlling (including budgetary controls). Department productivity and theories of work simplification. Preparation of resumes, interviewing skills, professional attitudes, group theory, and group dynamics. Students spend the last two-to-three weeks doing special projects designed and supervised by their departments. (Department of Nutrition and Dietetics students register for a 2-unit practicum in conjunction with this course.)

AHCJ 409 Adult Learning Styles (3)

Theories and styles of learning; personality factors related to learning; implications of effective intellectual, emotional, and social functioning included within the context of structuring education for the adult learner. Analysis of the teaching process, including setting of objectives, selection of content, and design of classroom and clinical teaching strategies, with emphasis on alternatives to lecturing.

AHCJ 414 Foundations of Health Information Systems (2)

Survey course for students interested in pursuing a master's degree in health information systems, business majors, and others who anticipate working with databases and computer systems in health care settings. Course includes introduction to the vocabulary and the principles of health information systems, specifically, the value of information, reasons for adopting the systems approach, general systems theory, scope of a system, structure and classification of systems, and the systems life cycle.

Prerequisite: Introduction to computers.

AHCJ 415 Educational Psychology for Health Professionals (3)

Psychological factors related to learning processes in professional and higher education. Emphasis on the role of communication skills in learning settings, gender influences on learning, objectives setting and course design, stimulation of higher-level thinking, motivation, and retention.

Prerequisite: AHCJ 409.

AHCJ 416 Sociology of the Hospital Environment (2)

Exploration of hospital culture in the context of medical sociology, including both the history and continuing evolution of health care norms. Examination of interactions between and within hospital microenvironments. Observation and analysis of interactions to include: expectations, obligations, negotiations, control, and compliance. Introduction to qualitative data-collection methods. Survey of the social, political, and economic forces that impact delivery of health care. Guest speakers and departmental tours included.

AHCJ 419 Physiology II (3)

Detailed study of neuromuscular physiology.

Prerequisite: AHCJ 318.

AHCJ 421 Psychology of Physical Disability (2)

Psychological reactions to illness or disability. Methods of dealing with these reactions considered with reference to the clinical situation. Seminar approach to professional responsibilities for health care.

AHCJ 426 Introduction to Computer Applications (1-3)

Hands-on instruction in Word, Excel, and PowerPoint. Lectures, laboratory assignments, quizzes, projects, and a written and practical examination. (Course not taught every quarter.)

Prerequisite: AHCJ 428.

AHCJ 428 Computer Applications (3)

Review of current computer applications for health care professionals, including software/hardware for office management, graphics, educational presentations, literature acquisitions, and adaptive devices. (Course may not be taught every quarter.)

Prerequisite: AHCJ 426 or demonstrated competency in content of AHCJ 426.

AHCJ 431 Database Management I (3)

Introduction to database management concepts, with emphasis on medical information. Microsoft Excel used as a flat database. Data management and presentation using the sorting, reporting, and charting functions of Excel.

Prerequisite: Introductory computer course.

AHCJ 432 Database Management II (2)

Theories and steps of database development using Microsoft Access. Topics include but are not limited to: relationships, form building, advanced queries, reporting, and macros. Project creating a basic medical-information database from scratch required.

Prerequisite: AHCJ 431 or consent of instructor.

AHCJ 433 Special Projects in Computer Applications (2)

Computer systems and applications designed to meet the specific professional needs and interests of the student. Emphasizes use of databases with health care data and on-systems design, as needed.

Prerequisite: AHCJ 431, 432.

AHCJ 444 Functional Neuroanatomy (3)

Study of neuroanatomical systems, structures, and pathways, with application to lesions of the human nervous system.

AHCJ 461 Research Methods (2)

Introduction to the scientific method in research. Focus on the major steps of the research process as these steps relate to research-report evaluation, proposal writing, literature review, development of conceptual framework, identification of variables, statement of hypotheses, research design, and analysis and presentation of data.

Prerequisite: AHCJ 351.

AHCJ 464 Group Process and Dynamics (3)

Introduction to principles and techniques of group theories, processes, and dynamics, as applied to the health-professional setting. Concepts include group functions, roles, structures, and characteristics; group membership, norms, dynamics, and relations. Theoretical perspectives on group development, dynamics, and conflicts. Practical issues, including educational applications, negotiation, observation, and diagnosis. Leadership issues, facilitation, expedition, and termination. Simulation exercises, active learning, and flexible choices of study and application.

AHCJ 465 Seminars in Leadership (2)

Prepares graduates for entry into the new work requirements. Through observation and participation, student explores the responsibility of today's employee to successfully integrate customer and community service and social responsibility.

AHCJ 466 Advanced Studies in Selected Physical Therapy Topics (5)

Provides students in-depth opportunities to pursue various areas of physical therapy, including orthopaedics, neurology, sports medicine, and general medicine. Incorporates literature review and related research activities.

AHCJ 485 Technology in Education (3)

Introduction to instructional technologies and their applications in education, including: computer-generated media, Internet resources, chat rooms, Web courses, two-way audio, videos, desk-top conferencing, and teleconferencing.

AHCJ 497 Advanced Clinical Experience (40 to 480 clock hours per term)

Advanced clinical experience in selected areas of professional practice.

AHCJ 498 Portfolio Practicum II (1)

Development of portfolio that illustrates the potential graduate's ability to meet the goals set by the School of Allied Health Professions for graduates of baccalaureate and master's degree programs.

AHCJ 499 Directed Study (1-4)

Individual arrangements for students to study under the guidance of a program faculty member. May include readings, literature review, or other special or research projects. Minimum of thirty hours required for each unit of credit. Laboratory may be required in addition to class time. A maximum of 4 units applicable to any degree program.

AHCJ 501 Advanced Clinical Practice I (3)

Demonstration and practice of advanced examination, assessment, and treatment of the lumbar spine, pelvic girdle, and lower extremities. Lecture and demonstration.

AHCJ 502 Advanced Clinical Practice II (3)

Emphasizes the skills utilized by clinical specialists in neurophysical therapy. Content based on the description of AHCJ 501.

AHCJ 503 Advanced Clinical Practice III (3)

Advanced clinical decision-making skills, with focus on patient classification, clinical-diagnosis practice parameters, and practice guidelines. Emphasizes development of clinical algorithms, clinical prognostic skills, and outcome measures.

AHCJ 504 Current Issues in Health Care (3)

Review and discussion of concerns relative to the health field, i.e., legislation, regulations, professional organizations. Project or paper required.

AHCJ 505 Educational Psychology for Health Professionals (3)

Study of psychological development as it relates to the learning process in professional and higher education. Particular emphasis on the role of development, gender and learning, communication skills in learning settings, objectives setting and course design, stimulating higher-level thinking, motivation, and retention.

AHCJ 506 Educational Evaluation and Clinical Assessment (3)

Introduction to principles and techniques of designing evaluation activities and tests for measuring classroom learning and instructional products. Includes criteria-referenced approaches, formative and summative instruments, critical-incident observations, portfolio assessment, and other measurement concepts.

AHCJ 507 Pharmacology in Rehabilitation (3)

Principles of pharmacology as related to diagnosis, prevention, and treatment of disease—including a presentation of the pharmacology and therapeutic value of drugs used in rehabilitation medicine. Related topics include pharmacokinetics, pharmacodynamics, adverse effects, drug interactions, and drug toxicity—with special consideration given to pediatric and geriatric pharmacology.

AHCJ 508 Current Issues in Basic Science (3)

Study of the current issues in basic science as related to physical therapy. Topics may include current advances in biomechanics, cell and molecular biology, tissue engineering and transplants, pharmacology, and presentation of basic science research. Lecture presentations and discussions of current literature.

AHCJ 509 Teaching and Learning Styles (3)

Explores theories and styles of learning and personality factors that relate to learning. Implications of effective intellectual, emotional, and social functioning included within the context of structuring education for the adult learner. Includes analysis of the teaching process from the setting of objectives, selection of content, and design of classroom and clinical teaching strategies—with particular emphasis on alternatives to lecturing—to assessment and evaluation.

AHCJ 514 Kinesiology: Motor Control and Learning (3)

Advanced kinesiology, including movement science dealing with behavioral basis of motor control and motor learning from an information-processing perspective.

AHCJ 515 Curriculum Development in Higher Education (3)

Examines principles of curriculum development. Selection, organization, and evaluation of learning experiences. Examines the nature, place, and inter-relationship of general and specialized education in higher education.

AHCJ 516 Musculoskeletal Pathology (3)

Study of the etiology, pathogenesis, and clinical manifestations of selected bone, joint, and muscle pathologies. Discussion of current literature for selected pathologies.

AHCJ 517 Information Systems Organizational Theory (3)

Complexities of large organizations and bureaucratic systems. Formal and informal structures, communication patterns, and philosophical approaches as these affect the effectiveness and efficiency of delivery, work motivation, resources, procurement, and allocations. Applications of diverse organizational diffusion theories and perspectives.

AHCJ 518 Neurobiology (3)

Study of neurobiology, including current neuroscience literature, as related to selected pathologies.

AHCJ 519 Graduate Portfolio (1)

Development and preparation of materials collected throughout the instructional and internship period that demonstrate the student's knowledge of and training in health information systems. Projects, letters of recommendation, and records of directed practice. Attendance at University professional seminars required. Specialized training in areas of communication, diversity, ethics, balanced living, and compassion.

AHCJ 521 Advanced Orthopaedic Procedures I (3)

Demonstration and practice of advanced examination and treatment of the lumbar spine, pelvic girdle, and lower extremities.

AHCJ 522 Advanced Orthopaedic Procedures II (3)

Demonstration and practice of advanced examination and treatment of the cervical spine, shoulder girdle, and upper extremities.

AHCJ 523 Advanced Orthopaedic Procedures III (3)

Demonstration and practice of advanced examination and treatment of the lumbar spine, thoracic spine, and ribcage.

AHCJ 525 Biostatistics (3)

Fundamental procedures of collecting, summarizing, presenting, analyzing, and interpreting data. Sampling, measures of central tendency and variation, probability, binomial distribution, normal distribution, sampling distributions and standard error, confidence intervals, hypothesis testing, t-tests, chi-square, correlation, and regression. Introduction to computer analysis for solution of statistical problems.

AHCJ 526 Introduction to Computer Applications II (3)

Hands-on instruction in Word, Excel, and Power-Point. Class activities include hands-on lectures, laboratory assignments, quizzes, projects, and a final examination. A special Web page project required.

AHCJ 527 Medical Screening for Rehabilitation Professionals (3)

Screening for non-neuromusculoskeletal origins for the musculoskeletal complaints of patients who commonly seek rehabilitation. Particular emphasis on components of the history and physical examination that suggest medical pathology requiring referral and/or physician consultation. Knowledge and skills related to screening for medical pathology in patients with musculoskeletal complaints of the lumbar spine, pelvis, lower extremities, thoracic spine, shoulder girdle, and upper extremities.

AHCJ 529 Hemiparetic Upper Extremity (1)

A manual therapy approach to management of the CVA upper extremity. Taught systematically using clinical reasoning as a model.

AHCJ 530 Research and Statistics I (3)

In-depth study of research designs: their advantages and disadvantages, including pretest/posttest designs, posttest-only control-group designs, time-series designs, factorial designs, randomized block and repeated-measures designs, and incomplete block designs. Introduction to clinical trials, sequential research designs, and single-case experimental designs. Measurement and analysis of validity and reliability. Design of survey instruments. Use of power calculations for choosing appropriate sample sizes.

AHCJ 531 Research and Statistics II (3)

Analysis of data using one-way ANOVA with multiple comparisons, factorial ANOVA designs, randomized complete and incomplete block designs, and repeated measures. Introduction to multiple correlation and regression and model building using multiple regression techniques. Evaluation of research literature that uses multivariate analysis for data analysis. Introduction to nonparametric statistics. Interpretation of multivariate analysis computer output.

AHCJ 532 Research and Statistics III (3)

Selection of a research topic, literature review, proposal writing and approval. Collection of research data after proposal approval. Limited to students who are in the doctoral program in physical therapy.

Prerequisite: AHCJ 531 and consent of instructor.

AHCJ 533 Research and Statistics IV (3)

Individual arrangements for doctoral students to work with the instructor on analysis and presentation of research data. Preparation of manuscript presenting results of doctoral research study.

Prerequisite: AHCJ 532 and consent of instructor.

AHCJ 534 Advanced Neurological Rehabilitation (3)

In-depth study of the patient with spinal cord injury, including etiology, current treatment techniques in acute and outpatient settings, and principles of exercise physiology. Review of research activities with regard to a cure for spinal cord injury, as well as the legal aspects of ADA and the individual with a spinal cord injury.

AHCJ 535 Exercise and Thermoregulation (3)

Focus on energy sources utilized by the body for exercise, neural and mechanical structures of mechanisms that control body movements, environmental influences on exercise performance, and principles of aerobic and anaerobic exercise. Application of concepts and principles to normal and disabled human conditions.

AHCJ 536 Health Care Financial Management (3)

Understanding the finances of health care, including financial statements, reimbursement models of fee-for-service, capitation, managed care, and risk pools. Concepts of modeling and scenario planning, with emphasis on return on investment.

AHCJ 537 Organizational Structure and Behavior (3)

Understanding, predicting, and influencing human behavior in an organization. Provides students with a variety of theories, models, strategies, and experiences in organizational behavior through which managers can find their own solutions in specific situations.

AHCJ 538 Histology (2-3)

Advanced histology of joint pathology and the associated changes in bone, cartilage, and other connective tissues. Paper required.

AHCJ 539 Human Factors in Technology Management (3)

Management theory applied to human resources and the flow of information throughout an institution. Recruiting, hiring, promotion, workload assignments, discipline. Legal and ethical issues. Managing people as individuals and in groups. Motivating, organizing, and directing teams.

AHCJ 545 Legal and Ethical Issues in the Health Professions (3)

History and structure of federal and state governments, including torts, contracts, administrative law, criminal law, and reporting issues. Legal and ethical issues in patient confidentiality and release of patient information. The impact of technology on the collection and dissemination of patient information. Medical legal liability issues, including corporate compliance.

AHCJ 546 Orthopaedic Interventions: Mobilization of Peripheral Nerves and Diarthroidal Joints of the Extremities (3)

Advanced study of the management of orthopaedic and neurological disorders of the extremities. Clinical course designed to strengthen student's knowledge and application of mobilization techniques to the joints and nerves of the periphery. Lecture, laboratory sessions, case studies, and cadaveric specimen-guided study (as specimens available).

AHCJ 547 Orthopaedic and Neurological Integrative Manual Therapy (3)

Manual therapy approach for the treatment of common musculoskeletal problems integrating orthopaedic and neurological rehabilitation. Course based on a working knowledge of anatomy, muscle-balance theory, neurodevelopmental treatment (NDT), muscle-length testing, soft-tissue mobilization (STM), and proprioceptive neuromuscular facilitation (PNF) principles. Emphasizes use of clinical reasoning during patient evaluation and patient management.

AHCJ 556 Faculty Procedures: Selection, Development, Evaluation (3)

Leadership issues for personnel selection, termination, development, and evaluation. Evaluation of faculty in clinical and lecture settings. Includes content and processes of evaluation, rating forms, quantifying data, evaluative decision making, and feedback. Examines criterion-referenced approaches. Formative and summative instruments, critical-incident observations, and other related measurement concepts.

AHCJ 557 Professional Systems in Management (3)

Administering the academic department: personnel selection, development, and evaluation; finance; team development; and leadership theories.

AHCJ 558 Stress and Health Behavior (3)

Evaluation of effects of stress on individuals, families, students, and health professionals in the educational setting. Biopsychological foundations, social systems, technological influences, life-development factors, and unique aspects of health-professional education analyzed. Coping strategies—such as nutrition, exercise, humor, time management and organization, cognitive therapies, relaxation, and imagery—explained.

AHCJ 564 Group Process and Dynamics (3)

Group guidance, theories of group-individual interaction, and the communication process. Educational orientation to the utilization of groups to enhance motivation, commitment, and learning.

AHCJ 565 Health Communication: Counseling Patients and Personnel (3)

Communication in health care, multiple applications of communication theory to health promotion, and essentials of professional communication in clinical teaching and leading groups of health professionals. Emphasis on counseling techniques, nondefensive communication, and increased communications awareness.

AHCJ 569 Computers and Electronics for Clinicians (3)

Thorough understanding of the roles of computers and electronics in a clinical setting. Equipment used in a classroom setting.

AHCJ 574 Behavioral Modification and Personal Change (3)

Exploration and application of health-behavior change models. Educational, psychosocial, behavioral issues, with emphasis on leadership, decision making, group process, and persuasion.

AHCJ 585 Technology in Education (3)

Introduction to instructional technologies and their applications in education, including: computer-generated media, Internet resources, chat rooms, Web courses, two-way audio, videos, desk-top conferencing, and teleconferencing. (Course not taught every year.)

AHCJ 591 Research I (3)

Introduces the scientific method in health-science research. Focuses on the major steps of the research process: problem identification, literature review, conceptual framework, identification of variables, statement of hypothesis, experimental design, and analysis and presentation of data. Includes critical evaluation of research literature. Application of the research process to problems in related specific allied health fields. Development of a research proposal. Pilot testing of a research proposal. Testing of procedures and data forms. Implementation of the research proposal in a practice setting.

AHCJ 592 Research II (3)

Computer data analysis and preparation of a research report. Preparation of a poster appropriate for a professional meeting. Graphics, tables, and abstract.

AHCJ 599 Directed Teaching (3)

Specialty module developed and presented in classroom or clinical setting. Includes course application, course syllabus, measuring instrument, student course evaluation, and lesson plans.

Prerequisite: AHCJ 505, 506; or consent of instructor.

AHCJ 601 Research Proposal Writing (3)

Preparation of a research proposal, including components essential for submission to the Institutional Review Board. Emphasis on writing skills in preparation of literature review, purpose, conceptual framework, proposed methodology, and statistical analysis. Includes the ways in which proposal serves as a basis for an article for publication.

AHCJ 605 Critical Analysis of Scientific Literature (3)

Evaluation of the scientific literature, including critical evaluation of the rationale for the study; population inclusion/exclusion criteria; sampling and randomization techniques; sample size; appropriateness of the research design; choice of the data analysis; structure and content of tables and graphs; interpretation of statistical results; and applications to practice. Students evaluate research articles by answering questions posed by the instructor as well as by identifying and evaluating the foregoing areas in articles of their own choosing.

AHCJ 629 Lower-Quarter Biomechanical Relationships (3)

Advanced examination procedures for performing a biomechanical assessment of the lower extremities. Emphasis on identifying the causes, compensations, and complications of movement dysfunctions associated with lower-extremity musculo-skeletal-pain syndromes. Physical therapy management of gait abnormalities.

AHCJ 699 Directed Study (1-6)

Individual arrangements for advanced students to study under the guidance of a program faculty member. May include reading, literature review, other special projects. Minimum of thirty hours required for each unit of credit.

COGNATE COURSES

Cognate courses meet professional course requirements outside the core curricula for programs in the School of Allied Health Professions and are offered both by departments within the School and by departments of other schools of this University.

School of Allied Health Professions students take advantage of Nichol Hall's state-of-the-art computer laboratory, which is set aside exclusively for their use.

EVALUATION OF MISSION AND GOALS—Portfolio Development

The School of Allied Health Professions conducts an evaluation program that includes courses, validation of writing, and standardized measures related to wholeness. The evaluation courses, Portfolio Practicum I and II, are intended to be a means of integrating the wholeness concept into the lives of the students and of assessing the outcome of their educational process. The portfolio faculty and staff assist students in understanding and modeling the mission of Loma Linda University and the School of Allied Health Professions.

Each portfolio practicum is in progress for three-to-four quarters, during which time the student is developing a portfolio based on the fifteen goals of the School (see Section II, Mission and Goals). The final portfolio provides the student with an organized, goal-driven documentation of growth and achieved competence of abilities in a personal and professional realm of skills. An Associate in Science degree program student completes the one-year Portfolio Practicum; all other undergraduate students complete Portfolio Practicum I and II over a two-year period; each graduate student completes a graduate portfolio.

The portfolio is a tool by which students develop and personally achieve goals set forth by the School of Allied Health Professions. Here to help are Laura Alipoon, Bette Husted, Cindy Malinowski (director of evaluation and portfolio), and Nancy Farrell.

THE ALLIED HEALTH PROFESSIONS

The sections that follow give the setting for each of the programs offered by the School of Allied Health Professions. In each department the subject and unit requirements for admission and for the professional programs are outlined, and the courses offered are described.

From cardiopulmonary to speech pathology (and all programs in between), Loma Linda University School of Allied Health Professions students—very serious about their studies and futures—are usually seen with an open textbook.

HEALTH SCIENCE—Bachelor of Science

The B.S. degree in health science requires completion of the General Education requirements (see section V) and a major area of emphasis in one of the University's health-science programs. A minimum of 192 quarter units must be completed, with a minimum of 45 units or the last 32 units taken through Loma Linda University. The appropriate number of units from the major field will be determined by the school granting the degree.

Upon completion of the program, the graduate will be qualified to:

1. Support the University's mission in entry-level health-science careers in government, hospitals, and private and voluntary health agencies.
2. Effectively communicate orally and in writing with health care professionals.
3. Pursue post-baccalaureate education in fields such as public health, health care administration, or health education.
4. Facilitate voluntary changes in health behaviors as well as advocate for social change that leads to higher levels of wellness or rehabilitation.

ADMISSION

On-campus students must be accepted into a degree program at Loma Linda University and not already possess a bachelor's degree. A letter of recommendation from the program of concurrent enrollment is required.

B.S. IN HEALTH SCIENCE for distance education of students at Humanitec Rehabilitation College, Japan BLOCK CURRICULUM

Freshman and Sophomore years are completed at Humanitec Rehabilitation College (HRC).

JUNIOR YEAR April to September (beginning)

AHCJ	328	Junior Portfolio (continues until March)	1
ENGL	111	Freshman English (basic writing)	3
RELF	440	World Religions	2
AHCJ	311	Medical Terminology	2
ENGL	112	Freshman English	3
TOTAL UNITS			<u>11</u>

September (end of) to March

ANTH	315	Cultural Anthropology	4
AHCJ	504	Current Issues in Health Care/Global (may be offered separately for PT and OT)	3
ENGL	113	Freshman English (professional writing)	2
AHCJ	498	Senior Portfolio (continues until December)	1
TOTAL UNITS			<u>10</u>

SENIOR YEAR April to July

Clinical externship in communities surrounding HRC (0)

September to December

RELF	423	Loma Linda Perspective	2
AHCJ	131	Communication Skills	1
PSYC	460	The Exceptional Individual	3
SUBTOTAL			<u>6</u>
			6

PLUS Occupational OR Physical Therapy selections, as below (5):

For Occupational Therapy students:

OCTH	443	Case Management Seminar	4
OCTH	418	Practicum (concurrent with OCTH 443)	1
SUBTOTAL			<u>5</u>

For Physical Therapy students:

PHTH	495	Research	2
PHTH	595	Advanced Studies in PT	3
SUBTOTAL			<u>5</u>
TOTAL UNITS			<u>11</u>

January to March: board examinations

March: graduation

CARDIOPULMONARY SCIENCES

RESPIRATORY CARE—Certificate; Bachelor of Science; Post-Professional

Bachelor of Science

EMERGENCY MEDICAL CARE—Progression Bachelor of Science; Bachelor of Science

PHYSICIAN ASSISTANT—Master of Physician Assistant

SURGICAL TECHNOLOGY—Associate in Science

ROBERT L. WILKINS, Chair

KENRICK C. BOURNE, Program Director, Master of Physician Assistant, Physician Assistant Program

ELIZABETH J. DICKINSON, Program Director, Associate in Science, Surgical Technology

DOROTHY I. DONESKY, Program Coordinator and Director of Clinical Education, Associate in Science, Surgical Technology

RESPIRATORY CARE

Respiratory care is an allied health profession that promotes health and improvement in the cardiopulmonary function of people with heart and lung abnormalities and disease. Newborn, pediatric, adult, and elderly patients are treated for a wide range of problems—infant respiratory distress syndrome; trauma; cardiopulmonary arrest; conditions brought on by shock; post-operative surgical complications; and respiratory diseases such as pneumonia, asthma, cystic fibrosis, chronic bronchitis, and emphysema.

The respiratory care practitioner is a member of the health care team in medical centers, skilled-nursing facilities, outpatient rehabilitation programs, physician offices, and in-home care. Many are involved in research and development of new and innovative care and equipment. They are effective communicators and compassionate caregivers, possessing an awareness of cultural sensitivity and diversity. They have leadership roles in patient education, wellness intervention, and development of respiratory care plans. Respiratory care professionals apply critical-thinking skills in cardiopulmonary diagnostics and patient assessment to optimize decision making and delivery of patient care. In a time of high technology, increasing growth of the elderly population, and increasing numbers of patients with asthma and chronic lung disease, there is a greater demand for educated and skilled respiratory care practitioners.

PROFESSIONAL ACCREDITATION, LICENSURE, AND CREDENTIALING

Respiratory care program accreditation is provided by the Commission on Accreditation of Allied Health Education Programs (CAAHEP) upon recommendation of the Committee on Accreditation for Respiratory Care (CoARC). CoARC publishes standards and guidelines that must be met, relevant to general and respiratory care education and to on-going program assessment and improvement. Inquiries regarding CAAHEP can be directed to 35 East Wacker Drive, Suite 1970, Chicago IL 60601-2208; Telephone 312/553-9355; Web site <http://www.caahep.org>; or FAX 312/553-9616. Inquiries regarding CoARC can be directed to 1248 Harwood Road, Bedford, TX 76021-4244; telephone 800/874-5615; or Web Site <http://www.coarc.com>. The Respiratory Care Program at Loma Linda University is CAAHEP accredited.

Graduates of CAAHEP-accredited respiratory care programs must apply to the State of California Department of Consumer Affairs Respiratory Care Board (RCB) for a license to practice in the state. The RCB requires that graduates of respiratory care programs meet general and respiratory care education with course grades of “C” or above, resulting in a minimum of an Associate in Science degree in respiratory care. Graduates must successfully

complete an examination for licensure, declare felony convictions, and undergo fingerprinting. License denial may occur due to prior felony conviction(s). Inquiries regarding the RCB can be directed to 1426 Howe Avenue, Suite 48, Sacramento, CA 95825-3234.

The National Board for Respiratory Care, Inc. (NBRC) provides nationally recognized credentialing examinations for graduates of accredited respiratory care programs. Those who successfully complete the entry-level examination receive the certified respiratory therapist (CRT) credential. This examination currently is required by the state of California for licensure to practice respiratory care. Advanced practitioner examinations are required for the registered respiratory therapist (RRT) credential; perinatal-pediatric specialist certification; and certified (CPFT) and registered (RPFT) pulmonary function technologist. NBRC inquiries can be made to 8310 Nieman Road, Lenexa, KS 66214-1579; telephone 913/599-4200; or Web site <http://www.nbrc.org>.

PROFESSIONAL ASSOCIATION

The American Association for Respiratory Care (AARC) encourages students and graduates to become members and participate in national meetings and local chapters. The AARC's aim is to foster professional growth, encourage research, and provide services and representation for its members. Further information may be obtained from the national office, 11030 Ables Lane, Dallas, TX 75229; telephone 972/243-2272; or Web site <http://www.aarc.org>.

Advanced-practitioner respiratory students—Delia Lujan, Medora Rodrigues, and Bilal Kanth—observe as Josue Cortes applies a nonrebreathing oxygen mask to Amalia Moreno.

RESPIRATORY CARE—Certificate

ADMISSION

To be eligible for admission, the applicant must have completed a minimum of 96 quarter units (64 semester units) from an accredited college or university or its equivalent from a foreign education program.

Prerequisites for Respiratory Care, Certificate

- Human anatomy and physiology **or** general biology **or** general zoology—complete sequences, with laboratories
- Microbiology with laboratory
- Introductory chemistry with laboratories, complete sequence; **or** general chemistry with laboratories, complete sequence
- High school-level physics **or** introductory physics, one quarter/semester in college; **or** general physics, one quarter/semester in college
- Two years of mathematics selected from: algebra I (elementary), algebra II (intermediate), or geometry. Course work may be taken in high school or college.

- General psychology
- English composition, complete sequence
- Introduction to computers (high school or college)

Recommended course work:

Speech

All course work must have a grade of C (2.0) or better.

PROFESSIONAL ELIGIBILITY

Upon completion of the program, graduates are eligible to pursue all credentialing examinations offered by the National Board for Respiratory Care (NBRC). NBRC inquiries can be made to 8310 Nieman Road, Lenexa, KS 66214-1579; telephone 913/599-4200; email: nbrc-info@nbrc.org or Web site <http://www.nbrc.org>.

**PROGRAM OF INSTRUCTION
RESPIRATORY CARE—Certificate**

YEAR ONE (Course work to be taken while in the BSRC program)		
RSTH	304	Cardiopulmonary Anatomy and Physiology 4
RSTH	323	Pulmonary Function Methodology 3
RSTH	331	Pharmacology I 2
RSTH	332	Pharmacology II 2
RSTH	334	Patient Assessment 2
RSTH	341	Respiratory Therapy Science I 5
RSTH	342	Respiratory Therapy Science II 5
RSTH	343	Respiratory Therapy Science III 4
RSTH	354	Case Studies—in Adult Respiratory Care 2
RSTH	366	Diagnostic Techniques 2
RSTH	381	Cardiopulmonary Diseases I 2
RSTH	382	Cardiopulmonary Diseases II 2
RSTH	391	Respiratory Care Practicum I 2
RSTH	392	Respiratory Care Practicum II 2
RSTH	393	Respiratory Care Practicum III 4
RSTH	404	Critical Care 4
AHCJ	305	HIV/AIDS and the Health Provider 1
AHCJ	311	Medical Terminology I 2
AHCJ	326	Patient Care 2
AHCJ	328	Portfolio Practicum I 1
AHCJ	402	Pathology I 3
AHCJ	403	Pathology II 3
EMMC	316	12-Lead ECG Interpretation 2

YEAR TWO

RSTH	421	Perinatal and Pediatric Respiratory Care	2
RSTH	422	Advanced Perinatal and Pediatric Respiratory Care	2
RSTH	424	Exercise Physiology and Pulmonary Rehabilitation	3
RSTH	434	Advanced Patient Assessment	2
RSTH	441	Respiratory Therapy Science IV	3
RSTH	444	Case Studies in Neonatal/Pediatric Respiratory Care	2
RSTH	464	Case Management in Respiratory Care	2
RSTH	466	Advanced Diagnostic Techniques	2
RSTH	471	Instructional Techniques I	2
RSTH	474	CP Health Promotion and Disease Prevention	2
RSTH	481	Research in Cardiopulmonary Sciences	1
RSTH	494	Respiratory Care Practicum IV	2
RSTH	495	Respiratory Care Practicum V	2
RSTH	496	Respiratory Care Practicum VI	3
AHCJ	351	Statistics for the Health Professions	3
AHCJ	461	Research Methods	2
AHCJ	465	Seminars in Leadership	2
AHCJ	498	Portfolio Practicum II	1
EMMC	315	Cardiology	3
RELE	457	Christian Ethics and Health Care	2

Applicants who have comparable education or experience may be able to gain credit toward the certificate by equivalency examination or evaluation of credit on an individual basis. Loma Linda University reserves the right to assess the respiratory care knowledge base and competencies of each applicant by assessment examinations(s).

A Loma Linda University grade point average of C (2.0) is required for all courses in the program. (see Section V.)

Holding major positions in our Department of Cardiopulmonary Sciences are (top row): Frank Sirna, Physician Assistant Program; Evelyn Zapien, department secretary; Sonia Neidigh, Physician Assistant Program; Arthur Marshak and David Lopez, both with the Respiratory Care Program; Kenrick Bourne, Physician Assistant Program director; Bob Wilkins, department chair; (bottom row): Bud Spearman and Dave Stanton, Respiratory Care Program; Ehren Ngo, Emergency Medical Care Program—all enjoying the Loma Linda countryside.

RESPIRATORY CARE—Bachelor of Science

Loma Linda University offers two Bachelor of Science degree programs in respiratory care. The first program is for students with no previous education in respiratory care, who have completed program prerequisites listed in the program below.

THE PROGRAM

The two-year, upper-division program leading to the Bachelor of Science degree is a sequence of professional course work intended to prepare competent respiratory therapists with advanced abilities in clinical care. Course work may be designed toward meeting entrance requirements for the dentistry, medicine, and physician assistant programs.

THE PROGRAM OBJECTIVES

Upon completion of the program, the graduate should:

1. Collect and review pertinent clinical information and suggest and implement diagnostic procedures according to age-specific criteria.
2. Select, obtain, assemble, maintain, and correct malfunctions on all respiratory therapy equipment.
3. Administer medications via aerosol, subcutaneous, and other appropriate routes of delivery, according to age-specific criteria.
4. Apply current and advanced respiratory care concepts and treatment plans in the areas of ventilatory support systems (invasive and non-invasive), medical gas therapy, gas-exchange therapy, airway care, and advanced resuscitation techniques, according to age-specific criteria.
5. Assist the physician in the performance of all diagnostic or therapeutic procedures related to cardiopulmonary function.
6. Function as an efficient member of the interdisciplinary team.
7. Demonstrate advanced knowledge and clinical skill in specialty areas selected from the following list:
 - Neonatal/pediatric critical care
 - Adult critical care
 - Cardiopulmonary diagnostics
 - Hyperbaric medicine
 - Sleep disorders medicine
 - Cardiopulmonary rehabilitation
 - Extended care

ADMISSION

Prerequisites for Respiratory Care, B.S.

20 units minimum in humanities (choose minimum of two areas from: history, literature, philosophy, foreign language, art/music appreciation or art/music history)

Religion required, 4 units per year of attendance at a Seventh-day Adventist college

Human anatomy and physiology with laboratories, complete sequence; **or** general biology with laboratories, complete sequence; **or** general zoology with laboratories, complete sequence

Microbiology with laboratory

Introductory chemistry with laboratories, complete sequence; **or** general chemistry with laboratories, complete sequence

High school-level physics **or** introductory physics, one quarter/semester in college; **or** general physics, one quarter/semester in college

Two years high school mathematics with grades of C or above **or** intermediate algebra in college

General psychology **or** sociology

Cultural anthropology **or** an approved course dealing with cultural diversity

Select 4 more quarter units from sociology, economics, geography, political science, psychology

English composition, complete sequence

Speech

Computers

Personal health **or** nutrition

Two physical education courses

Electives to meet minimum total requirements of 96 quarter units

For total unit requirements for graduation, see **Division of General Studies, LLU GENERAL EDUCATION REQUIREMENTS** (section V).

AHCJ	465	Seminars in Leadership	2
AHCJ	498	Portfolio Practicum II	1
EMMC	315	Cardiology	3
RELE	457	Christian Ethics and Health Care	2
REL_	___	Religion elective	2
REL_	___	Religion elective	2

A minimum of 192 quarter units are required for the Bachelor of Science degree in respiratory care.

RESPIRATORY CARE—Post-Professional Bachelor of Science

Loma Linda University offers two Bachelor of Science degree programs in respiratory care. The second program is for students who have an Associate in Science degree in respiratory care from a CAAHEP-accredited respiratory care program and who wish to earn a Bachelor of Science degree in respiratory care. This program is designated the Post-Professional Bachelor of Science degree in respiratory care.

THE PROGRAM

The two-year, upper-division program leading to the Bachelor of Science degree is a sequence of professional course work intended to graduate individuals who have acquired advanced knowledge in the respiratory care profession, including assessment, therapeutic interventions, and management of patients with cardiopulmonary-related disorders; and who uphold the standards of the mission and goals of the School of Allied Health Professions.

THE PROGRAM GOALS

1. To provide therapists to the respiratory care and medical communities who have advanced post-professional training in cardiopulmonary care and fundamental knowledge in the areas of leadership and education.
2. To provide an undergraduate program for two-year-level respiratory therapists that enhances and broadens their knowledge in cardiopulmonary health care sciences and general studies, and allows progression into graduate programs.

THE PROGRAM OBJECTIVES

Upon completion of the program, the graduate should:

1. Apply fundamental and advanced adult, pediatric, and neonatal respiratory care concepts and treatment plans in the areas of pathophysiology, diagnostics and advanced interventions, gas exchange therapy, medical gas therapy, airway care, and ventilatory support systems (invasive and noninvasive).
2. Apply problem-solving skills in the areas of advanced pulmonary physiology, related diagnostics, and comprehensive pulmonary rehabilitation programs.
3. Perform fundamental and advanced patient assessment and diagnostic skills for various cardiopulmonary diseases.
4. Develop fundamental skills to conduct and interpret research in the health care arena.
5. Develop fundamental skills in leadership.
6. Develop fundamental skills in topic presentation to the health care profession and patient-care community, using appropriate lecture and demonstration techniques.

7. Develop advanced practitioner competency in specialty cardiopulmonary care areas of the student's choice (subject to availability).
8. Enter graduate-level programs.

ADMISSION

To be eligible for admission, the applicant must (a) be a graduate of a CAAHEP-approved or provisionally approved, or CAHEA approved advanced practitioner associate degree (or the equivalent) program in respiratory care; (b) complete the subject requirements noted as prerequisites (students who have not completed these requirements may be accepted on a provisional basis); and, (c) arrange for an interview at the University by appointment (an offcampus interview can usually be arranged for the distant student).

Prerequisites for Respiratory Care, Post-Professional B.S.

Human anatomy and physiology with laboratories, complete sequence; **or** general biology with laboratories, complete sequence; **or** general zoology with laboratories, complete sequence

Microbiology with laboratory

Introductory chemistry with laboratories, complete sequence; **or** general chemistry with laboratories, complete sequence

High school-level physics; **or** introductory physics, one quarter/semester in college; **or** general physics, one quarter/semester in college

Two years high school mathematics with grades of C or above **or** intermediate algebra in college

General psychology **or** sociology

Cultural anthropology **or** an approved course dealing with cultural diversity

English composition, complete sequence

Speech

Computers

Personal health **or** nutrition

Two physical education courses

Electives to meet minimum total requirements of 96 quarter units

For total unit requirements for graduation, see Division of General Studies, LLU GENERAL EDUCATION REQUIREMENTS (section V).

**PROGRAM OF INSTRUCTION
POST-PROFESSIONAL B.S. DEGREE IN RESPIRATORY CARE—
CORE COURSES**

RSTH 301	Advanced Respiratory Therapy Science	3
RSTH 311	Advanced Neonatal Respiratory Care	3

	Electives	2-4

Respiratory care affiliations to be selected from the following areas, in consultation with the program director:
adult critical care; cardiopulmonary specialties; pediatric/neonatal; polysomnography;
rehabilitation/patient education; research; special procedures (bronchoscopy and hyperbaric oxygen therapy)

Credit may be given for professional clinical experience and advanced certification, subject to evaluation by the program director.

Prerequisite: AHCJ 461, RSTH 315 completed or taken concurrently; licensed by the state of California as a respiratory care practitioner.

Post-professional respiratory care students, Kelly Thompson and Pablo Bracho, practice ventilation technique on a mannequin head.

EMERGENCY MEDICAL CARE—Progression Bachelor of Science; Bachelor of Science

THE PROGRAM

The two- to three-year, upper-division program leading to the Bachelor of Science degree is a sequence of additional professional course work intended to prepare emergency medical care (EMC) providers for positions in education, management, or advanced clinical practice. Course work may be applied toward meeting entrance requirements for dentistry, medicine, and other graduate programs.

Those electing to study on a part-time basis must complete the junior and senior years within a four-year period. Students new to the profession should be employed a minimum of sixteen hours per week in an emergency medical care-related position in order to gain the most from the program.

The EMC program uses distance education technology in the offering of its courses. Courses in the program are offered in different formats:

- two-way audio and video,
- web-based, and
- traditional lecture format.

The format in which any particular course is taught is selected based on content and teaching style believed to be most effective in conveying knowledge to the learner.

THE PROGRAM OBJECTIVES

Upon completion of the program the graduate should be qualified to:

1. Demonstrate leadership skills through advanced and multi-level thinking, providing options and alternatives for the care of patients.
2. Demonstrate leadership in the emergency medical care field by sharing the knowledge attained through the EMC program with members of other professional disciplines.
3. Develop and refine critical thinking skills to enhance ability to analyze and develop the most effective means of caring for patients.
4. Compare and contrast the different disciplines of prehospital health care providers that contribute to emergency medical care.
5. Differentiate the different areas of a Level I trauma center and the significance each area of the hospital has in the care of a critical patient.
6. Effectively modify practice within the discipline, using the knowledge learned in the emergency medical care program.
7. Progress to medical, dental, or other graduate programs.

ADMISSION

To be eligible for the junior year of the EMC program, applicants to both the Loma Linda University campus and the Loma Linda University at Fresno campus must (a) be an EMT*, paramedic, registered nurse, or respiratory therapist; (b) complete the subject requirements listed as prerequisites (students who have not completed these requirements may be accepted on a provisional basis); (c) arrange for an interview at the University by appointment.

All applicants to the EMC program must satisfactorily complete a (1) writing sample, (2) defining issues test, and (3) mathematics sample. Students must achieve a satisfactory score on their writing and mathematics samples prior to starting the second half of professional course work.

*An emergency medical technician (EMT) must also have completed the following prerequisites before being considered: a year of work experience and certification in ACLS.

Prerequisites for Emergency Medical Care, B.S.

20 units minimum in humanities (choose minimum of two areas from: history, literature, philosophy, foreign language, art/music appreciation/history)

Religion required, 4 units per year of attendance at a Seventh-day Adventist college or university

Human anatomy and physiology with laboratories, complete sequence

Microbiology with laboratory

Chemistry one quarter **or** semester, with laboratory

Introductory physics with laboratory, one quarter; **or** high school physics

*Two years high school mathematics with grades of C or above **or** intermediate algebra in college

*General psychology

Cultural anthropology **or** an approved course dealing with cultural diversity

Select 4 more quarter units from sociology, economics, geography, political science, psychology

*English composition, complete sequence

Computers (high school or college)

Personal health **or** nutrition

Two physical education courses

Electives to meet minimum total requirements of 96 quarter units

To be eligible for the junior year of this program, the student must be an EMT, paramedic, RN, or respiratory therapist and must complete the prerequisites listed above.

*denotes EMC Progression Program prerequisites

For total unit requirements for graduation, see Division of General Studies, LLU GENERAL EDUCATION REQUIREMENTS (section V).

COMPUTER REQUIREMENT

The EMC program faculty are proud to be on the cutting edge in using distant-education technology to facilitate teaching their course work. This technology, however, requires that all prospective students applying for the EMC program have access to a computer with Internet capabilities by the time they actually begin the program. The EMC program and its faculty will not be responsible for course work not completed due an inability to access a computer. Specific computer hardware specifications may be obtained from the cardiopulmonary department secretary.

PORTFOLIO REQUIREMENT

In addition to the requirements listed under "Program of Instruction," students accepted into the EMC program must maintain a working portfolio. The exact details of this requirement will be explained to the student during the initial orientation meeting.

Devoted to their chosen field, this group of Emergency Medical Care Program students includes Robert Inzunza, Pablo Fernandez, Timothy Nakamura, Ehren Ngo (clinical director), Kimberly Condit, Glen Kuck (program director), David Oleson, Nicole Holthaus, Fredy Simandjuntak, Mariko Kimura, Michael Voskanian, Julie Richter, Robert Herman, and Michelle Samson.

PROGRAM OF INSTRUCTION

EMERGENCY MEDICAL CARE—Bachelor of Science core

EMMC 204	Introduction to Theories of Emergency Medical Services	2
EMMC 207	Introduction to Cardiopulmonary Therapeutics	2
EMMC 224	Fundamentals of Personal and Professional Development	2
EMMC 308	Pharmacology	2
EMMC 314	Introduction to 12-Lead ECG Interpretation	1
EMMC 315	Cardiology	3
EMMC 316	12-Lead ECG Interpretation	2
EMMC 321	Theories of Emergency Medical Services	2
EMMC 325	Current Issues in Emergency Medical Care	2
EMMC 351	Neonatal Resuscitation	1
EMMC 355	Perinatal Emergencies	2
EMMC 405	Trauma and Surgical Care	2
EMMC 415	Pediatric Emergency Care	2
EMMC 421-423	Emergency Medical Practicum I, II, III	1, 1, 1
EMMC 431	Emergency Case Studies	2
EMMC 435	Disasters, WMD, and Terrorism	2
EMMC 444	Diversity in EMS	2
EMMC 484	Legal Issues in Health Care	2
RTCH 464	Moral Leadership	2
RTCH 470	Curriculum Development in Health Sciences	2
RSTH 411	Advanced Cardiac Life Support	2
RSTH 457	Physical Diagnosis I	2
RSTH 462, 463	Management Practicum I, II	2, 2
RSTH 471	Instructional Techniques I	2
AHCJ 305	HIV/AIDS and the Health Provider	1
AHCJ 324	Psycho-Social Models and Interventions	2
AHCJ 328	Portfolio Practicum I	1
AHCJ 351	Statistics for the Health Professions	3
AHCJ 402, 403	Pathology I, II	4, 4
AHCJ 461	Research Methods	2-3
AHCJ 465	Seminars in Leadership	2
AHCJ 498	Portfolio Practicum II	1
RELE 457	Christian Ethics and Health Care	3
RELF 406	SDA Beliefs	2
RELF 416	God and Human Suffering	3

PHYSICIAN ASSISTANT—Master of Physician Assistant

Physician assistants (PAs) are health professionals licensed to practice medicine under physician supervision. Physician assistants are qualified by graduation from an accredited physician assistant educational program and certification by the National Commission on Certification of Physician Assistants. Within the physician/PA relationship, PAs exercise autonomy in medical decision making and provide a broad range of diagnostic and therapeutic services. The clinical role of PAs includes primary and specialty care in medical and surgical settings in rural and urban areas. PA practice is centered on patient care and may also include educational, research, and administrative activities.

THE PROGRAM

Loma Linda University offers a professional course of study leading to a Master of Physician Assistant (M.P.A.) degree. The program consists of an eleven-month didactic phase that provides a foundation of biological, behavioral, and medical sciences. This is followed by a twelve-month clinical phase of clerkships in a variety of medical specialties that are designed to provide diverse and intensive patient-care experience. Graduate physician assistants are professionals trained to be able to participate as members of a health care team. They are prepared to manage common health care needs typically encountered in primary-care settings.

Accreditation

The Physician Assistant Program was granted professional accreditation by the Commission on accreditation of Allied Health Education Programs (CAAHEP) on October 20, 2000. Effective January 1, 2001 CAAHEP was succeeded by the Accreditation Review Commission on Education for the Physician Assistant (ARC-PA).

THE PROGRAM OBJECTIVES

Upon completion of the program, the graduate will be qualified to:

1. Obtain detailed and accurate patient histories.
2. Perform appropriate physical examinations.
3. Evaluate patients and make diagnoses.
4. Order, perform, and interpret diagnostic tests.
5. Order and perform selected therapeutic procedures.
6. Develop, implement, and monitor patient-management plans.
7. Develop skills in orally presenting patient data.
8. Provide continuity of patient care.
9. Assist in surgical procedures.
10. Evaluate and perform life-saving procedures in emergent situations.
11. Counsel and instruct patients regarding issues of health care management, mental

health, therapeutic regimens, normal growth and development, and family planning.

12. Refer patients to pertinent health/mental/social service agencies in the community.
13. Write drug orders.
14. Conduct a medical literature search.
15. Conduct an investigation of a medical, health, or psycho-social topic; perform a statistical evaluation; and present data in appropriate oral and written formats.

ADMISSION

The following are the criteria for admission to the Master of Physician Assistant program:

1. Completion of a baccalaureate degree in a health care field; **or** a baccalaureate degree in any field of study **plus** an associate degree in a health care field. All degrees must be from accredited institutions.
2. One year (2000 hours) of documented patient-care experience preferred, but not required, prior to admission into the program.
3. Cumulative G.P.A. of at least 3.0 on a 4.0 scale for all college work.
4. G.P.A. of 3.0 on a 4.0 scale for all science courses completed.
5. Three letters of recommendation (including one from an osteopath or one from a physician or physician assistant).
6. Autobiographical sketch (one-to-three double spaced, typed pages).
7. Selected applicants will be invited for an interview prior to acceptance into the program.
8. Preference for admission will be given to applicants who meet one or more of the following criteria: Seventh-day Adventists, graduates of Loma Linda University, applicants from underrepresented populations, those with past clinical experience, and those with proven community-service linkages.

Prerequisites for Physician Assistant, M.P.A.

Applicants must have a baccalaureate degree. A baccalaureate degree in a health-related field is preferred. An associate degree in a health-related field with a baccalaureate degree in any field is acceptable. All degrees must be from accredited institutions.

Religion required, 4 units per year of attendance at a Seventh-day Adventist college or university

College-level prerequisite courses

General psychology

English

Introductory chemistry with laboratory (complete sequence—organic, inorganic, and biochemistry); or general chemistry

Human anatomy and physiology with laboratory (complete sequence)

Microbiology with lab

Introductory physics with lab (complete sequence)

Sociology or cultural anthropology

College algebra

General statistics highly recommended

Lisa Vanegas-Diaz (student) performs an examination on the ear of Kathy Rabago (student)—under the watchful supervision of Sonia Neidigh (Physician Assistant Program didactic coordinator).

PROGRAM OF INSTRUCTION

PHYSICIAN ASSISTANT—Master of Physician Assistant

The program of instruction outlined as follows is for students enrolled during the 2001-2002 academic year.

FIRST QUARTER (AUTUMN)

PAST 401	Anatomy and Physiology I	3
PAST 404	Biochemistry for Physician Assistants	3
PAST 503	Physical Diagnosis	4
PAST 511	PA Professional Issues I	1
PAST 509	Behavioral Science for PAs	3
PAST 507	Preventive Medicine Concepts	2
AHCJ 305	HIV/AIDS and the Health Provider	1
AHCJ 519	Graduate Portfolio	1

SECOND QUARTER (WINTER)

PAST 402	Anatomy and Physiology II	3
PAST 406	Clinical Laboratory	2
PAST 411	Pathology for Physician Assistants I	3
PAST 501	Clinical Medicine for Physician Assistants I	4
PAST 521	Research I	3
PAST 508	Interpretation of EKGs	1
HPRO 443	Writing for Publication	2

THIRD QUARTER (SPRING)

PAST 403	Anatomy and Physiology III	3
PAST 412	Pathology for Physician Assistants II	3
PAST 405	Pharmacology for Physician Assistantss	3
PAST 502	Clinical Medicine for Physician Assistants II	4
PAST 512	Physician Assistant Professional Issues II	1
PAST 522	Research II	2
RELE 505	Clinical Ethics	3

FOURTH QUARTER (SUMMER)

PAST 504	Primary Care Pediatrics	2
PAST 505	Women's Health Care	2
PAST 506	Clinical Skills for Physician Assistants	2
PAST 5__	Clinical Rotations	4

FIFTH QUARTER (AUTUMN)

PAST 5__	Clinical Rotations	4
PAST 5__	Clinical Rotations	4
PAST 5__	Clinical Rotations	4
PAST 513	Physician Assistant Professional Issues III	1

SIXTH QUARTER (WINTER)

PAST 5__	Clinical Rotations	4
PAST 5__	Clinical Rotations	4
PAST 5__	Clinical Rotations	4
PAST 523	Research III	2

SEVENTH QUARTER (SPRING)

PAST 5__	Clinical Rotations	4
PAST 5__	Clinical Rotations	4
PAST 5__	Clinical Rotations	4
AHCJ 519	Graduate Portfolio (in progress)	

EIGHTH QUARTER (SUMMER)#

PAST 5__	Clinical Rotations	4
PAST 5__	Clinical Rotations	4

#Presentation of research projects is done in this quarter.

SURGICAL TECHNOLOGY—Associate in Science

Surgical technologists are an integral part of the surgical team—working closely with surgeons, anesthesiologists, registered nurses, and other surgical personnel delivering patient care and assuming appropriate responsibilities before, during, and after surgery.

The specialty of surgical technology is rapidly growing in hospital operating rooms and in outpatient surgery centers, as well as in a variety of settings that call for a sterile field, such as physicians' private-practice offices.

Surgical technology professionals facilitate the surgery process by anticipating the needs of the surgeons, passing instruments, and providing sterile items in an efficient manner. Along with the circulator, they share responsibility for accounting for sponges, needles, and instruments before, during, and after surgery. They may hold retractors or instruments, sponge or suction the operative site, or cut suture materials as directed by the surgeon.

PROFESSIONAL CERTIFICATION

The Liaison Council on Certification for the Surgical Technologist (LCC-ST)—7108-C South Alton Way, Englewood, CO 80112-2106—provides the national certifying examination for graduates of CAAHEP-approved programs in surgical technology. Graduates who pass the LCC-ST examination are recognized by the council as certified surgical technologists (CST) or as certified first assistants (CFA).

PROFESSIONAL ASSOCIATION

The Association of Surgical Technologists (AST) is the professional organization of the surgical technologist. The AST's primary concern is ensuring that surgical technologists are educationally qualified to provide quality patient care. The AST is also concerned with representing the interests of the profession in the legislative and regulatory arenas and in communicating information on the profession to the public and to the health care industry.

The Association of Surgical Technologists encourages both students and graduates to become members and participate in national and local chapter meetings. The AST's aim is to foster professional growth, encourage education, and provide services and representation for its members. For further information, contact the national office, 7108-C South Alton Way, Englewood, CO 80112-2106.

THE PROGRAM

The program in surgical technology, leading to the Associate in Science degree, is based on one year of prerequisites completed at any accredited college or university.

The four quarters of course work at Loma Linda University begin with the Autumn Quarter of the sophomore year. The program also includes clinical experience at Loma Linda University Medical Center facilities and affiliated hospitals.

Accreditation

The Associate in Science degree program is accredited by the Commission on Accreditation of Allied Health Education Programs (CAAHEP) in collaboration with the Accreditation Review Committee on Education in Surgical Technology (ARC-ST).

THE PROGRAM OBJECTIVES

Upon completion of the program, the graduate should:

1. Demonstrate competence as a surgical technologist.
2. Pass the LCC-ST examination.
3. Comprehend and apply the knowledge and skills related to the performance of the duties of a surgical technologist.
4. Demonstrate behaviors consistent with health professionals in their duties as a surgical technologist.
5. Relate in an ethical manner to other members of the surgical health care team.
6. Maintain patient records and communicate relevant information to other members of the health team.

PROGRAM OF INSTRUCTION

SURGICAL TECHNOLOGY—Associate in Science

The program of instruction outlined as follows is for students enrolled during the 2001-2002 academic year.

SOPHOMORE YEAR

SGTH	205	Surgical Instrumentation	3
SGTH	221-223	Surgical Preparation I, II, III	4, 4, 4
SGTH	231, 232	Surgical Care Fundamentals I, II	4, 3
SGTH	241, 242	Surgical Procedures I, II	4, 4
SGTH	278	Seminar in Surgical Technology	2
SGTH	291-294	Surgical Technology Clinical Practicum I, II, III, IV	2, 2, 4, 5
SGTH	299	Student Project	2
SGTH	225	Pharmacology for Surgical Technology	2
AHCJ	305	HIV/AIDS and the Health Provider	1
AHCJ	311	Medical Terminology	2
AHCJ	326	Patient Care Methods	2
AHCJ	328	Portfolio Practicum I	1
RELE	457	Christian Ethics and Health Care	2
REL	—	Religion elective	2

A minimum grade of C (2.0) is required for all courses in the program.

ADMISSION

To be eligible for admission, the applicant must have completed a minimum of 48 quarter units (32 semester units) units at an accredited college or university.

Prerequisites for Surgical Technology, A.S.

The minimum subject requirements in quarter units are:

Religion required, 4 units per year of attendance at a Seventh-day Adventist college

Human anatomy and physiology with laboratories, complete sequence

Microbiology with laboratory

Two years high school mathematics with grades of C (2.0) or above **or** intermediate algebra in college

General psychology **or** sociology

English composition, complete sequence

Speech

Electives to meet requirements of 48 quarter units

Recommended

Introductory chemistry with laboratories, complete sequence; **or** one year high school chemistry plus college organic plus biochemistry

Observation experience

Observation experience is recommended.

COURSES

For information about units of credit and course numbers, see the beginning of section III of this BULLETIN.

RSTH 301, 302, 303 Advanced Respiratory Therapy Science I, II, III (3, 3, 2)

Comprehensive review of patient-care techniques. In-depth presentation and discussion of clinical application of respiratory therapy devices and their influences on patient care. Reports and discussions of current and advanced developments. Designed to integrate experience with current concepts and to develop logical courses for proper equipment and technique application for specific patient care. Co-listed with RSTH 441. (Not taught every year.)

Prerequisite: Junior standing or consent of the department chair.

RSTH 304 Cardiopulmonary Anatomy and Physiology (4)

Anatomic and physiologic components of the cardiovascular and respiratory systems investigated. Emphasis on histology, embryology, diffusion, gases transported in the blood, acid-base balance, lung volumes and capacities, mechanics of ventilation, ventilation-perfusion relationships, regulation of respiration, cardiac cell-membrane action potentials, and excitation-contraction coupling.

RSTH 311 Advanced Neonatal Respiratory Care (3)

Neonatal and fetal physiology, diseases, and therapeutic interventions. Emphasis on neonatal respiratory care. Review of current research related to high-frequency ventilation, extracorporeal membrane oxygenation, and surfactant therapy.

RSTH 323 Pulmonary Function Methodology II (3)

Evaluation of pulmonary function in health and disease through spirometry, plethysmography, helium dilution, nitrogen washout, single-breath nitrogen, volume of isoflow, and diffusing capacity studies, including blood-gas instrumentation, quality control, quality assurance, and current ATS standards. Lecture and laboratory.

RSTH 331, 332 Pharmacology I, II (2, 2)

Survey of pharmacologic agents currently used in medicine, including their kinetics, dynamics, and therapeutics. Special emphasis given to drugs and their effects on the respiratory, cardiovascular, and autonomic nervous systems. Topics include the bronchodilators, anti-inflammatory agents, mucokinetic agents, cardiovascular agents, diuretics, antimicrobials, neuromuscular agents, and agents used to treat nicotine dependence.

RSTH 334 Patient Assessment (2)

General introduction to the clinical setting. Assessment and evaluation of the patient with respiratory disease. Development of clinical practice habits and patient-care techniques. Student must obtain current cardiopulmonary resuscitation (CPR) certification from the American Heart Association before the end of the term.

Corequisite: RSTH 341.

RSTH 341 Respiratory Therapy Science I (5)

Basic principles of respiratory therapy, as related to gas physics; medical-gas storage and therapy; and administration of humidity, aerosol and airway pressure therapies, artificial airways, and resuscitation devices. Emphasis on methods of administration of the therapy, with special attention placed on the equipment used, as well as the application of this information to the clinical setting.

RSTH 342 Respiratory Therapy Science II (5)

Lecture and laboratory presentation of the principles of respiratory therapy related to lung-inflation therapy; use of artificial airways, and their care and complications. Introduction to mechanical ventilatory support, including beginning ventilators, support systems, comparison of methods, and respiratory monitoring. Emphasis on application of this information to the clinical setting.

Prerequisite: RSTH 341.

RSTH 343 Respiratory Therapy Science III (4)

Lecture and laboratory presentation of the principles of respiratory therapy related to mechanical ventilatory support, including patient management and ventilatory support systems. Emphasis on methods of ventilatory support, with special attention to the mechanical ventilators commonly used in the students' clinical sites. Application of this information to the clinical setting.

Prerequisite: RSTH 341, 342.

RSTH 354 Case Studies in Adult Respiratory Care (2)

Adult critical-care concepts presented through a case-study approach. Respiratory care plan used to present diseases, treatment, and procedures relevant to respiratory care. Patient rounds further develop critical-thinking skills in a patient-care setting.

Prerequisite: RSTH 381.

RSTH 366 Diagnostic Techniques (2)

Continues the clinical use of diagnostic tests and procedures. Emphasis on evaluation of chest radiographs and monitoring hemodynamics.

Prerequisites: RSTH 304, 331.

RSTH 381, 382 Cardiopulmonary Diseases I, II (2, 2)

Comprehensive study of cardiopulmonary diseases and their adverse effects. Course content includes disease etiology, pathology, pathophysiology, clinical features, prognosis, treatment, and prevention.

Prerequisite: RSTH 304, 331, 341.

Corequisite: RSTH 323, 332, 342, 366.

RSTH 391 Respiratory Care Practicum I (2)

General introduction to the clinical setting; assessment of patients with respiratory disease. Development of work habits and patient-care techniques. Students must obtain current cardiopulmonary resuscitation (CPR) certification from the American Heart Association before the end of the quarter.

Prerequisite: RSTH 341.

Concurrent: RSTH 342.

RSTH 392 Respiratory Care Practicum II (2)

Application of specific therapeutic techniques, including oxygen and humidity therapy, aerosol therapy, airway management, lung-inflation techniques, and chest physiotherapy.

Prerequisite: RSTH 341, 391; AHA CPR certification.
Concurrent: RSTH 342, 381.

RSTH 393 Respiratory Care Practicum III (4)

Therapeutic techniques applied in continuous mechanical ventilation; special procedures, operation and post-anesthesia room, and arterial blood-gas laboratory.

Prerequisite: RSTH 343, 381, 392.
Corequisite: RSTH 382, 404.

RSTH 401 Cardiopulmonary Intensive Care (2-4)

Management of the patient with cardiopulmonary failure. Theory and capabilities of various life-support and monitoring systems.

Prerequisite: Senior standing or consent of instructor.

RSTH 404 Critical Care (4)

Continues the theory, practice, and knowledge of mechanical ventilation—providing an integrated approach to respiratory care in the critical-care arena. A systems-based approach used to incorporate respiratory care concepts such as planning and implementing of protocols, best practice guidelines, etc. Presentations, projects, and critical evaluation used to increase critical-thinking skills and patient-care skills.

Prerequisite: RSTH 354.

RSTH 411 Advanced Cardiac Life Support (2)

Principles and techniques of advanced emergency cardiac care: review of basic CPR, endotracheal intubation, and the use of airway adjuncts. Monitoring and dysrhythmia recognition. Essential and useful drugs for cardiac life support. Intravenous techniques. Appropriate use of devices for elective cardioversion or defibrillation, stabilization, and transportation. Use of circulatory adjuncts. Acid-base balance, drug therapy, and therapeutic interventions.

RSTH 421 Perinatal and Pediatric Respiratory Care (2)

Fetal development and circulation. Prenatal risk factors. Newborn resuscitation; newborn and pediatric assessment. Etiology, pathophysiology, course, treatment, and outcome of respiratory diseases as they relate to problems in pediatrics and neonatology. Discussion of ECMO, high-frequency ventilation, and nitric oxide.

Prerequisite: RSTH 304, 331.

RSTH 422 Advanced Perinatal and Pediatric Respiratory Care (2)

Pathophysiology of newborn and pediatric diseases that are likely to be encountered by the respiratory-care practitioner. Perinatal risk factors, resuscitation, and research on the transition to extrauterine life. Diagnostics, monitoring of clinical indices, and treatments used in perinatal/pediatric respiratory care. Advanced information on surfactant, high-frequency ventilation, and ECMO.

RSTH 424 Exercise Physiology and Pulmonary Rehabilitation (3)

Metabolism of carbohydrates, lipids, and proteins in energy production, oxygen consumption, carbon dioxide production, and respiratory quotient applied to measurable counterparts of oxygen uptake, carbon dioxide output, and respiratory exchange ratio at rest and during exercise. Metabolic studies, body-fat composition, exercise studies, and malnutrition in chronic obstructive pulmonary disease utilized as a foundation for evaluation and implementation of pulmonary rehabilitation program. Rehabilitation components include team assessment, patient training, exercise, psychosocial intervention, and follow-up.

Prerequisite: RSTH 323.

RSTH 434 Advanced Patient Assessment (2)

Advanced skills in interviewing, physical examination, and interpretation of laboratory data. Lecture, reading material, and physical-examination procedures. Provides insight for better interview and examination of patients with cardiopulmonary disease. Increases understanding of the pathophysiology behind the symptoms.

RSTH 441 Respiratory Therapy Science IV (3)

In-depth presentation and discussion of the clinical application of respiratory therapy devices and their influences on patient care. Reports and discussions of current and advanced developments. Emphasis on the application of this information to the clinical setting. Co-listed with RSTH 301. (Not taught every year.)

Prerequisite: RSTH 341, 342, 343; or permission of instructor.

RSTH 444 Case Studies in Neonatal/Pediatric Respiratory Care (2)

Development of respiratory care-management skills of the neonatal and pediatric patient through the presentation of student case studies. Clinical staff and faculty review current management of the newborn, infant, and child. Students present patients and explain implications of care. Assistance in presentation skills.

Prerequisite: RSTH 421.

RSTH 451 Respiratory Care Affiliation I (2)

General care, basic critical care, and advanced critical care in the adult, pediatric, and neonatal setting as practiced at LLUMC. Open to students who are now, or have been recently, employed by LLUMC.

Prerequisite: CA RCP licensure.

RSTH 452 Respiratory Care Affiliation II (2)

Specialty clinical assignments selected from the following areas: adult critical care, cardiopulmonary specialties, pediatrics and neonates, polysomnography, rehabilitation and patient education, research, and special procedures. Limited to students in the post-professional B.S. degree program in respiratory care.

Prerequisite: AHJC 461; RSTH 422; CA RCP licensure.

RSTH 453 Respiratory Care Affiliation III (2)

Specialty clinical assignments selected from the following areas: adult critical care, cardiopulmonary specialties, pediatrics and neonates, polysomnography, rehabilitation and patient education, research, and special procedures. Limited to students in the post-professional B.S. degree program in respiratory care.

Prerequisite: AHJC 461; RSTH 452; CA RCP licensure.

RSTH 454 Respiratory Care Affiliation IV (2)

Specialty clinical assignments selected from the following areas: adult critical care, cardiopulmonary specialties, pediatrics and neonates, polysomnography, rehabilitation and patient education, research, and special procedures. Limited to students in the post-professional B.S. degree program in respiratory care.

Prerequisite: AHCJ 461; RSTH 452; CA RCP licensure.

RSTH 455 Respiratory Care Affiliation V (2)

Specialty clinical assignments selected from the following areas: adult critical care, cardiopulmonary specialties, pediatrics and neonates, polysomnography, rehabilitation and patient education, research, and special procedures. Limited to students in the post-professional B.S. degree program in respiratory care.

Prerequisite: AHCJ 461; RSTH 452; CA RCP licensure.

RSTH 457 Physical Diagnosis I (2)

Systematic review of bedside assessment techniques utilized in the care of patients with respiratory disease. Student presentations and discussions of selected cases that involve diagnostic and therapeutic modalities of particular interest to respiratory therapists. (Three [3] units required for B.S. degree in respiratory therapy.)

RSTH 458 Physical Diagnosis II (1)

Continued discussion of clinical assessment techniques and interpretation of findings in patients with cardiopulmonary disease. Emphasis on use of laboratory tests, chest radiographs, arterial blood gases, and other tests used to evaluate the patient. Lecture, reading, and discussion of case studies.

RSTH 462, 463 Management Practicum II, III (2, 2)

Experience in management of respiratory or emergency medical-care management. Clinical application of the theoretical management skills developed during the didactic portions of the training.

RSTH 464 Case Management in Respiratory Care (2)

A case management approach to patient care utilized in the management and evaluation of treatment and disease. Special emphasis on case management of the respiratory care patient includes discharge planning, utilization review, patient assessment, cost containment, patient education, and integration issues.

Prerequisite: RSTH 334, 424, 434.

RSTH 466 Advanced Diagnostic Techniques I (2)

Advanced diagnostic theory and practice in the following areas: Holter monitoring, echocardiography, bronchoscopy, sleep studies, and other relevant respiratory care diagnostics.

Prerequisite: RSTH 366.

RSTH 471, 472, 473 Instructional Techniques I, II, III (2, 2, 2)

Development of units of instruction, instructional objectives, and evaluation procedures. Observation and participation in classroom management. Application of teaching principles through experience in various teaching activities, such as community preventive health care programs, in-service and continuing education, and college classroom and clinical teaching. Conferences and individual guidance.

Prerequisite: RSTH 471 precedes RSTH 472, 473.

RSTH 474 Cardiopulmonary Health Promotion and Disease Prevention (3)

Discussion of current lifestyle diseases, including cardiopulmonary, metabolic, communicable, and nutritional. Concepts regarding risk factors, screening approaches, and risk reduction—with impact on specific health parameters.

Recommended prerequisite: RSTH 424.

RSTH 481 Research in Cardiopulmonary Sciences (1)

Application of the basic concepts of research specific to cardiopulmonary sciences. Development of a basic research proposal. Strongly recommended that the student complete most of the required core courses before registering for this course.

Prerequisite: AHCJ 351.

Concurrent: AHCJ 461.

RSTH 491, 492, 493 Education Practicum I, II, III (2, 2, 2)

Experience in clinical education, evaluation, and scheduling. Familiarization with hospital affiliation agreements and accreditation issues.

Prerequisite: Must be licensed in California as an RCP.

RSTH 494 Respiratory Care Practicum IV (2)

Development of professional competence and maturity in the clinical setting. Comprehensive training in all aspects of respiratory care, including the pulmonary function laboratory and home care.

Prerequisite: RSTH 343, 382, 393, 404.

RSTH 495 Respiratory Care Practicum V (2)

Specialty training in respiratory care practice. Students rotate to specialized areas of respiratory care, increasing their proficiency and understanding in the following areas: neonatal/pediatric critical care, adult critical care, cardiopulmonary diagnostics, hyperbaric medicine, sleep disorders medicine, cardiopulmonary rehabilitation, and extended care. In addition, students continue their professional development and competency in the general and critical care settings.

Prerequisite: RSTH 404, 494.

RSTH 496 Respiratory Care Practicum VI (3)

Continuation of specialty training in respiratory care practice. Students rotate to specialized areas of respiratory care, increasing their proficiency and understanding in the following areas: neonatal/pediatric critical care, adult critical care, cardiopulmonary diagnostics, hyperbaric medicine, sleep disorders medicine, cardiopulmonary rehabilitation, and extended care. In addition, students continue their professional development and competency in the general and critical care settings.

Prerequisite: RSTH 495.

RSTH 499 Respiratory Therapy Independent Study (.5-2)

Project or paper submitted on a topic of current interest in an area of respiratory therapy. Regular meetings provide student with guidance and evaluation. Elected on the basis of need or interest. The .5 unit of credit designed to offer directed experience in the prevention of AIDS and other communicable diseases in the clinical setting.

EMMC 204 Introduction to Theories of Emergency Medical Services (2)

Introduction to prehospital medical services. Roles and responsibilities of paramedics and EMTs. EMS systems design, constraints, and operating problems. EMS environment and scene issues. Medical-legal issues. History and current state of prehospital care and medical oversight.

EMMC 207 Introduction to Cardiopulmonary Therapeutics (2)

Administration of gases and gas mixtures. Humidity aerosol treatment, oxygen therapy, theory of application of mechanical ventilation, interpretation of arterial blood gases. Description of ventilators and relationship of therapeutic procedures to underlying pathology.

EMMC 224 Fundamentals of Personal and Professional Development (2)

Practical approaches that facilitate personal, academic, and professional growth, including presentations on goal setting, mission statements, time management, and conflict resolution. Provides the student with introductory and advanced concepts in communication skills and information resources that enhance completion of literature reviews and research, including library and internet databases.

EMMC 308 Pharmacology (2)

General overview of pharmacology, including pharmacokinetics, pharmacodynamics, and therapeutics of drugs. Basic definitions, sources of information, classification of drugs, and principles and mechanisms of drug actions. Emphasis on prehospital drug categories.

EMMC 314 Introduction to 12-Lead ECG Interpretation (1)

Development of basic ECG interpretation skills. Focus on anatomy and physiology, underlying pathophysiology, basic rhythm recognition, and overview of related treatments. Special emphasis on skills needed by bedside practitioner to differentiate between benign and life-threatening dysrhythmias.

EMMC 315 Cardiology (3)

Designed to assist the health care provider develop assessment skills and knowledge of medical management of the patient with acute and chronic cardiovascular disorders. Focus on anatomy and physiology, underlying pathophysiology, advanced history taking and physical assessment, cardiovascular pharmacology, electrical modalities, cardiac diagnostic testing, and current research. Special emphasis on the emergency care of patients with myocardial infarction and trauma to the cardiovascular system. Assignment includes interaction with cardiac patients and observation of diagnostic studies in the clinical setting.

EMMC 316 12-Lead ECG Interpretation (2)

Designed for health care providers who are familiar with basic ECG monitoring and are seeking to learn principles of application and interpretation of the 12-lead system. Special emphasis on recognition of the acute myocardial infarction. Additional topics include identifying: axis deviation, acute ischemic conditions, electrolyte imbalances, bundle-branch block, and infarct impostors. Practical application of information to bedside care of cardiac patients, with emphasis on patient assessment, data collection, and use of the 12-lead to guide rapid intervention. Certificate issued upon successful completion of the course.

Prerequisite: Successful completion of a basic ECG interpretation examination.

EMMC 321 Theories of Emergency Medical Services (2)

Investigation of the dimensions of emergency medical services. Influence of environment on oxygen delivery. Development of paradigms for EMS. Decision making in the constrained environment. Stress models and role theories. Discussion of EMS as sequential environments from public health to critical care.

EMMC 325 Current Issues in Emergency Medical Care (2)

Seminar-style discussion regarding current issues and controversies in emergency medicine. Issues may include topics such as prehospital use of thrombolytic therapy, managed care, primary-care advanced-scope paramedic practice, etc.

EMMC 351 Neonatal Resuscitation (1)

Neonatal anatomy and physiology. Asphyxia and its effects in the newborn. Intubation, medications, and ventilation techniques. Thermoregulation as it relates to resuscitation of the neonate. Skills laboratory for delivery resuscitation, including megacode.

EMMC 355 Perinatal Emergencies (2)

Infant mortality and social issues related to premature delivery. Maternal evaluation, with emphasis on the imminent delivery. Physiology related to the perinatal time period. Fetal anatomy and physiology. High-risk deliveries. New issues for neonatal diseases.

EMMC 405 Trauma and Surgical Care (2)

Comprehensive review and analysis of topics in the management of cardiothoracic trauma. Description of surgical procedures and outcomes for trauma victim. Principles of care of the patient after stabilization and surgery. Management of surgical emergencies, including the acute abdomen, and chest trauma.

EMMC 415 Pediatric Emergency Care (2)

Comprehensive review regarding care of the child in the emergency medical services system. Tissue-oxygen delivery, physiologic systems dysfunction, trauma, environmental problems, prevention of psychological dysfunction, legal aspects, and special needs of children. Laboratory-skills practice in thoracentesis and chest-tube placement, airway control and intraosseous vascular access.

EMMC 421, 422, 423 Emergency Medicine Practicum I, II, III (1, 1, 1)

Clinical assignments rotating with registered nurses, respiratory therapists, paramedics, and physicians in prehospital, ED, ICU, transport services, X-ray, alternative medicine, labor and delivery, and rehabilitation. Observation of and discussion with residents in cardiac ICU, cardiac diagnostic laboratory, and cardiac failure clinic. Rotations in neurosurgical ICU, medical ICU, and anesthesiology. Clinical hours and rotations tailored to individual needs by the clinical coordinator.

EMMC 431 Emergency Case Studies (2)

Seminar-style discussion on issues critical to emergency medical care. Case studies of the patient in EMS, from initial insult through comprehensive stabilization and disposition. New research in emergency medical care.

EMMC 435 Disasters, WMD, and Terrorism (2)

Introduction to EMS response involving large-scale natural disasters and weapons of mass destruction (WMD). Exploration of prehospital and hospital treatment. Evaluation of current issues facing EMS personnel. Crisis and consequence management, theories of terrorism response, and state and federal resources. Discussion of interagency roles, overview of social and psychological aspects, policy development and the media, comparison of response protocols of disaster versus terrorist incidents.

EMMC 444 Diversity in EMS (2)

A senior level emergency medical care core-curriculum course designed to expose students to specialty areas of EMS that often are overlooked. Includes wilderness medicine; search and rescue; event/mass-gathering medicine; sports medicine; aeromedical EMS; water-rescue and dive EMS; hazardous materials and toxicology; tactical and forensic EMS; catastrophic and disaster EMS; and international EMS.

EMMC 484 Legal Issues in Health Care (2)

Introduction to the legal system as it pertains to health care professionals. Concepts of malpractice, litigation, consent for and refusal of medical treatment, advanced directives, and patient confidentiality. Discussion of employment issues, including discrimination and sexual harassment. Development of health and safety programs per OSHA regulations, risk management, legal issues in vehicle operations and equipment, and EMS and law-enforcement interactions.

Enrollment in PAST courses is limited to Physician Assistant Program students.**PAST 401, 402, 403 Anatomy and Physiology I, II, III (3, 3, 3)**

Gross and microscopic anatomy of the human body. Lecture, laboratory with cadaver dissection, demonstration, and slides. Orientation to structure of various systems of the body.

Prerequisite: Series to be taken in sequence.

PAST 404 Biochemistry for Physician Assistants (3)

Chemistry and metabolism of carbohydrates, lipids, nucleic acids, and proteins. Chemical basis of life processes. Lecture and laboratory demonstrations to support student competency.

PAST 405 Pharmacology for Physician Assistants (3)

Basic concepts of pharmaceuticals used in diagnosis, prevention, and treatment of disease, including a systematic presentation of the pharmacology and the therapeutic value of the drugs used in medicine. Related topics include drug legislation, PDR, routes of administration, pharmacokinetics, pharmacodynamics, adverse effects, drug interactions and drug toxicity, with special consideration of pediatric and geriatric pharmacology. Overview of responsibilities for prescribing and/or dispensing of pharmaceuticals by the physician assistant.

PAST 406 Clinical Laboratory (2)

Provides the physician assistant student with an overview of clinical laboratory procedures and operations. Emphasis on interpretation and clinical significance of commonly ordered laboratory tests. Observation and performance of laboratory testing routinely performed in primary-care offices and hospital laboratories. Lecture and laboratory. Laboratory exposure provided in a clinical laboratory setting.

PAST 411 Pathology for Physician Assistants I (3)

Fundamental mechanisms of disease, including cell injury, inflammation, repair, regeneration, and fibrosis; vascular, cardiac, respiratory, gastrointestinal, hepatobiliary, urinary, reproductive, endocrine, and integumentary pathologies. One hour per week participation in differential diagnosis seminar required.

PAST 412 Pathology for Physician Assistants II (3)

Fundamental mechanisms of disease, including the central and peripheral nervous systems; bones and joints; skeletal muscle, developmental, genetic, infectious and parasitic pathologies, and neoplasia. Two autopsy observations with written report, and one hour per week participation in differential diagnosis seminar required.

PAST 501 Clinical Medicine for Physician Assistants I (4)

Study of common medical and/or surgical disorders encountered in general adult medicine; management of these disorders. Typical clinical presentation, etiology, pathophysiology, and diagnostic work-up.

PAST 502 Clinical Medicine for Physician Assistants II (4)

Introduces the student to a study of common medical and/or surgical disorders encountered in general adult medicine. Course content includes typical clinical presentation, etiology, pathophysiology, diagnostic work-up, and management of medical and/or surgical disorders.

PAST 503 Physical Diagnosis (4)

Lecture, demonstration and practice in the art and science of obtaining a medical history and performing a physical examination.

PAST 504 Primary Care Pediatrics (2)

Introduces the PA student to the common medical and surgical disorders encountered in pediatric medicine. Emphasis on primary-care concepts in the care of children. Introduction to rare disorders that the PA may encounter in primary care. Presentation of disease processes mirrors adult medicine by discussing the etiology, pathophysiology, clinical presentation, diagnostic work-up, and management.

PAST 505 Women's Health Care (2)

Common problems encountered in caring for women; management of these problems. Etiology, pathophysiology, clinical presentation, and diagnostic work-up.

PAST 506 Clinical Skills for Physician Assistants (2)

Introduction to the basic skills and knowledge needed to evaluate and treat common illnesses and injuries. Topics include safety, aseptic technique, BLS, ACLS, wound care, local anesthesia, suturing, casting, splinting, and use of various tubes and drains.

PAST 507 Preventive Medicine Concepts (2)

Selected topics dealing with aspects of disease prevention. Includes the relevance of statistics, epidemiology, research designs, and clinical trials; as well as selected disease trends, lifestyle modification, the role of physical activity, nutrition and immunization, and public health approaches to communicable diseases.

PAST 508 Interpretation of EKGs (1)

Study of the pathophysiology and identification of commonly encountered arrhythmias. Includes lectures, demonstrations, and practice in the interpretation of EKGs.

PAST 509 Behavioral Medicine for Physician Assistants (3)

Instruction in the behavioral science counseling skills necessary to assist patients in dealing with illness and injury; in following prescribed treatment regimens; and in adopting attitudes and behaviors leading to improved health behaviors (including thinking, feeling, and acting).

PAST 511, 512 PA Professional Issues I, II (1, 1)

Designed to acquaint entering students with the history, development, and current status of the PA profession and help him/her formulate an appropriate perception of the PA role. Topics included are: An historical perspective of the PA profession, as well as current trends and issues; the PA's role in health care delivery; political and legal factors that affect PA practice; intraprofessional factors; and the PA's role in relation to physicians and other providers; importance of biomedical ethics and professional responsibilities in relation to their role as health care providers; content relating to PA professional organizations, program accreditation, graduate certification and recertification; employment considerations, and professional liability are included.

PAST 513 Physician Assistant Professional Issues III (1)

Designed to acquaint entering students with the history, development, and current status of the PA profession and help him/her formulate an appropriate perception of the PA role. Topics included are: An historical perspective of the PA profession, as well as current trends and issues; the PA's role in health care delivery; political and legal factors that affect PA practice, intraprofessional factors, and the PA's role in relation to physicians and other providers; importance of biomedical ethics and professional responsibilities in relation to their role as health care providers; content relating to PA professional organizations, program accreditation, graduate certification and recertification; employment considerations, and professional liability are included.

PAST 521 Research I (3)

Introduces the scientific method in health-science research. Focuses on the major steps of the research process: Problem identification, literature review, conceptual framework, identification of variables, statement of hypotheses, experimental design and analysis, and presentation of data. Includes critical evaluation of research literature.

PAST 522 Research II (2)

Application of the research process to problems in related specific allied health fields. Development of a research proposal. Pilot testing of procedures and data-collection forms.

Prerequisite: PAST 521.

PAST 523 Research III (2)

Implementation of a research proposal in a practice setting. Computer data analysis and preparation of a research report both in written and oral formats. Develop or create PowerPoint presentation, poster, and abstract for submission to a professional meeting.

Prerequisite: PAST 521, 522.

PHYSICIAN ASSISTANT CLINICAL ROTATIONS**PAST 524 Family Medicine I (4)**

A four-week rotation in a primary care clinic. This rotation provides clinical experience with common medical problems and health care needs of all age groups. Forty hours per week.

PAST 525 Family Medicine II (4)

A four-week rotation in a primary care clinic that includes urgent care. This rotation provides clinical experience with common medical problems and health care needs of all age groups. May require late evening and weekend hours. Forty hours per week.

PAST 526 Internal Medicine I (Inpatient Medicine) (4)

A four-week rotation as part of an Internal Medicine admitting team. Provides clinical experience with common medical problems, admissions, daily rounds, and patient management and discharge processes. On-call required (overnight). Sixty hours per week.

PAST 527 Internal Medicine II (Outpatient Medicine) (4)

A four-week rotation in outpatient medical clinics. This rotation provides clinical experience with common adult medical problems, including management of chronic diseases. Forty hours per week.

PAST 528 Pediatrics I (Inpatient Pediatrics) (4)

A four-week rotation as part of a Pediatrics admitting team. May include overnight in-hospital call, emergency room call, ward rounds, and outpatient clinic duties. This rotation provides clinical experience with common childhood illnesses, admissions, discharge, daily progress notes, and patient management processes. Sixty hours per week.

PAST 529 Pediatrics II (Outpatient Pediatrics) (4)

A four-week rotation in a pediatrics clinic. This rotation provides clinical experience with common medical problems and health care needs of people from birth to 18 years. May require evening or weekend hours. Forty hours per week.

PAST 531 Obstetrics and Gynecology (4)

A four-week rotation through various aspects of an Obstetrics and Gynecology service. This rotation provides clinical experience in women's health care with emphasis on primary care, including normal pregnancy and childbirth. May require in-hospital on-call (overnight) or late hours. Sixty hours per week.

PAST 532 General Surgery (4)

A four-week rotation on General Surgery service. This rotation provides clinical experience with common medical problems requiring surgical intervention, primarily in adults. Includes assignment to an admitting team, in-hospital call (overnight) or late hours. Includes assisting in the operating room and surgical clinic. Sixty hours per week.

PAST 533 Emergency Medicine (4)

A four-week rotation through a hospital Emergency Department, primarily in urgent care or assigned to minor trauma and illnesses. This rotation provides clinical experience with common illnesses and injuries, suturing, and splinting. Requires late night and week-end duties. Sixty hours per week.

PAST 534 Psychiatry/Behavioral Medicine (4)

A four-week rotation through an inpatient and outpatient behavioral medicine service. Rotation provides clinical experience with common mental health problems, including acute and chronic psychoses, substance abuse, and affective disorders. May require late night or on-call duties. Sixty hours.

PAST 535 Geriatrics (2)

A two-week rotation on a geriatric medicine service. This rotation provides clinical experience with the special medical needs of the elderly. Forty hours per week.

PAST 536 Elective I (2)

A two-week elective rotation through a medical or surgical service of choice (as available). Hours/call may vary.

PAST 537 Elective II (4)

A four-week elective rotation through a medical or surgical service of choice (as available). Hours/call may vary.

SGTH 205 Surgical Instrumentation (3)

Classification of instruments and surgical equipment, catheters, drains, tubes. Preparation and care of surgical supplies and equipment, surgical packing, and dressings. Cleaning and packaging of surgical instruments.

SGTH 221, 222, 223 Surgical Preparation I, II, III (4, 4, 4)

Preoperative patient-care routines to include: patient assessment, variations, precautions, and equipment in patient positioning, skin preparation, draping, catheterization, and emergency procedures. Psychosocial aspects of the surgical patient. Preoperative evaluation and assessment of patient risk factors and outcomes. (Laboratory fee assessed Autumn Quarter—\$75.00.)

SGTH 225 Pharmacology for Surgical Technology (2)

General overview of pharmacology, including kinetics, dynamics, and therapeutics of drugs. Emphasis on agents used in the operating environment.

SGTH 231, 232 Surgical Care Fundamentals I, II (4, 3)

Principles and applications of maintaining a sterile surgical environment. Responsibilities of the scrub, circulating, and second-assisting roles. Principles and techniques of sterilization, disinfection, and antisepsis of the operating room and patient. Wound healing and care. Environmental control and safety.

GTH 241, 242 Surgical Procedures I, II (4, 4)

General and specialty surgical procedures, pathology and surgical interventions, specialized equipment, types of anesthesia, and complications. Lecture and laboratory.

SGTH 278 Seminar in Surgical Technology (2)

Applications and topics that concern the surgical technologist, such as management principles, psychosocial aspects of patient care, education, and professional organizations and credentialing. Role of the surgical technologist and the surgical team.

SGTH 291, 292, 293, 294 Surgical Technology Clinical Practicum I, II, III, IV (2, 2, 4, 5)

Supervised clinical assignments in both inpatient and outpatient clinical settings. Comprehensive training in all aspects of surgical technology. General introduction to the operating room setting and to advanced clinical practice in the final quarter. Application of surgical technology techniques in the development of professional competence in the clinical operating-room setting.

SGTH 294L Surgical Technology Clinical Practice IV Laboratory (4)

Supervised clinical assignments in both inpatient and outpatient clinical settings. Comprehensive training in all aspects of surgical technology. General introduction to the operating room setting and to advanced clinical practice. Application of surgical technology techniques in the development of professional competence in the clinical operating room setting.

SGTH 299 Student Project (2)

Student-selected topic in surgical technology for further in-depth study in one or more of the following areas for presentation to faculty and students: management, education, research, or clinical practice.

CONJOINT

See CONJOINT COURSES, section III General Information, for course descriptions.

COGNATE**HPRO 443 Writing for Publication (2)**

Writing by health professionals for popular, lay, or professional publications. Selection of journal or magazine, writing of query letter, preparation of abstract and manuscript in final form for submission. Includes preparation of camera-ready art. Not a remedial writing course.

RELE 457 Christian Ethics and Health Care (2)

Ethical issues in modern medicine and related fields from the perspective of Christian thought and practice.

RELE 505 Clinical Ethics (3)

In-depth, case-based analysis of bioethics, with emphasis on clinical applications. Background conceptual and historical readings orient students to the issues highlighted by classic cases in bioethics.

RELF 423 Loma Linda Perspectives (2)

History and philosophy of Loma Linda University as a Christian health-sciences institution that fosters human wholeness.

CLINICAL LABORATORY SCIENCE

PHLEBOTOMY—Certificate

CYTOTECHNOLOGY—Certificate; Bachelor of Science

CLINICAL LABORATORY SCIENCE (formerly MEDICAL TECHNOLOGY)—Bachelor of Science

CLINICAL LABORATORY TECHNICIAN (formerly MEDICAL LABORATORY TECHNICIAN)—Associate in Science

KENNETH A. CANTOS, M.D., Chair

MONIQUE K. GILBERT, Program Director, Phlebotomy

MARLENE O. OTA, Program Director, Cytotechnology

DARRYL G. HEUSTIS, M.D., Medical Director, Cytotechnology

PAMELA J. WAT, M.D., Medical Co-director, Cytotechnology

RODNEY M. ROATH, Program Director, Clinical Laboratory Science

KATHERINE G. DAVIS, Clinical Coordinator, Clinical Laboratory Science

ANNE MARIE KERI, Program Director, Clinical Laboratory Technician; Education Coordinator, Clinical Laboratory Science

JAMES M. PAPPAS, M.D., Medical Director, Clinical Laboratory Science

PHLEBOTOMY—Certificate

Procedures in phlebotomy are designed to train individuals to collect blood for laboratory analysis, which is necessary for the diagnosis and care of the patient. Ideal for health professionals seeking to expand their current skills, for currently employed phlebotomists, or for those interested in a profession in laboratory medicine, this training program is approved by the California Department of Health, Laboratory Field Services. Successful participants receive a certificate in phlebotomy.

THE PROGRAM

The program trains the modern phlebotomist to perform venipuncture, capillary puncture, and CPR; and to record the patient's vital signs, which include medical terminology, laboratory safety, basic anatomy and physiology, quality-assurance methods, and medicolegal issues of phlebotomy. More than 100 hours of supervised clinical experience are provided at Loma Linda University Medical Center and other medical affiliates, allowing participants to achieve proficiency in the health care setting.

Accreditation

The program is accredited by the California Department of Health, Laboratory Field Services; and by the National Accrediting Agency for Clinical Laboratory Sciences (NAACLS), 8410 West Bryn Mawr Avenue, Suite 670, Chicago, IL 60631-3415.

PROFESSIONAL REGISTRATION

Upon successful completion of the certificate program, participants receive a certificate in phlebotomy and are eligible to take the national certifying examination offered by the Board of Registry, American Society of Clinical Pathologists (ASCP), 2100 West Harrison Street, Chicago, IL 60612; 800/621-4142.

ADMISSION

To be eligible for admission, the applicant must be eighteen years of age or older and have a high school diploma with a minimum grade point average of 2.0; or GED. All registrants must have current immunizations (measles, mumps, rubella, tetanus, and PPD skin test).

How to apply

Prospective students should contact the Department of Clinical Laboratory Science for an application packet with instructions.

PROGRAM OF INSTRUCTION PHLEBOTOMY—Certificate

AHCJ 105 Procedures in Phlebotomy (3)

Corequisite: Current CPR certification or concurrent enrollment. CPR training and certification or renewal arranged during the program for students not already certified.

ACADEMIC PROGRESSION

A minimum grade of C (2.0) is required for satisfactory performance in the program. A grade of C (2.0) or better is required for certification. C- grades are not acceptable. Unsatisfactory clinical performance will be cause for dismissal from the program. Students are responsible for transportation to clinical sites.

CYTOTECHNOLOGY—Certificate; Bachelor of Science

Cytotechnology is a specialty within the broad field of clinical laboratory science. The cytotechnologist, working under the direction of a pathologist, detects cell changes caused by different disease processes; and is able to differentiate between normal, atypical, and malignant cell changes. In recognizing microscopic abnormalities of cells and cellular patterns from various body sites, the cytotechnologist assists the pathologist in detecting cancer at its earliest and potentially most curable stage. As a result, physicians are able to diagnose and treat cancer long before discovering its existence by alternate methods.

OPPORTUNITIES

Cytotechnologists work in hospitals, clinics, and independent pathology laboratories. The employment outlook for cytotechnologists is favorable, with the demand for trained workers exceeding the supply. Cytotechnologists can advance to supervisory positions, participate in research activities, or become teachers in the field. Advancement is based on experience, skill, and advanced education.

THE PROGRAM

The Cytotechnology Program, based on the completion of two years of study at an accredited college or university, leads **either** to a certificate **or** to a certificate and a Bachelor of Science degree. The program of study begins with the Autumn Quarter. A certificate is awarded at the completion of the fourth quarter of study, and those electing to continue are awarded the Bachelor of Science degree upon the completion of an additional two quarters of study. With the certificate in cytotechnology and the baccalaureate degree, the student is eligible to take the national examination and become a registered cytotechnologist.

Registered cytotechnologists entering the program to receive the Bachelor of Science degree are considered to have completed, on the basis of registry, the equivalent course work listed in the first four quarters of the program. A total of 64 quarter units is applied toward the graduation requirements, provided the course work in pathology is equivalent to that offered in the certificate program at this University. Where credit in pathology is not equivalent, the requirement may be met by taking AH CJ 402 and 403 at this University; or by completing a minimum of 8 quarter units of upper-division course work in developmental biology or comparative animal physiology at an accredited college or university.

A writing-validation examination will be administered to all students. For those students achieving a score of less than 4 on the Wholistic Score Sheet, remedial writing must be taken

within the first academic year. Upon retest, the student must achieve a score of 4 or higher.

Accreditation

The program is accredited by the Commission on Accreditation of Allied Health Education Programs (CAAHEP), 35 East Wacker Drive, Suite 1970, Chicago, IL 60601-2208, in collaboration with the Cytotechnology Programs Review Committee—Phone: 312 / 553-9355; FAX: 312 / 553-9616; Web site: www.caahep.org; email: caahep@caahep.org

PROFESSIONAL REGISTRATION

Upon completion of the certificate program (fourth quarter of study) and the completion of a baccalaureate degree, the student is eligible to sit for the certifying examination given by the Board of Registry of the American Society of Clinical Pathologists, P. O. Box 12277, Chicago, IL 60612-0277. Information about qualifying examinations can be obtained at the office of the department chair.

THE PROGRAM OBJECTIVES

Upon completion of the program, the graduate should be qualified to:

1. Determine and implement the appropriate procedures for collecting and processing biological specimens for cytologic analysis.
2. Detect, differentiate between, and diagnose presence and absence of disease in gynecologic and nongynecologic samples.

3. Integrate and relate data generated by the various clinical departments, making judgments regarding possible discrepancies; confirm cytologic results; verify quality-control procedures; and develop solutions to problems concerning the generation of laboratory data.
4. Use contemporary and uniform diagnostic terminology in reporting laboratory results.
5. Judge the results of quality-assurance measures and institute proper procedures to maintain accuracy and precision.
6. Evaluate current and new techniques, instruments, and procedures in terms of their clinical and diagnostic usefulness and practicality.
7. Demonstrate professional conduct and interpersonal communication skills with patients, laboratory personnel, other health care professionals, and the public.
8. Recognize, encourage, and act upon the individual's need for continuing education as a function of growth and maintenance of professional competence.
9. Apply sound principles of management and supervision.
10. Understand and apply sound principles of scientific research.

ADMISSION

PLEASE NOTE: GRADES OF C- ARE NOT TRANSFERABLE FOR CREDIT.

Prerequisites for Cytotechnology, Certificate only

General biology, complete sequence
 Human anatomy and physiology, complete sequence
 Microbiology with laboratory
 Introductory chemistry with laboratories, complete sequence
 College algebra
 English composition, complete sequence

Prerequisites for Cytotechnology, Certificate and B.S.

20 units minimum in humanities (choose minimum of two areas from: history, literature, philosophy, foreign language, art/music appreciation/history)
 Religion required, 4 units per year of attendance at a Seventh-day Adventist college or university
 General biology, complete sequence

Human anatomy and physiology, complete sequence
 Microbiology with laboratory

Introductory chemistry with laboratories, complete sequence

College algebra

Cultural anthropology **or** an approved course dealing with cultural diversity

Select 8 units from a minimum of two areas: sociology, economics, geography, political science, psychology, anthropology

English composition, complete sequence (minimum of 9 quarter units)

Personal health **or** nutrition

Two physical education courses

Electives to meet the minimum total requirement of 96 quarter units

For total unit requirements for graduation, see Division of General Studies, LLU GENERAL EDUCATION REQUIREMENTS (section V).

How to apply—Cytotechnology

Prospective students should apply as soon after January 1 as possible for the next academic year. The certificate program begins in August and the B.S. degree program begins in September. Preference will be given to applicants whose applications and completed transcripts are received by March 1.

It is suggested that applicants take a minimum of two years of mathematics and natural sciences (excluding general science) during the high school years. A high school diploma or the GED is required for acceptance.

If English is not the native language, an undergraduate must submit a minimum score of 550 for the Test of English as a Foreign Language (TOEFL) or a minimum score of 90 percent on the Michigan Test of English Language Proficiency (MTELP) or the equivalent. Minimum scores of 5 both on the TOEFL writing test and the speaking test (TWE and TSE-A) are required for acceptance.

ACADEMIC PROGRESSION

A minimum grade of C (2.0) is required for all courses in the program. A grade of less than C in any one course, or unsatisfactory clinical performance, will be cause for dismissal from the program for the remaining academic year. Readmission to the program will require reapplication.

**PROGRAM OF INSTRUCTION
CYTOTECHNOLOGY— Certificate; Certificate and Bachelor of Science**

The program of instruction outlined as follows is for students enrolled during the 2001-2002 academic year.

JUNIOR YEAR*

CLSC 341	Female Genital Cytology	12
CLSC 351	Respiratory Cytology	7
CLSC 353	Urinary Tract and Prostate Cytology	3
CLSC 357	Gastrointestinal Tract Cytology	2
CLSC 361	Body Cavity and Miscellaneous Secretions Cytology	8
CLSC 363	Bone Biopsy Cytology	1
CLSC 365	Breast Cytology	1
CLSC 367	Cytogenetics	1
CLSC 371	Cytopreparation Techniques	3
CLSC 373	Histotechnology Techniques	1
AHCJ 402, 403	Pathology I, II	4, 4
AHCJ 328	Portfolio Practicum I	1

A microscope rental fee and usage and replacement fee are required for the Autumn, Winter, Spring, and Summer Quarters of the certificate program.

SENIOR YEAR**

CLSC 301, 302	Introduction to Radiographic Procedures I, II	2, 2
CLSC 404	General Histology	5
CLSC 405	Pathology	5
CLSC 424	Hematology	3
CLSC 431	Electron Microscopy	3
CLSC 432	Current Research Techniques	3
CLSC 481	Supervised Cytology Research Project	4
CLSC 483	Supervised Hematology Research Project	2
CLSC 491, 492	Cytology Affiliation I, II	6, 6
AHCJ 331	Human Resource Management	3
AHCJ 426	Introduction to Computer Applications I	3
AHCJ 498	Portfolio Practicum II	1
RELE 457	Christian Ethics and Health Care	2
RELF 423	Loma Linda Perspectives	2
REL_ ____	Religion electives	4

Religion requirements do not apply to certificate-only students. However, if a student is planning to enroll in the B.S. degree program, Summer Quarter would be the best time to take the religion units; 8 units of religion are required for graduation.

*Certificate students

**Bachelor of Science degree students

The Department of Clinical Laboratory Science wears many hats. Here are some of the faculty and staff (top row): Rodney Roath, Clinical Laboratory Sciences Program director; Claro Masangcay, cytotechnology; Thuan Nguyen and Jim Brandt, CLS; Marlene Ota, Cytotechnology Program director; Teri Ross, CLS; Kathy Davis, clinical coordinator; (middle row): Anne Marie Keri, education coordinator; Margie Martinez, department secretary; Monique Gilbert, Phlebotomy Program director; (front row) Gary Radin, cytotechnology; Ken Cantos, department chair.

CLINICAL LABORATORY SCIENCE—Bachelor of Science
(formerly MEDICAL TECHNOLOGY)**CLINICAL LABORATORY TECHNICIAN—Associate in Science**
(formerly MEDICAL LABORATORY TECHNICIAN)

A student who has an interest in science, an investigative mind that enjoys the challenge of solving problems quickly and accurately, and a desire to help others should consider a career as a clinical laboratory scientist (CLS) or a clinical laboratory technician (CLT).

Clinical laboratory scientists and technicians examine and analyze body fluids, tissues, and cells. They look for bacteria, parasites, or other microorganisms; analyze the chemical content of fluids; match blood for transfusions; and test for drug levels in the blood to show how a patient is responding to treatment.

Clinical laboratory scientists perform complex chemical, biological, hematological, immunologic, microscopic, and bacteriologic tests. They use, maintain, and troubleshoot sophisticated laboratory equipment that is used to perform diagnostic tests. The clinical laboratory scientist analyzes these test results and discusses them with the medical staff. S/he also possesses the scientific and diagnostic skills required for DNA technology and genetic engineering applications.

Clinical laboratory technicians perform moderately complex diagnostic tests and assist clinical laboratory scientists. Technicians prepare specimens for cultures and analysis, count cells, and look for abnormal cells. They use automated equipment and instruments that perform a number of tests simultaneously. Technicians are also trained to utilize microscopes, cell counters, and other laboratory equipment to perform tests that help physicians diagnose and treat disease. Under the supervision of the clinical laboratory scientist, clinical laboratory technicians work in various laboratory departments, including clinical microbiology, chemistry, hematology, and the blood bank.

OPPORTUNITIES

Employment of clinical laboratory workers is expected to parallel the growth of other health care occupations through the year 2006, particularly as the volume of laboratory tests increases with population growth and the development of new technology. This new technology will encourage more testing and spur employment. The twenty-first century is offering clinical laboratory scientists new avenues in test development, experimental design, administration, and education.

Clinical laboratory scientists and technicians work in hospitals or similar medical facilities, clinical and reference laboratories, home-health diagnostics, transfusion services,

physicians' offices, and private medical clinics of physicians. They also find employment in health information systems, DNA-technology and genetic engineering corporations, research laboratories, federal government agencies and facilities, veterans' hospitals, and U.S. Public Health Service facilities; and in the areas of product development and of customer and patient education.

CLINICAL LABORATORY SCIENCE*—Bachelor of Science (formerly MEDICAL TECHNOLOGY)

THE PROGRAM

The Clinical Laboratory Science Program is a two-year professional program. The freshman and sophomore years, which are taken at any accredited college or university, afford the fundamentals of a liberal education. Entry is in the post-summer session at the junior-year level. After satisfactory completion of the program, the student is awarded a Bachelor of Science degree and is eligible to take the state and national board examinations and to become a registered clinical laboratory scientist.

The junior year is a ten-month program of lecture and laboratory. Emphasis is on the basic clinical science courses necessary for clinical laboratory science.

The senior year is a ten-month clinical practicum that provides professional clinical experience in the hospital laboratory environment. Emphasis is on technical proficiency, organization, the laboratory's relationship to patient care, financial management, and laboratory operations. Senior students must coordinate their time with the operation of Loma Linda University Medical Center's clinical laboratory and with supplemental training laboratories in the community. Transportation to supplemental training laboratories is the responsibility of the student. The senior schedule is a full-time week (forty clock hours), arranged with a Monday-through-Friday, day-shift schedule for lecture and laboratory requirements. On occasion, days or times outside of this typical schedule may be necessary to allow students exposure to unique procedures. A special calendar schedule, different from the University academic calendar, is followed.

Accreditation

The program is accredited by the National Accrediting Agency for Clinical Laboratory Sciences, 8410 West Bryn Mawr Avenue, Suite 670, Chicago, IL 60631-3415; Phone: 773/714-8800; FAX: 773/714-8886; www.nacls.org It also satisfies the requirements in medical technology of the American Society of Clinical Pathologists' Board of Registry for Medical Technology, P. O. Box 12277, Chicago, IL 60612-0277. The program is approved by the State of California Department of Health Laboratory Field Services, 2151 Berkeley Way Annex 12, Berkeley, CA 94707-1011.

PROFESSIONAL REGISTRATION

Completion of the required sequence of academic course work and directed professional experience prepares the graduate to take the certifying examinations of the Board of Registry of Medical Technologists and the National Certification Agency for Medical Laboratory Personnel, P. O. Box 15945-289, Lenexa, KS 66152-285; and the licensure examination of the state of California. Information regarding examinations can be obtained from the department chair.

*In 1999 the program name was changed from Medical Technology to Clinical Laboratory Science; the graduates are qualified as clinical laboratory scientists.

THE PROGRAM GOALS

The goals of the Clinical Laboratory Science Program are to help the student:

1. Demonstrate the basic and advanced knowledge essential to the practice of clinical laboratory science.
2. Demonstrate technical and clinical proficiency in the skills essential to the practice of clinical laboratory science.
3. Obtain certification and licensure as a practitioner in clinical laboratory science.
4. Demonstrate self-confidence in technical, professional, and interpersonal skills.
5. Become a cooperative, effective, and efficient health care worker.
6. Communicate effectively—both orally and in writing—with peers, supervisors, patients, the public, and members of the health care team.
7. Read and interpret professional literature.
8. Share his/her knowledge and skills by providing instruction to peers and support personnel.
9. Recognize that lifelong learning is essential to maintain technical and professional skills.
10. Become a contributor to the profession.
11. Prepare to be a leader in the profession.
12. Cultivate initiative, creativity, and involvement in the profession.
13. Recognize the ethical standards that are required in the health care profession.

14. Explore his/her relationship with God within the context of the Seventh-day Adventist church.

THE PROGRAM OBJECTIVES

Graduates of the Loma Linda University Clinical Laboratory Science Program will demonstrate the following career-entry competencies, perspectives, and experience:

1. Comprehension of the basic and advanced knowledge essential to the practice of clinical laboratory science.
2. Technical and clinical proficiency in the skills essential to the practice of clinical laboratory science.
3. Ability to become certified and licensed practitioners in clinical laboratory science.
4. Use of computer applications for communication, recordkeeping, analysis, and access of information.
5. Application of principles related to quality control, quality assurance, and total quality management.
6. Ability to work independently.
7. Cooperative participation in group/team environments.
8. Awareness of the influence that social or cultural perspectives may have on the interactions and relationships among coworkers, patients, and the community.
9. Professional demeanor.
10. Recognition of the value of lifelong continuing education.
11. Participation in professional organizations and activities.
12. Current knowledge of the laws, regulations, policies, and agencies that affect the clinical laboratory environment.
13. Acceptance of responsibility and accountability for behavior.
14. Awareness of the benefits that a relationship with God can bring to the community and the individual.

How to apply

Prospective students should apply as soon after January 1 as possible for the 2001-2002 academic year. Preference will be given to applicants whose completed applications and official transcripts are received by May 1. To receive an application form or BULLETIN, call 800/422-4558. BULLETIN cost is \$10.00 per copy.

It is suggested that applicants take a minimum of two years of mathematics and natural sciences (excluding general science) during the high school years. A high school diploma or the GED is required for acceptance. Applicants must complete prerequisite course work at any accredited college before being admitted to the School of Allied Health Professions.

Foreign applicants, other than those from Canada, must complete 45 quarter or 30 semester units of credit at an accredited college in the United States. If English is not the applicant's native language, s/he must submit a minimum score of 550 (undergraduate student) for the Test of English as a Foreign Language (TOEFL). Additionally, a minimum score of 5 on the TOEFL writing test (TWE) is required for acceptance.

Test requirement

Upon acceptance, a self-study syllabus will be sent to the student in preparation for a mathematics screening examination, which will be given immediately following registration. Those achieving scores below the acceptable minimum will be required to take CLSM 301 Laboratory Mathematics Review.

ACADEMIC PROGRESSION

A minimum grade of C (2.0) is required for all courses in the program; C- grades are not acceptable. A grade of less than C in any course, or unsatisfactory clinical performance, will be cause for dismissal from the program for the remaining academic year. Readmission to the program will require reapplication.

Prerequisites for Clinical Laboratory Science, B.S.

20 units minimum in humanities (choose minimum of two areas from: history, literature, philosophy, foreign language, art/music appreciation/history)

Religion required, 4 units per year of attendance at a Seventh-day Adventist college or university

General chemistry with laboratories, complete sequence

Organic chemistry with laboratories, complete sequence

Quantitative analysis

General physics with laboratory (must complete principles of light and electricity)

Molecular **or** cellular biology with laboratory (one quarter/semester) (General biology with laboratories, complete sequence may be taken by pre-med/pre-dent students)

College algebra

Cultural anthropology **or** an approved course dealing with cultural diversity

Select 8 units from a minimum of two areas: sociology, economics, geography, political science, psychology, anthropology

English composition, complete sequence

Computers

Personal health **or** nutrition

Two physical education courses

Electives to meet the minimum total requirement of 96 quarter units

For total unit requirements for graduation, see **Division of General Studies, LLU GENERAL EDUCATION REQUIREMENTS (section V)**.

PROGRAM OF INSTRUCTION
CLINICAL LABORATORY SCIENCE—Bachelor of Science

The program of instruction outlined as follows is for students enrolled during the 2001-2002 academic year.

JUNIOR YEAR

POST-SUMMER SESSION

CLSM	301	Laboratory Mathematics Review*	1
CLSM	303	Urine and Body Fluid Analysis I	1
CLSM	311	Clinical Laboratory Techniques	2
AHCJ	105	Procedures in Phlebotomy	3
AHCJ	328	Portfolio Practicum I	1

AUTUMN QUARTER

CLSM	307	Medical Parasitology	3
CLSM	321	Hematology I	3
CLSM	331	Biochemistry	5
AHCJ	318	Physiology	4

CLSM	498	Clinical Laboratory Science Seminar III	2
AHCJ	498	Portfolio Practicum II	(continued)
REL_	___	Religion elective	2

* An examination is given during the first week of school. A student who passes the examination does not have to take this class.

[#]Clinical practicum begins

SENIOR YEAR CLINICAL PRACTICUM*

CLSM 471 Clinical Practicum I	6
Corequisite:	(7 units)
CLSM 411 Urine and Body Fluid Analysis II	
CLSM 422 Hematology II	
CLSM 472 Clinical Practicum II	6
Corequisite:	(11 units)
CLSM 413 Diagnostic Microbiology	
CLSM 442 Immunohematology III	
CLSM 473 Clinical Practicum III	6
Corequisite:	(9 units)
CLSM 434 Clinical Chemistry III	
CLSM 455 Special Procedures	

- *Clinical Practicum I is a thirteen-week clinical rotation in the areas of hematology, urinalysis, and parasitology.
 - *Clinical Practicum II is a thirteen-week clinical rotation in the areas of microbiology and immunohematology.
 - *Clinical Practicum III is a thirteen-week clinical rotation in the areas of chemistry, immunology, and special procedures.
- Clinical Practicum I, II, and III will be registered for through block registration and taken successively.

CLINICAL LABORATORY TECHNICIAN—Associate in Science

(formerly MEDICAL LABORATORY TECHNICIAN)

(COMMENCES AUGUST 2002, PENDING STATE APPROVAL)

THE PROGRAM

The Clinical Laboratory Technician Program requires 54 quarter units (36 semester units) of prerequisites from an accredited college and 50 quarter units of instruction at Loma Linda University. The ten-month program emphasizes combined instruction with clinical laboratory theory and technical skills. Successful completion of the program provides the student with an Associate in Science degree and makes the student eligible to take the state and national board examinations to become a registered clinical laboratory technician.

Entry is in the post-summer session at the sophomore-year level. The clinical practicum is completed in the last two quarters of the program and provides professional clinical experience in the hospital laboratory environment. Students are required to have their own transportation to and from clinical sites. The clinical practicum schedule is a full-time week (forty clock hours), arranged with a Monday-through-Friday, day-shift schedule for lecture and laboratory requirements. On occasion, days or times outside of this typical schedule may be necessary to allow students exposure to unique procedures.

Accreditation pending

Clinical laboratory technician programs are accredited by the National Accrediting Agency for Clinical Laboratory Sciences, 8410 West Bryn Mawr Avenue, Suite 670, Chicago, IL 60631-3415. CLT programs must satisfy the requirements in medical technology of the American Society of Clinical Pathologists' Board of Registry for Medical

Technology, P. O. Box 12277, Chicago, IL 60612-0277. CLT programs are approved by the State of California Department of Health Laboratory Field Services, 2151 Berkeley Way Annex 12, Berkeley, CA 94707-1011.

PROFESSIONAL REGISTRATION

Completion of the required sequence of academic course work and directed professional experience prepares the graduate to take the certifying examinations of the Board of Registry of Medical Technologists and the National Certification Agency for Medical Laboratory Personnel, P. O. Box 15945-289, Lenexa, KS 55285; and the licensure examination of the state of California. Information on examinations can be obtained from the department chair.

THE PROGRAM GOALS

The specific goals of the Department of Clinical Laboratory Science are to:

1. Provide opportunity, instruction, and guided experience by which the student may acquire the basic knowledge and attain the skills essential to the practice of the clinical laboratory technician profession.
2. Help the student accept responsibility for integrity, ethical relationships, and empathetic attitudes that can contribute to the welfare and well-being of patients.
3. Help the student develop a background of information and attitudes conducive to inter-professional understanding and cooperation.

4. Encourage the student to cultivate habits of self-education that will foster lifelong growth.
5. Provide a complete educational experience that culminates in a clinical laboratory technician A.S. degree and makes the student eligible to take the California State License, the National Board of Registry, and the National Certification Clinical Laboratory Technician/Medical Laboratory Technician examinations.
6. Engender and nurture in the student the desire to serve mankind, and in particular to serve as needed in the medical centers sponsored by the Seventh-day Adventist church, both in this country and elsewhere.

THE PROGRAM OBJECTIVES

Graduates of the Loma Linda University Clinical Laboratory Technician Program will demonstrate the following career-entry competencies, perspectives, and experience:

1. Comprehension of the basic knowledge essential to the practice of the clinical laboratory technician profession.
2. Technical and clinical proficiency in the skills essential to the practice of the clinical laboratory technician profession.
3. Ability to become certified and licensed practitioners in the clinical laboratory technician profession.
4. Use of computer applications for communication, recordkeeping, analysis, and access of information.
5. Application of principles related to quality control, quality assurance, and total quality management.
6. Ability to integrate data and knowledge from different disciplines.
7. Ability to work independently.
8. Cooperative participation in group/team environments.
9. Awareness of the influence that social or cultural perspectives may have on the interactions and relationships among coworkers, patients, and the community.
10. Professional demeanor.
11. Recognition of the value of lifelong continuing education.
12. Participation in professional organizations and activities.
13. Current knowledge of the laws, regulations, policies, and agencies that affect the clinical laboratory environment.
14. Acceptance of responsibility and accountability for behavior.
15. Awareness of the benefits that a relationship with God can bring to the community and the individual.

ADMISSION

PLEASE NOTE: GRADES OF C- ARE NOT TRANSFERABLE FOR CREDIT.

Prerequisites for Clinical Laboratory Technician (formerly Medical Laboratory Technician), A.S.

Select 4 units from one area: history, literature, philosophy, foreign language, art/music appreciation/history

Religion required, 4 units per year of attendance at a Seventh-day Adventist college or university

General chemistry with laboratory, complete sequence

General biology with laboratory (one course); **or** human anatomy and physiology with laboratory

Introductory physics with laboratory

Physiology with laboratory; **or** human anatomy and physiology with laboratory

Select 4 units from: anthropology, economics, geography, political science, psychology, sociology

English composition, complete sequence

Two physical education courses (recommended)

Electives to meet the minimum total requirement of 54 quarter units

Work experience

Work experience in a laboratory setting, although not required, is recommended, for favorable consideration.

How to apply

Prospective students should apply as soon after January 1 as possible for the 2002-2003 academic year. Preference will be given to applicants whose completed applications and official transcripts are received by May 1. To receive an application form or BULLETIN, call 800/422-4558. BULLETIN cost is \$10.00 per copy.

It is suggested that applicants take a minimum of two years of mathematics and natural sciences (excluding general science) during the high school years. A high school diploma or the GED is required for acceptance. Applicants must complete prerequisite course work at any accredited college before being admitted to the School of Allied Health Professions.

Foreign applicants, other than those from Canada, must complete 54 quarter or 36 semester units of credit at an accredited college in the United States. If English is not the applicant's native language, s/he must submit a minimum score of 550 (undergraduate student) for the Test of English as a Foreign Language (TOEFL). Additionally, a minimum score of 5 on the TOEFL writing test (TWE) is required for acceptance.

Test requirement

Upon acceptance, a self-study syllabus will be sent to the student in preparation for a mathematics screening examination, which will be given immediately following registration. Those achieving scores below the acceptable minimum will be required to take CLSM 301 Laboratory Mathematics Review.

ACADEMIC PROGRESSION

A minimum grade of C (2.0) is required for all courses in the program; C- grades are not acceptable. A grade of less than C in any one course, or unsatisfactory clinical performance, will be cause for dismissal from the program for the remaining academic year. Readmission to the program will require reapplication.

COURSES

For information about units of credit and course numbers, see the beginning of section III of this BULLETIN.

CLSC 301, 302 Introduction to Radiographic Procedures I, II (2,2)

Nature and description of radiologic procedures for the nonradiologic technologist. Principles and medical techniques applied to the radiographic setting. Survey of anatomy and instrumentation. Includes observation laboratory.

CLSC 341 Female Genital Cytology (12)

Histology and cytology of the female genital tract. Cytohormonal changes, nonneoplastic abnormalities, premalignant lesions, and rare malignancies. Lecture, demonstration, and microscopic examination.

CLSC 351 Respiratory Cytology (7)

Histology and cytology of the respiratory tract. Lecture, demonstration, and microscopic examination. Research methods, with emphasis on experimental design and interpretation of results.

CLSC 353 Urinary Tract and Prostate Cytology (3)

Histology and cytology of the urinary tract and prostate. Lecture, demonstration, and microscopic examination.

CLSC 357 Gastrointestinal Tract Cytology (2)

Histology and cytology of the gastrointestinal tract. Lecture, demonstration, and microscopic examination.

CLSC 361 Body Cavity and Miscellaneous Secretions Cytology (8)

Histology and cytology of fluids from the body cavities and other sites. Research methods applicable to cytology, with emphasis on experimental design and interpretation of results. Lecture, demonstration, and microscopic examination.

CLSC 363 Bone Biopsy Cytology (1)

Histology and cytology of bone. Lecture, demonstration, and microscopic examination.

CLSC 365 Breast Cytology (1)

Histology and cytology of the breast. Lecture, demonstration, and microscopic examination.

CLSC 367 Cytogenetics (1)

Meiosis, mitosis, karyotype preparation. Genetic disorders. Lecture, demonstration, and laboratory.

CLSC 371 Cytopreparation Techniques (3)

Procedures on collection and fixation techniques from all organ sites. Techniques in assuming cumulation of follow-up data and laboratory quality control. Clinical and social aspects of AIDS. Lecture, demonstration, and laboratory.

CLSC 373 Histotechnology Techniques (1)

Histologic preparatory techniques, with emphasis on special stains.

CLSC 404 General Histology (5)

Microscopic study of fundamental tissues, cells, organs, and systems of the human body, with emphasis on laboratory and conference exercises.

Prerequisite: AH CJ 402, 403.

CLSC 405 Pathology (5)

Advanced pathology, with emphasis on the cytologic changes of cells in disease. Review of all organ systems, with correlation between tissue-biopsy material and cytologic findings.

Prerequisite: PATH 305, 306.

CLSC 424 Hematology (3)

Theory and background of routine and special laboratory procedures used in diagnosis and treatment of hematologic and other diseases. Evaluation and comparison of methodology. Emphasis on bone marrow, body fluid, and peripheral blood-cell morphology: hematopoiesis, maturation, kinetics. Atypical and abnormal cellular morphology, including leukemias, lymphomas, and anemias. Clinical and social aspects of AIDS.

CLSC 431 Electron Microscopy I (3)

Principles and techniques of electron microscopy, including basic cell ultrastructure and immunohistochemistry.

CLSC 432 Current Research Techniques (3)

Introduction to current research applications and skills development. Techniques in immunocytochemistry and image and flow cytometry.

CLSC 481 Supervised Cytology Research Project (4)

Research project under the supervision of the program director. Oral presentation and paper.

CLSC 483 Supervised Hematology Research Project (2)

Supervised research project under the direction of the hematopathologist. Oral presentation and paper.

CLSC 491, 492 Cytology Affiliation I, II (6, 6)

Six two-week internships in the cytopathology laboratory. Rotation through all phases of diagnostic service work and laboratory functions in cytology. Independent screening of routine gynecologic and nongynecologic specimens.

CLSM 205 Instrumentation (2)

Introduction to basic instrumentation principles and their application in the clinical laboratory environment, provided through lecture and laboratory. Basic electronics, chromatography techniques, and automated analyzers in all laboratory areas. Laboratories designed to allow student to operate, troubleshoot problems related to, and perform maintenance procedures on various types of clinical laboratory equipment. Lecture and laboratory.

CLSM 214 Clinical Microbiology (5)

Designed for students in the health sciences. Topics include history, classification, morphology, growth, control, transmission, and pathology of selected bacteria, viruses, fungi, and parasites. Host defenses against microbial pathogens. Lecture and laboratory.

CLSM 224 Hematology I (4)

Introduction to normal and abnormal hematology and hemostasis. Theory of routine and special laboratory procedures used in diagnosis, evaluation, and treatment of hematologic and coagulation disorders. Emphasis on peripheral blood cell morphology. Lecture and laboratory.

CLSM 226 Clinical Chemistry I (4)

Theory, clinical correlations, and laboratory procedures related to the study of proteins, enzymes, carbohydrates, lipids, nonprotein nitrogen compounds, liver-function, tests, electrolytes, endocrinology, therapeutic drug monitoring, and toxicology. Principles of quality assurance and quality control as they apply to clinical chemistry. Lecture and laboratory.

CLSM 234 Immunohematology I (3)

Overview of transfusion medicine from donor selection and blood collection to fundamentals of antigen-antibody reactions. Includes major blood group systems, compatibility testing and basic antibody-identification techniques. Hemolytic disease of the newborn, transfusion therapy, and hazards of transfusion. Lecture and laboratory.

CLSM 235 Immunology I (3)

Covers the topics of basic immunology, immunopathology, and immunologic techniques. Specific focus on the normal workings of the immune system; the immune systems under altered conditions, such as autoimmunity and hypersensitivity; and assays utilized in a clinical laboratory environment.

CLSM 244 Hematology II (2)

Application and correlation of analytical techniques with theory and clinical experience. Directed study and review to include: normal and abnormal hematologic processes; hemostasis and coagulation; evaluation of normal and abnormal cellular morphology, and urine/body fluid processing, analysis, and morphology.

Prerequisite: CLSM 224, 303.

Corequisite: CLSM 271.

CLSM 247 Clinical Chemistry II (1)

Correlation and application of theory and clinical experience to analytical techniques. Directed study and review to include: proteins, enzymes, carbohydrates, lipids, nonprotein nitrogen compounds, liver-function tests, electrolytes, common endocrinology tests, routine therapeutic drug monitoring and basic toxicology. Students learn to recognize and resolve minor technical problems encountered during laboratory procedures. Principles of quality assurance and quality control as they apply to the clinical-chemistry laboratory.

Prerequisite: CLSM 226.

Corequisite: CLSM 271.

CLSM 251 Diagnostic Bacteriology and Virology (1)

Correlation and application of theory and clinical experience to analytical techniques. Student performs and interprets routine bacteriological tests and procedures. Complements a four-week clinical practicum in microbiology. Directed study and review include: theory and operation of automated microbiology instruments and rapid-identification systems; set-up and interpretation of routine cultures and antibiotic-susceptibility patterns; special requirements for culture of anaerobic bacteria, tubercula bacilli; isolation of bacteria from specific sites; overview of specialized microbiology procedures.

Prerequisite: CLSM 214.

Corequisite: CLSM 272.

CLSM 252 Diagnostic Parasitology and Mycology (1)

Correlation and application of theory and clinical experience to analytical techniques. Student performs routine parasitology and mycology diagnostic tests. Complements a two-week clinical practicum in microbiology. Directed study and review to include: special requirements for specimen preparation; concentration and staining techniques; isolation and identification of fungi, yeast, and parasites.

Prerequisite: CLSM 214.

Corequisite: CLSM 272.

CLSM 255 Immunohematology II (1)

Correlation and application of theory and clinical experience to directed study and review. Reinforces and builds upon principles and theory learned in CLSM 234 and complements the clinical practicum. Examination of the roles of the collection facility and the transfusion service. Emphasis on principles of routine blood-bank testing, interpretation, and quality-assurance protocols utilized in procedures such as type and screen and major crossmatch. Overview of specialized procedures, including elution, adsorption, and titration.

Prerequisite: CLSM 234.

Corequisite: CLSM 272.

CLSM 257 Special Procedures (1)

Correlation and application of theory and clinical experience with analytical techniques. Directed study and review includes the following immunoassays: enzyme and radioisotopic assays, microparticle enzyme immunoassay, fluorescence polarization, and nephelometry. Also included: rapid screening assays for bacteria and viruses, spectrophotometry, serology, electrophoresis, polymerase chain reaction, Western blot assay, and current immunologic techniques.

Prerequisite: CLSM 214, 235.

Corequisite: CLSM 272.

CLSM 271 Clinical Practicum I (5)

Application of knowledge and skills in clinical facilities as a staff medical laboratory technician. Students assist in specimen collection; perform routine laboratory testing; and resolve technical and instrument problems in hematology, urine and body fluid analysis, and clinical chemistry. Students observe and perform limited testing using specialized techniques, including analysis of whole blood, hormones, and tumor markers. Observation of special tests that aid in the evaluation and diagnosis of anemia, white cell disorders, coagulation disorders, and evaluation for urine and body fluids. Nine weeks of supervised clinical experience.

Prerequisite: CLSM 205, 224, 226, 303.

Corequisite: CLSM 244, 247.

CLSM 272 Clinical Practicum II (6)

Eleven weeks of supervised clinical laboratory experience in selected areas, including: microbiology, parasitology, mycology, immunohematology, and special procedures. Students assist in specimen collection, perform routine laboratory testing, observe specialized techniques, and resolve technical and instrument problems. Students observe and perform limited testing using specialized techniques, including polymerase chain reaction, toxicology, direct and indirect immunofluorescence, enzyme immunoassay, and serology.

Prerequisite: CLSM 214, 234, 235.

Corequisite: CLSM 251, 252, 255, 257.

CLSM 301 Laboratory Mathematics Review (1)

Problem solving related to clinical determinations, including solution preparation and calculations necessary for generating laboratory test results from raw data.

CLSM 303 Urine and Body Fluid Analysis I (1)

Urinalysis screening procedure and its application in the diagnosis of renal, systemic, and metabolic diseases. Analysis and morphology of body fluids.

Lecture and laboratory.

CLSM 307 Medical Parasitology (3)

Medically important parasites: life cycles, clinical features, infective diagnostic stages. Demonstrations, slide studies, and diagnostic procedures. Lecture and laboratory.

CLSM 311 Clinical Laboratory Techniques (2)

Introduction to clinical laboratory procedures, including theory and skill development in: specimen preparation and handling, microscopy, basic separation techniques, fundamentals of instrument design, spectrophotometry, analytical techniques, quality-control concepts. Applied physics, with emphasis on light and electricity. Thirty-two hours of clinical experience in specimen processing in a clinical laboratory. Lecture and laboratory.

CLSM 321 Hematology I (3)

Examination of normal hematologic physiology, cellular development, and hemostasis in the human.

Introduction to pathophysiology, with emphasis on clinical and laboratory evaluation of hematologic status. Theory and background of laboratory procedures used in diagnosis and treatment of hematologic and other diseases. Stress on proficiency in evaluation of normal and abnormal cellular morphology. Lecture and laboratory.

CLSM 322 Hematology II (3)

Theory and background of routine and special laboratory procedures used in diagnosis and treatment of hematologic and other diseases. Emphasis on peripheral blood-cell morphology, hematopoiesis, maturation, and kinetics. Pathophysiology of hematologic disorders, including anemias and hematologic malignancies. Correlation of hemostasis testing with clinical hemostatic disorders. Lecture and laboratory.

Prerequisite: CLSM 321.

CLSM 324 Immunology I (4)

Fundamentals of humoral-and-cell-mediated immunity. Mediators of the immune response and aspects of human immunopathology. Clinical and social aspects of HIV/AIDS. Immunologic laboratory tests as tools for patient care. Research methods applicable to immunology, with emphasis on experimental design and interpretation. Lecture and laboratory.

CLSM 327 Clinical and Pathogenic Microbiology I (5)

Introduction to microbiological concepts, leading to an in-depth study of the major groups of pathogenic bacteria and their relationship to human disease. Emphasis on clinical-laboratory identification methods and procedures. Lecture and laboratory.

CLSM 328 Clinical and Pathogenic Microbiology II (5)

Nature and control of microorganisms encountered in clinical material and various anatomical sites. Emphasis on antimicrobial agents, mycology, and virology, including hepatic viruses and HIV/AIDS. Lecture and laboratory.

Prerequisite: CLSM 327 or consent of instructor.

CLSM 331 Biochemistry (5)

Chemical structure and metabolism of carbohydrates, amino acids, lipids, and nucleic acids. Protein synthesis, functions, and analysis. Enzymes and their structure, function, kinetics, and regulation. Lecture and laboratory.

CLSM 332 Clinical Chemistry I (4)

Clinical chemistry procedures and their clinical significance in medicine, with focus on the following areas: carbohydrates and diabetes mellitus, proteins, lipids, lipoproteins, cardiovascular disease, enzymes, liver function, iron, hemoglobin, and porphyrins. Quality assurance, method evaluation, and establishment of reference ranges. Lecture and laboratory.

Prerequisite: CLSM 331 or consent of instructor.

CLSM 333 Clinical Chemistry II (4)

Clinical chemistry procedures and their clinical significance in medicine, with focus on the following areas: fluids and electrolytes, acid-base balance, the endocrine systems; thyroid, parathyroid, adrenal cortex and catecholamines, and steroids; reproduction, pregnancy, and fetal well-being; therapeutic drug monitoring and toxicology. Lecture and laboratory.

Prerequisite: CLSM 332.

CLSM 341 Immunohematology I (3)

Fundamentals of antigen-antibody reactions. Study of major blood-group systems, compatibility testing, and antibody-identification techniques. Clinical analysis of hemolytic disease of the newborn. Lecture and laboratory.

CLSM 342 Immunohematology II (3)

Blood collection, donor testing, component preparation, and quality management in the collection facility. Identification of multiple antibodies, typing discrepancies, hemotherapy, hazards of transfusion, and investigation of autoimmune hemolytic disease. Lecture and laboratory.

Prerequisite: CLSM 341.

CLSM 364 Statistics for Laboratory Medicine (2)

Statistical methods related to applications to medical technology and quality control. Introduction to fundamental procedures for collecting, summarizing, analyzing, and presenting data. Measures of central tendency and variation, probability, normal distribution, hypothesis testing and confidence intervals, t-tests, chi-square, correlation, and regression. Limited to medical technology students and others closely related to the clinical laboratory.

CLSM 401 Immunology II (1)

Correlation and application of theory and clinical experience with analytical techniques. Assessment and interpretation of data. Evaluation and comparison of methodologies. Directed study and review include standard serological techniques, nephelometry, and electrophoresis.

Prerequisite: CLSM 324.

Corequisite: CLSM 472.

CLSM 411 Urine and Body Fluid Analysis II (1)

Correlation and application of theory and clinical experience with analytical techniques. Assessment and interpretation of data. Evaluation and comparison of methodologies. Urinalysis screening procedures and applications in the diagnosis of renal, systemic, and metabolic diseases. Processing, analysis, and morphologic evaluation of body fluids.

Prerequisite: CLSM 303.

Corequisite: CLSM 471.

CLSM 413 Diagnostic Microbiology (8)

Correlation and application of theory and clinical experience with analytical techniques. Assessment and interpretation of data. Evaluation and comparison of methodologies. Directed study and review of diagnostic bacteriology, mycology, parasitology, and virology. Emphasis on isolation and identification of pathogenic microorganisms. Susceptibility testing, instrumentation, and rapid identification methods included.

Prerequisite: CLSM 307, 327, 328.

Corequisite: CLSM 472.

CLSM 422 Hematology III (6)

Correlation and application of theory and clinical experience with analytical techniques. Assessment and interpretation of data. Evaluation and comparison of methodologies. Directed study and review of hemostasis, cellular quantification and identification techniques, and clinical hematology. Includes white-cell, red-cell, platelet, and hemostatic disorders.

Prerequisite: CLSM 321, 322.

Corequisite: CLSM 471.

CLSM 431 Immunoassay I (2)

Fundamentals and principles of radioisotopic and nonradioisotopic immunoassays. Methods discussed include fluorescence polarization, enzyme immunoassay, chemiluminescence, and radioassay. Clinical uses of the above methods discussed and applied to clinical laboratory science.

Prerequisite: CLSM 332 or consent of instructor.

CLSM 434 Clinical Chemistry III (5)

Correlation and application of theory and clinical experience with analytical techniques. Assessment and interpretation of data. Evaluation and comparison of methodologies. Directed study and review include: carbohydrates, proteins, lipids, enzymology, electrolytes, acid-base balance, endocrine system, and therapeutic drug monitoring.

Prerequisite: CLSM 333.

Corequisite: CLSM 472.

CLSM 442 Immunohematology III (3)

Application of theory and techniques routinely used in transfusion medicine. Emphasis on correlation with clinical experience. Directed study and review includes: type and screen, antibody identification, investigation of hemolytic disease of the newborn, hemotherapy, and hazards of transfusion. Assessment and interpretation of data. Overview of donor facilities: donor criteria, records management, component preparation, blood storage, and infectious disease testing.

Prerequisite: CLSM 341, 342.

Corequisite: CLSM 471.

CLSM 455 Special Procedures (4)

Correlation and application of theory and clinical experience with analytical techniques. Assessment and interpretation of data. Evaluation and comparison of methodologies. Directed study and review include the following immunoassays: chemiluminescence, enzyme and radioisotopic assays, microparticle enzyme immunoassay, and fluorescence polarization. Thin-layer and high-pressure liquid chromatography, spectrophotometry, toxicology, amino acids, polymerase and ligase chain reactions, Western blot assays, and current immunologic techniques.

Prerequisite: CLSM 324, 333.

Corequisite: CLSM 472.

CLSM 471 Clinical Practicum I (6)

Thirteen weeks of supervised clinical laboratory experience in selected areas, including: parasitology, hematology, urinalysis, and body fluids. Student performs tests routinely done in these areas of the clinical laboratory. Selected case studies included as part of floor rounds.

Prerequisite: Satisfactory completion of Clinical Laboratory Science Program junior-year courses.

Corequisite: CLSM 411, 422.

CLSM 472 Clinical Practicum II (6)

Thirteen weeks of supervised clinical laboratory experience in selected areas, including: microbiology and immunohematology, with experience in transfusion services and in a blood-collection facility. Student performs tests routinely done in these areas of the clinical laboratory. Special emphasis on clinical laboratory quality-control procedures and evaluation.

Prerequisite: Satisfactory completion of Clinical Laboratory Science Program junior-year courses.

Corequisite: CLSM 413, 442.

CLSM 473 Clinical Practicum III (6)

Thirteen weeks of supervised clinical laboratory experience in selected areas, including: chemistry and special procedures. Student performs tests routinely done in these areas of the clinical laboratory. Incorporates experience in administrative duties.

Prerequisite: Satisfactory completion of Clinical Laboratory Science Program junior-year courses.

Corequisite: CLSM 434, 455.

CLSM 491 Clinical Laboratory Management I (2)

Introduction to theories of quality management, organization, strategic planning, and the decision-making process. Review and analysis of government agencies, legislation, and regulatory bodies that impact laboratory management. Comparison of quality systems-management philosophies.

Prerequisite: Satisfactory completion of Clinical Laboratory Science Program junior-year courses.

CLSM 492 Clinical Laboratory Management II (2)

Introduction to management theory, including: management styles, professional communications, business ethics, group theory, team building, process management, process control, and personnel.

CLSM 493 Clinical Laboratory Management III (2)

Financial management, with emphasis on concepts, tools, and strategies underlying financial decision making. Topics include health care reimbursement systems, coding, billing, development of operating budgets, and financial reports. Concepts of financial negotiations, inventory management, and financial planning. Integration and application of analytical techniques used in the service industries.

CLSM 495 Laboratory Science (3)

Clinical laboratory experience, in an area selected for a project, to develop a degree of specialized technical ability.

CLSM 496 Clinical Laboratory Science Seminar I (1)

Introduction to an assigned capstone project, designed to incorporate skills developed and knowledge obtained in the Clinical Laboratory Science Program junior year. Project must be of current interest to the laboratory field. Topics related to the project include literature-search methods, research methods, presentation skills, team building, assessment of impact on clinical outcomes, and analysis and implementation of clinical applications

Prerequisite: Satisfactory completion of Clinical Laboratory Science Program junior-year courses, or consent of instructor.

CLSM 497 Clinical Laboratory Science Seminar II (1)

Continuation of assigned capstone project. Presentation of relevant contemporary topics.

Prerequisite: CLSM 496 or consent of instructor.

CLSM 498 Clinical Laboratory Science Seminar III (2)

Students meet regularly with faculty advisers to formulate plans and provide status reports on progress of capstone project. Additional time outside regular class periods. Submission and presentation of assigned capstone to faculty as a culminating activity.

Prerequisite: CLSM 496, 497; or consent of instructor.

CLSM 499 Medical Technology Independent Study (1-5)

Project or paper to be submitted on a topic of current interest in an area related to medical technology. Regular meetings to provide the student with guidance and evaluation. Elected on the basis of need or interest.

CONJOINT

See CONJOINT COURSES, section III General Information, for course descriptions.

HEALTH INFORMATION MANAGEMENT

HEALTH INFORMATION SYSTEMS—Master of Health Information Systems; Post-Master's Certificate in Health Information Systems

HEALTH INFORMATION SYSTEMS—Master of Health Information Systems

Currently, there is a strong need for expertise in information systems in the health care setting. According to the U.S. Bureau of Labor Statistics, the two strongest areas of career growth are computer science and health care. Current research indicates that only a small number of graduate programs are available in information systems with a health care emphasis.

The role of the graduate is to facilitate the flow of information throughout a health care facility to enhance administrative and management decision making, financial systems, medical record department functions, strategic planning, and to interface with health care information systems, when appropriate.

THE PROGRAM

The Health Information Systems Program leads to a Master of Health Information Systems (M.H.I.S.) degree. The degree may be completed in five quarters (fifteen months).

Evening courses are offered twice a week for four quarters (twelve months). The internship follows completion of all course work.

Completion of the course work in two years (twenty-four months) is possible by special arrangement.

ADMISSION

To be eligible for admission, the applicant must have completed a baccalaureate degree with a G.P.A. of 3.0 or higher.

Prerequisites for Health Information Systems, M.H.I.S.

Baccalaureate degree with a G.P.A. of 3.0 or higher

Principles of accounting

Introduction to computer applications

Foundations of health information systems

NOTE: Students enrolled in this program are expected to have a computer with online access to the Internet.

THE PROGRAM OBJECTIVES

Upon completion of the program, the graduate should be qualified to:

1. Plan, develop, implement, monitor, and maintain information systems in the health care setting.
2. Design and evaluate information/security systems.
3. Evaluate and modify existing health information systems.
4. Implement and evaluate data-communication systems, including local-area and wide-area networks.
5. Use organizational theory and behavioral and management principles.
6. Participate in strategic management.
7. Demonstrate a knowledge of human-resources management, including the human-computer interaction systems.
8. Demonstrate awareness of current issues affecting health care and their implications for health information systems.
9. Demonstrate knowledge of research and statistical methods.
10. Demonstrate knowledge of the legal and ethical issues of health information systems.

PROGRAM OF INSTRUCTION

HEALTH INFORMATION SYSTEMS—Master of Health Information Systems

The program of instruction outlined as follows is for full-time students enrolled during the 2001-2002 academic year.

MHIS	501	Information Systems in Health Organizations	3
MHIS	502	Planning and Implementation of Health Information Systems	3
MHIS	508	Managing Information Resources	3
MHIS	511	Security and Data Communications Theory	3
MHIS	515	Maintenance and Operation of Information Systems	3
MHIS	575	Market Research Methods in Health Care	3
MHIS	595	Seminar in Health Information Systems	2
MHIS	602	Health Systems Operations Management	3
MHIS	604	Strategic Health Information Systems Management	3
MHIS	605	Health Information Systems Internship	5
AHCJ	517	Information Systems Organizational Theory	3
AHCJ	519	Graduate Portfolio	1
AHCJ	525	Biostatistics	3
AHCJ	536	Health Care Financial Management	3
AHCJ	537	Organizational Structure and Behavior	3
AHCJ	539	Human Factors in Technology Management	3
AHCJ	545	Legal and Ethical Issues in the Health Professions	3
REL	—	Religion electives	3

HEALTH INFORMATION SYSTEMS—Post-Master’s Certificate

The management of health information systems provides essential skills for administrative, clinical, and financial workers in a variety of health care settings. With the rapid increase of technology in health care, facilitation of the flow of information and the integration of systems is increasingly important to the overall management of health care facilities and to the clinicians who provide patient care.

The post-master’s certificate in health information systems is a flexible program available to physicians, dentists, administrators, and others interested in acquiring additional skills in this area.

THE PROGRAM

The post-master’s certificate program requires completion of a minimum of 18 units chosen from the program courses specified. The program begins in Autumn Quarter and may be completed in four quarters or less, depending on the courses the applicant is required to complete.

Evening courses are offered twice a week for four quarters (twelve months). Completion of the course work in two years (twenty-four months) is possible by special arrangement.

ADMISSION

To be eligible for admission, the applicant must have completed a master’s degree or the equivalent. Applicants must submit the following:

- a statement of professional goals,
- a current resume,
- transcripts, and
- a proposed program of study selected from the specified courses. Approval by the M.H.I.S.-degree program committee is required before starting the program.

Prerequisites for Health Information Systems, Post-Master’s Certificate

Master’s degree from an accredited institution.

If deemed necessary, students may be asked to complete one or more of the following prerequisite courses: accounting, foundations of health information systems, introduction to computers.

PROGRAM OF INSTRUCTION
HEALTH INFORMATION SYSTEMS—Post-Master's Certificate

The program of instruction outlined as follows suggest courses from which applicants will choose a minimum of 18 units, based on their previous education and professional experience.

MHIS	501	Information Systems in Health Organizations	3
MHIS	502	Planning and Implementation of Health Information Systems	3
MHIS	504	Data Base Concepts	3
MHIS	508	Managing Information Resources	3
MHIS	511	Security and Data Communications Theory	3
MHIS	515	Maintenance and Operation of Information Systems	3
MHIS	575	Market Research Methods in Health Care	3
MHIS	602	Health Systems Operations Management	3
MHIS	604	Strategic Health Information Systems Management	3
AHCJ	517	Information Systems Organizational Theory	3
AHCJ	536	Health Care Financial Management	3
AHCJ	537	Organizational Structure and Behavior	3
AHCJ	539	Human Factors in Technology Management	3
AHCJ	545	Legal and Ethical Issues in the Health Professions	3

HEALTH INFORMATION ADMINISTRATION—Certificate; Bachelor of Science

Health care records are part of an integrated system of health information. The data provide a basis for patient care, quality assurance, legal defense, reimbursement, risk management, accreditation, planning, and decision making. The health information department has assumed increased importance with the advent of prospective-payment corporate compliance and the necessity for diagnostic and procedural information.

A career in health information management is likely to appeal to a person who has organizational and leadership abilities and who is interested in and has aptitude for medical science but whose talents are suited for participation other than physical involvement in human illness. The health information administrator (formerly known as medical record administrator) designs, develops, and maintains systems for storage, retrieval, and dissemination of information in accordance with federal, state, and local statutes and regulations. This person works with the medical staff and other health professionals in research, administrative studies, functions relative to health information, and patient-care evaluation. The health information administrator in a health care facility will provide management leadership in planning and organizing the department, motivating and evaluating employees, and providing in-service programs for departmental employees or other personnel in the facility.

OPPORTUNITIES

While many health information administrators are employed in various areas of acute-care facilities, others work in alternative-delivery health care systems, research facilities, quality assurance, data companies, industrial establishments, governmental agencies, medical departments of insurance companies, accounting firms, or as consultants to skilled nursing and other facilities.

The multiplicity of new technologies, the advent of electronic equipment, the demand for health information, the emphasis on evaluation of care, the surge in research, the emphasis on cost control, and other factors combine to require comprehensive knowledge and increased utilization of administrative talent and judgment.

HEALTH INFORMATION ADMINISTRATION—Certificate**ADMISSION**

To be eligible for admission, the applicant must have completed a minimum of 96 quarter units at an accredited college or university.

Prerequisites for Health Information Administration, Certificate

Bachelor's degree from an accredited college/university
 Human anatomy and physiology with laboratories, complete sequence
 Pathophysiology
 Medical terminology
 College algebra/Intermediate algebra
 General psychology
 Accounting
 Computer spreadsheet (MS Excel recommended)
 Word processing
 Research methods
 Statistics
 Principles of management

Recommended:

Business communications
 Speech

Applicants who have comparable education or experience may be able to gain credit toward the certificate by equivalency examination or evaluation of credit on an individual basis.

PROFESSIONAL REGISTRATION

Upon completion of the program, and upon recommendation of the faculty, graduates are eligible to write the qualifying examination of the American Health Information Management Association (AHIMA), 919 North Michigan Avenue, Suite 1400, Chicago, IL 60611-1683, for the designation of RHIA (registered health information administrator).

PROGRAM OF INSTRUCTION
HEALTH INFORMATION ADMINISTRATION—Certificate

The program of instruction outlined as follows is for full-time students enrolled during the 2001-2002 academic year.

HLIN	301	Introduction to Health Record Science	4*
HLIN	303, 304	Basic Coding Principles and Techniques I, II	3, 3*
HLIN	305	Hospital Census and Administrative Statistics	2*
HLIN	306	E & M Coding for Billing and Reimbursement	2
HLIN	401	Survey of Health Systems Management	4
HLIN	421	The Computerized Patient Record	3
HLIN	441	Legal Aspects of Health Information Administration	3
HLIN	445	Coding Seminar	3
HLIN	451	Quality Improvement in Health Care	3
HLIN	461	Health Information Management Practicum	1-5
HLIN	483	Long-Term and Alternative-Delivery Systems in Health Care	4
HLIN	484	Current Topics in Health Information Administration	4
HLIN	494	Health Information Management	5
HLIN	495	Health Information Affiliation	1-4
AHCJ	407	Financial Management	2
RELE	457	Christian Ethics in Health Care	2

*This course is not required for RHIT progression students. A minimum of 50 units is required for completion. When required, units will be earned with other courses recommended by the student's adviser.

An LLU G.P.A. of 2.5 must be maintained throughout the program.

A minimum grade of C (2.0) is required for all courses in the program.

A minimum of 50 units is required for completion.

Diana Medal, Marilyn Davidian (department chair), Debbie Hamada, Martha Casey (department secretary), Jennifer Guerrero, and Terri Rouse expect great things from their students—because they provide exceptional training and guidance.

HEALTH INFORMATION ADMINISTRATION—Bachelor of Science

THE PROGRAM

The Health Information Administration Program, leading to the Bachelor of Science degree, begins with the Autumn Quarter. The freshman and sophomore years, which are taken at an accredited college or university, afford the fundamentals of a liberal education and provide background in science, humanities, social studies, and business. Concentration on health-information-administration subject matter begins at Loma Linda University in the junior year and continues through the senior year.

Students are advised to complete the curriculum in two years as scheduled. Those electing to study on a part-time basis because of a heavy work load or other reasons must complete all course work within a four-year period.

Accreditation

The Health Information Administration Program is accredited by the Commission on Accreditation of Allied Health Education Programs (CAAHEP), 35 E. Wacker Drive, Suite 1970, Chicago, IL 60601-2208; phone: 312/553-9355; FAX: 312/553-9616; www.caahep.org—in cooperation with the American Health Information Management Association (AHIMA), Council on Accreditation, 919 North Michigan Avenue, Suite 1400, Chicago, IL 60611-1683.

THE PROGRAM OBJECTIVES

Upon completion of the program, the graduate should be qualified to:

1. Perform assessment and management of information needs for a variety of health care settings.
2. Design, select, implement, and enhance health care information systems.
3. Protect confidential patient, employee, and administrative information.
4. Effectively manage personnel.
5. Understand financial management requirements for institutions and their relationship to clinical data.
6. Integrate financial and clinical databases in order to meet the information needs in various health care settings.
7. Produce written and verbal communication with peers, administrative officers, employees, and health care consumers.
8. Promote continuing education and expansion of professional knowledge.
9. Develop personal and professional ethics with a Christian emphasis.
10. Promote the health information management profession, including professional memberships, recruitment, and mentoring.
11. Participate in research activities that aid in decision-making abilities and quality-outcomes management.

CLINICAL EXPERIENCE

Three complementary types of clinical experience are offered. The first is a variety of assignments in large and small hospitals and other facilities that will acquaint the student with managing information in all aspects of the health care environment. The majority of these assignments are either at Loma Linda University Medical Center or at hospitals located a short distance from the University.

The second type of clinical experience is a two-week practicum during the summer at the end of the junior year. The summer practicum is not required of registered health information record technicians. The third assignment is a four-week affiliation during the Spring Quarter of the senior year.

Arrangements for the summer practicum and affiliation sites are made through the department chair and the clinical coordinator. Students are responsible for their own transportation to those facilities not within walking distance of the University, as well as for food and lodging during the two- and four-week assignments.

PROFESSIONAL REGISTRATION

Upon completion of the program, and on the recommendation of the faculty, graduates are eligible to write the qualifying examination of the American Health Information Management Association for the designation of RHIA (registered health information administrator).

PROFESSIONAL ASSOCIATION

Students and graduates are eligible to become members of the American Health Information Management Association and the California Health Information Association. The purpose of these associations is to promote the art and science of health information management. They grant student membership at a nominal cost to undergraduates of approved schools. The student is expected to become a member of these associations, pay the nominal dues, read the journals, and become familiar with their professional activities.

ADMISSION

To be eligible for admission, the applicant must have completed a minimum of 96 quarter units at an accredited college or university.

Prerequisites for Health Information Administration, B.S.

20 units minimum in humanities (choose minimum of two areas from: history, literature, philosophy, foreign language, art/music appreciation/history)

Religion required, 4 units per year of attendance at a Seventh-day Adventist college or university

Human anatomy and physiology, complete sequence

Medical terminology

Select 6 units from chemistry, geology, mathematics, physics, statistics

Two years high school mathematics with grades of C or intermediate algebra in college

General psychology

Cultural anthropology or an approved course dealing with cultural diversity

Select 4 units from: sociology, economics, geography, political science

English composition, complete sequence

Computers

Word processing

Personal health or nutrition

Two physical education courses

Introductory accounting (one quarter or semester)

Electives to meet the minimum total requirement of 96 quarter units

For total unit requirements for graduation, see Division of General Studies, LLU GENERAL EDUCATION REQUIREMENTS (section V).

PROGRAM OF INSTRUCTION**HEALTH INFORMATION ADMINISTRATION—Bachelor of Science**

The program of instruction outlined as follows is for full-time students enrolled during the 2001-2002 academic year.

JUNIOR YEAR

HLIN	301	Introduction to Health Record Science	4*
HLIN	303, 304	Basic Coding Principles and Techniques I, II	3, 3*
HLIN	305	Hospital Census and Administrative Statistics	2
HLIN	325	Pharmacology for Health Information Administration	2
HLIN	361-363	Health Information Administration Practicum I, II, III	1, 1, 1*
HLIN	395	Health Information Administration Practicum IV	2*
HLIN	483	Long-Term and Alternative-Delivery Systems in Health Care	4
AHCJ	305	HIV/AIDS and the Health Provider	1
AHCJ	308	Professional Communications	2
AHCJ	328	Portfolio Practicum I	1
AHCJ	331	Human Resource Management	3
AHCJ	351	Statistics for the Health Professions	3
AHCJ	402, 403	Pathology I, II	4, 3
AHCJ	408	Health Care Management	4
AHCJ	431, 432	Database Management I, II	3, 2
REL	___	Religion electives	3

*This course is not required for RHIT progression students. The necessary units for graduation will be earned with other courses recommended by the student's adviser

Courses within the senior year may be taken only after completion of the junior year and the summer practicum, with an LLU G.P.A. of 2.5; or by permission of the department chair.

SENIOR YEAR

HLIN	306	E & M Coding for Billing and Reimbursement	2*
HLIN	401	Survey of Health Systems Management	4
HLIN	421	The Computerized Patient Record	3
HLIN	441	Legal Aspects of Health Information Administration	3
HLIN	445	Coding Seminar	3
HLIN	451	Quality Improvement in Health Care	3
HLIN	462, 463	Health Information Administration Practicum V, VI	1, 1
HLIN	471	Applied Research Methods	2
HLIN	484	Current Topics in Health Information Administration	4
HLIN	494	Health Information Management	5
HLIN	495	Health Information Affiliation	4
AHCJ	407	Financial Management	2
AHCJ	433	Special Projects in Computer Applications	2
AHCJ	461	Research Methods	2
AHCJ	498	Portfolio Practicum II	1
RELE	457	Christian Ethics and Health Care	3
RELF	423	Loma Linda Perspectives	2

A minimum grade of C (2.0) is required for all courses in the program.

*Course not required for RHIT Progression students. The necessary units for graduation will be earned with other courses recommended by the student’s adviser.

CODING SPECIALIST—Certificate

Health care facilities need coders for accurately figuring ICD-9-CM, CPT, E & M and DRG assignments for diagnostic and surgical information from health records. In most instances, financial reimbursement is tied to these numeric codes. The statistical information generated from the codes is used in research, quality patient care, education, and administrative decision making.

In acute-care facilities the coding specialist usually works in a medical record department and enjoys professional interaction with other medical record practitioners. In physician medical-practice settings, the coding specialist works closely with physicians to identify diagnoses and procedures for optimal reimbursement.

OPPORTUNITIES

Coding specialists are in demand in acute-care and ambulatory-care facilities, including physician-office practices and long-term care facilities. A variety of government agencies require coding expertise as well. The need for accurate, skilled coders is acute in California and throughout the nation. Job-opportunities information is mailed to alumni as it becomes available.

THE PROGRAM

The Coding Specialist Certificate Program is a nine-quarter program. Classes meet once a week in the evening. The student is introduced to health care records, including the need for confidentiality and ethics.

Professional certification

Upon successful completion of the program, the student is eligible to take the national certification examination of the American Health Information Management Association.

THE PROGRAM OBJECTIVES

Upon completion of the program, the graduate should be qualified to:

1. Use with understanding the instructions in format, organization, and mechanics of the ICD-9-CM, CPT, E & M coding systems.
2. Code with accuracy and consistency.
3. Analyze medical records to identify significant medical conditions and surgical procedures; correctly select the principal diagnosis and procedure; and appropriately sequence other diagnoses, complications, and procedures.
4. Supervise health-data collection and processing through coding, indexing, and maintaining disease and operation statistics.
5. Develop policies and procedures for coding, including a plan for coding quality.
6. Follow federal, state, and professional society guidelines for coding in health institutions.
7. Understand the concepts of the prospective payment system and perform diagnostic related-group and ambulatory-patient classification assignments using decision trees and computerized patient-data groupers.
8. Delineate the difference between optimization of coding in compliance with governmental regulations and fraudulent coding.

ADMISSION

Prerequisites for Coding Specialist, Certificate

High school diploma or equivalent
Human anatomy and physiology

Subject requirement for 2001-2002

The applicant must complete the following subject requirement at an accredited college or university:

Human anatomy and physiology, complete sequence (may take LLU course AH CJ 235 Anatomy and Physiology to fulfill requirement Summer Quarter previous to HLCS 239)

PROGRAM OF INSTRUCTION CODING SPECIALIST—Certificate

The program of instruction outlined as follows is for students enrolled during the 2001-2002 academic year.

HLCS 238	Essentials of Human Disease	3
HLCS 239	Introduction to Coding and Medical Records	3
HLCS 241	Medical Terminology	3
HLCS 242	Coding I	4
HLCS 243	Coding II	4
HLCS 245	Coding III	4
HLCS 254	Evaluation and Management Coding for Billing and Reimbursement	3
HLCS 261	Coding Practicum I	3
HLCS 262	Coding Practicum II	3

A minimum grade of C (2.0) is required for all courses in the program.

COURSES

For information about units of credit and course numbers, see the beginning of section III of this BULLETIN. Multinumbered courses must be completed in sequence.

HLCS 238 Essentials of Human Diseases (3)

Survey of human diseases, including the etiology, pathogenesis, and clinical manifestations of commonly encountered diseases.

HLCS 239 Introduction to Coding and Medical Records (3)

Introduction to health care facilities and the information systems involved in the care of health records. In-depth study of health-record content, confidentiality of health care information, and professional ethics.

HLCS 241 Medical Terminology (3)

Prefixes, suffixes, and root words used in the language of medicine. Terms pertaining to pathology and surgery.

Prerequisite: Human anatomy and physiology.

HLCS 242 Coding I (4)

Principles and conventions for using ICD-9-CM. Coding techniques by body system and disease process: infectious, endocrine, nutritional, metabolic, blood; parasitic diseases; immunity disorders; respiratory, digestive, nervous, sense organs, and circulatory. Laboratory as needed.

Prerequisite: HLCS 239, 241; or equivalent.

HLCS 243 Coding II (4)

Continues coding techniques by body system and disease process: genitourinary, neoplasms, mental disorders, skin and subcutaneous tissue, musculoskeletal, and connective tissue. Congenital anomalies, injury, poisoning, and complications of pregnancy and childbirth. Laboratory as needed.

Prerequisite: HLCS 242.

HLCS 245 Coding III (4)

Focus on advanced coding principles, including: the prospective payment system and decision-making leading to optimal DRG assignment, regulatory-agency coding requirements at the state and national levels, coding assessment by peer-review organizations, coding quality assurance, CPT in in/outpatient settings, physician-based CPT coding, and APCs. Laboratory included.

Prerequisite: HLCS 243.

HLCS 254 Evaluation and Management Coding for Billing and Reimbursement (3)

Principles of evaluation and management coding, and CPT modifier assignment pertaining to outpatient health care services and physician professional billing in outpatient, inpatient, ER, observation unit, and skilled nursing facilities. HCFA regulations for E&M coding are explored. This course also addresses principles of billing and third-party reimbursement in the health care field, emphasizing billing forms and the billing process.

Prerequisite: HLCS 242, 243, 245; or equivalent.

HLCS 261 Coding Practicum I (3)

A sixty-six-hour coding laboratory designed to provide a capstone experience for students in the Coding Specialist Program who have completed all required academic course work in coding. Coding practicum enables students to apply all state and national coding and reimbursement regulations for inpatient and outpatient coding to a variety of patient records covering common diseases and procedures of all body systems. Laboratory coordinated by instructor, who evaluates the students' work for thoroughness and accuracy, and who provides corrective feedback. Laboratory provides the student the opportunity for repeated coding practice in order to improve speed and productivity.

Prerequisite: HLCS 238, 239, 241, 242, 243, 245, 254.

HLCS 262 Coding Practicum II (3)

A sixty-six-hour coding laboratory designed to provide a capstone experience for students in the Coding Specialist Program who have completed all required academic course work in coding. Coding practicum enables students to apply all state and national coding and reimbursement regulations for inpatient and outpatient coding to a variety of patient records covering common diseases and procedures of all body systems. Laboratory coordinated by instructor, who evaluates the students' work for thoroughness and accuracy, and who provides corrective feedback. Laboratory provides the student the opportunity for repeated coding practice in order to improve speed and productivity.

Prerequisite: HLCS 238, 239, 241, 242, 243, 245, 254, 261.

HLIN 301 Introduction to Health Records Science (4)

History of medical records, professional ethics, and the administration of medical records as a profession and as a health-care facility service. Techniques for numbering and filing records. Sources of information. Reporting requirements. Principles of indexes and registers, collateral records, preservation of records. Philosophy of accreditation, third-party payor, and licensure standards for hospitals. Quantitative and qualitative analysis and chart-completion systems. In-depth study of the medical record, including the problem-oriented record. Laboratory.

HLIN 303 Basic Coding Principles and Techniques I (3)

Principles of disease and operation classification (coding) using ICD-9-CM. Basic coding techniques for diagnoses, surgical procedures, symptomatology, and other reasons for health care encounters. Disease and operation coding techniques by topic: infectious, parasitic, endocrine, nutritional, metabolic, immunity disorders, hematologic, nervous, sense organs, circulatory, respiratory, and digestive. Manual and computerized DRG assignment. Laboratory designed to enhance student coding proficiency.

HLIN 304 Basic Coding Principles and Techniques II (3)

Review of disease and operation coding by system: hepatic, biliary, urogenital, skeletal, neoplastic. Special emphasis on obstetrical and newborn coding, trauma, external causes of trauma, congenital anomalies, and chromosome disorders. History, principles, and purpose of recognized systems of disease and operation nomenclatures and classifications. Indexes used in health care settings. Techniques of indexing utilized to compile, store, and retrieve medical data. Analysis of the major classification systems available. Laboratory designed to enhance student coding. Actual medical record coding emphasizing proficiency.

Prerequisite: HLIN 303.

HLIN 305 Hospital Census and Administrative Statistics (2)

Basic census formulas and definitions. Development and use of statistics as required by health care facilities, clinics, and licensing and accrediting bodies.

Prerequisite: HLIN 301.

HLIN 306 E & M Coding for Billing and Reimbursement (2)

Principles of evaluation and management coding, CPT modifier assignment pertaining to physician professional billing in outpatient, inpatient, ER, observation unit, and home-health settings. Principles of billing and third-party reimbursement in the health care field, emphasizing billing forms and the billing process.

Prerequisite: HLIN 303, 304.

HLIN 325 Pharmacology for Health Information Administration (2)

Introduction to understanding of pharmacology as required for medical record analysis, audits, and other related studies. Basic definitions, sources of information, classification of drugs, and principles and mechanisms of drug actions.

HLIN 361, 362, 363 Health Information Administration Practicum I, II, III (1, 1, 1)

Supervised experience in medical record departments and other areas of health care facilities.

HLIN 395 Health Information Administration Practicum IV (2)

Two-week, supervised clinical experience (eighty clock hours) during the summer at the end of the junior year in a health facility or health-related organization, as approved by the department chair. Written and oral reports of experience, with classroom discussion. Not required of accredited record technicians.

Prerequisite: Completion of junior-year courses and clinical assignments, or permission of the department chair.

HLIN 401 Survey of Health Systems Management (4)

General systems concepts in health care: analysis, design, implementation, and maintenance. Management of information systems in an integrated or interfaced environment. Emphasis on health information applications. Identification of manual methodology that can be computerized. Development of databases, screens, and reports. Analysis of information-management standard requirements.

HLIN 421 The Computerized Patient Record (3)

Applications of information-systems theory directly to the process of moving a health care facility to a nonpaper, electronic health record. Evaluation of existing vendor software, hardware, and services that could be utilized to accomplish this goal. Development of CPR-user survey and information on request-for-proposal process discussed.

Prerequisite: HLIN 401.

HLIN 441 Legal Aspects of Health Information Administration (3)

Basic principles of law related to the health care field. Law-making process. Analysis of legislation. Risk-management aspects of medical documentation. Court system in the United States as it relates to negligence. Development of policies and procedures regarding confidentiality. Release of general, psychological, alcohol and drug, and HIV-positive health documentation. Release of information in response to subpoena. Design and analysis of consent forms.

HLIN 445 Coding Seminar (3)

Advanced coding concepts. Issues in reimbursement coding for DRGs, coding quality assurance, and CPT coding. Coding for APCs introduced. Laboratory on coding software included.

Prerequisite: HLIN 304 or equivalent.

HLIN 451 Quality Improvement in Health Care (3)

Quality improvement methodology. Data retrieval, display, and follow up for various sectors of health care. Mechanisms for promoting facility-wide participation in achieving optimum patient care as delineated in medical-staff information management, accreditation, and government standards. Risk management as an integral facet of quality improvement.

HLIN 461 Health Information Management Practicum (1-5)

Supervised experience in health information departments, with emphasis on management projects. Previous management experience considered when assigning the course load, the practicum environment, and the projects. Course may be repeated for additional credit.

HLIN 462, 463 Health Information Administration Practicum V, VI (1, 1)

Supervised experience in health information departments and other areas of health care facilities, with emphasis on the management aspect.

HLIN 471 Applied Research Methods (2)

Laboratory with application of research methodologies to health information administration, including evaluation of published research within the field. Directed experience in a research project.

Prerequisite: AHJC 351, 461.

HLIN 483 Long-Term and Alternative Delivery Systems in Health Care (4)

Focus on aspects of health information management in delivery systems other than acute care, and their interrelationships. Health-record content, format, regulatory and accreditation requirements, record storage and retention, data collection/reporting, risk management, utilization management, and quality-improvement areas reviewed. Long-term care, hospital-based ambulatory care, free-standing ambulatory care, hospice, home care, dialysis-treatment centers, veterinary medicine, subacute care, mental health care, and managed-care organizations.

HLIN 484 Current Topics in Health Information Administration (4)

Topics of current interest in the field of health information administration, including career planning and professionalism. Content varies.

Prerequisite: AH CJ 408; HLIN 494.

HLIN 494 Health Information Management (5)

Advanced approach to record systems and technical aspects of health information administration. Resource management. Projects included. Preparing resumes, practicing interviewing skills, designing and developing a functional layout plan for a department. Disaster-preparedness documentation. Organizational, interrelational, and managerial functions and concepts in the health care setting.

Prerequisite: AH CJ 408.

HLIN 495 Health Information Affiliation (1-4)

Directed experience (40 to 160 clock hours) at an approved facility. Application of skills and knowledge in management. Written and oral reports of experience with classroom discussion. International experience may be available.

Prerequisite: Completion of the first two quarters of the senior year or permission of the department chair.

HLIN 499 Health Information Administration Independent Study (1-4)

Project or paper to be submitted on a topic of current interest in an area of health information administration. Regular meetings to provide the student with guidance and evaluation. Elected on the basis of need or interest.

May be repeated.

MHIS 501 Information Systems in Health Organizations (3)

Concepts of information management, including decision support, executive/management systems, systems modeling, and computer/workstation technology. Exploration of new options for technology in information systems and current hardware and software in use.

MHIS 502 Planning and Implementation of Health Information Systems (3)

Evaluation and modification of existing systems. Planning, design, and implementation of new health information systems. Systems typologies and topologies, methods of critical analysis of needs, and development of models to meet identified needs. Systems design and development. Managing patient information across a continuum of care. Accessing information relevant to the health care organization. Emphasis on systems integration, coordination of the planning and development process, setting objectives for a system, and determining whether the objectives are met in the finished product. Scheduled laboratory with practical applications.

MHIS 504 Data Base Concepts (3)

Essentials of database environment and development processes. Concepts of database analysis and design, including various database models and available software. Management principles of data warehouses included. Although sufficient technical detail provided, emphasis remains on management and implementation issues pertinent in an information systems curriculum.

MHIS 508 Managing Information Resources (3)

Technology as information. Information as a return on investment. Theory and practice of managing existing information systems. Responsibilities and interactions of the successful information professional in a health care organization. Project selection and prioritization, project management and control, staffing, organizational integration, and communication with other elements of the organization. Scheduled laboratory assignments using project-management and application-development software.

MHIS 511 Security and Data Communications Theory (via web) (3)

How information systems work. Fundamentals of information systems hardware and software, including existing databases on local and national networks. Internet and Intranet projects required. Distributed data processing, client-server systems, local-area networks (LAN), wide-area networks (WAN), and data communications, including voice and image. Field trips. Scheduled laboratory assignments using various database environments.

MHIS 515 Maintenance and Operation of Information Systems (via web) (3)

Process of maintenance and management of data-communication systems. Network administration. Analysis and development of information-security systems, system auditing, information-system documentation, and system-maintenance plans. Development of maintenance plan and security plan. Scheduled laboratory.

MHIS 575 Market Research Methods in Health Care (3)

Application of health care-market data sources, including the Internet, *Dartmouth Health Care Atlas*, government and health care agencies, health care-market research firms, publications, and others. Effective presentation of market research data for decision-support systems using multiple communication formats, including written analysis, public speaking/LCD presentations, media strategic-planning/business-planning documents, accreditation reports, and other resources.

MHIS 595 Seminar in Health Information Systems (2)

Projects and case studies designed to prepare the student for the internship. Techniques of personnel selection, interviewing, vendor evaluation, and management of an HIS department

Prerequisite: To be taken in the last quarter before the internship.

MHIS 602 Health Systems Operations Management (3)

Use of quantitative methods to analyze and improve business processes within an organization. Regression analysis, simulation, decision analysis, capacity planning, inventory models, linear programming, scheduling, and cost-benefit analysis.

MHIS 604 Strategic Health Information Systems Management (3)

Decision making, planned change through the strategic planning process. Purpose, vision, mission, and strategic objectives. Developing strategic alternatives and choices incorporating information technology. System life-cycle method. Concepts of marketing strategy and competition analysis in the health care market. Integration mergers, restructuring, and downsizing; and their effects. Presentation of a health information-system technology business plan.

MHIS 605 Health Information Systems Internship (5)

Practical application of the principles of classroom theory in a health care setting. Major project required.

Prerequisite: Completion of all M.H.I.S.-degree course work.

CONJOINT

See CONJOINT COURSES, section III General Information, for course descriptions.

NUTRITION AND DIETETICS

DIETETIC TECHNOLOGY—Associate in Science; Certificate

NUTRITION AND DIETETICS—Progression Bachelor of Science; Bachelor of Science; Certificate

BERTRUM C. CONNELL, Chair

DIETETIC TECHNOLOGY—Associate in Science

The dietetic technician is a support member of the nutrition-care team. At the direction of the dietitian, the dietetic technician screens patients for nutrition-care needs, marks menus, teaches individuals or groups, monitors effectiveness of nutrition care, and documents findings in the patient's medical record. Dietetic technicians contribute to the overall success of the food service by developing menus, supervising food-service employees, monitoring quality of food, and providing in-service training for employees.

OPPORTUNITIES

The dietetic technician practices with other members of the nutrition-care team, including the registered dietitian, the dietetic assistant, and food-production and food-service personnel. Employment may be found in a variety of environments, including hospitals and other health care facilities, retirement centers, schools and universities, government and community agencies, food-management companies, and industrial feeding sites.

THE PROGRAM

The program consists of four quarters and integrates the theory of the classroom studies with the experience of the laboratory and supervised clinical experience. Students participate as active learners in a variety of settings planned to develop competent dietetic technicians. The Associate in Science degree is awarded upon successful completion of the program.

Accreditation

The Dietetic Technology Program is currently granted accreditation by the Commission on Accreditation for Dietetic Education of The American Dietetic Association, 216 West Jackson Boulevard, 7th floor, Chicago, IL 60606-6995; Phone: 800/877-1600; Web site www.eatright.org/cade; FAX: 312/899-4899.

PROFESSIONAL REGISTRATION

Upon satisfactory completion of the program and upon recommendation of the faculty, the graduate will be eligible to take the registration examination of the Commission on Dietetic Registration in order to become a dietetic technician, registered (DTR).

PROFESSIONAL ASSOCIATION

Students and graduates are eligible for membership in The American Dietetic Association. The mission of the association is to provide

direction and leadership for quality practice, education, and research; and to promote optimal health and nutritional status of the American population. This organization grants student membership at a nominal cost to undergraduates of approved schools. The national office of The American Dietetic Association is at 216 West Jackson Boulevard, Chicago, IL 60606-6995. Along with membership in the American Dietetic Association, students become members of the California Dietetic Association. Students are encouraged to join the Inland District Dietetic Association and, where possible, the Seventh-day Adventist Dietetic Association.

THE PROGRAM OBJECTIVES

Upon completion of the program, the graduate should be qualified to:

1. Perform competently at the entry level of technical practice.
2. Value life-long learning.
3. Utilize current technology.
4. Participate as a leader in nutrition care.
5. Recognize the option to pursue a bachelor's degree program upon completion of the Associate in Science degree.
6. Fill the need for registered dietetic technicians, where appropriate, within the health care and educational network of Seventh-day Adventist institutions as well as local organizations.

ADMISSION—Associate in Science

Admission to the program is based upon a selective process. To be eligible for consideration, the applicant must meet the following criteria:

- completion of prerequisite requirements listed below, at an accredited college or university;
- a 2.5 G.P.A. or above;
- an interview;
- letter of application; and
- recommendations.

Prerequisites for Dietetic Technology, A.S.

Religion required, 4 units per year of attendance at a Seventh-day Adventist college

Human anatomy and physiology with laboratory

Introductory chemistry with laboratories, complete sequence

Two years high school mathematics with grades of C or better, **or** intermediate algebra in college

Sociology

English composition, complete sequence

Speech

Computer competency

Human nutrition

Electives to meet the total minimum requirements of 43 quarter units

Nutrition and dietetics students—Rhonda Ng, Adina Tapu, and Juliann Aranda—look on as assistant professor Maxine Taylor explains the importance of presentation for the weekly LUNCH POWER buffet and Spiritual Wholeness meetings.

**PROGRAM OF INSTRUCTION
DIETETIC TECHNOLOGY—Associate in Science**

The program of instruction outlined below is for full-time students enrolled during the 2001-2002 academic year.

SOPHOMORE YEAR

POST-SUMMER SESSION (4 weeks): August 20-September 14, 2001

DTCH 201	Human Nutrition	3
DTCH 202	Food Selection and Preparation	4
DTCH 203	The Art of Food Presentation	3

AUTUMN QUARTER: September 24-December 13, 2001

DTCH 205	Professional Issues in Nutrition and Dietetics	1
DTCH 239	Life-Cycle Nutrition	2
DTCH 241	Introduction to Clinical Nutrition	3
DTCH 271	Quantity Food Purchasing, Production, and Service	5
AHCJ 407	Financial Management	2

WINTER QUARTER: January 3-March 15, 2002

DTCH 242	Nutritional Care	4
DTCH 272	Food Systems Management	4
DTCH 204	Community Nutrition	4
REL_ ___	Religion elective	2

SPRING QUARTER: March 25-June 7, 2002

DTCH 281	Operations Management in Quantity Food Production	4
DTCH 291	Dietetic Technology Affiliation	4
AHCJ 305	HIV/AIDS and the Health Provider	1
AHCJ 408	Health Care Management	4
RELF 436	Adventist Heritage and Health	3

A minimum grade of C (2.0) is required for all courses in the program.

**DIETETIC TECHNOLOGY—
Certificate**

ADMISSION

To be eligible for admission, the applicant must have earned a minimum of a baccalaureate degree at an accredited college or university.

- Prerequisites for Dietetic Technology, Certificate Bachelor's degree from an accredited college/university
Human anatomy and physiology with laboratories, complete sequence
Introductory chemistry with laboratories, complete sequence
Sociology
Speech

**PROGRAM OF INSTRUCTION
DIETETIC TECHNOLOGY—Certificate**

Subject requirements for 2001-2002

Applicants must meet the core professional requirements as specified for the A.S. degree.

The program of instruction for students seeking the certificate in dietetic technology is identical to the program of instruction for the A.S. degree. Courses previously taken that are identical to courses required for the degree may, with proper documentation, be considered as meeting the requirements. The final decision is made through the academic variance process.

This program meets the 450 clock hours of professional practice necessary to establish eligibility to write the registration examination for the dietetic technician.

**NUTRITION AND DIETETICS—
Progression Bachelor of Science**

Prerequisites to the junior year

Progression to the bachelor's degree program to become a registered dietitian requires completion of all the prerequisites for the bachelor's degree. These include general chemistry, microbiology, general psychology, and humanities—including cultural diversity/cultural anthropology. The prospective student should complete a year of practice as a registered dietetic technician before applying to the bachelor's degree program.

NUTRITION AND DIETETICS—Bachelor of Science

Dietetics, a vital profession in the field of health promotion, focuses on the sciences of nutrition and management in feeding individuals and groups throughout the life cycle. The Coordinated Program in Dietetics combines supervised professional practice with didactic curriculum to develop professional skills concurrently with cognitive and technical skills.

Admission to the program is based on a selective process. To be eligible for consideration, the applicant must meet the following criteria: completion of subject requirements, as indicated, at an accredited college or university; a 3.0 G.P.A. or above; an interview; a letter of application; and recommendations.

OPPORTUNITIES

Dietetic practice is the application of principles derived from integrating knowledge of food, nutrition, biochemistry, physiology, business and management, journalism, behavioral and social sciences, and the arts to achieve and maintain health, prevent disease, and facilitate recovery from illness.

Members of the dietetics profession practice in a variety of environments, including hospitals and other health care facilities, schools and universities, government and community agencies, business, and industry. A growing number of dietitians are employed in physicians' offices, clinics, home-health care agencies, mass communication, and many other entrepreneurial roles.

By successfully passing the registration examination for dietitians, practice opportunities as a specialist in medical nutrition therapy, administrative dietetics, nutrition education, community nutrition, or research are available. There is increased recognition of the importance of nutrition in the fields of medicine, dentistry, and health promotion—with emphasis on fitness and optimal well-being. This indicates that the dietitian's scope of practice is steadily widening.

MEDICAL NUTRITION THERAPY

The dietitian in medical nutrition therapy applies the science of nutrition to the care of people through health promotion and disease prevention; and uses medical nutrition therapy in the treatment of disease. The effective dietitian must be aware of the cultural, social, economic, aesthetic, and psychological factors that affect eating patterns. As a member of the patient-care team, the registered dietitian (RD) is responsible for assessing, implementing, and monitoring the nutritional care of patients. In addition, the RD may

serve professionally as a nutrition practitioner in health care; a teacher in an educational institution; a research dietitian; or a nutrition consultant-educator in municipal, state, or federal departments of health.

ADMINISTRATIVE DIETETICS

The administrative registered dietitian (RD) manages food-service systems. In a health care institution, the RD is responsible for the effective functioning of food service from the standpoint of patients, administration, medical staff, and personnel. The administrative RD may also teach; manage food systems in educational, public, or commercial facilities; serve as consultant to health care or educational institutions; or enter the field of research.

COMMUNITY NUTRITIONIST

Community nutritionists practice in diverse settings, translating nutrition science into improved health status. Challenges may include forming partnerships with various organizations, mastering technology, enacting regulations and policies that protect and improve the public's health, and creatively managing of scarce resources. Dietitians working in the community exhibit high-quality leadership and planning skills, and many create positions that are entrepreneurial as well as financially rewarding.

THE PROGRAM

The Nutrition and Dietetics Program is established to prepare entry-level dietitians to enter the profession and contribute to the wholeness of mankind. The graduate is awarded the Bachelor of Science degree and is eligible to write the registration examination of the Commission on Dietetic Registration. The program is composed of didactic and supervised professional practice experiences in an environment of liberal arts education to prepare an educated graduate. Admission to the professional program at this University begins with the Autumn Quarter of the junior year. The applicant will present at least two years of preprofessional education from an accredited college or university to meet the specific subject requirements for 2001-2002.

The professional program of eight quarters includes theory, laboratory, research, and clinical experiences. Ten-to-eleven weeks of clinical experience are scheduled at the end of the junior year and eight weeks during the Spring Quarter of the senior year. Students participate as active members of the nutrition-care team in multiple clinical settings. Administrative affiliation experiences involve decision-making assignments in volume-feeding operations.

Accreditation

The Coordinated Program in Dietetics is currently granted accreditation by the Commission on Accreditation for Dietetics Education of The American Dietetic Association, 216 West Jackson Boulevard, Chicago, IL 60606-6995, 312/899-1600.

PROFESSIONAL REGISTRATION

Upon satisfactory completion of the program and upon recommendation of the faculty, the graduate will be eligible to take the registration examination for dietitians in order to become a registered dietitian.

PROFESSIONAL ASSOCIATION

Students and graduates are eligible for membership in The American Dietetic Association. The mission of the association is to provide direction and leadership for quality practice, education, and research; and to promote optimal health and nutrition status of the American population. The association grants student membership at a nominal rate to students in accredited programs. The national office of The American Dietetic

Association is at 216 West Jackson Boulevard, Chicago, IL 60606-6995. Along with membership in The American Dietetic Association, students become members of the California Dietetic Association. Students are encouraged to join the Inland District Dietetic Association and, where possible, the Seventh-day Adventist Dietetic Association.

THE PROGRAM OBJECTIVES

Upon completion of the program, the graduate should be qualified to:

1. Perform competently at the entry level of professional practice.
2. Exhibit Christian ethical and moral values.
3. Exhibit an investigative spirit to continue attaining knowledge and developing professional competency beyond the entry level.
4. Communicate effectively and be computer literate, using and analyzing data in the decision-making process.
5. Develop leadership skills to achieve personal and corporate goals.
6. Incorporate critical thinking skills into professional and personal decisions.
7. Demonstrate, from a historical and contemporary basis, the value of diversity in the personal and professional life from ethnic, gender, generational, and ideological points of view.

PROGRAM OF INSTRUCTION

NUTRITION AND DIETETICS—Bachelor of Science

The program of instruction outlined as follows is for full-time students enrolled during the 2001-2002 academic year.

JUNIOR YEAR

POST-SUMMER SESSION (4 weeks)

DTCS	301	Human Nutrition*	3
DTCS	302	Food Selection and Preparation	4
DTCS	303	The Art of Food Presentation	3

AUTUMN QUARTER

DTCS	305	Professional Issues in Nutrition and Dietetics	0.5
DTCS	339	Life Cycle Nutrition	2
DTCS	341	Introduction to Clinical Nutrition	3
DTCS	371	Quantity Food Purchasing, Production, and Service	5
AHCJ	329	Organic Chemistry	5

WINTER QUARTER

DTCS	304	Community Nutrition	4
DTCS	342	Medical Nutrition Therapy I	5
DTCS	372	Food Systems Organization and Management	4
AHCJ	402	Pathology	4

SPRING QUARTER

DTCS	343	Medical Nutrition Therapy II	5
DTCS	442	Nutrition Counseling	3
AHCJ	305	HIV/AIDS and the Health Provider	1
AHCJ	332	Biochemistry	5
RELF	436	Adventist Heritage and Health	3

*Required only if not completed as a prerequisite

ADMISSION

Prerequisites for Nutrition and Dietetics, B.S.

- Two years high school mathematics with grades of C or better; **or** intermediate algebra in college
- Anatomy and physiology
- General chemistry with laboratories, one semester or two quarters
- Microbiology with laboratory
- General psychology
- Sociology
- Cultural anthropology **or** an approved course dealing with cultural diversity
- English composition, complete sequence
- Speech
- Computer competency
- Human nutrition
- Two physical education courses
- Electives to meet the total minimum requirements of 83 quarter units
- For total unit requirements for graduation, see Division of General Studies, LLU GENERAL EDUCATION REQUIREMENTS (section V).**

SENIOR YEAR

SUMMER Professional Practice Experience (11 weeks)

DTCS 395 Nutrition and Dietetics Practicum (11 weeks) 6

AUTUMN

DTCS 305 Professional Issues in Nutrition and Dietetics 0.5
 DTCS 321 Nutrition and Human Metabolism 2
 DTCS 444 Medical Nutrition Therapy III 3
 DTCS 445 Nutrition Care Management 2-4
 AHCJ 351 Statistics for the Health Professions 3
 AHCJ 407 Financial Management 2
 RELE 457 Christian Ethics and Health Care 3

WINTER

DTCS 425 Pharmacology in Medical Nutrition Therapy 2
 DTCS 452 Advanced Nutrition 4
 DTCS 461 Food Science 4
 DTCS 476 Exercise Physiology in Medical Nutrition Therapy 3
 DTCS 491 Orientation to Research in Dietetics Laboratory 1
 AHCJ 461 Research Methods 2

SPRING

DTCS 453 Advanced Medical Nutrition Therapy 4
 and
 DTCS 473 Clinical Nutrition Affiliation (8 weeks) 6
 or
 DTCS 474 Advanced Food Systems Management 4
 and
 DTCS 479 Administrative Dietetics Affiliation (8 weeks) 6
 or
 DTCS 477 Advanced Community Nutrition 4
 and
 DTCS 478 Community Nutrition Affiliation (8 weeks) 6
and
 REL_ ____ Religion elective 3

Having concluded their meeting, nutrition and dietetics staff and faculty take time out for an introduction. Standing are Darlene McIntyre, department secretary; Cindy Kosch, Crystal Whitten, and Joni Pagenkemper—all faculty; Kenneth Burke, associate department chair; Maxine Taylor, faculty; and Georgia Hodgkin, program director. Seated is Bert Connell, department chair.

NUTRITION AND DIETETICS—Certificate

ADMISSION

To be eligible for admission, the applicant must have earned a minimum of a baccalaureate degree at an accredited college or university.

Subject requirements for 2001-2002

The applicant must complete the core professional courses required for the B.S. degree.

Residency requirement

A minimum of 36 units of credit in residency is required.

PROGRAM OF INSTRUCTION

NUTRITION AND DIETETICS—Certificate

An individualized program of instruction will be developed prior to admission, based on the applicant's need and previous courses, to assure that all program requirements are met to establish eligibility to write the registration examination for

dietitians of the Commission on Dietetic Registration.*

A minimum grade of C (2.0) is required for all courses in the program.

*Academic course work demonstrating competency in the following prerequisites is required:

Prerequisites for Nutrition and Dietetics, Certificate

- Bachelor's degree from an accredited college
- Human anatomy and physiology with laboratories, complete sequence
- Microbiology with laboratory
- General chemistry with laboratories, one semester or two quarters
- General psychology
- Sociology
- English
- Speech
- Writing
- Mathematics
- Computers

COURSES

For information about units of credit and course numbers, see the beginning of section III of this BULLETIN.

DTCH 201 Human Nutrition (3)

Fundamentals of normal nutrition. Carbohydrates, proteins, fats, vitamins, and minerals; their roles in human metabolism. Introduction to nutrition in the life cycle. Per week: lecture 3 hours.

DTCH 202 Food Selection and Preparation (4)

Foods and their nutritive values. Changes associated with maturation, preservation, table preparation, transportation, and storage in relation to food safety. Per week: lecture 3 hours, practicum 3 hours. Laboratory fee.

DTCH 203 The Art of Food Presentation (3)

Art of food presentation to enhance acceptance of food. Nutritional concepts and cultural food patterns in planning and producing meals. Focus on meal service at home and in professional and social settings. Per week: lecture 2 hours, practicum 3 hours. Laboratory fee.

Prerequisite: DTCH 201, 202; or consent of the instructor.

DTCH 204 Community Nutrition (4)

Education of community members in different areas related to nutrition requiring knowledge of normal nutrition and life-cycle issues. Nutrition assessment; medical nutrition-therapy topics such as obesity, CHD, diabetes, etc. Legislative process and politics. Program planning, implementation, management, and evaluation. Counseling, teaching, and facilitating group processes. Interpreting data and research findings. Identifying and accessing community-nutrition resources. Community interactions that promote a healthy lifestyle, including but not limited to nutrition topics. Per week: lecture 2 hours, practicum 6 hours.

Prerequisite: DTCH 201.

Corequisite: DTCH 239, 241.

DTCH 205 Professional Issues in Nutrition and Dietetics (1)

Growth of dietetic technology and of nutrition and dietetics as professions; Their role in restoration and maintenance of health. Nontraditional roles of the dietetic technician and registered dietitian illustrated. Emphasis on the development of professionalism accountability, the responsibility for lifelong learning. Preparation of a professional portfolio.

DTCH 239 Life Cycle Nutrition (2)

Management of the normal nutrition needs of individuals across the life span. Includes focus on pregnancy, lactation, normal infant growth and development, childhood, and adolescence, with an overview of school feeding programs. Adult men's and women's health issues. Geriatrics. Per week: lecture 1 hour, practicum 3 hours.

Prerequisite: DTCH 201.

Corequisite: DTCH 241.

DTCH 241 Introduction to Clinical Nutrition (3)

Basic knowledge of the responsibilities of the clinical dietetic technician and dietitian: medical terminology, patient charts, documentation in the medical record, patient interviewing, and counseling techniques. Utilization of the computer for diet analysis. Introduction to nutrition assessment, vegetarian diets, nutrition quackery, sports nutrition, obesity, eating disorders, osteoporosis, dental nutrition, and labeling requirements. Open to dietetic technician students only. Per week: lecture 1 hour, practicum 6 hours.

Prerequisite: DTCH 201 or equivalent; introductory chemistry, complete sequence with laboratory; anatomy and physiology, with laboratory.

Corequisite: DTCH 239.

DTCH 242 Nutritional Care (4)

Basic biochemical and physiological conditions that necessitate dietary modifications in the clinical management of the patient, including diabetes, cardiac disease, burns, allergies, osteoporosis, cancer, physical handicaps, gastrointestinal and renal disease. Continued practice in interviewing and introduction to nutritional counseling. Use of computer-assisted nutritional analysis and learning modules. Medical terminology. Per week: lecture 2 hours, practicum 6 hours.

Prerequisite: DTCH 241.

DTCH 271 Quantity Food Purchasing, Production, and Service (5)

Emphasis on methods to achieve quantitative and qualitative standards in quantity food production. Menu planning for institutions. Purchasing. Practicum in food purchasing, production, and service. Per week: lecture 2 hours, practicum 9 hours.

DTCH 272 Food-Systems Management (4)

Study of food-service systems. Effective utilization of resources within the food system. Computer application in food-systems management. Per week: lecture 2 hours, practicum 6 hours.

Prerequisite: DTCH 271.

DTCH 281 Operations Management in Quantity Food Productions (4)

Application of operations-management techniques to food-systems management, including: quantitative decision making, development of work standards, and productivity management. Operations-analysis evaluation and quality control. Role of the nutritional services department supervisor. Leadership. Per week: lecture 2 hours, practicum 6 hours.

Prerequisite: DTCH 272.

DTCH 291 Dietetic Technology Affiliation (4)

Supervised experience in dietetic technology in community hospitals, extended-care facilities, county hospitals, public health departments, and school food service. Performance review and evaluation. Minimum of three weeks (120 clock hours) at the end of the program.

Prerequisite: DTCH 281.

DTCH 299 Independent Study in Dietetic Technology (1-5)

Project or paper to be submitted on a topic of current interest in an area of dietetic technology. Regular meetings to provide the student with guidance and evaluation.

DTCS 301 Human Nutrition (3)

Fundamentals of normal nutrition. Carbohydrates, proteins, fats, vitamins, minerals; their roles in human metabolism. Introduction to nutrition in the life cycle. Per week: lecture 3 hours.

DTCS 302 Food Selection and Preparation (4)

Foods and their nutritive values. Changes associated with maturation, preservation, table preparation, transportation, and storage in relation to food safety. Per week: lecture 3 hours, laboratory 3 hours. Laboratory fee.

DTCS 303 The Art of Food Presentation (3)

Art of food presentation to enhance acceptance of food. Nutritional concepts and cultural food patterns in planning and producing meals. Focus on meal service at home and in professional and social settings. Per week: lecture 2 hours, practicum 3 hours. Laboratory fee.

DTCS 304 Community Nutrition (4)

Education of community members in different areas related to nutrition. Requires knowledge of normal nutrition and life-cycle issues. Nutrition assessment; medical nutrition-therapy topics such as obesity, CHD, diabetes, etc. Legislative processes and politics. Program planning, implementation, management, and evaluation. Counseling, teaching, and facilitating group processes. Interpreting data and research findings. Identifying and accessing community nutrition resources. Community interactions that promote a healthy lifestyle, including but not limited to nutrition topics. Per week: lecture 2 hours, practicum 6 hours.

Prerequisite: DTCS 339, 341.

DTCS 305 Professional Issues in Nutrition and Dietetics (0.5)

Growth of nutrition and dietetics as a profession, and its role in restoration and maintenance of health. Illustrated nontraditional roles of the registered dietitian and dietetic technician, registered. Emphasis on development of professionalism, accountability, and responsibility for life-long learning. Preparation of a professional portfolio.

DTCS 311 Human and Clinical Nutrition for Nursing (4)

Fundamentals of normal nutrition. Carbohydrates, proteins, fats, vitamins, minerals; their roles in human metabolism. Investigating the role of nutrition at various stages in the life cycle of the individual in health and disease. Nutrition intervention in the prevention and treatment of disease in the clinical setting.

DTCS 312 Clinical Nutrition for Nursing (2)

Nutrition intervention in the prevention and treatment of disease in the clinical setting.

DTCS 321 Nutrition and Human Metabolism (2)

Nutritional requirements and metabolism of essential nutrients for the human organism at the cellular level. Focus on vitamin and mineral metabolism. Per week: lecture 2 hours.

Prerequisite: DTCS 301 or equivalent; general chemistry; anatomy and physiology; biochemistry.

DTCS 339 Life Cycle Nutrition (2)

Management of the normal nutrition needs of individuals across the life span. Includes focus on pregnancy, lactation, normal infant growth and development; childhood, and adolescence, with an overview of school feeding programs. Adult men's and women's health issues. Geriatrics. Per week: lecture 1 hour, practicum 3 hours.

Prerequisite: DTCS 301.

Corequisite: DTCS 341.

DTCS 341 Introduction to Clinical Nutrition (3)

Basic knowledge of the responsibilities of the clinical dietitian: review of the medical record, documentation in the medical record, medical terminology, and patient interviewing. Utilization of the computer for diet analysis. Introduction to nutrition assessment, anemias, food allergies, vegetarian diets, nutrition quackery, sports nutrition, obesity, eating disorders, osteoporosis, dental nutrition, and food labeling requirements. Per week: lecture 1 hour, practicum 6 hours.

Prerequisite: DTCS 301 or equivalent; anatomy and physiology with laboratory; general chemistry.

Corequisite: DTCS 339.

DTCS 342 Medical Nutrition Therapy I (5)

Basic biochemical and physiological processes that necessitate dietary modifications in the clinical management of the patient, including diabetes, cardiac disease, cancer, enteral nutrition support, food allergies, anemias, and rehabilitation. Continued practice in interviewing and nutritional counseling. Utilization of computer-assisted nutritional analysis. Medical terminology. Per week: lecture 3 hours, practicum 6 hours.

Prerequisite: DTCS 339, 341.

Corequisite: AHCJ 402

DTCS 343 Medical Nutrition Therapy II (5)

Basic biochemical and pathophysiologic processes that necessitate dietary modifications in the clinical management of the patient with pulmonary disease, including cystic fibrosis; digestive disorders; disorders of the liver, biliary system, and pancreas; alcoholism; renal disease; solid-organ transplantation; sepsis/trauma and HIV/AIDS. Continuation of nutrition assessment, patient interviewing, and counseling. Application of enteral and parenteral nutrition support when indicated in the clinical management of patients with these conditions. Introduction to preparation of an in-depth case study.

Prerequisite: DTCS 342.

DTCS 371 Quantity Food Purchasing, Production, and Service (5)

Emphasis on methods to achieve quantitative and qualitative standards in quantity food production. Menu planning for institutions. Purchasing. Practicum in food production and service. Open to dietetics students only. Per week: lecture 2 hours, practicum 9 hours.

Prerequisite: Microbiology.

DTCS 372 Food Systems Organization and Management (4)

Study of food-service systems. Effective utilization of resources within the food system. Computer application in food-systems management. Per week: lecture 2 hours, practicum 9 hours.

Prerequisite: DTCS 371.

DTCS 395 Nutrition and Dietetics Practicum (6)

Supervised experience in clinical, community, and administrative dietetics in hospitals, outpatient clinics, public health departments, and convenience-food systems. Performance review and evaluation. Eleven weeks (440 clock hours) during the summer at the end of the junior year.

Prerequisite: DTCS 343, 372.

DTCS 405 Senior Seminar (0.5)

Development of professional skills; team efforts to market nutrition in the community; volunteer efforts in the community; professional networking; and special topics as determined by nutrition and dietetics faculty. Emphasis on professional portfolio and transition to entry-level nutrition educator/nutritionist/dietitian/food-service director.

Prerequisite: DTCS 305.

DTCS 425 Pharmacology in Medical Nutrition Therapy (2)

General overview of pharmacology, including kinetics, dynamics, and therapeutics of drugs. Basic definitions, sources of information, classification of drugs, and principles and mechanisms of drug actions. Special emphasis given to drug-nutrient interactions.

DTCS 442 Nutrition Counseling (3)

Continued application of techniques of nutrition counseling, with emphasis on improving skills in verbal and nonverbal communication, assertiveness, dealing with cultural differences, dealing with death and dying. Skills in administration for the nutrition counselor. Ethical implications in health care. Per week: lecture 2 hours, practicum 3 hours.

Prerequisite: DTCS 342.

Corequisite: DTCS 343.

DTCS 444 Medical Nutrition Therapy III (3)

Nutrition intervention in the treatment of high-risk newborns. Inborn errors of metabolism. Fetal alcohol syndrome. Neurological/rheumatological disorders, including Parkinson's disease, Alzheimer's disease, and arthritis. Rehabilitation conditions, including stroke, head and spinal cord injury, and dysphagia management. Endocrine disorders. Infection and wound healing. Burns. Immunology. AIDS. Updates on advanced nutrition topics. Preparation of an in-depth case study. Per week: lecture 2 hours, practicum 3 hours.

Prerequisite: DTCS 343, 395; AHJC 334.

DTCS 445 Nutrition Care Management (2-4)

Application of operations analysis, financial management, quantitative decision making and productivity-management techniques to enhance the delivery of nutrition care. Staff justification, continuous quality improvement, reimbursement for nutrition services, care management, and entrepreneurship. Students who have taken a course in principles of management register for 2 units only.

Prerequisite: DTCS 395.

DTCS 452 Advanced Nutrition (4)

Advanced topics of normal nutrition presented, with emphasis on case studies to illuminate metabolic pathways and effects of disease.

Prerequisite: DTCS 321, 343, 395; AHJC 334.

DTCS 453 Advanced Medical-Nutrition Therapy (4)

Case-study approach to the theory and application of critical-care nutrition to complex medical conditions. Interpretation and synthesis of the following information: fluid and electrolyte balance, acid/base balance, vital signs, ICU monitoring forms, interpretation of laboratory data and diagnostic tests, medical and surgical history, and drug/nutrient interactions. Focus on a problem-list approach to nutrition assessment, documentation, intervention, and outcome evaluation. Clinical rotation in critical-care setting. Per week: lecture 2 hours, practicum 6 hours.

Prerequisite: DTCS 395, 444.

DTCS 461 Food Science (3-4)

Chemical, physical, and biological effects of maturation, processing, storage, and preservation on the structure, composition, palatability, product quality, and microbiological safety of food and its additives. Variable unit is laboratory. Laboratory requirement determined by instructor. Per week: lecture 3 hours, laboratory 3 hours. Laboratory fee.

Prerequisite: Basic foods, human nutrition, organic chemistry.

DTCS 473 Clinical Nutrition Affiliation (6)

Application of knowledge and skills in clinical facilities as a staff dietitian. Regular conferences to aid in developing professional competence. Major applied project relating to clinical or community nutrition. Minimum of eight weeks (320 clock hours) during the Spring Quarter of the senior year.

Prerequisite: DTCS 453.

DTCS 474 Advanced Food-Systems Management (4)

Development of problem-solving competencies in the management of food systems. Production schedules, equipment, layout and design, and work analysis. Presentation of current management philosophy, with application to administrative dietetics. Practicum with computerized management-information system. Per week: lecture 3 hours, practicum 9 hours.

Prerequisite: DTCS 445.

DTCS 476 Exercise Physiology in Medical Nutrition Therapy (3)

Basic preparation for development and leadership of exercise programs. Includes: exercise physiology training, acute and chronic effects of exercise, simple assessment of fitness, role of exercise in prevention of common health problems, and management of selected risk factors. Discussion of endurance, strength, flexibility, and aerobic exercises. Laboratory included.

Prerequisite: Anatomy and physiology.

DTCS 477 Advanced Community Nutrition (4)
Provides students access to community professionals in the context of informal, round-table discussions. Topics may include school-based nutrition education and interventions; epidemiology (cancer, CHD, or vegetarian diets); addictions; nutrition education and teaching aids; study of an international health organization; nutrition and public policy in the U.S. (FDA, NCI, etc.); nutrition journalism; the RD in private practice; soy protein use around the world; and promotion of nutrition in the community. Provides students a weekly opportunity to participate in professional practice, including opportunity to conduct community-based programs and limited research. Assignments include giving a multimedia presentation, professional-practice case studies, professional-practice diary, writing a nutrition article to be submitted for publication, and a special-interest project (subject to approval of the instructor). 320 clock hours.

Prerequisite: DTCS 304, 404.

DTCS 478 Community Nutrition Affiliation (6)
Professional practice in community-nutrition settings, about traditional and nontraditional settings. Students who successfully complete DTCS 477 sign up for DTCS 478. The professional practice includes projects, presentations to the community, research, screening events, association with clinical instructors, assessment and counseling, group instruction, community nutrition events, etc.

Prerequisite: DTCS 477.

DTCS 479 Administrative Dietetics Affiliation (6)
Application of knowledge and skills in the administrative dietetics area as a staff dietitian. Regular conferences to aid in developing professional competence. Minimum of eight weeks (320 clock hours) during the Spring Quarter of the senior year.

Prerequisite: DTCS 474.

DTCS 491 Orientation to Research in Dietetics Laboratory (1)

Experience in nutrition and dietetics research, including hypothetical-formulation research methods, data collection, and presentation of findings. Per week: practicum 3 hours.

Prerequisite: AHCJ 351.

Concurrent: AHCJ 461

DTCS 497 Advanced Clinical Experience (40 to 480 clock hours per term)

Advanced clinical experience in selected areas of professional dietetic practice.

Prerequisite: Completion of DTCS 473 or 479.

DTCS 499 Nutrition and Dietetics Independent Study (1-5)

Project or paper to be submitted on a topic of current interest in an area of nutrition and dietetics. Regular meetings to provide the student with guidance and evaluation. Elected on the basis of need or interest.

CONJOINT

See CONJOINT COURSES, section III General Information, for course descriptions.

COGNATE

RELE 457 Christian Ethics and Health Care (2)

Ethical issues in modern medicine and related fields from the perspective of Christian thought and practice.

RELF 436 Adventist Heritage and Health (3)

Origin and development of Seventh-day Adventist interest in health, from the background of nineteenth-century medicine and health reform to the present.

OCCUPATIONAL THERAPY

OCCUPATIONAL THERAPY ASSISTANT—Associate in Arts

OCCUPATIONAL THERAPY—Entry-Level Master of Occupational Therapy; Post-Professional Master of Occupational Therapy

LIANE H. HEWITT, Chair; Program Director, Occupational Therapy Assistant; Program Director, Post-Professional Master of Occupational Therapy

ESTHER M. HUECKER, Program Director, Entry-Level Master of Occupational Therapy

*ex officio

The occupational therapist and occupational therapy assistant work with persons who find it difficult to cope with psychological or physiological dysfunction.

The primary concern of both therapist and assistant is to stimulate those changes in behavior patterns that will increase the patient's personal independence and ability to work within his/her cultural and personal milieu. To accomplish this goal, the occupational therapist evaluates the patient; sets up treatment goals; and works together with the occupational therapy assistant in selecting tasks from the gamut of normal daily self-care activities, using them to assist the patient in gaining independent-living skills regardless of disability or handicap.

Essential to the role of occupational therapy is an interest in the behavioral sciences and a concern for the individual's need to find proper adjustments to life's circumstances. A desire to teach and a background or interest in medical science are beneficial. Those inclined to mechanical or scientific techniques are suited to helping patients develop their capacities for employment. Others find that they can use their interests in creative arts, crafts, music, and teaching to work with disabled homemakers, children, and retired persons.

OPPORTUNITIES

Occupational therapists and occupational therapy assistants practice in general hospitals, rehabilitation centers, pediatric or psychiatric clinics, schools, skilled-nursing facilities, home care, and outpatient community-centered programs (including hand-rehabilitation, work-evaluation, and adult day-care facilities). Occupational therapy professionals have a wide choice of positions (using varied therapeutic skills with individuals of varying age and disability) and opportunities for advancement.

ACCREDITATION

Both the Occupational Therapy and Occupational Therapy Assistant Programs are accredited by the Accreditation Council for Occupational Therapy Education (ACOTE), P. O. Box 31220, Bethesda, MD 20824-1220, 301/652-2682. Graduates of the programs will be able to take the national certification examination for occupational therapist and occupational therapy assistant, administered by the National Board for Certification in Occupational Therapy (NBCOT). After successful completion of this examination, the individual will be an occupational therapist, a registered (OTR); or a certified occupational therapy assistant (COTA).

PROFESSIONAL REGISTRATION

Upon satisfactory completion of the occupational therapy A.A. or entry-level M.O.T. degree—including completion of Level II fieldwork within twenty-four months following completion of academic preparation, and upon recommendation of the faculty—the graduate is eligible to take the national certification examination administered by The National Board for Certification for Occupational Therapy (NBCOT). NBCOT offers computerized examinations four times a year.

Many states require licensure in order to practice; however, state licenses are based on the results of the NBCOT certification examination. The American Occupational Therapy Association provides recognition essential to the practice of occupational therapy in the United States and most foreign countries. Information about qualifying examinations can be obtained at the office of the department chair.

When the graduate applies to write the certification examination with the NBCOT, s/he will be asked to answer questions related to the topic of felonies. For further information on these limitations, contact NBCOT at 800 South Frederick Avenue, Suite 200, Gaithersburg, MD 20877-4150; or telephone 301/990-7979.

PROFESSIONAL ASSOCIATIONS

Students are eligible for membership in The American Occupational Therapy Association and Occupational Therapy Association of California, two organizations that foster development and improvement of service and education. The student is encouraged to become a member, read the journal, and attend local professional meetings. The national office address is The American Occupational Therapy Association, P. O. Box 31220, Bethesda, MD 20824-1220.

OCCUPATIONAL THERAPY ASSISTANT—Associate in Arts

THE PROGRAM

The second year of the Occupational Therapy Assistant (OTA) program, leading to the Associate in Arts degree, is based on the completion of one year of prerequisite course work at any accredited college or university. The four quarters of course work at Loma Linda University begin with the Autumn Quarter of the sophomore year. For the two ten-week clinicals during the summer at the end of the program, the student is assigned for experience at approved hospitals and in community health care programs. Level II fieldwork must be completed within eighteen months following academic preparation.

DISTANCE EDUCATION

The Occupational Therapy Assistant Program is offered via distance education at Fresno City College, Fresno, California.

CPR CERTIFICATION

Students are required to have current cardiopulmonary resuscitation (CPR) certification for all scheduled clinical experience.

IMMUNIZATIONS

Students are required to have a current TB test, the complete hepatitis B series, and chicken pox immunizations for all scheduled clinical experience. Titers for MMR, hepatitis B, and varicella must be completed before entering the program. These are essential for fieldwork placements.

TRANSPORTATION

Students are required to have their own transportation to and from fieldwork sites.

ADMISSION

To be eligible for admission, the applicant must have completed a minimum of 48 quarter units or 32 semester units at an accredited college or university.

PLEASE NOTE: GRADES OF C MINUS (C-) ARE NOT TRANSFERABLE FOR CREDIT.

Prerequisites for Occupational Therapy Assistant, A.A.

Religion required, 4 units per year of attendance at a Seventh-day Adventist college

Fine arts **or** music appreciation

Human anatomy and physiology with laboratory, one quarter/semester

Introductory chemistry **or** introductory physics (one quarter/semester)

Two years high school mathematics with grades of C or better **or** intermediate algebra in college

Sociology **or** anthropology

General psychology

English composition, complete sequence

Speech-public speaking recommended

Computers

Ceramics or other related art, such as pottery, sculpture

Electives to meet the minimum total requirement of 48 quarter units or 32 semester units

Work experience

A minimum of forty hours of documented volunteer hours in an occupational therapy department of the applicant's choice is required before applicant will be considered for admission.

THE PROGRAM OBJECTIVES

Upon completion of the program, the graduate should be qualified to:

1. Demonstrate a basic level of knowledge and skills for safe and effective delivery of occupational therapy services.
2. Exhibit Christian and ethical values in clinical practice.
3. Implement and reassess appropriate occupational therapy treatment plans that are focused on patient needs.
4. Function as an effective member of an interdisciplinary team.
5. Incorporate clinical reasoning and problem-solving skills into professional practice.
6. Commit to life-long learning as it pertains to both professional and personal growth.
7. Commit to advancing the philosophy of the Seventh-day Adventist church to achieve its global mission.

PROGRAM OF INSTRUCTION
OCCUPATIONAL THERAPY ASSISTANT—Associate in Arts

The program of instruction outlined as follows is for full-time students enrolled during the 2001-2002 academic year.

AUTUMN QUARTER

OCTA 201	Introduction to Occupational Therapy	1
OCTA 214	Applied Anatomy	2
OCTA 224	Therapeutic Activities I	2
OCTA 228	Intervention Techniques	2
OCTA 233	Occupational Therapy Practice I	5
OCTA 241	Rehabilitation Principles I	2
OCTA 251	Human Pathology I	2

WINTER QUARTER

OCTA 215	Introduction to Functional Neuroanatomy	2
OCTA 217	Occupational Therapy Assistant Practicum I	1
OCTA 225	Therapeutic Activities II	2
OCTA 234	Occupational Therapy Practice II	5
OCTA 252	Human Pathology II	2
OCTA 271	Group Dynamics	2
REL_ —	Religion elective	2

SPRING QUARTER

OCTA 218	Occupational Therapy Assistant Practicum II	1
OCTA 226	Occupational Therapy Assistant Seminar	2
OCTA 235	Occupational Therapy Practice III	5
OCTA 253	Human Pathology III	2
OCTA 256	Professional Self-Management	2
OCTA 261	Aging	2
AHCJ 305	HIV/AIDS and the Health Provider	1
RELE 457	Christian Ethics and Health Care	2

SUMMER QUARTER

OCTA 291	Occupational Therapy Assistant Affiliation I	3
OCTA 292	Occupational Therapy Assistant Affiliation II	3

A minimum grade of C (2.0) is required for all courses in the program.

Under the talented guidance of Liane Hewitt (department chair, front row), occupational therapy and occupational therapy assistant staff and faculty go out of their way to mentor their students: (front row, continued) Christy Billock, faculty; Michelle Frasco and Madge Oh, staff; Ruth Jeffries, faculty; Donna Anzai; (back row) Karen Pendleton, Marilyn Wright, Dorre Yamashiro—faculty; Cerise Bender, staff; Esther Huecker, program director; and Judi Palladino.

OCCUPATIONAL THERAPY—Entry-Level Master of Occupational Therapy

THE PROGRAM

The Occupational Therapy Program begins with the Summer Quarter. Admission to the Entry-Level Master of Occupational Therapy Program junior and senior years at this University is based on presentation of credit for two academic years of prerequisites earned at an accredited college or university, as listed under Admission—Entry-Level Master of Occupational Therapy.

Students who already have a baccalaureate degree may apply under Option 2 based on specific prerequisites as listed under Admission/Option 2.

The curriculum is built on three levels of learning: foundation, professional, and practice. These levels of learning represent curriculum content that supports the student's progressive growth and knowledge. Initially, the student focuses primarily on combining foundation-knowledge courses with prerequisite courses and experiences completed prior to admission into the program. Next, the curriculum emphasizes student learning of core occupational therapy professional courses. Subsequently, the curriculum provides opportunities for the student to learn in the practice environments. Class-room instruction is integrated with supervised fieldwork practice at approved community programs.

Clinical experience

For the two three-month fieldwork experiences (Winter and Spring Quarters of the second year), the student is assigned for experience at approved hospitals and in community health care programs. Assignments cannot always be arranged in the immediate community because of limited facilities. Students are responsible for their own transportation to those facilities not within walking distance from the University. Level II fieldwork must be completed within twenty-four months of the didactic course work.

CPR CERTIFICATION

Students are required to have current cardiopulmonary resuscitation (CPR) certification for all scheduled fieldwork experience.

IMMUNIZATIONS

Students are required to have a current TB test and titers for varicella, MMR, and hepatitis B series for all scheduled fieldwork experience.

THE PROGRAM OBJECTIVES

Upon completion of the program, the graduate should be qualified to:

1. Demonstrate a basic level of knowledge and skills for safe and effective delivery of occupational therapy services.
2. Exhibit Christian and ethical values in clinical practice.
3. Evaluate, formulate, and implement appropriate occupational therapy treatment plans that are focused on patient needs.
4. Function as an effective member of an interdisciplinary team.
5. Incorporate clinical reasoning and problem-solving skills into professional practice.
6. Commit to lifelong learning as it pertains to both professional and personal growth.
7. Commit to advancing the philosophy of the Seventh-day Adventist church to achieve its global mission.

ADMISSION—Option One: B.S. and M.O.T. (Bachelor of Science and Master of Occupational Therapy) track

This option is for individuals who do not have an earned bachelor's degree from an accredited college or university. Graduates will receive a Bachelor of Science degree in health science and a Master of Occupational Therapy degree.

To be eligible for admission, the applicant must have completed a minimum of 96 quarter units at an accredited college or university.

PLEASE NOTE: GRADES OF C- ARE NOT TRANSFERABLE FOR CREDIT.

Prerequisites for Entry-Level Master of Occupational Therapy, M.O.T.

20 units minimum in humanities (choose minimum of two areas from: history, literature, philosophy, foreign language, art/music appreciation or art/music history)

Religion required, 4 units per year of attendance at a Seventh-day Adventist college or university

Human anatomy and physiology with laboratories, complete sequence

Introductory chemistry with laboratory

Introductory physics with laboratory

Two years high school mathematics with grades of C or better or intermediate algebra in college

Cultural anthropology

Sociology

General psychology

Human growth and development

Select one additional behavioral science

English composition, complete sequence

Speech

Computers

Personal health or nutrition

Two physical education courses

Electives to meet the minimum total requirement of 96 quarter units

Work experience

A minimum of forty hours of documented community service of the applicant's choice is required before application will be considered for admission.

ADMISSION—Option Two: M.O.T. (Master of Occupational Therapy) track

This option is for individuals who have earned a baccalaureate degree from an accredited college or university. Graduates will receive a Master of Occupational Therapy degree.

To be eligible for admission, the applicant must have earned a baccalaureate degree at an accredited college or university.

Subject requirements for 2001-2002

The applicant must complete the following subject requirements at an accredited college or university:

Human anatomy and physiology with laboratory, complete sequence.

Chemistry with laboratory.

Physics with laboratory.

(Complete sequence of chemistry or physics is also acceptable.)

Work experience

A minimum of forty hours of documented community service of the applicant's choice is required before application will be considered for admission.

PROGRAM OF INSTRUCTION

OCCUPATIONAL THERAPY—Entry-Level Master of Occupational Therapy

The program of instruction outlined as follows is for full-time students enrolled during the 2001-2002 academic year.

YEAR ONE

OCTH 301	Introduction to Occupational Therapy	3
OCTH 306	Group Dynamics	2
OCTH 309	Human Occupation Across the Lifespan	5
OCTH 314	Task Analysis	2
OCTH 315	Therapeutic Media	2
OCTH 316	Design and Technology	2
OCTH 317, 318	Occupational Therapy Practicum I, II	1, 1
OCTH 321	Intervention Techniques I	2
OCTH 331	Kinesiology	3
OCTH 341	Neuroanatomy	3
OCTH 451-453	Disorders of Human Performance I, II, III	5, 5, 4
AHCJ 305	HIV/AIDS and the Health Professional	1
AHCJ 311	Medical Terminology	2
AHCJ 312	Anatomy	9
AHCJ 351	Statistics for the Health Professions	3
AHCJ 402, 403	Pathology I, II	4, 3
AHCJ 404	Pharmacology	1
REL_ —	Religion electives	2, 2

YEAR TWO

OCTH 411	Introduction to Occupational Therapy Research	2
OCTH 417	Occupational Therapy Practicum III	1
OCTH 431	Intervention Techniques II	3
OCTH 511-513	Case Management Seminar I, II, III	2, 2, 3
OCTH 517	Occupational Therapy Practicum IV	1
OCTH 524	Intervention Techniques III	3
OCTH 525	Program Seminar	2
OCTH 526	Business Topics in Health Care	2
OCTH 531	Fieldwork Experience I	6
OCTH 532	Fieldwork Experience II	6
OCTH 541	Current Trends in Occupational Therapy Practice I	3
AHCJ 461	Research Methods	2
RELE 457	Christian Ethics and Health Care	2*
REL_ —	Religion elective	2

YEAR THREE

OCTH 542	Current Trends in Occupational Therapy Practice II	3
OCTH 544	Advanced Occupational Therapy History	3
OCTH 551, 552	Theoretical Perspectives on Occupation I, II	3, 3
OCTH 561, 562	Program Development/Design I, II	3, 3
OCTH 571-573	Research I, II, III	2, 2, 2
OCTH 599	Directed Study	2
AHCJ 509	Teaching and Learning Styles	3
AHCJ 601	Research Proposal Writing	3
REL_ ___	Spirituality and occupation	2*

A minimum grade of C (2.0) is required for all courses in the program. The program of instruction is full time for each quarter. Academic credit of less than twelve units per quarter does not indicate less than full-time work.

*Religion courses required for M.O.T. track students only.

OCCUPATIONAL THERAPY—Post-Professional Master of Occupational Therapy

THE PROGRAM

The post-professional master's degree program is designed for the occupational therapist with an entry-level baccalaureate degree in occupational therapy who wishes to pursue advanced studies in the profession.

G.P.A. of 3.0. The applicant must also be certified by the National Board for Certification in Occupational Therapy (NBCOT). The applicant's recommendations, interview, essay, and work experience are also considered in the admissions screening process

ADMISSION

To be eligible for admission, the applicant must have earned a bachelor's degree or post-baccalaureate certificate in occupational therapy from an accredited program, with a minimum

Prerequisites for Post-Professional Master of Occupational Therapy, M.O.T.

Baccalaureate degree in occupational therapy from an accredited institution.

PROGRAM OF INSTRUCTION

OCCUPATIONAL THERAPY—Post-Professional Master of Occupational Therapy

The program of instruction outlined as follows is for full-time students enrolled during the 2001-2002 academic year. The curriculum is four quarters in length for full-time students or eight quarters in length for part-time students.

OCTH 504	Foundations of Human Occupation	3
OCTH 505	Advanced Theories of Occupational Therapy Intervention	3
OCTH 526	Business Topics in Health Care	3
OCTH 584	Concepts of Occupation	3
OCTH 598	Occupational Therapy Advanced Specialty Track	3
AHCJ 504	Current Issues in Health Care	3
AHCJ 505	Educational Psychology for Health Professionals	3
AHCJ 509	Teaching and Learning Styles	3
AHCJ 525	Biostatistics	3
AHCJ 526	Introduction to Computer Applications II	3
AHCJ 591	Research I	3
AHCJ 592	Research II	3
_____	Elective	3
_____	Elective	3
_____	Elective	3
REL_ ___	Religion electives	3

COURSES

For information about units of credit and course numbers, see the beginning of section III of this BULLETIN.

OCTA 201 Introduction to Occupational Therapy (1)

Growth of occupational therapy as a profession and its role in medical rehabilitative care. Human development from birth to death. Self-care, work, and play related to physical function and sociocultural adjustment. Per week: lecture 1 hour.

OCTA 214 Applied Anatomy (2)

Review of upper/lower extremities and trunk anatomy. Analysis-associated pathology as it applies to function. Per week: lecture 1 hour, laboratory 2 hours.

OCTA 215 Introduction to Functional Neuroanatomy (2)

Basic concepts of the anatomy of brain and spinal cord. Introduction to the neuron, synapse, nerve conduction, cell threshold, and feedback system. Per week: lecture 2 hours.

OCTA 217, 218 Occupational Therapy Assistant Practicum I, II (1, 1)

Observation and supervised experience in community programs. Per week: 8 hours.

Prerequisite: Must be completed in sequence.

OCTA 224, 225 Therapeutic Activities I, II (2, 2)

Basic activities used by the occupational therapy assistant in a clinic setting. Problem-solving approach to woodwork, metalwork, and the primitive crafts. Clinic maintenance and safety emphasized. Per week: lecture 1 hour, laboratory 2 hours.

OCTA 226 Occupational Therapy Assistant Seminar (2)

Practical application of analyzing an activity for an individual or group of patients and demonstrating the ability to adapt those activities to each patient's needs. Per week: lecture 2 hours.

OCTA 228 Intervention Techniques (2)

Theory and application of basic skills in the management of disabled persons. Application of skills to body mechanics, self-care, and homemaking. Use of adaptive equipment in laboratory and clinic settings. Per week: lecture 1 hour, laboratory 2 hours.

OCTA 233 Occupational Therapy Practice I (5)

Normal and abnormal growth and development. Diagnosis and treatment of disabilities associated with development. Per week: lecture 4 hours, laboratory 2 hours.

OCTA 234 Occupational Therapy Practice II (5)

Introduction to major categories of physical dysfunction, with emphasis on intervention strategies and appropriate treatment protocols. Per week: lecture 4 hours; laboratory 2 hours.

OCTA 235 Occupational Therapy Practice III (5)

Theoretical foundations based on mental-health practice. Development of therapeutic relationships, data gathering, treatment methods, and use of adaptive activities to fit the needs of individual patients or groups. Per week: lecture 4 hours, laboratory 2 hours.

OCTA 241 Rehabilitation Principles (2)

Introduction to general rehabilitation principles. Course work emphasis on treatment planning, documentation, and introduction to clinical reasoning. Per week: Lecture 1 hour.

OCTA 251, 252, 253 Human Pathology I, II, III (2, 2, 2)

Introduction to disorders and diseases. Includes organ-system diseases, central-nervous system dysfunction, orthopaedic problems, and mental illness. Medical-intervention strategies. Per week: lecture 2 hours.

OCTA 256 Professional Self-Management (2)

Social and ethical issues affecting health care and occupational therapy. Per week: seminar 2 hours.

OCTA 261 Aging (2)

Evaluation and treatment of acute and long-term dysfunction of older persons. Addresses age as a developmental stage of the normal life span. Treatment intervention in terms of the model of human occupation frame of reference. Per week: lecture 2 hours.

OCTA 271 Group Dynamics (2)

Theories of group interaction and communication. Laboratory emphasizes the influence and dynamics of social roles in the context of structured occupational therapy group exercise. Per week: lecture 1 hour, laboratory 2 hours.

OCTA 291 Occupational Therapy Assistant Affiliation I (3)

Supervised clinical experience in hospitals or community health care programs, with emphasis on treatment of patients with psychosocial dysfunction. Successful completion necessary before student is eligible to take the certification examination. Summer, ten weeks (400 clock hours).

OCTA 292 Occupational Therapy Assistant Affiliation II (3)

Supervised clinical experience in hospitals, rehabilitation centers, or community health care programs, with emphasis on treatment of patients with neurophysiological and sensorimotor dysfunction. Successful completion necessary before student is eligible to take the certification examination. Summer, ten weeks (400 clock hours).

OCTA 299 Directed Study (1-2)

Under direction of a faculty adviser, student is assigned a special project or clinical assignment related to occupational therapy. Regular discussion with the faculty regarding progress and status of assignment.

OCTH 301 Introduction to Occupational Therapy (3)

Definition of occupational therapy from basic philosophical and historical perspectives. Describes the uniqueness of the profession and various practice areas of occupational therapy. Explores the roles of occupational therapists and describes the professional organizations of occupational therapy. Includes a laboratory in which students explore their individual uniqueness and denote their enculturation and socialization into occupational therapy. Five weeks: per week—lecture 4 hours, laboratory 2 hours.

OCTH 306 Group Dynamics (2)

Historical and current knowledge of group dynamics as related to psychosocial aspects of occupational therapy. Principles of group dynamics, leadership skills, and basic treatment planning practiced in group exercises. Per week: 2 hours.

OCTH 309 Human Occupation Across the Lifespan (5)

Understanding of how occupation, embedded in a diverse social-cultural context, is shaped and changed through the human lifespan. Occupation, defined in occupational therapy and occupational science, and examined in historical relationship to human adaptation and health. Delineations among academic studies, theories, models, and frames of reference related to occupation introduced and explored as potential foundations influencing occupational therapy.

OCTH 314 Task Analysis (2)

Occupational performance approach to provide a theoretical framework for task analysis. Selected activities and case analysis across the lifespan provide opportunity to develop skills in inquiry, analysis, reasoning, and creativity. Per week: lecture 2 hours.

OCTH 315 Therapeutic Media (2)

Application of occupational therapy through purposeful activity. Analysis and application of crafts, hobbies, and recreation. Practice in development of resources, presentation skills, observation techniques, and therapeutic use of self. Per week: laboratory 4 hours.

Prerequisite: OCTH 314.

OCTH 316 Design and Technology (2)

Supports development of basic competencies for assistive technology by examination and assessment of theoretical and societal issues, population and policy trends, scientific advances, environmental constraints, funding opportunities, advocacy, and effective outcome evaluation. Case studies allow assistive technology evaluation, basic design, and resource coordination. Per week: 3 hours.

OCTH 317, 318 Occupational Therapy Practicum I, II (1, 1)

Observation and supervised experience in clinical and/or community-based programs. Per quarter: 80 hours.

OCTH 321 Intervention Techniques I (2)

Introduction to the treatment of performance areas within the temporal and environmental contexts. Emphasis on safety issues and hands-on performance of techniques as they relate to solving problems for specific classifications of dysfunctions. Major topics include functional mobility and transfers, self-care skills, assistive technology, joint protection and energy conservation, body mechanics, universal precautions, home management, and leisure activities. Per week: lecture 1 hour, laboratory 2 hours.

OCTH 331 Kinesiology (3)

Anatomical and mechanical fundamentals of human motion. Application to the analysis of motor skills, including muscle testing and goniometry. Emphasis on the upper extremities. Per week: lecture 2 hours, laboratory 2 hours.

Prerequisite: AHCJ 312.

OCTH 341 Neuroanatomy (3)

Basic anatomy and function of the central and peripheral nervous systems, common clinical manifestations of neurologic dysfunction, and occupational performance impact on the individual with neurological dysfunction. Per week: lecture 2 hours, laboratory 2 hours.

Prerequisite: AHCJ 312.

OCTH 411 Introduction to Occupational Therapy Research (2)

Application of the research process by systematically identifying and investigating a problem, issue, or question of relevance to occupational therapy practice. Per week: group projects 2 hours.

OCTH 417 Occupational Therapy Practicum III (1)

Observation and supervised experience in clinical and/or community-based programs. Per quarter: 80 hours.

Prerequisite: OCTH 317, 318.

OCTH 431 Intervention Techniques II (3)

Fundamentals of sensorimotor and psychosocial interventions. Per week: lecture 2 hours, laboratory 3 hours.

OCTH 451 Disorders of Human Performance I (5)

Overview of the etiology, clinical course, evaluation, management, and prognosis of congenital, developmental, acute and chronic-disease processes; and of traumatic injuries. Includes problems associated with individuals and families having difficulty with social-cultural expectations; emphasis on effect of such conditions on human occupational performance across the lifespan.

Prerequisite: OCTH 309, 341.

OCTH 452 Disorders of Human Performance II (5)

Continuation of overview of etiology, clinical course, evaluation, management, and prognosis of congenital, developmental, acute, and chronic-disease processes; and of traumatic injuries. Includes problems associated with individuals and families having difficulty with social-cultural expectations; effect of such conditions on human occupational performance across the life-span.

Prerequisite: OCTH 306, 331, 451.

OCTH 453 Disorders of Human Performance III (4)

Continuation of overview of etiology, clinical course, evaluation, management, and prognosis of congenital, developmental, acute, and chronic-disease processes; and of traumatic injuries. Includes problems associated with individuals and families having difficulty with social-cultural expectations; effect of such conditions on human occupational performance across the life-span.

Prerequisite: OCTH 452.

OCTH 496 Occupational Therapy Review (1-3)
Guided-study program for occupational therapists preparing for the certification examination. One-to-three quarter units of study may be arranged through the department chair. Use of library, programmed instruction, audiovisual media, and class attendance.

OCTH 499 Occupational Therapy Independent Study (1-2)

Project or paper to be submitted on a topic of current interest in an area related to occupational therapy. Regular meetings to provide the student with guidance and evaluation. Elected on the basis of need or interest.

OCTH 504 Foundations of Human Occupation (3)
Philosophical and historical foundations for linking theories to practice in occupational therapy.

OCTH 505 Advanced Theories of Occupational Therapy Intervention (3)

Systematic review and validation of occupational therapy models and theories. Critical analysis of the student's practice for evidence of theory-based application. Synthesis through proposing feasible approaches for validation of intervention programs.

OCTH 511 Case-Management Seminar I (2)

Introduction to application of clinical reasoning process; effective communication skills with clients/patients, families, and team members. Documentation and overall professional skill-building.

Prerequisite: OCTH 451.

OCTH 512 Case-Management Seminar II (2)

Continuation of case-management process as a means of addressing questions of importance to occupational therapy practice through theoretical perspectives. Application of case-management skills, assessment, intervention planning, implementation, reassessment, and termination when appropriate. Emphasis on clinical reasoning in contemporary models of practice using collaborative service-delivery systems and community resources.

Prerequisite: OCTH 451, 452, 511.

OCTH 513 Case-Management Seminar III (3)

Continuation of case-management process as a means of addressing questions of importance to occupational therapy practice through theoretical perspectives. Application of case-management skills, assessment, intervention planning, implementation, reassessment, and termination when appropriate. Emphasis on clinical reasoning in contemporary models of practice using collaborative service-delivery systems and community resources.

Prerequisite: OCTH 451, 452, 511, 512.

OCTH 517 Occupational Therapy Practicum IV (1)

Observation and supervised experience in clinical and/or community-based programs. Per quarter: 80 hours.

Prerequisite: OCTH 317, 318, 417.

OCTH 524 Intervention Techniques III (3)

Hand and upper-extremity rehabilitation, evaluation procedures, and treatment protocol for diseases and trauma. Current concepts in design and fabrication of hand splints.

Prerequisite: OCTH 451.

OCTH 525 Program Seminar (2)

Development of clinical reasoning skills. Evaluation of program effectiveness in providing tools to assess, plan, and implement treatment, make referrals, and discontinue occupational therapy services. Emphasis on professional portfolio and transition to entry-level occupational therapy practitioner.

Prerequisite: Senior standing.

OCTH 526 Business Topics in Health Care (2-3)

Introduction to business for occupational therapy practitioners, including financial statements and budgetary processes, marketing, management, and consultation. Emphasis on use of strategic planning for decision-making processes of program development, productivity, and accountability. Major paper and presentation required for the additional unit.

OCTH 531, 532 Fieldwork Experience I, II (6, 6)

Supervised fieldwork experience in clinical and/or community-based programs. Emphasis on assessment, planning, treatment, problem solving, administration, and professionalism. Successful completion necessary before the student is eligible to take the certification examination (480 clock hours each).

OCTH 533 Advanced Fieldwork Experience (40 to 480 clock hours per term)

Advanced fieldwork experience in selected areas of professional practice. Completion of the agreed-upon clock hours required to receive a grade.

OCTH 541 Current Trends in Occupational Therapy Practice I (3)

Analysis of current trends in the field of occupational therapy. Preparation for entry into the profession; includes program planning and development, health care economics, health care administration, legal and regulatory issues, employment strategies, professional responsibilities, political and professional trends, advocacy, and community service.

Prerequisite: Senior standing.

OCTH 542 Current Trends in Occupational Therapy Practice II (3)

Explores new and future developments in occupational therapy and health care. Addresses issues of social-political involvement, advocacy, alternate employment possibilities, and management; health care systems, including international occupational therapy perspectives.

OCTH 544 Advanced Occupational Therapy History (3)

Provides the student with an extensive understanding of the history of occupational therapy by critically reviewing historical incidents, the history of occupational therapy and societal theories and practices, and political conditions. Facilitates the student's ability to enact advocacy and to better understand future projections in the field.

OCTH 551 Theoretical Perspectives on Occupation I (3)

Provides the student with an expansive view of diverse influences on occupation and occupational therapy practice by critically investigating occupational theories and academic disciplines, such as anthropology, sociology, psychology, and philosophy.

OCTH 552 Theoretical Perspectives on Occupation II (3)

Provides the student with an expansive view of diverse influences on occupation and occupational therapy practice by critically investigating occupational theories and academic disciplines, such as anthropology, sociology, psychology, and philosophy.

Prerequisite: OCTH 551.

OCTH 561 Program Development/Design I (3)

Focus on selection, research, and design of programs pertinent to occupational therapy practice.

Implementation of program planning and evaluation related to health-behavior theory and marketing.

OCTH 562 Program Development/Design II (3)

Focus on selection, research, and design of programs pertinent to occupational therapy practice.

Implementation of program planning and evaluation related to health-behavior theory and marketing.

Prerequisite: OCTH 561.

OCTH 571-573 Research I, II, III (2, 2, 2)

Student develops and implements a scholarly research proposal by systematically identifying and investigating a problem, issue, or question of relevance to occupational therapy practice.

Prerequisite: OCTH 411; AHCJ 351, 461.

OCTH 584 Concepts of Occupation (3)

In-depth understanding of various concepts of human experience and the impact on occupational performance. Student strengthens his/her base of occupational therapy practice by gaining deeper knowledge of course concepts.

Corequisite: OCTH 504.

OCTH 598 Occupational Therapy Advanced Specialty Track (3)

Presentation of in-depth practice application in an area of occupational therapy. Opportunity to pursue various topics related to current trends. Development of advanced clinical skills, where appropriate.

OCTH 599 Directed Study (2)

Student pursues an area of special interest under the direction of the faculty adviser. Topic must be approved by the OT department.

OCTH 699 Directed Study (3)

Student pursues an area of special interest under the direction of the faculty adviser. Topic must be approved by the OT department.

CONJOINT

See CONJOINT COURSES, section III General Information, for course descriptions.

COGNATE

RELE 457 Christian Ethics and Health Care (2)

Ethical issues in modern medicine and related fields from the perspective of Christian thought and practice.

RELR 525 Health Care and the Dynamics of Christian Leadership (3-4)

Focus on the components of leadership principles in the practice of health care. Exploration of the imperative of moral leadership in the community, administrative, and clinical settings.

Additional project required for fourth unit.

PHYSICAL THERAPY

PHYSICAL THERAPIST ASSISTANT—Associate in Science

PHYSICAL THERAPY—Entry-Level Master of Physical Therapy; Progression Master of Physical Therapy; Post-Professional Master of Physical Therapy

PHYSICAL THERAPY—Entry-Level Doctor of Physical Therapy; Post-Professional Doctor of Physical Therapy; Post-Professional Doctor of Physical Therapy Science

EDD J. ASHLEY, Department Chair, Physical Therapy; Program Director, Post-Professional Doctor of Physical Therapy Science

HOWARD W. SULZLE, Associate Department Chair

LAWRENCE E. CHINNOCK, Program Director, Progression Master of Physical Therapy, Entry-Level Master of Physical Therapy, and Entry-Level Doctor of Physical Therapy

EVERETT B. LOHMAN III, Program Director, Post-Professional Master of Physical Therapy, Post Professional Doctor of Physical Therapy

JEANNINE STUART-MENDES, Academic Coordinator of Clinical Education, Entry-Level Master of Physical Therapy and Entry-Level Doctor of Physical Therapy Programs

ANTONIO VALENZUELA, Academic Coordinator of Clinical Education, Progression Master of Physical Therapy Program

PHYSICAL THERAPIST ASSISTANT—Associate in Science

The physical therapist assistant is a skilled paraprofessional health worker who, under the supervision of a physical therapist, carries out the patient's treatment program. The extent to which the physical therapist assistant is involved in treatment depends upon the supervising therapist.

A planned patient-care program is carried out by the assistant, following established procedures. Duties of the physical therapist assistant include: training patients in exercises and activities of normal daily living; conducting treatments; utilizing special equipment; assisting in performing tests, evaluations, and complex treatment procedures; and observing and reporting the patient's responses.

The other members of the rehabilitation team include the occupational therapist, nurse, speech and hearing therapist, respiratory therapist, recreational therapist, physician, social worker, chaplain, vocational counselor, dietitian, and psychologist. This team has as its objective the optimum functional restoration and rehabilitation of patients disabled by illness or injury.

OPPORTUNITIES

Physical therapy offers a career for men and women who are interested in medical science and who enjoy working with people. Graduates have a wide choice of opportunities with medical groups, hospitals, rehabilitation centers, outpatient clinics, national and state agencies, and school systems.

Physical Therapy Assistant Program faculty member, Ron Rea, explains the “convex-on-concave rule” as Li-Lenn Yune, Levy Bathan, and Alexis Wallace look on.

THE PROGRAM

The Physical Therapist Assistant Program leads to the Associate in Science degree and professional certification. The program begins with the sophomore year. Instruction begins in June; graduation is the following June. Official program completion, however, is when clinical affiliations are completed, usually by the end of September.

Clinical experience

Supervised clinical experience is obtained in a variety of settings during the program. Students complete a two-week practicum and three major clinical assignments, each six weeks in length.

All clinical assignments will be made by the coordinator of clinical education or a designate (or program director). Because of the limited number of local facilities available, assignments cannot be made on the basis of the student's family/marital status or personal preference. Although the department makes an effort to accommodate the student's preference, the student agrees to accept the clinical assignment made by the department at any of the affiliated facilities, whether local or out of state.

Accreditation

The program is accredited by the Commission on Accreditation in Physical Therapy Education of the American Physical Therapy Association, 1111 North Fairfax Street, Alexandria, VA 22314; 703/706-3245.

CPR CERTIFICATION

Students are required to have current cardiopulmonary resuscitation (CPR) certification for all scheduled clinical experiences.

TRANSPORTATION

Students are required to have their own transportation to and from clinical sites.

IMMUNIZATIONS

Students are required to have a current TB test, the complete hepatitis B series, and chicken pox immunization for all scheduled clinical experiences.

PROFESSIONAL REGISTRATION

Satisfactory completion of the degree requirements and clinical affiliation qualifies the student to sit for the National Physical Therapy Assistant Licensing Examination. Licensure or registration is not required in all states for the physical therapist assistant to practice. Information about licensure or registration in the state in which one wishes to practice can be obtained on the Web: www.fsbpt.org/directory.cfm

PROFESSIONAL ASSOCIATION

Students and graduates are eligible for affiliate membership in the American Physical Therapy Association. The objective of the association is to foster development and improvement of service and education. This organization grants student membership at a nominal cost to undergraduates of approved schools. The student is required to become a member of this association while in the program. The national office of the American Physical Therapy Association is at 1111 North Fairfax Street, Alexandria, VA 22314.

THE PROGRAM OBJECTIVES

Upon completion of the program, graduates should be qualified to:

1. Demonstrate a basic level of knowledge and skills appropriate for the safe and effective practice of physical therapy.
2. Demonstrate Christian values, attitudes, and behaviors to themselves, to others, and to their profession.
3. Demonstrate ethical and legal accountability to themselves and their patients.
4. Commit to proactive, long-term involvement in professional and personal growth.
5. Participate as part of the resource personnel assisting the Seventh-day Adventist church to achieve its global mission.

In addition, the physical therapist assistant faculty and staff have identified four "core objectives" that are being addressed in each class of each quarter. The student will:

1. Demonstrate effective written, verbal, and nonverbal communication with instructors, classmates, and clinical personnel.
2. Demonstrate effective problem-solving skills.
3. Exhibit professionalism to instructors, classmates, and clinical personnel.
4. Demonstrate ability to work effectively in a team setting.

ADMISSION

PLEASE NOTE: GRADES OF C MINUS (C-) ARE NOT TRANSFERABLE FOR CREDIT.

To be eligible for admission, a student must have completed the following prerequisites at a regionally accredited college or university and have a minimum G.P.A. of 2.5 in both science and nonscience classes.

Prerequisites for Physical Therapist Assistant, A.S.

Religion required, 4 units per year of attendance at a Seventh-day Adventist college

Select 4 units from one area: history, literature, philosophy, foreign language, art/music appreciation/history)

Human anatomy and physiology with laboratory, complete sequence

Introductory physics with laboratory, one quarter/semester

Two years high school mathematics with grades of C or above **or** intermediate algebra in college

General psychology

Human growth and development **or** developmental psychology **or** abnormal psychology

English composition, complete sequence

Speech

Personal health **or** nutrition **or** two physical education courses

Electives to meet the minimum total requirements of 48 quarter units

Work/Observation experience

Twenty hours in an inpatient physical therapy setting plus an additional sixty hours in an inpatient or outpatient setting, for a total of eighty hours required.

Physical therapy students enjoying a moment together reviewing procedures.

**PROGRAM OF INSTRUCTION
PHYSICAL THERAPIST ASSISTANT—Associate in Science**

The program of instruction outlined as follows is for students enrolled during the 2001-2002 academic year.

SOPHOMORE YEAR

PTAS 201	Applied Anatomy and Physiology	4
PTAS 203	Applied Kinesiology	4
PTAS 205	Introduction to Physical Therapy	1
PTAS 206	Documentation Skills	1
PTAS 212	Physical Therapy Procedures	3
PTAS 224	General Medicine	3
PTAS 225	Neurology	3
PTAS 226	Orthopaedics	3
PTAS 227	Therapeutic Exercises	2
PTAS 231	Physical Therapy Modalities	3
PTAS 236	Applied Electrotherapy	3
PTAS 238	Wound Care	1
PTAS 241	Applied Pediatrics	2
PTAS 243	Applied Geriatrics	3
PTAS 251	Orthopaedics II	3
PTAS 252	Applied Neurology	3
PTAS 261	Physical Therapy Practice	1
PTAS 264	Applied Prosthetics and Orthotics	2
PTAS 265	Professional Seminar	1
PTAS 275	Psychosocial Aspects of Health	2
PTAS 291	Physical Therapist Assistant Practicum	1
PTAS 293	Physical Therapist Assistant Affiliation I	3
PTAS 294	Physical Therapist Assistant Affiliation II	3
PTAS 295	Physical Therapist Assistant Affiliation III	3
AHCJ 305	HIV/AIDS and the Health Provider	1
RELR 475	The Art of Integrative Care	2
RELE 456	Personal and Professional Ethics	2

A minimum grade of C (2.0) is required for all courses in the program.

**PHYSICAL THERAPY—
Entry-Level Master of Physical Therapy
Progression Master of Physical Therapy
Post-Professional Master of Physical Therapy
Entry-Level Doctor of Physical Therapy
Post-Professional Doctor of Physical Therapy
Post-Professional Doctor of Physical Therapy Science**

Physical therapists evaluate and treat patients with disease, injury, or disabilities. In many states, registered physical therapists work as independent practitioners. The physical therapy techniques are applied to restore strength, flexibility, and coordination; to reduce pain; and generally to prepare the patient to function more effectively at work and in activities of daily living. Agents such as heat, light, electricity, water exercise, and massage are used. While working with patients, psychological and sociological principles are used to motivate and instruct.

Within the profession there are many specialties, including orthopaedics, neurology, pediatrics, geriatrics, cardiopulmonary, hand rehabilitation, and sports physical therapy. Physical

therapists work in acute-care and convalescent hospitals, rehabilitation centers, children's centers, private practice, athletic training and sports-medicine programs, research institutions, school systems, and home-care agencies.

CPR CERTIFICATION

Students are required to have current cardiopulmonary resuscitation (CPR) certification for all scheduled clinical experiences.

PROFESSIONAL ASSOCIATION

Students and graduates are eligible for membership in the American Physical Therapy Association (APTA). The objective of the association is to foster development and improvement of service and education. This organization grants student membership at a nominal cost to students of approved schools. The student is required to become a member of this association while in the program and is encouraged to read the journal and attend the APTA-sponsored meetings.

PROFESSIONAL REGISTRATION

Satisfactory completion of the entry-level M.P.T., progression M.P.T. or entry-level D.P.T. degree requirements and clinical affiliation qualifies the student to sit for all state registration examinations.

Information about the state registries of physical therapists can be obtained at the office of the department chair. All states require that a physical therapist pass the national qualifying examination for registration to practice. California application form and fee are submitted to the Physical Therapy Board of California, 1434 Howe Avenue, Suite 92, Sacramento, CA 95852.

Open to LLU students and LLUMC employees, and available to individuals and groups in the surrounding communities—Life Support classes are coordinated with the help of Ruel Alipoon (director), Janine Davis, and Monica Noutfia.

PHYSICAL THERAPY—Entry-Level Master of Physical Therapy

THE PROGRAM

The Entry-Level Master of Physical Therapy Program is designed for individuals who have no previous degree in physical therapy and wish to pursue a Master of Physical Therapy degree and professional certification. Admission to the University follows presentation of two academic years of prerequisites earned at a regionally accredited college or university. Graduation is in the Spring Quarter following completion of the clinical affiliations. The emphasis in the program is on professional courses, ethics, and practical experience at Loma Linda University Medical Center and affiliated hospitals and clinics.

Accreditation

The program is accredited by the Commission on Accreditation in Physical Therapy Education of the American Physical Therapy Association, 1111 North Fairfax Street, Alexandria, VA 22314; 703/706-3245.

Clinical experience

Supervised experience is obtained in a variety of settings and at different times during the program. First-year students complete one two-week practicum assignment during the Spring Quarter. Second-year students complete two three-week assignments during the Autumn and Spring Quarters. The major clinical assignments, thirty-three weeks, are during the third year.

All clinical assignments will be made by the academic coordinator of clinical education or a designate. Because of the limited number of local facilities available, assignments cannot be made on the basis of the student's family/marital status or personal preference. Although the department makes an effort to accommodate the student's preference, the student agrees to accept the clinical assignments made by the department at any of the affiliated facilities, whether local or out of state.

THE PROGRAM OBJECTIVES

Upon completion of the program, the graduate should be qualified to:

1. Demonstrate a basic level of knowledge, skills, and behaviors appropriate for the safe and effective practice of physical therapy.

This will be evidenced by the graduate's ability to—

- a) evaluate a patient and identify problems amenable to physical therapy;
 - b) formulate and carry out a therapeutic treatment plan focused on solving the identified problems;
 - c) develop discharge plans that include education of patients in a home-care program and preventive lifestyle;
 - d) function as a viable member of an interdisciplinary health care team.
2. Conduct clinically relevant research activities and critically review and interpret professionally published research material.
 3. Demonstrate ethical and legal accountability to themselves, their patients, and their profession.
 4. Commit to proactive, long-term involvement in professional and personal growth.
 5. Actively contribute as an alumnus of Loma Linda University through involvement in clinical education and support of student endowment funds.
 6. Address the spiritual and emotional needs of patients—exhibiting compassion and empathy to all people, as embodied in the biblical teaching of Jesus Christ.
 7. Participate as part of the resource personnel assisting the Seventh-day Adventist church in achieving its global mission, through its church ministries, educational programs, and health care systems.

ADMISSION

Subject requirements for 2001-2002

To be eligible for admission, the applicant must have a minimum G.P.A. of 3.3 and have completed a minimum of 98 quarter units at a regionally accredited college or university. Admission is a selective process. Criteria used include: G.P.A., completion of subject requirements, interview, essay, recommendations, and work experience. The minimum subject admission requirements in quarter units are listed under the two options that follow. Grades of C minus (C-) and below are not transferrable for credit.

OPTION ONE—B.S./M.P.T. track

This option is for individuals who DO NOT have an earned bachelor's degree from a regionally accredited college or university. Graduates will receive a Bachelor of Science degree in health science and a Master of Physical Therapy degree.

Prerequisites for Entry-Level Master of Physical Therapy, B.S. and M.P.T. track

Minimum of 20 units in humanities/religion. If applicants have attended an SDA institution, they must have a minimum of 4 units religion per year (up to 8). All applicants must have a minimum 12 units in humanities (choose a minimum of two areas from: history, literature, philosophy, foreign language, art/music appreciation/history). For remaining units to meet the 20, students may take additional religion or humanities course work.

Human anatomy and physiology with laboratories, complete sequence; **or** general biology with laboratories, complete sequence

Microbiology with laboratory (alternate biology course accepted)

Statistics

Select one of the following two:

1: General chemistry with laboratories, complete sequence AND a minimum of 6 quarter units of any physics with laboratory

2: General physics with laboratory, complete sequence; AND a minimum of two academic terms of any sequenced chemistry with laboratories

Cultural anthropology **or** an approved course dealing with cultural diversity

General psychology

Human growth and development

English composition, complete sequence

Speech

Computers

Personal health **or** nutrition

Two physical education courses

Electives to meet the minimum total requirements of 98 quarter units

Work experience

A minimum of eighty hours of work/observation experience (volunteer/employee) in a physical therapy department, twenty hours of which are expected to be in an inpatient setting.

Test requirement

No test is required.

OPTION TWO—M.P.T.-only track

This option is for individuals who have an earned baccalaureate degree from a regionally accredited college or university. Graduates will receive a Master of Physical Therapy degree.

Prerequisites for Entry-Level Master of Physical Therapy, M.P.T.-only track

Human anatomy and physiology with laboratories, complete sequence; **or** general biology with laboratories, complete sequence

Microbiology with laboratory; alternate biology course accepted.

Statistics

Select one of the following two options:

1: General chemistry with laboratories, complete sequence; AND a minimum of 6 quarter units of any physics with laboratory

2: General physics with laboratory, complete sequence; AND a minimum of two academic terms of any sequenced chemistry with laboratories

General psychology

Human growth and development

Speech

Computers

Work experience

A minimum of eighty hours of work/observation experience (volunteer/employee) in a physical therapy department, twenty hours of which must be in an inpatient setting, are required.

Test requirement

No test is required.

PROGRAM OF INSTRUCTION
PHYSICAL THERAPY—Entry-Level Master of Physical Therapy

The program of instruction outlined as follows is for students enrolled during the 2001-2002 academic year.

YEAR ONE

PHTH 321	Kinesiology	3
PHTH 327	Human Life Sequences	3
PHTH 328	Manual Muscle Testing	3
PHTH 343	Neuroanatomy	4
PHTH 371	Therapeutic Exercise	4
PHTH 373	Therapeutic Procedures	3
PHTH 413	Clinical Neurology	2
PHTH 434	PT Communication and Documentation	2
PHTH 435	Hydrotherapy and Massage	3
PHTH 465	Exercise Physiology	3
PHTH 471	Physical Therapy Practicum I	1
PHTH 477	Locomotion Studies	3
AHCJ 305	HIV/AIDS and the Health Provider	1
AHCJ 311	Medical Terminology	2
AHCJ 312	Anatomy	9
AHCJ 318, 419	Physiology I, II	4, 3
AHCJ 328	Portfolio Practicum I	1
AHCJ 402, 403	Pathology I, II	4, 3
AHCJ 426	Introduction to Computer Applications I	2
AHCJ 444	Functional Neuroanatomy	2
AHCJ 538	Histology	2-3
REL_ 4__	Adventist selective	2
REL_ 4__	Religion elective	3

YEAR TWO

PHTH 411	Clinical Orthopaedics	2
PHTH 412	Clinical Psychiatry	2
PHTH 424	Electrotherapy	3
PHTH 495, 496	Research I, II	3, 2
PHTH 501-503	Neurorehabilitation I, II, III	3, 2, 3
PHTH 504, 505	Pediatric Care I, II	3, 2
PHTH 521-523	Orthopaedics I, II, III	3, 3, 3
PHTH 525, 526	General Medicine I, II	3, 3
PHTH 531	Soft-Tissue Techniques	2
PHTH 561	Physical Therapy Administration	4
PHTH 572, 573	Physical Therapy Practicum II, III	1.5, 1.5
PHTH 595	Applied Research I	1
AHCJ 404	Pharmacology	1
AHCJ 405	Dynamics of Learning and Teaching	1
AHCJ 421	Psychology of Physical Disability	2
AHCJ 498	Portfolio Practicum II	1
HPRO 508	Aspects of Health Promotion	2
RELE 457	Christian Ethics and Health Care	2
REL_ 4__	Religion elective	2

YEAR THREE

PHTH 583-585	Physical Therapy Affiliation I, II, III	5.5, 5.5, 5
PHTH 591	Advanced Orthopaedic Studies	6
PHTH 592	Advanced Neurologic Studies	6
PHTH 594	Advanced General Medicine Studies	4
PHTH 596, 597	Applied Research II, III	2, 1

A minimum grade of C (2.0) is required for all courses in the program.

Graduate students (clockwise from standing student): Tuan Pham, Mike Thorpe, Robert Schroetlin, Peter Carrillo, and Chris Gorton make last-minute adjustments to their group research project for the Entry-Level M.P.T. Program.

PHYSICAL THERAPY—Progression Master of Physical Therapy

THE PROGRAM

The Progression Master of Physical Therapy Program is specifically for men and women who have graduated from an accredited physical therapist assistant program and wish to pursue a Master of Physical Therapy degree and professional certification. Admission to the University follows completion of an associate degree in physical therapy, completion of the prerequisites and a minimum of 2500 hours as a physical therapist assistant earned in no less than sixteen months following graduation as a physical therapist assistant but within the past five years prior to application. The emphasis throughout the program is on professional courses, ethics, and practical experience at Loma Linda University Medical Center and affiliated hospitals and clinics.

Individuals who became physical therapists assistants by passing the challenge examination but did not graduate from an accredited physical therapist assistant program may be eligible for the PMPT program by:

1. Completing all prerequisite course work.
2. Having a 3.3 overall prerequisite G.P.A.
3. Having 4000 hours as a licensed PTA.
4. Coming on campus six weeks prior to the program for a preprogram block.

The program is two and one-quarter years in length. Classes begin in June. Graduation is in the Spring Quarter followed by one quarter of didactic and one quarter of clinical affiliation.

Accreditation

The program is accredited by the Commission on Accreditation in Physical Therapy Education of the American Physical Therapy Association, 1111 North Fairfax Street, Alexandria, VA 22314; 703/706-3245

Clinical experience

Supervised experience is obtained in a variety of settings and at four different times during the program. In the Spring Quarter of the first year, students complete one three-week practicum. In the Winter Quarter of the second year, students complete one eight-week affiliation. In the final quarter of the program, students complete two eight-week affiliations. All clinical assignments will be made by the academic coordinator of clinical education or a designate. Because of the limited number of local facilities available, assignments cannot be made on the basis of the student's family/marital status or personal preference. Although the department makes an effort to accommodate the student's preference, the student agrees to accept the clinical assignments made by the department at any of the affiliated facilities, whether local or out of state.

ADMISSION

Subject requirements for 2001-2002.

To be eligible for admission, the applicant must have a minimum G.P.A. of 3.0, 2500 hours of work experience as a physical therapist assistant, and a minimum of 98 quarter units at a regionally accredited college or university. Admission is a selective process. Criteria used include: G.P.A., completion of subject requirements, interview, essay, recommendations, and work experience. The minimum subject admission requirements in quarter units are listed below. Grades of (C-) and below are not transferable for credit.

For students with a bachelor's degree prior to enrolling in the Progression Master of Physical Therapy Program, only the prerequisites denoted with an asterisk (*) are required.

Prerequisites for Progression Master of Physical Therapy, M.P.T.

Minimum of 20 units in humanities/religion. If applicants have attended an SDA institution, they must have a minimum of 4 units religion per year (up to 8). All applicants must have a minimum 12 units in humanities (choose a minimum of two areas from: history, literature, philosophy, foreign language, art/music appreciation/history). For remaining units to meet the 20, students may take additional religion or humanities course work.

*Human anatomy and physiology with laboratories, complete sequence; **or** general biology with laboratories, complete sequence

*Microbiology with laboratory; alternate biology course accepted

*Statistics

*Select one of the following two options:

1: General chemistry with laboratories, complete sequence; **and** a minimum of 6 quarter units of any physics with laboratory

2: General physics with laboratory, complete sequence; **and** a minimum of two academic terms of any sequenced chemistry with laboratories

Cultural anthropology **or** an approved course dealing with cultural diversity

*General psychology

*Human growth and development

English composition, complete sequence

*Speech

*Computers

Personal health **or** nutrition

Two physical education courses

Electives to meet the minimum total requirements of 98 quarter units

PHYSICAL THERAPY—Post-Professional Master of Physical Therapy

ADMISSION

To be eligible for admission, the applicant must have earned a bachelor's degree in physical therapy from an accredited program. There is no GRF requirement for acceptance into this program.

TOEFL SCORE

A TOEFL score of 550 is required for foreign students. All foreign transcripts, including high school, must be submitted to an approved evaluation service. The list of the four approved services can be obtained from the School of Allied Health Professions admissions office. Results of the evaluation are to be sent to this University

directly from the evaluation center. Official foreign transcripts must be sent to the School of Allied Health Professions, directly from school to school, at the time of application.

THE PROGRAM

The Post-Professional Master of Physical Therapy Program is designed for individuals with a degree in physical therapy who wish to pursue advanced studies in their profession.

To practice physical therapy in the United States one must meet the criteria of the state in which s/he wishes to practice. Credentials are evaluated based on the applicant's entry-level education. Post-professional education cannot be used for this purpose.

PROGRAM OF INSTRUCTION

PHYSICAL THERAPY—Post-Professional Master of Physical Therapy

The program of instruction outlined as follows is for students enrolled during the 2001-2002 academic year.

PHTH	529	Pathokinesiology of Gait	3
PHTH	531	Soft-Tissue Techniques	3
PHTH	598	Advanced Specialty Tracks	3

AHCJ	505	Educational Psychology for Health Professionals	3
AHCJ	509	Teaching and Learning Styles	3
AHCJ	525	Biostatistics	3
AHCJ	526	Introduction to Computer Applications I	3
AHCJ	538	Histology	2-3
AHCJ	546	Orthopaedic Interventions: Mobilization of Peripheral Nerves and Joints of the Extremities	3
AHCJ	547	Orthopaedic and Neurological Integrative Manual Therapy	3
AHCJ	591	Research I	3
AHCJ	592	Research II	3
MFAM	558	Advanced Human Growth and Development	3
RELR	575	The Art of Integrative Care	3

PHYSICAL THERAPY—Entry-Level Doctor of Physical Therapy

THE PROGRAM

The Entry-Level Doctor of Physical Therapy Program (D.P.T.) is designed for individuals who have no previous degree in physical therapy and wish to pursue a Doctor of Physical Therapy degree and professional certification. Admission to the University follows presentation of a bachelor's degree earned at a regionally accredited college or university. The program is 3.5 years in length. The emphasis in the program is on professional courses, ethics, and practical experience. Additional emphasis is placed on research and specialized clinical affiliations.

Accreditation

The program is accredited by the Commission on Accreditation in Physical Therapy Education of the American Physical Therapy Association, 111 North Fairfax Street, Alexandria, VA 22314; 703/706-3245.

Clinical experience

Supervised experience is obtained in a variety of settings and at different times during the program. First-year students complete one two-week practicum assignment during the Spring Quarter. Second-year students complete two three-week assignments during the Autumn and Spring Quarters. The major clinical assignments are during the third year. The student will be assigned one eleven-week and one twelve-week affiliation in the Summer and Winter Quarters respectively. The final affiliation will be twenty-two weeks in length and will be assigned at a facility where the clinical instructor is an APTA board-certified specialist.

All clinical assignments will be made by the academic coordinator of clinical education or a designate. Because of the limited number of local facilities available, assignments cannot be made on the basis of the student's family/marital status or personal preference. Although the department makes an effort to accommodate the student's preference, the student agrees to accept the clinical assignments made by the department at any of the affiliated facilities, whether local or out of state.

ADMISSION

Subject requirements for 2001-2002.

To be eligible for admission, the applicant must have an earned bachelor's degree from a regionally accredited college or university and have a minimum G.P.A. of 3.3. Admission is a selective process. Criteria used include: G.P.A., completion of subject requirements, interview, essay, recommendations, and work experience.

The minimum subject admission requirements in quarter units are:

Prerequisites for Entry-Level Doctor of Physical Therapy, D.P.T.

Human anatomy and physiology with laboratories, complete sequence; **or** general biology with laboratories, complete sequence

Microbiology with laboratory; alternate biology course accepted.

Statistics

Select one of the following two:

1: General chemistry with laboratories, complete sequence; and a minimum of 6 quarter units of any physics with laboratory

2: General physics with laboratory, complete sequence; and a minimum of two academic terms of any sequenced chemistry with laboratories

General psychology (alternate course with approval of Department Chair)

Human growth and development

Speech

Computers

Work experience

A minimum of eighty hours of work/observation experience (volunteer/employee) in a physical therapy department, twenty hours of which must be in an inpatient setting, are required.

Test requirement

No test required.

PHYSICAL THERAPY—Post-Professional Doctor of Physical Therapy

ADMISSION

The post-professional Doctor of Physical Therapy degree track is designed for the individual with a degree in physical therapy who wishes to pursue advanced studies in the profession. To be eligible for admission, the applicant must have earned a bachelor's degree in physical therapy from an accredited program, and is expected to have completed a minimum of 30 quarter units beyond the bachelor's level prior to beginning the program. There is no GRE requirement for acceptance into this program.

Since some courses are Web based, all students admitted in the program must have access to a personal computer (minimum: 300 MHZ multimedia) with Internet access (minimum: 56 kbs [v.90 standard]).

COURSES

For information about units of credit and course numbers, see the beginning of division III of this BULLETIN.

PHTH 321 Kinesiology (3)

Functional anatomy of the musculoskeletal system. Analysis and application of the biomechanics of normal and pathological movement of the human body. Lecture and laboratory.

Prerequisite: ANAT 312.

PHTH 327 Human Life Sequences (3)

Sequential human development from neonate through adolescence, as applied to normal and abnormal neurological development. Includes concepts of pre- and postnatal care, delivery, and neonatal assessment. Incorporates the interrelationship of the physical, perceptual, and motor components in treatment of the neurologically disabled patient. Development of the human organism from young adult to death. Special emphasis on the problem of aging.

PHTH 328 Manual Muscle Testing (3)

Methods of evaluating muscle strength and function by use of specific and gross manual muscle tests. Lecture, demonstration, and laboratory.

PHTH 343 Neuroanatomy (4)

Basic anatomy and function of the central, peripheral, and autonomic nervous systems and related structures. Gross anatomy of brain and spinal cord. Functional consideration of cranial nerves, tracks, and nuclei of major systems. Lecture, slides, and laboratory with specimens.

PHTH 371 Therapeutic Exercise (4)

Application of physical, mechanical, and soft-tissue biomechanical considerations in the formulation of exercise prescriptions. Consideration of the neurophysiological basis of motor control and motor-learning acquisition. Selection of exercise modes for treatment of musculoskeletal and neurological disorders of the nonpathological individual.

PHTH 373 Therapeutic Procedures (3)

Blood pressure determination and aseptic techniques. Principles and utilization of posture and body mechanics. Selection and use of wheelchairs, ambulation aids, and other equipment. Progressive planning toward complete activities of daily living.

PHTH 411 Clinical Orthopaedics (2)

Systematic review of disease and injury affecting the musculoskeletal system (particularly the hands), resulting in physical disability. Conditions caused by congenital deformities, fractures, trauma, tumors, disease, and sports injuries. Radiologic terminology, properties, and imaging.

PHTH 412 Clinical Psychiatry (2)

Introduction to mental and personality disorders. Review of abnormal behaviors commonly found in a clinical setting.

PHTH 413 Clinical Neurology (2)

Systematic review of clinical disorders of the central and peripheral nervous systems, with emphasis on sensorimotor sequelae of injury and disease.

PHTH 424 Electrotherapy (3)

Principles and techniques of electrotherapy procedures, including electrodiagnosis. Basic physical and physiological indications and contraindications. Lecture, demonstration, and laboratory.

PHTH 434 PT Communication and Documentation (2)

Introduction to the principles and dynamics of professional communication. Emphasis on the basic skills needed in a clinical setting, including but not limited to the following: evaluations, progress notes, discharge summary, workers' compensation, prescriptions, patient interviews, letters of justification, electric formats, and legal considerations related to all aspects of the above.

PHTH 435 Hydrotherapy and Massage (3)

Fundamental principles, physiological effects, and techniques of hydrotherapy and massage used in preventive medicine and diagnostic techniques. Lecture, demonstration, and laboratory.

PHTH 465 Exercise Physiology (3)

Principles and application of human response to exercise, including body composition. Tests and measurements. Techniques of physical fitness. Cardio-respiratory considerations. Exercise prescriptions.

PHTH 471 Physical Therapy Practicum I (1)

Two-week assignment, to be completed during the Spring Quarter of third year, in an affiliated clinical setting. Forty clock hours per week of supervised clinical experience.

PHTH 477 Locomotion Studies (3)

Development of competencies in the identification and evaluation of normal and abnormal gait patterns, progressing to development of treatment programs. Includes current prosthetic and orthotic devices and their assistance with gait.

PHTH 495 Research I (3)

Introduces the scientific methods in health-science research. Focuses on the major steps of the research process: problem identification, literature review, conceptual framework, identification of variables, statement of hypothesis, experimental design, and analysis and presentation of data. Includes critical evaluation of research literature.

PHTH 496 Research II (2)

Application of the research process to problems in related specific allied health fields. Development of a research proposal.

PHTH 497 Advanced Clinical Experience (40 to 480 clock hours)

Advanced clinical experience in selected areas of professional practice.

PHTH 499 Physical Therapy Independent Study (1-3)

Project or paper to be submitted on a topic of current interest in an area related to physical therapy. Regular meetings to provide the student with guidance and evaluation. Elected on the basis of need or interest.

PHTH 501 Neurorehabilitation I (3)

Basic physiological and neurophysiological mechanisms specific to therapeutic concepts. Clinical approach to pathology and trauma of the central and peripheral nervous systems. Stroke, spinal cord injury, and head injuries. Emphasis on clinical application.

PHTH 502 Neurorehabilitation II (2)

Basic physiological and neurophysiological mechanisms specific to therapeutic concepts. Clinical approach to pathology and trauma of the central and peripheral nervous systems. Emphasis on proprioceptive neuromuscular facilitation.

PHTH 503 Neurorehabilitation III (3)

Continuation of basic physiological and neurophysiological mechanisms specific to therapeutic concepts. Clinical approach to pathology and trauma of the central and peripheral nervous systems. Emphasis on comparing and contrasting facilitation techniques.

PHTH 504 Pediatric Care I (3)

Discussion of the etiology, associated problems, and physical therapy care of clients with cerebral palsy, spina bifida, and various orthopaedic disorders. Includes presentation and demonstration of adaptive equipment options. Laboratory demonstrations. Introduction to the physical therapist's role in the NICU.

PHTH 505 Pediatric Care II (2)

Discussion of the etiology, associated problems, and physical therapy care of clients with arthrogryposis, osteogenesis imperfecta, muscular dystrophies, cystic fibrosis, and hemophilia. Expands further on various therapy techniques available to the client with cerebral palsy.

PHTH 507 Lower-Quarter Biomechanical Relationships (3)

Advanced examination procedures for performing a biomechanical assessment of the lower extremities. Emphasis on identifying causes of, compensations for, and complications of movement dysfunctions associated with lower-extremity musculoskeletal pain syndromes. Physical therapy management of gait abnormalities.

PHTH 521 Orthopaedics I (3)

Basic theory of extremity mobilization. Each joint presented in relationship to articular and periarticular structures that determine joint function and dysfunction. Evaluation and mobilization techniques.

PHTH 522, 523 Orthopaedics II, III (3, 3)

Basic theory of spinal evaluation and treatment techniques. General principles of functional anatomy, tissue and joint biomechanics, pathology, and treatment. Medical exercise training.

PHTH 525, 526 General Medicine I, II (3, 3)

Medical and surgical disorders. Basic pathology and/or etiology and clinical manifestations. Medical treatment for conditions within selected specialties: cardiac, respiratory, burns, arthritis, oncology, hematology, immunology, and endocrinology.

PHTH 529 Pathokinesiology of Gait (3)

Advanced observational analysis of normal and abnormal human locomotion, with comparison of pathological differences.

PHTH 531 Soft-Tissue Techniques (2-3)

Trends in soft-tissue manipulation. Lecture, demonstration, and laboratory.

PHTH 561 Physical Therapy Administration (4)

Principles of organization and administration in health care delivery. Multidisciplinary approach to patient management and patient-therapist relations. Administration of physical therapy services. Professionalism, medicolegal considerations, supervision and training of supportive personnel. Departmental design and budgetary considerations.

PHTH 565 Sports Physical Therapy I (1)

Advanced study of the neuromusculoskeletal system as it applies to the athletic population. Selected competencies of advanced clinical practice for the sports physical therapist as outlined by the American Board of Physical Therapy Specialties in the Description of Advanced Clinical Practice in Sports Physical Therapy. Emphasizes the development and implementation of a sports-medicine program, pre-participation physical examination, medical emergencies in the sports-medicine setting, criteria for return to play, types and frequency of sport-specific injuries, pre-game sideline/courtside set up, techniques of athletic-tape application to various body locations, and onfield examinations.

PHTH 566 Sports Physical Therapy II (1)

Advanced study of the neuromusculoskeletal system as it applies to the athletic population. Selected competencies of advanced clinical practice for the sports physical therapist as outlined by the American Board of Physical Therapy Specialties in the Description of Advanced Clinical Practice in Sports Physical Therapy. Emphasizes recognition and intervention for emergency medical conditions, including abdominal trauma, cardiac pathology, and respiratory emergencies in the athletic/sports medicine arena; protective equipment utilized in athletics; environmental conditions of heat, cold, altitude, and playing surfaces; and criteria utilized for determination of return to play.

PHTH 568 Advanced Diagnosis and Management: Patellofemoral (1)

Advanced study of the patellofemoral joint as it applies to the general and athletic populations. Emphasis on examination, classification, diagnosis, and management of patellofemoral pain syndromes. Physical therapy intervention primarily focused on evidence-based treatment approaches, including: joint mobilization, passive range of motion, therapeutic exercise, and a variety of bracing and taping techniques. First course in a series of three courses dealing with the diagnosis and management of lower-chair disorders.

PHTH 569 Advanced Diagnosis and Management of Foot and Ankle Disorders (1)

Advanced study of diagnosis and management of foot and ankle disorders. Clinical course designed to strengthen knowledge and application of orthotic therapy. Effective protocols for managing and trouble shooting orthotic therapy patients.

PHTH 572, 573 Physical Therapy Practicum II, III (1.5, 1.5)

Two three-week assignments, to be completed during the Summer and Spring Quarters of the fourth year, in affiliated clinical settings. Forty clock hours per week of supervised clinical experience.

PHTH 583, 584, 585 Physical Therapy Affiliation I, II, III (5.5, 5.5, 5)

Three twelve-week assignments—to be completed in the Summer, Winter, and Spring Quarters during the fifth year—in affiliated clinical settings. Emphasis on a variety of clinical settings: acute care, rehabilitation, orthopaedics, geriatrics, and pediatrics. Forty clock hours per week of supervised clinical experience, special assignments, in-services, lectures, demonstrations, and conferences.

PHTH 586, 587 Doctor of Physical Therapy Affiliation I, II (5)

A full-time clinical assignment under the supervision of an APTA board-certified clinical specialist in a specialized area of clinical practice. Student receives an "IP" grade at the end of PHTH 586. A "satisfactory" grade will be granted after satisfactory completion of PHTH 587. 480 laboratory hours.

PHTH 591 Advanced Orthopaedic Studies (6)

Specialty track designed to provide opportunity to pursue, in greater depth, various topics related to current trends in orthopaedic physical therapy and development of advanced clinical skills, where appropriate.

PHTH 592 Advanced Neurologic Studies (6)

Specialty track designed to provide opportunity to pursue, in greater depth, various topics related to current trends in neurologic physical therapy and development of advanced clinical skills where appropriate.

PHTH 594 Advanced General Medicine Studies (4)

Specialty track designed to provide opportunity to pursue, in greater depth, various topics related to current trends in general medicine physical therapy and development of advanced clinical skills where appropriate.

PHTH 595 Applied Research I (1)

Pilot testing of a research proposal in a practice setting. Testing of procedures and data forms.

PHTH 596 Applied Research II (2)

Implementation of a research proposal in a practice setting. Computer data analysis and preparation of a preliminary research report.

PHTH 597 Applied Research III (1)

Preparation and presentation of a research report both in written and oral formats. Graphics, tables, Power-point presentations, poster, and abstract.

PHTH 598 Advanced Specialty Tracks (3)

Presentation of the newest clinical treatment applications over the spectrum of the patient population in the field of physical therapy. Includes ortho, neuro, and general medicine.

PMPT 312 Anatomy (6)

Gross and microscopic anatomy of the human body. Lecture, laboratory, demonstration, and slides. Orientation to structure of various systems of the body.

PMPT 321 Kinesiology (2)

Functional anatomy of the musculoskeletal system. Analysis and application of biomechanics of normal and pathological movement of the human body. Lecture and laboratory

Prerequisite: PMPT 312.

PMPT 328 Manual Muscle Testing (2)

Methods of evaluating strength and function by use of specific and gross manual muscle tests. Lecture, demonstration, and laboratory.

Prerequisite: PMPT 312.

PMPT 371 Therapeutic Exercise (3)

Application of physical, mechanical, and soft-tissue biomechanical considerations in the formulation of exercise prescriptions. Considerations of the neurophysiological basis of motor control and motor-learning acquisition, and selection of exercise modes for treatment of musculoskeletal and neurological disorders and the nonpathological individual. Class modified for the progression-program PTA graduate, who already has some basic knowledge.

PMPT 424 Electrotherapy (2)

Principles and techniques of electrotherapy procedures, including electrodiagnosis. Basic physical and physiological indications and contraindications. Lecture, demonstration, and laboratory. Modified for the PMPT program.

PMPT 427 Human Life Sequence (2)

Sequential development of the human organism from neonate through old age. Modern concepts of postnatal care through the normal process of aging. Evaluation of developmental reflexes and gross motor function of the pediatric population and balance of the geriatric population. Demonstration of treatment techniques as adapted to pediatric and geriatric patients. Discussion of cultural awareness. Ethical and legislative issues as they relate to the human life sequence.

PMPT 434 PT Communication and Documentation (2)

Dynamic and principles of professional communication. Basic skills include, but are not limited to, the following: initial evaluations, progress notes, discharge summary, patient interviews, letters of justification, legal consideration, and computer documentation programs. Class modified for the Progression M.P.T. Program.

PMPT 435 Hydrotherapy and Massage (2)

Fundamental principles, physiological effects, and techniques of hydrotherapy and massage used in preventative medicine and diagnostic techniques. Lecture, demonstration, and laboratory. Class modified for the Progression M.P.T. Program.

PMPT 477 Locomotion Studies (3)

Development of competencies in the identification and evaluation of normal and abnormal gait patterns, progressing to development of treatment programs. Includes current prosthetic and orthotic devices and their assistance with gait. Class modified for the Progression M.P.T. Program.

PMPT 574 Physical Therapy Practicum (1.5)

A three-week assignment in affiliated clinical settings. Forty clock hours per week of supervised clinical experience.

PMPT 583, 584, 585 PT Affiliation I, II, III (3, 3, 3)

Three eight-week assignments: in the Winter Quarter of the second year, students complete one eight-week affiliation. In the final quarter of the program, the students complete two eight-week affiliations. Emphasis on a variety of clinical settings: acute care, rehabilitation, orthopaedics, geriatrics, and pediatrics. Forty clock hours per week of supervised clinical experience, special assignments, in-services, lectures, demonstrations, and conferences.

PMPT 591 Advanced Orthopaedic Studies (5)

Specialty tracks designed to provide opportunity to pursue in greater depth various topics related to current trends in orthopaedic physical therapy. Development of advanced clinical skills, where appropriate.

PMPT 592 Advanced Neurologic Studies (5)

Specialty tracks designed to provide opportunity to pursue in greater depth various topics related to current trends in neurologic physical therapy. Development of advanced clinical skills, where appropriate.

PMPT 593 Advanced General Medicine Studies (3)

Specialty tracks designed to provide opportunity to pursue in greater depth various topics related to current trends in general medicine physical therapy. Development of advanced clinical skills, where appropriate.

PTAS 201 Applied Anatomy and Physiology (4)

Anatomy of the human body, with emphasis on the neuromuscular and skeletal systems, including anatomical landmarks. Basic neuroanatomy of the central nervous system.

PTAS 203 Applied Kinesiology (4)

Introduction to functional anatomy of the musculoskeletal system. Application of biomechanics of normal and abnormal movement in the human body. Introduction to components of gait. Lecture and laboratory.

Prerequisite: PTAS 201.

PTAS 205 Introduction to Physical Therapy (1)

Physical therapy practice and the role of the physical therapist assistant in providing patient care. Quality assurance. Interpersonal skills. Introduction to the multidisciplinary approach. Familiarization with health care facilities and government agencies.

PTAS 206 Documentation Skills (1)

Introduction to basic abbreviations, medical terminology, chart reading, and note writing.

PTAS 212 Physical Therapy Procedures (3)

Principles of basic skills in the physical therapy setting. Goniometry. Sensory- and gross-muscle testing. Mobility skills in bed and wheelchair; and transfer training. Gait training and activities of daily living. Body mechanics, positioning, and vital signs. Architectural barriers identified. Teaching techniques for other health care providers, patients, and families. Wheelchair measurement and maintenance. Lecture and laboratory.

PTAS 224 General Medicine (3)

Introduction to general-medicine conditions, including pathology and management of medical problems. Diseases of the body systems, including urinary, reproductive, digestive, circulatory, nervous, endocrine, and musculoskeletal. Theoretical principles and practical application of respiratory techniques, exercises, and postural drainage. CPR certification must be obtained before end of term.

PTAS 225 Neurology (3)

Introduction to neurological conditions, including pathology and management of medical problems of stroke, head injury, Parkinson's disease, spinal cord and nerve injuries, and other conditions.

PTAS 226 Orthopaedics (3)

Introduction to common orthopaedic conditions, pathologies, and surgical procedures of the peripheral joints. Joint mobilization techniques. Procedures and progression of therapeutic exercises for each specific joint covered as these exercises relate to tissue repair and healing response. Practical laboratory includes integration of treatment plans and progressions.

PTAS 227 Therapeutic Exercise (2)

Introduction to therapeutic exercise theories and practical applications. Tissue response to range-of-motion, stretch, and resistive exercise. Laboratory covers practical applications of various types of exercise techniques and machines used in the clinics, and a systematic approach to therapeutic exercise progression.

PTAS 231 Physical Therapy Modalities (3)

Basic physical therapy modalities, including, heat and cold application, hydrotherapy and massage, pool therapy, physiology and control of edema, stump wrapping, standard precautions, sterilization techniques, and chronic-pain management. Lecture and laboratory.

PTAS 236 Applied Electrotherapy (3)

Principles and techniques of electrotherapy procedures, including basic physiological effects; and indications and contraindications of specific electrotherapy modalities. Practical application and demonstration of modalities in a laboratory setting.

PTAS 238 Wound Care (1)

Normal structure and function of the skin. Pathology of the skin, including problem conditions, burns, and wounds. Lecture and laboratory to include wound identification, measuring, dressing, treatments, and debridement. Model wounds used for hands-on training.

PTAS 241 Applied Pediatrics (2)

Normal and abnormal development, from conception to adolescence. Emphasis on developmental sequence, testing, and treatment of neurological and orthopaedic disorders. Practical laboratory.

PTAS 243 Applied Geriatrics (3)

Introduction to various aspects of geriatric care. Wellness care and adaptation to exercise modalities. Procedures pertaining to the geriatric patient. Diagnosis and aging changes that affect function in geriatric rehabilitation.

PTAS 251 Orthopaedics II (3)

Introduction to common orthopaedic conditions, pathologies, and surgical procedures of the spine. Treatments, procedures, and progression of therapeutic exercises of the spine as related to tissue repair and healing response. Practical laboratory includes integration of treatment plans and progressions.

PTAS 252 Applied Neurology (3)

Introduction to facilitation techniques of neurodevelopmental treatment, proprioceptive neuromuscular facilitation, Brunnstrom, and principles of therapeutic exercise of the cardiac patient. Practical laboratory.

PTAS 261 Physical Therapy Practice (1)

Observations of evaluations, treatments, and various diagnoses. Billing procedures and third-party payors. Completion of a resume and a state licensing application. Preparation and presentation of case study and in-service.

PTAS 264 Applied Prosthetics and Orthotics (2)

Introduction to basic principles in the use of selected prosthetic and orthotic devices. Exposure to various types of devices and adjustment to devices; examination of indications and contraindications for orthotic and prosthetic use with patients seen in physical therapy.

Prerequisite: PTAS 203.

PTAS 265 Professional Seminar (1)

Contemporary theories and practices of physical therapy. Topics covered by faculty and guest lecturers include: sports taping, ortho taping, soft tissue, affective learning. Lecture and laboratory.

PTAS 275 Psychosocial Aspects of Health (2)

Psychological and sociological reactions to illness or disability. Includes trauma, surgery, and congenital and terminal illness. Individual and family considerations.

PTAS 291 Physical Therapist Assistant Practicum (1)

Two-week assignment to be completed during the Winter Quarter in an affiliated clinical setting. Emphasis on patient and staff working relationships. Awareness of patient disorders and limited application of physical therapy techniques. Forty clock hours per week of supervised clinical experience.

PTAS 293, 294, 295 Physical Therapist Assistant Affiliation I, II, III (3, 3, 3)

I: One six-week assignment to be completed during the Spring Quarter.

II, III: Two six-week assignments to be completed during the second Summer Quarter in affiliated clinical settings. Students exposed to a variety of clinical settings. Forty clock hours per week of supervised clinical experience. The combined total of twenty weeks of clinical experience prepares the student for entry-level performance.

CONJOINT

See CONJOINT COURSES, section III General Information, for course descriptions.

COGNATE**HPRO 508 Aspects of Health Promotion (2)**

Dynamics of community and individual health. Factors in the promotion of a healthful lifestyle, including cardiovascular enhancement, stress reduction and coping mechanisms, nutritional awareness, weight management, and substance control.

RELE 456 Personal and Professional Ethics (2)

Introductory exploration of the foundations, norms, and patterns of personal integrity in professional contexts.

RELE 457 Christian Ethics and Health Care (2)

Ethical issues in modern medicine and related fields from the perspective of Christian thought and practice.

RELR 475 The Art of Integrative Care (2)

Principles, concepts, and practices that affect the ministry of health care and the Christian witness in the clinical setting.

RELR 575 Art of Integrative Care (3)

Examination of the attitudes and actions of the health care professional relative to personal spirituality and patient witnessing.

RELF 423 Loma Linda Perspectives (2)

History and philosophy of Loma Linda University as a Christian health-sciences institution that fosters human wholeness.

MFAM 553 Family Systems Theory (3)

Review of Bowen theory and theory of family systems. Introduction to family psychotherapy as an outgrowth of the theory. Students examine their own families of origin.

MFAM 558 Advanced Human Growth and Development (3)

Human biological, psychological, and social development from conception to death, including but not limited to, childbirth, child rearing, childhood, adolescence, adulthood, marriage, divorce, blended families, step-parenting, and geropsychology. Overview of concepts, theories, and research relevant to human development. Emphasis on development over the life span in the context of family interaction and its impact on family therapy.

PSYC 405 Psychology of Human Relations (3)

Human relations for career and personal success. Topics include the effective use of human resources, communication, leadership skills, decision making, stress management, assertiveness training, managing conflicts, career development, and achieving balance.

RADIATION TECHNOLOGY

MEDICAL RADIOGRAPHY—Associate in Science

RADIATION SCIENCES—Bachelor of Science

RADIATION THERAPY TECHNOLOGY—Bachelor of Science; Certificate

DIAGNOSTIC MEDICAL SONOGRAPHY—Certificate

NUCLEAR MEDICINE TECHNOLOGY—Certificate

SPECIAL IMAGING TECHNOLOGY: CT/MRI—Certificate

ARTHUR W. KROETZ, Department Chair; Program Director, Nuclear Medicine Technology

MARK J. CLEMENTS, Associate Department Chair; Program Director, Medical Radiography; Coordinator, Diagnostic Medical Sonography

LAURA L. ALIPOON, Program Director, Radiation Sciences

STEVEN L. LEBER, Clinical Coordinator, Medical Radiography; Program Director, Special Imaging Technology

CAROL A. DAVIS, Clinical Program Director, Radiation Therapy Technology

MARIE M. DELANGE, Clinical Program Director, Diagnostic Medical Sonography

GREGORY E. WATKINS, Medical Adviser, Medical Radiography Program

GLENN A. ROUSE, Medical Director, Diagnostic Medical Sonography Program

JAMES M. SLATER, Medical Director, Radiation Therapy Technology Program

_____, Medical Director, Nuclear Medicine Technology Program

FACULTY

Laura L. Alipoon
Mark J. Clements
Noha S. Daher
Carol A. Davis
Marie M. DeLange
Intithar S. Elias
Barbara S. Holshouser
Arthur W. Kroetz
Steven L. Leber

CLINICAL FACULTY

James Robert Baer
Brenda S. Holden
Helen J. King
Ray Lin
Glenn A. Rouse

Representing the Department of Radiation Technology are Art Kroetz (department chair), Laura Alipoon, Carol Davis, Marie DeLange, Steve Leber, Mark Clements, and Connie Daniel.

MEDICAL RADIOGRAPHY—Associate in Science

The medical radiographer, or radiologic technologist, is responsible for the accurate demonstration of body structures on a radiograph or other image receptor. The technologist determines proper exposure factors, manipulates medical imaging equipment, evaluates the radiographic image for quality, and provides for patient protection and comfort.

The technologist frequently assists the physician team member in specialized procedures. These often require the administration of chemical mixtures to the patient for enhanced viewing of the function of body systems.

THE PROGRAM

The Medical Radiography Program begins with the Autumn Quarter and is based on the completion of one year of prerequisite course work at any accredited college or university. The first quarter at Loma Linda University primarily emphasizes the theoretical aspects of radiography, with one day per week in clinical orientation. The remaining five quarters combine clinical training on a two-to-five-days-per-week basis, with more advanced classroom topics. The schedule extends through vacation periods and involves some evening and weekend duties.

Affiliations

For the clinical portion of the program, students are assigned to one of the affiliated medical centers: Loma Linda University Medical Center and Loma Linda University Community Medical Center, Inland Valley Regional Medical Center, Hemet Valley Medical Center, Eisenhower Medical Center, Desert Hospital, Redlands Community Hospital, Menifee Valley Medical Center, Pioneer Memorial Hospital, El Centro Regional Medical Center, White Memorial Medical Center, or St. Mary Regional Medical Center.

Accreditation

The program is accredited by the Joint Review Committee on Education in Radiologic Technology (JRCERT), 20 North Wacker Drive, Suite 900, Chicago, IL 60606-2901; 312/704-5300. The program is also approved by the State of California Department of Health Services.

CPR CERTIFICATION

Students are required to have current cardiopulmonary resuscitation (CPR) certification (adult and child) for all scheduled clinical experience.

PROFESSIONAL REGISTRATION AND CERTIFICATION

Upon completion of the requirements for the Associate in Science degree, the graduate is

eligible to write the qualifying examination of The American Registry of Radiologic Technologists (ARRT) and become certified by the state of California.

PROFESSIONAL ASSOCIATION

Students and graduates are eligible for membership in The American Society of Radiologic Technologists (ASRT) and The California Society of Radiologic Technologists (CSRT). The objectives of the association are to advance the science of radiologic technology, to improve education, and to elevate the quality of patient care. Clinical-year students are encouraged to become members of The California Society of Radiologic Technologists (CSRT).

THE PROGRAM OBJECTIVES

Upon completion of the program, the graduate should be qualified to:

1. Complete all certification requirements of the state of California and the American Registry of Radiologic Technologists.
2. Anticipate and provide basic patient care, comfort, and education, as needed.
3. Practice radiation protection by utilizing principles of basic x-ray production and interactions to limit radiation exposure to the patient, self, and other members of the health care team.
4. Understand the limits of equipment operation, including the recognition of equipment malfunctions and problem-reporting procedures.
5. Obtain optimum images by properly utilizing equipment, accessories, techniques, and procedures; and apply knowledge of human structure, function, and pathology to varying patient situations.
6. Demonstrate knowledge and skills relating to quality-assurance activities.
7. Provide services to humanity, with full respect for the dignity of all persons.

8. Communicate appropriately with patients, colleagues, and others with whom s/he comes in contact.
9. Behave in a professional manner in all interactions.
10. Demonstrate teamwork in the clinical setting and other situations where this concept leads to completion of goals that an individual could not easily meet alone.
11. Support the profession's code of ethics and comply with the profession's scope of practice.
12. Continue to improve knowledge and skills by participating in educational and professional activities, sharing knowledge with colleagues, and investigating new and innovative aspects of professional practice.

Prerequisites for Medical Radiography, A.S.

- Religion required, 4 units per year of attendance at a Seventh-day Adventist college
- Human anatomy and physiology with laboratories, complete sequence
- Two years high school mathematics at algebra level or above, with grades of C or above; **or** algebra in college
- Medical terminology
- One year high school-level physics **or** introductory physics (one quarter/semester)
- General psychology **or** sociology
- English composition, complete sequence
- Speech
- Computers
- Electives to meet the minimum total requirements of 42 units

ADMISSION

To be eligible for admission, the applicant must have completed high school from an accredited institution or passed the GED and completed a minimum of 42 quarter units (or 28 semester units) at an accredited college or university.

Observation experience

A minimum of twelve hours of observation in a radiology department is required. Contact the department to obtain the appropriate form.

PROGRAM OF INSTRUCTION

MEDICAL RADIOGRAPHY—Associate in Science

The program of instruction outlined below is for students enrolled during the 2001-2002 academic year. Certain aspects of the curriculum require individual scheduling. Time arrangements may be subject to change. Entrance to the clinical year is contingent upon the completion of all prior requirements.

SOPHOMORE YEAR

RTMR 202	Orientation Laboratory	1
RTMR 221	Radiologic Patient Care	2
RTMR 253, 254	Medical Radiography Procedures I, II	3, 4
RTMR 253L-254L	Medical Radiography Procedures Laboratory I, II	1, 1
RTMR 283	Radiologic Physics	3
RTMR 284	Radiation Protection and Biology	2
RTMR 285, 286	Principles of Radiography I, II	3, 4
RTMR 371	Medical Radiography Affiliation I	1
AHCJ 326	Patient Care Methods	2
RELE 457	Christian Ethics and Health Care	2
REL_ ___	Religion elective	2

CLINICAL YEAR

RTMR 255	Medical Radiography Procedures III	1
RTMR 287	Principles of Radiography III	2
RTMR 321	Radiographic Film Critique	1
RTMR 331	Special Technical Procedures	2
RTMR 334	CT and Cross-sectional Anatomy	2
RTMR 342	Computer Applications in Radiology	1
RTMR 345	Radiologic Pathology	2
RTMR 363	Comprehensive Review	1
RTMR 372-375	Medical Radiography Affiliation II, III, IV, V	2, 3, 2, 2
AHCJ 305	HIV/AIDS and the Health Provider	1
AHCJ 328	Portfolio Practicum I	1
WRIT 317	Writing II	1

A minimum grade of C (2.0) is required for all courses in the program.

RADIATION SCIENCES—Bachelor of Science

For radiologic technologists educationally prepared beyond the level of the Associate in Science degree, there are numerous career options. Radiology departments in large hospitals offer career opportunities in management, supervision, and research. Excellent opportunities also exist for those who are qualified to teach radiologic technology. In addition, commercial enterprises and state governments continually need technologists with advanced training to serve as customer representatives, technical consultants, and health physicists.

THE PROGRAM

The Bachelor of Science degree program, which begins at the level of the junior year, emphasizes the more advanced areas in radiologic technology and is designed to prepare graduates for careers in administration, clinical specialties, teaching, or health physics.

Students choosing to study on a part-time basis must complete the junior and senior years within a four-year period.

Accreditation

Loma Linda University is regionally accredited by Western Association of Schools and Colleges (WASC), 985 Atlantic Avenue, Suite 100, Alameda, CA 94501; telephone, 510/748-9001; FAX, 510/748-9797; www.wascweb.org; wascsr@wascsr.org

PROFESSIONAL REGISTRATION AND CERTIFICATION

Students electing to take the clinical practice emphasis are eligible upon graduation to write the qualifying examination of the second clinical specialty.

THE PROGRAM OBJECTIVES

Upon completion of the program, the graduate should be qualified to:

1. Demonstrate leadership skills through advanced and multilevel thinking in the areas of administration and education, science, and clinical practice.
2. Develop and refine critical thinking skills to enhance his/her ability to analyze and develop the most effective means of care for patients, to manage a department, or to educate students.
3. Behave in a professional manner in all interactions, including communicating appropriately with patients, colleagues, and others with whom s/he comes in contact.
4. Demonstrate teamwork in the clinical setting and other situations where this concept leads to completion of goals that an individual could not easily meet alone.

5. Continue to improve knowledge and skills by participating in educational and professional activities, sharing knowledge with colleagues, and investigating new and innovative aspects of professional practice.
6. Support the profession's code of ethics and comply with the profession's scope of practice.
7. Utilize Loma Linda University's program as a linkage to other programs and disciplines, as desired.

ADMISSION

Educational background

To be eligible for admission, the applicant must be a graduate of an approved associate degree program (or the equivalent) in radiologic technology, radiation therapy, nuclear medicine, or diagnostic ultrasound. A maximum of 70 semester or 105 quarter units from an accredited junior college will be accepted as transfer credit, including units for clinical training. Students who have completed a hospital training program are allowed 55 quarter units of academic credit on the basis of their registry certificate.

Certification

The applicant must have certification from The American Registry of Radiologic Technologists (ARRT). Applicants who are eligible to take the ARRT examination for certification but who have not had opportunity to do so are given provisional status for one quarter. Eligibility to continue is subject to student's obtaining certification. It should be understood that the University will not sign or validate registry documents of students who obtained their training in another program.

PROGRAM OF INSTRUCTION RADIATION SCIENCES—Bachelor of Science

The student in the baccalaureate degree program completes—

- the general studies requirements;
- the radiation technology core requirements;
- and an area of emphasis (administration and education, clinical practice, or science).

Electives to meet the needs of the individual student are selected from existing courses after consultation with the program director.

Prerequisites for Radiation Sciences, B.S.

20 units minimum in humanities (choose minimum of two areas from: history, literature, philosophy, foreign language, art/music appreciation/history)
 Religion required, 4 units per year of attendance at a Seventh-day Adventist college or university
 Human anatomy and physiology with laboratories, complete sequence
 Additional natural science units from: chemistry, geology, mathematics, physics, and statistics
 Must have a total of 12 quarter hours, including up to 6 units from anatomy and physiology

Two years high school mathematics with grades of C or above; **or** intermediate algebra in college
 Cultural anthropology **or** an approved course dealing with cultural diversity
 Select 8 quarter units from: economic, geography, political science, psychology, sociology
 English composition, complete sequence
 Electives to meet a minimum total requirements of 42 quarter units

PROGRAM OF INSTRUCTION

**B. S. DEGREE IN RADIATION SCIENCES—
 CORE COURSES AND RELIGION STUDIES**

(39 units)

RTCH 417	Applied Research Methods	1
RTCH 494	Senior Project	3
RTCH 385	Current Issues in Radiation Sciences I	2
RTCH 485	Current Issues in Radiation Sciences II	2
RTMR 451	Management of a Radiologic Service	3
AHCJ 305	HIV/AIDS and the Health Provider	1
AHCJ 324	Psycho-Social Models	2
AHCJ 328	Portfolio Practicum I	1
AHCJ 351	Statistics for the Health Professions	3
AHCJ 461	Research Methods	2-3
AHCJ 465	Seminars in Leadership	2
AHCJ 498	Portfolio Practicum II	1
EMMC 314	Introduction to 12-Lead ECG Interpretation	1
EMMC 316	12-Lead EKG Interpretation	2
EMMC 405	Trauma and Surgery	2
EMMC 431	Emergency Case Studies	2
EMMC 484	Legal Issues in Health Care	2
RELE 457	Christian Ethics and Health Care	3
REL_ —	Religion elective to complete required 4 units/year	0-4

AREA OF EMPHASIS

A. ADMINISTRATION AND EDUCATION (10 units)

RTCH 411	Student Teaching Practicum	2
RTCH 413	Management Practicum	2
RTCH 475	Curriculum Development in Health Sciences	2
RSTH 471	Instructional Techniques	2
RTMR 452	Quality Management in Radiation Sciences	2

A minimum grade of C (2.0) is required for all classes.

B. CLINICAL PRACTICE

A six to twenty-four month, full-time internship in a second clinical specialty selected from the following areas—

CLINICAL SPECIALTY	UNITS GIVEN TOWARD B.S. DEGREE
Medical sonography	31 units
Nuclear medicine technology	18 units
Special imaging technology	18 units
Radiation therapy technology	26-41 units

Acceptance into these specialties is separate from acceptance into the baccalaureate program. For more detailed information about admission requirements and the program of instruction, request an outline of the certificate programs in these specialties.

C. SCIENCE

12-15 quarter units selected from the natural sciences in the areas of: biology, anatomy, physiology, medical terminology, and physics. AHCJ 402 and 403 (Pathology I and II) are highly recommended.

RADIATION THERAPY TECHNOLOGY—Bachelor of Science

Radiation therapy is a multifaceted career that combines working in a highly technical environment with the opportunity to work closely with patients and members of many other professions to provide a high standard of clinical care. Radiation therapy is the therapeutic application of ionizing radiation to malignant and benign conditions. The therapist is responsible for delivering the treatment, which is prescribed by a radiation oncologist; maintaining accurate treatment records; and implementing quality-assurance plans. A radiation therapist must be detail oriented; able to work accurately under pressure; and, most important, be able to interact empathically with patients. Individuals who show initiative and are capable of critical thinking and problem solving make good radiation therapists. The job demand in this field is currently high, and starting salaries are between \$38,000-40,000 per year.

PROGRAM DESCRIPTION

This B.S. degree program is designed to accommodate both x-ray technologists and professionals who are currently licensed and working in the field of radiation therapy.

Track A is for ARRT-registered radiologic technologists, registered nurses, or graduates from another accredited allied health program who have fulfilled the prerequisites and who **wish to be educated as radiation therapists**. It is designed as a full-time, twenty-four month degree course and will fully prepare students to pass the national board examinations at the end of the program.

Track B is designed for radiation therapists who are ARRT registered in radiation therapy and who wish to obtain a baccalaureate degree. It is a twenty-four-month program that is didactic in nature and helps prepare the therapist for duties in the areas of teaching or administration.

Courses will be a combination of Web-based learning and traditional learning; some classes, therefore, may not meet weekly.

PROFESSIONAL REGISTRATION AND CERTIFICATION

Upon completion of the certificate requirements, the student is eligible to write the qualifying examination for radiation therapy technology of The American Registry of Radiologic Technologists (ARRT).

ADMISSION

Prerequisites for Radiation Therapy Technology, B.S.

20 units minimum in humanities (choose a minimum of two areas from: history, literature, philosophy, foreign language, art/music appreciation/history)

Religion required, 4 units per year of attendance at a Seventh-day Adventist college or university

Human anatomy and physiology with laboratories, complete sequence **or** general biology with laboratories, complete sequence

Select additional natural science units from: chemistry, geology, mathematics, physics, and statistics. Must have a minimum total of 12 quarter hours, including up to 6 units from anatomy and physiology.

Intermediate college algebra

Cultural anthropology **or** an approved course dealing with cultural diversity

Select 8 quarter units from: economics, geography, political science, psychology, and sociology

English composition, complete sequence

Computers

Personal health **or** nutrition

2 physical education courses

Electives to meet the minimum total requirements of 96 quarter units

For total unit requirements for graduation, see Division of General Studies, LLU GENERAL EDUCATION REQUIREMENTS (section V).

3. an area of emphasis (administration and education is the only emphasis offered through distance learning at this time). Electives selected from existing courses after consultation with the program adviser.

DEGREE REQUIREMENTS

The student in the baccalaureate program completes:

1. the General Education requirements;
2. the radiation sciences core requirements; and

PROGRAM OF INSTRUCTION

B.S. IN RADIATION THERAPY TECHNOLOGY—

Required Core Courses and Religion Studies

(30 units)

RTCH 385	Current Issues in Radiation Sciences I	2
RTCH 417	Applied Research Methods	1
RTCH 494	Senior Project	2
RTMR 451	Management of a Radiologic Service	3
RTMR 454	Quality Management in Radiologic Service	3
AHCJ 305	HIV/AIDS and the Health Professional	1
AHCJ 328	Portfolio Practicum I	1
AHCJ 351	Statistics for the Health Professions	3
AHCJ 461	Research Methods	2
AHCJ 498	Portfolio Practicum II	1
EMMC 314	Introduction to 12-Lead ECG Interpretation	1
EMMC 484	Legal Issues in Health Care	2
RELF 416	God and Human Suffering	3
RELF 423	Loma Linda Perspectives	2
RELE 457	Christian Ethics and Health Care	3

Track A

(45-46 units)

RTTH 332	Radiation Biology	1
RTTH 342	Patient Care Practices in Radiation Therapy	2
RTTH 344	Radiation Therapy Procedures	2
RTTH 345	Quality Assurance in Radiation Therapy	1
RTTH 348	Radiation Therapy Review	1
RTTH 353	Psycho-Oncology	2
RTTH 355	Physical Principles of Radiation Therapy	3
RTTH 356	Physical Principles of Dosimetry	3
RTTH 357	Applied Dosimetry	2
RTTH 358	Advanced Dosimetry (with lab)	3
RTTH 364	Radiation Oncology I	3
RTTH 365	Radiation Oncology II	3
RTTH 371-378	Radiation Therapy Affiliation I	8
AHCJ 402	Pathology I	4
AHCJ 403	Pathology II	3-4
AHCJ 404	Pharmacology	1
DTCS 301	Human Nutrition	3

Track B

(26 units)

RSTH 471	Instructional Techniques	2
RTCH 411	Student Teaching Practicum	2
RTCH 413	Management Practicum	2
RTCH 464	Moral Leadership	4*
RTCH 470	Curriculum Development in Health Science	2
RTTH 353	Psycho-Oncology	2
RTTH 358	Advanced Dosimetry (with laboratory)	3
AHCJ 402	Pathology I	4
AHCJ 403	Pathology II	3-4
AHCJ 404	Pharmacology	2
AHCJ 465	Seminars in Leadership	2*
DTCS 301	Human Nutrition	3

*Either RTCH 464 or AHCJ 465 may be taken.

RADIATION THERAPY TECHNOLOGY—Certificate

During the twelve-month certificate program of clinical studies in radiation therapy technology, students take formal course work along with instruction in the clinical aspects of radiation therapy. The program begins with the Autumn Quarter. The clinical portion of the program consists of practical demonstrations in the use of radiation therapy equipment and an opportunity to participate, under close supervision, in actual radiation therapy procedures in a variety of radiation oncology departments. The clinical calendar varies from the University calendar in that the clinical schedule is full time (forty clock hours per week), arranged around lectures, and coordinated with the operation of the Loma Linda University Medical Center radiation medicine department.

Accreditation

The program is accredited by the Joint Review Committee on Education in Radiologic Technology, 20 North Wacker Drive, Suite 900, Chicago, IL 60606-2901; 312/704-5300.

ADMISSION

Prerequisites for Radiation Therapy Technology, Certificate

To be admitted into the radiation therapy technology program and to become certified and registered, the applicant **must fulfill one of the following prerequisites:**

- Be an ARRT-registered radiologic technologist; **and/or**
- Be a graduate of an accredited radiologic technology program;

and

Must have credits in the following:

- Radiation physics
- Human anatomy and physiology with laboratory, complete sequence
- Intermediate algebra in college
- Radiation protection (available in professional program for those who have not taken it)

Patient-care methods

Computers

or

Be a registered nurse **or**

Be a graduate of an accredited allied health program (minimum training of two years)

and

Must have credits in the following:

- Human anatomy and physiology with laboratory, complete sequence
- Intermediate algebra in college
- Medical terminology
- Patient-care methods
- Radiation physics
- Radiation protection (available in professional program for those who have not taken it)
- Principles of radiography
- Computers

Observation experience

A minimum of forty hours of work observation in a radiation therapy department is required.

PROGRAM OF INSTRUCTION

RADIATION THERAPY TECHNOLOGY—Certificate

The program of instruction outlined below is for students enrolled during the 2001-2002 academic year.

RTTH	332	Radiation Biology	1
RTTH	342	Patient-Care Practices in Radiation Therapy	2
RTTH	344	Radiation Therapy Procedures	2
RTTH	348	Radiation Therapy Review	1
RTTH	355	Physical Principles of Radiation Therapy I	3
RTTH	356	Physical Principles of Radiation Therapy II	3
RTTH	357	Applied Dosimetry	2
RTTH	364, 365	Radiation Oncology I, II	3, 3
RTTH	371-374	Radiation Therapy Affiliation I, II, III, IV	1, 1, 1, 1
RTTH	381-384	Topics in Radiation Therapy I, II, III, IV	1-3, 1-3, 1-3, 1-3
AHCJ	403	Pathology II	3

DIAGNOSTIC MEDICAL SONOGRAPHY—Certificate

The diagnostic ultrasound profession is a multispecialty field comprised of diagnostic medical sonography (with subspecialties in abdominal, neurologic, obstetric/gynecologic, and ophthalmic ultrasound); diagnostic cardiac sonography (with subspecialties in adult and pediatric echocardiography); vascular technology; and other emerging fields. These diverse specialties are distinguished by their use of diagnostic medical ultrasound as primary technology in their daily work. The diagnostic ultrasound professional is an individual qualified by professional credentialing and academic clinical experience to provide diagnostic patient-care services using ultrasound and related diagnostic procedures. Diagnostic ultrasound professionals perform patient assessments, acquire and analyze data obtained using ultrasound related diagnostic technologies, provide a summary of findings to the physician to aid in patient diagnosis and management, and use independent judgment and systematic problem-solving methods to produce high-quality diagnostic information and optimize patient care.

THE PROGRAM

The multi-track certificate programs in medical sonography consist of study in ultrasound technology and other closely related areas. The program includes complete didactic and clinical experience in OB-GYN, abdomen, cardiac, neuro-, pediatrics, and vascular sonography. The clinical portion of the program includes orientation to the clinical aspects of medical sonography; practical demonstrations in the use of ultrasound equipment; and an opportunity to participate, under close supervision, in actual medical sonographic procedures within the department. The clinical calendar varies from the University calendar in that the clinical schedule is full time (forty clock hours per week), arranged around lectures and coordinated with the operation of the Loma Linda University Medical Center ultrasound department.

Accreditation

The program has been accredited since 1983 in both general sonography and echocardiography by the Commission on Accreditation of Allied Health Education Programs (CAAHEP) 35 East Wacker Drive, Suite 1970, Chicago, IL 60601-2208; and the Joint Review Committee on Education in Diagnostic Medical Sonography, 1248 Harwood Road, Bedford, TX 76021-4244; telephone: 817/685-6629.

Professional registration

Upon completion of the certificate requirements, the student is eligible to write the qualifying examination of the American Registry of Diagnostic Medical Sonographers.

ADMISSION

Requirements for 2001-2002

The applicant must fulfill one of the following requirements. Specific course requirements must be completed at an accredited college or university.

Applicant must be an ARRT-registered radiologic technologist

or

Be a graduate of an accredited allied health program, including nursing (two years minimum training)

or

Have any two-year A.S. degree

or

Have a baccalaureate degree in one of the natural sciences

and have credits in the following:

- Human anatomy and physiology with laboratory, complete sequence
- Intermediate algebra
- Medical terminology
- Patient-care methods
- Introduction to computers

PROGRAM OF INSTRUCTION
DIAGNOSTIC MEDICAL SONOGRAPHY—Certificate

The program of instruction outlined below is for students enrolled during the 2001-2002 academic year.

TRACK 1:

Two-year certificate

Two credentials—(RVT, General RDMS)

RTMS 344	Introduction to Medical Sonography	4
RTMS 345	OB-GYN and Neurosonography	4
RTMS 346	Vascular Technology/Doppler/Scan Techniques	5
RTMS 348	Abdomen Small-Parts Sonography	4
RTMS 371-378	Medical Sonography Affiliation,	1, 1, 1, 1, 1, 1, 1
RTMS 379	Ultrasound Physics and Instrumentation	2
RTMS 381-384	Topics in Medical Sonography I-IV	1, 1, 2, 2
HPRO 543	Writing for Health Professional	2

Option: Third credential (RDMS) requires additional six months

TRACK 2:

One-year certificate

One credential—Cardiac (RDMS)

RTMS 344	Introduction to Medical Sonography	4
RTMS 347	Echocardiography, Adult and Pediatric Specialties	4
RTMS 371-374	Medical Sonography Affiliation	1, 1, 1, 1
RTMS 379	Ultrasound Physics and Instrumentation	2
RTMS 383	Topics in Medical Sonography III	2
HPRO 543	Writing for Health Professional	2

Option: RVT or RDMS credentials requires one additional year

TRACK 3:

One-year certificate (RDMS certification prerequisite)

One credential—Vascular (RVT)

RTMS 344	Introduction to Medical Sonography	4
RTMS 346	Vascular Technology/Doppler/Scan Techniques	5
RTMS 371-374	Medical Sonography Affiliation	1, 1, 1, 1
RTMS 379	Ultrasound Physics and Instrumentation	2
RTMS 383	Topics in Medical Sonography III	2
HPRO 543	Writing for Health Professional	2

Option: RDMS credential requires one additional year

A minimum grade of C (2.0) is required for all courses in the program.

**PROGRAM OF INSTRUCTION
DIAGNOSTIC MEDICAL SONOGRAPHY—Certificate
with
RADIATION SCIENCES—Bachelor of Science**

Students enrolled in the Diagnostic Medical Sonography (i.e., ultrasound) Program who wish to complete not only the certificate (p. 162) but also a B.S. degree in radiation sciences will need to complete the following:

- the General Education requirements (which can be found in section V),
- the ultrasound emphasis (p. 162), and
- the modified B.S. degree core of courses listed below.

B. S. DEGREE IN RADIATION SCIENCES—

CORE COURSES AND RELIGION STUDIES

FOR DIAGNOSTIC MEDICAL SONOGRAPHY CERTIFICATE STUDENTS (26 units)

RTCH	385	Current Issues in Radiation Sciences I	2
RTCH	494	Senior Project	3
RTMR	451	Management of a Radiologic Service	3
EMMC	484	Legal and Ethical Issues	2
AHCJ	305	HIV/AIDS and the Health Provider	1
ACHJ	328	Portfolio Practicum I	1
AHCJ	351	Statistics for the Health Professions	3
AHCJ	465	Seminars in Leadership	2
AHCJ	498	Portfolio Practicum II	1
RELE	457	Christian Ethics and Health Care	3
REL_	___	Religion elective	

Ray Martinez, ultrasonographer, explains proper imaging technique to Moony Price, Medical Sonography Program student.

NUCLEAR MEDICINE TECHNOLOGY—Certificate

Nuclear medicine uses radioactivity to diagnose and treat disease. This medical specialty provides information about both the structure and function of virtually every major organ system within the body. Nuclear medicine procedures are safe, involve little or no patient discomfort, and do not require the use of anesthesia. The nuclear medicine technologist is responsible for preparing and administering radiopharmaceuticals; performing patient imaging procedures; accomplishing computer processing and image enhancement; analyzing biologic specimens; and providing images, data analysis, and patient information for diagnostic interpretation by the physician health care team member.

THE PROGRAM

During the twelve-month certificate program of clinical studies in nuclear medicine, students take formal course work along with instruction in the clinical aspects of nuclear medicine. This includes participation, under close supervision, in the actual procedures within the nuclear medicine department. The clinical calendar varies from the University calendar in that the clinical schedule is full time (forty clock hours per week), arranged around lectures and coordinated with affiliated nuclear medicine departments. The program begins with the Autumn Quarter.

Accreditation

The program is accredited by Western Association of Schools and Colleges, Accrediting Commission for Senior Colleges and Universities, 985 Atlantic Avenue, Suite 100, Alameda, CA 94501 and Department of Health Services, Radiologic Health Branch, P.O. Box 942732, Sacramento, CA 94234-7320.

PROFESSIONAL REGISTRATION AND CERTIFICATION

Upon completion of the certificate requirements, the student is eligible to write the qualifying examination in nuclear medicine of The American Registry of Radiologic Technologists (ARRT), the certifying examination of the Nuclear Medicine Technology Certification Board (NMTCB) and of the state of California (CTNM).

ADMISSION

Prerequisites for Nuclear Medicine Technology Certificate

The applicant must fulfill one of the following requirements:

- Be a graduate of an accredited radiologic technology program; **or**
- Be an ARRT-registered radiologic technologist; **or**
- Be an ASCP-certified medical technologist; **or**
- Be a registered nurse with at least two years of college credit, with a minimum of an associate degree; **or**
- Have a baccalaureate degree in one of the natural sciences;

and

Must have credits in the following:

- Two years high school mathematics with grades of C or above **or** intermediate algebra in college
- Chemistry with laboratory (one quarter/semester introductory or general)
- General physics with laboratory, complete sequence (highly recommended)
- Human anatomy and physiology with laboratory, complete sequence
- Medical terminology
- Patient-care methods

Observation experience

A minimum of twenty-four hours of observation in a nuclear medicine department is required.

Certifications

- CPR certification (adult, child)[#]
- Venipuncture*
- ECG/EKG interpretation*

(If the student is unable to complete these three certifications prior to entering the program, equivalent courses—offered by Loma Linda University Life Support Education [#] or Loma Linda University Medical Center Staff Development [*]—can be taken concurrently with the program.)

PROGRAM OF INSTRUCTION

NUCLEAR MEDICINE TECHNOLOGY—Certificate

The program of instruction outlined below is for students enrolled during the 2001-2002 academic year.

RTNM	351, 352	Principles of Nuclear Medicine I, II	3, 3
RTNM	353, 354	Nuclear Medicine Procedures I, II	2, 2
RTNM	371-374	Nuclear Medicine Affiliation I, II, III, IV	1, 1, 1, 1
RTNM	381	Topics in Nuclear Medicine I	2
RELE	457	Christian Ethics and Health Care	2

A minimum grade of C (2.0) is required for all courses in the program.

SPECIAL IMAGING TECHNOLOGY—CT/MRI Certificate

The Special Imaging Technology Program (computed tomography/magnetic resonance imaging) is nine months in length. Technologists spend forty hours per week in a combination of clinical and didactic training.

THE PROGRAM

Computed Tomography (CT)/Magnetic Resonance Imaging (MRI)

Students in the CT/MRI Special Imaging Program spend nine months in clinical and formal course work. Each student spends four and one-half months in each of the modalities. The program begins once a year, starting with Autumn Quarter (near the end of September). The clinical portion of the program consists of practical demonstrations in the use of CT and MRI equipment and an opportunity to participate, under close supervision, in actual CT and MRI procedures.

Prerequisites for Special Imaging Technology, CT/MRI Certificate

The applicant must:

- Be an ARRT-registered radiologic technologist
- Be a certified radiologic technologist (CRT, state of California)
- Have current CPR certification

Observation experience

Sixteen hours of observation, eight hours each in CT and MRI is required. A form to document this experience is provided in the application packet or may be obtained by calling the Department of Radiologic Technology.

Schedule

The program is full time and requires forty hours per week of the student's time in clinical and didactic learning experience. Clinical rotations are normally scheduled during daytime hours, Monday through Friday; but several four-week evening rotations are required. Didactic classes are held once each week during daytime hours at Loma Linda University. Students at affiliated sites will be required to drive to the campus for classes each week. Students are given vacation, holiday, and sick time appropriate to the total length of the program.

PROFESSIONAL REGISTRATION AND CERTIFICATION

Upon completion of the certificate requirements, and if the student has completed the new competency requirements of The American Registry of Radiologic Technologists (ARRT), the student is eligible to write the qualifying examination for computer tomography and/or magnetic resonance imaging of the ARRT. It is possible that a student may not be able to complete all of the competencies now required by the ARRT. If this is the case, it is the responsibility of the student to find an appropriate site to finish the required competencies after completing the program before writing the ARRT examination.

PROGRAM OF INSTRUCTION

COMPUTED TOMOGRAPHY/MAGNETIC RESONANCE IMAGING—Certificate

The program of instruction outlined below is for students enrolled during the 2001-2002 academic year.

RTSI	367	Cross-sectional Radiographic Anatomy	3
RTSI	368, 369	Special Imaging I, II	3, 3
RTSI	371-373	Special Imaging Affiliation I, II, III	1, 1, 1
RTSI	381-383	Topics in Special Imaging I, II, III*	1-3, 1-3, 1-3
RTMR	451	Management of a Radiologic Service**	2-3

RTMR 454	Quality Management in Radiologic Sciences**	2-3
REL_ ___	Religion elective	2

RTSI 381-383 Topics in Special Imaging I, II, III may be taken concurrently with
RTSI 371-373 Special Imaging Affiliation I, II, III for credit toward the baccalaureate degree.

*RTSI 381-383 is not part of the course requirement for nonbaccalaureate students.

** B.S. degree students take course for 3 units.

A minimum grade of C (2.0) is required for all courses in the program.

COURSES

For information about units of credit and course numbers, see the beginning of section III of this BULLETIN.

RTCH 385 Current Issues in Radiation Sciences I (2)

A faculty-facilitated course that includes class discussion, small-group work, and presentation of student projects. Students choose the direction of their learning within the scope of the content by choosing the content of their group work and projects.

RTCH 411, 412 Student Teaching Practicum I, II (2, 2)

Classroom teaching experience. Includes preparation of lecture outlines, objectives, and tests. Presentation of lectures and laboratory sessions. Practical application of teaching techniques.

RTCH 413, 414 Radiologic Management Practicum I, II (2, 2)

Observation of and discussion with selected administrative personnel in a radiology service. Emphasis on practical application of management theory. Projects assigned.

RTCH 464 Moral Leadership (2)

Methods of applying servant leadership to management and educational settings. Concepts of managing learners and professionals, assessing leadership style, the essence of leadership, leadership skill building, and conflict management discussed within a moral framework. Assigned readings, discussions, papers, and personal inventories utilized to aid in assessing the learner's leadership skills.

RTCH 471 Applied Research Methods (1)

Application of research methods to radiation sciences. Directed experience with a research project. Laboratory.

Prerequisite: AHCJ 351.

Concurrent: AHCJ 454 or 461.

RTCH 475 Curriculum Development in Health Science (2)

Curriculum development theories and approaches applied to the health-science arena. Development of a seminar, course, or curriculum. Designing assessment tools and procedures, designing a learning experience, selecting appropriate technology, developing a learner-centered handout/syllabus, and cultivating respect for diversity in learning.

RTCH 485 Current Issues in Radiation Sciences II (2)

A student-centered, faculty-facilitated course that is a continuation of RTCH 385. Class discussion, small-group work, and presentation of student projects/paper. New technology and its impact on the radiology department.

Prerequisite: RTCH 385.

RTCH 494 Senior Project (3)

Project associated with the development of radiologic procedures and techniques. Units chosen in consultation with adviser.

RTCH 497 Advanced Clinical Experience (40 to 480 clock hours per term)

Advanced clinical experience in selected areas of professional practice.

RTCH 499 Radiation Technology Independent Study (.5-2)

Project or paper to be submitted on a topic of current interest in an area related to radiation technology. Regular meetings to provide the student with guidance and evaluation. Elected on the basis of need or interest. The .5 unit of credit is designed to offer directed experience in the prevention of AIDS and other communicable diseases in the clinical setting.

RTMR 202 Orientation Laboratory (1)

Clinical orientation to the functions of radiologic technologists. Laboratory sessions conducted at affiliated clinical sites.

RTMR 221 Radiologic Patient Care (2)

Aspects of patient care in the radiology service. Emphasis on aseptic techniques. Physical and emotional care of the patient in relation to radiologic procedure. Contrast media and other drugs used in the practice of radiology.

RTMR 253, 254, 255 Medical Radiography Procedures I, II, III (3, 4, 1)

Application of anatomy and physiology to the radiographic situation. Proper patient positioning, equipment usage, and technical film-quality factors.

RTMR 253L, 254L Medical Radiography Procedures Laboratory I, II (1, 1)

Principles of patient positioning and radiographic exposure applied to the laboratory setting. Clinical patient simulations and radiographic phantoms used to determine optimum techniques.

RTMR 283 Radiologic Physics (3)

Physics of radiation and radioisotopes. Theoretical basis for understanding the nature, production, and interaction of radiation with matter. Requirements of the state radiation-control law. Background for understanding radioactivity and its application in nuclear medicine and radiation therapy. Laboratory.

Prerequisite: Pass basic mathematics examination.

RTMR 284 Radiation Protection and Biology (2)

Fundamental concepts of radiation protection and biological effects of radiation on patients and occupationally exposed personnel. Application of radiation-safety laws.

RTMR 285 Principles of Radiography I (3)

Principles of producing the optimum radiograph. Physical factors involved in photographic processing techniques. Instruction in the use of accessory equipment in obtaining the optimum radiograph under any situation. Laboratory.

RTMR 286 Principles of Radiography II (4)

Advanced instruction in the principles of radiographic theory and technique. Application of television, cineradiography, and other photographic equipment and principles to medical radiography.

RTMR 287 Principles of Radiography III (2)

Applications of fluoroscopy to radiographic imaging. Introduction to new DIGITAL imaging modalities and their impact on diagnostic radiography. Review of quality-assurance/quality-control practices in radiography.

RTMR 301, 302 Introduction to Radiographic Procedures I, II (1-3, 1-3)

Nature and description of radiologic procedures for the nonradiologic technologist. Principles and medical techniques applied to the radiographic setting. Survey of anatomy and instrumentation. Includes observation laboratory.

RTMR 321 Radiographic Film Critique (1)

Weekly conference for the critical evaluation of the fine points of the radiographic examination.

RTMR 322 Radiographic Film Critique II (1)

Weekly conference for the critical evaluation of the fine points of the radiographic examination.

RTMR 331 Special Technical Procedures (2)

History, techniques, and purposes of selected advanced radiologic procedures.

RTMR 334 CT and Cross-sectional Anatomy (2)

Recognition of basic anatomical landmarks as visualized in axially created digital images.

RTMR 342 Computer Applications in Radiology (1)

Application of computer-generated images in medical radiography. Includes computed tomography, digital subtraction angiography, nuclear medicine, ultrasound, radiation therapy, and magnetic resonance imaging.

Prerequisite: RTMR 285, 286, 287.

RTMR 345 Radiologic Pathology (2)

Appearance of common pathologic processes using radiologic imaging methods.

RTMR 363 Comprehensive Review (1)

Review of the major content areas emphasized on certification examinations. Student evaluation and performance analysis. Time provided to make class presentations, organize study materials, and take simulated registry examinations.

RTMR 371, 372, 373, 374, 375 Medical Radiography Affiliation I, II, III, IV, V (1, 2, 3, 2, 2)

Clinical experience of fifteen months covering a wide variety of technical procedures. Transmission and prevention of AIDS and other communicable diseases, with specific application to medical radiography. Clock hours per quarter: winter 192, spring 416, summer 520, autumn 416, winter 416.

RTMR 379 Special Project (1-3)

Project to be submitted in the form of a paper or a visual aid representing a topic of current interest in an area related to radiation sciences. Regular meetings to provide guidance to the student.

RTMR 381, 382, 383, 384, 385 Topics in Medical Radiography I, II, III, IV, V (3, 3, 3, 1-3, 1-3)

Survey of selected topics in medical radiography. Procedure summaries, projects, literature reviews. May be taken concurrently with RTMR 371-375 Radiography Affiliation I, II, III, IV, V for credit toward the baccalaureate degree.

RTMR 401, 402, 403, 404 Advanced Clinical Procedures I, II, III, IV (1-3, 1-3, 1-3, 1-3)

Credit for full-term, postcertification clinical practice in a radiology service. Periodic evaluations by the clinical supervisor.

RTMR 451 Management of a Radiologic Service (2-3)

Techniques of organization, planning, and management, with specific applications to a hospital radiology service.

RTMR 454 Quality Management in Radiologic Sciences (2-3)

An in-depth look at continuous quality management of all aspects in a radiology department, from equipment to personnel.

Prerequisite: RTMR 451.

RTMS 344 Introduction to Medical Sonography (4)

Introduction to sonography, including OB-GYN, abdomen, vascular, neurosonography, cardiac, and pediatric. Terminology and scan techniques of all areas.

RTMS 345 OB-GYN and Neurosonography (4)

OB-GYN and neonatal neurosonography specialties and scan techniques. Student case presentations and case studies.

RTMS 346 Vascular Technology/Doppler/Scan Techniques (5)

Vascular technology, doppler, abdomen, small-parts, and cross-sectional anatomy covered. Continued case studies and case presentations.

RTMS 347 Echocardiography, Adult and Pediatric Specialties (4)

Cardiac sonography, including pediatrics. Continued case studies and case presentations.

RTMS 348 Abdomen Small-Parts Sonography (4)
Sonography of the abdomen, small parts, cross-sectional anatomy, and pathology.

RTMS 371, 372, 373, 374, 375, 376, 377, 378
Medical Sonography Clinical Affiliation
(1, 1, 1, 1, 1, 1, 1)

Clinical experience in medical sonography (416 clock hours per term) covering a wide variety of technical procedures.

Prerequisite: Completion of each course in sequence, beginning with RTMS 371.

RTMS 379 Ultrasound Physics and Instrumentation (2)

Study of the basic physical principles and instrumentation of ultrasound production and imaging. Selected case-study presentations, as assigned.

RTMS 381, 382, 383, 384 Topics in Medical Sonography I-IV (1, 1, 2, 2)

Survey of selected topics in medical sonography. Procedure summaries, projects, literature reviews.

RTMS 385, 386 Topics in Medical Sonography V, VI (1-3, 1-3)

Selected projects that may be taken concurrently with RTMS 371-378 Medical Sonography I-VII for credit toward the B.S. degree.

RTMS 401, 402, 403, 404 Advanced Clinical Procedures I, II, III, IV (1-3, 1-3, 1-3, 1-3)

Credit for full-time, postcertification clinical practice in a medical sonography service. Periodic evaluations by the clinical supervisor.

RTNM 351, 352 Principles of Nuclear Medicine I, II (3, 3)

Radioactivity and its application in medicine. Atomic and nuclear structure, nuclear reactions, sources of radiation, modes of radioactive decay, dosage calculations, radiation hazards, biological effects, instrumentation, and basic measurements. Laboratory.

RTNM 353, 354 Nuclear Medicine Procedures I, II (2, 2)

Clinical applications of the principles discussed in RTNM 351, 352. Transmission and prevention of AIDS and other communicable diseases, with specific application to nuclear medicine. Laboratory.

RTNM 371, 372, 373, 374 Nuclear Medicine Affiliation I, II, III, IV (1, 1, 1, 1)

Clinical experience of twelve months (416 clock hours per term) covering a wide variety of technical procedures.

RTNM 381, 382, 383, 384 Topics in Nuclear Medicine I, II, III, IV (1-3, 1-3, 1-3, 1-3)

Survey of selected topics in nuclear medicine. Procedure summaries, projects, literature reviews. May be taken concurrently with RTNM 371-374 for credit toward the baccalaureate degree.

RTNM 401, 402, 403, 404 Advanced Clinical Procedures I, II, III, IV (3, 3, 3, 3)

Credit for full-time, postcertification clinical practice in a nuclear medicine service. Periodic evaluations by the clinical supervisor.

RTSI 367 Cross-sectional Radiographic Anatomy (3)

Overview of gross anatomy. Identification of normal anatomy in two-dimensional as well as three-dimensional planes. Relation of the structural as well as the physiological functions of the different body systems.

RTSI 368, 369 Special Imaging I, II (3, 3)

Part I: Basic principles, physics, imaging parameters, biological effects, management, and patient protocol of magnetic resonance imaging (MRI).

Part II: Basic principles, physics, imaging parameters, radiological effects, management, and patient protocol of computed tomography (CT).

RTSI 371, 372, 373 Special Imaging Affiliation I, II, III (1, 1, 1)

Clinical experience of nine months (three quarter terms of 520 clock hours per term) that provides a wide variety of experiences in computerized tomography (CT) and magnetic resonance imaging (MRI).

RTSI 381, 382, 383 Topics in Special Imaging I, II, III (1-3, 1-3, 1-3)

Survey of selected topics in special imaging. Procedure summaries, projects, literature reviews. May be taken concurrently with RTSI 371-373 for credit toward the baccalaureate degree.

RTSI 389 Special Project (1)

Project to be submitted in the form of a paper or a visual aid representing a topic of current interest in an area related to radiation sciences. Regular meetings to provide guidance to the student.

RTSI 391, 392, 393 Internships I, II, III (3, 3, 3)

Advanced clinical training for qualified CRT, ARRT-certified individuals, with current CPR and fluoroscopy permit. Training involves three quarters (nine months) of clinical time in the areas of cardiovascular/general angiography and interventional radiography. Full-time clinical learning experience involving forty hours per week.

RTSI 401, 402, 403, 404 Advanced Clinical Procedures I, II, III, IV (3, 3, 3, 3)

Credit for full-time, postcertification clinical practice in a radiology service. Periodic evaluations by the clinical supervisor.

RTTH 332 Radiation Biology (1)

Radiation's effects on living systems.

RTTH 342 Patient-Care Practices in Radiation Therapy (2)

Aspects of radiation therapy patient care. Emphasis on equipment, treatment, and psychological support of the patient. Transmission and prevention of AIDS and other communicable diseases, with specific application to radiation therapy.

RTTH 344 Radiation Therapy Procedures (2)

Study and/or practical applications of patient support and immobilization devices. Principles of choosing patient-treatment modalities. Methods of tumor localization. Purposes and utilization of beam direction and modification equipment.

RTTH 345 Quality Assurance in Radiation Therapy (1)

General aspects of continuous quality improvement (CQI) and specific aspects of quality management as they relate to the Department of Radiation Therapy. Examination of the comprehensive nature of a quality-management program, and quantification of the radiation therapist's role on the CQI team.

RTTH 348 Radiation Therapy Review (1)

Comprehensive review of radiation physics, protection, and dosimetry. Application of radioactive materials. Radiobiology. Technical aspects of radiation oncology.

RTTH 353 Psycho-Oncology (2)

Examination of potential psychological effects of malignant disease on the patient and family. The patient's emotional responses to the initial diagnosis, and methods of coping and adapting to the disease and its treatment. Role of the radiation therapist as a member of the patient's emotional-support team.

RTTH 355 Physical Principles of Radiation Therapy I (3)

Nature and description of the structure of matter and energy. Radioactive decay schemes and interaction of photons and gamma radiation. Instrumentation involved in measurement of ionizing radiation, beam quality, and dose. Laboratory.

RTTH 356 Physical Principles of Radiation Therapy II (3)

Calibration techniques of photon, particulate, and electron beams. Percentage depth dose, tissue-air ratios, treatment planning, scatter functions, field flatness, and symmetry. Field shaping, arc therapy, and tissue inhomogeneities. Clinical dosimetric considerations. Laboratory.

RTTH 357 Applied Dosimetry (2)

Brachytherapy sources, isotope calibration, protection, and implantation techniques. Teletherapy equipment and protection. Quality assurance for external and brachytherapy procedures. Laboratory.

RTTH 358 Advanced Dosimetry (3)

Develops student's ability to construct treatment plans using the 3-D planning system. Integrates theory with practice. Student completes a number of plans that utilize all major treatment techniques.

Prerequisite: RTTH 357 (or equivalent).

RTTH 364, 365 Radiation Oncology I, II (3, 3)

A two-term course covering pathology, etiology, epidemiology, histopathology, metastasis, staging, and treatment of major types of malignant neoplasms. Includes technique/simulation laboratory.

RTTH 371, 372, 373, 374 Radiation Therapy Affiliation I, II, III, IV (attendance credit) (1, 1, 1, 1)

Clinical experience of twelve months (520 clock hours per term) covering a wide variety of technical procedures.

RTTH 381, 382, 383, 384 Topics in Radiation Therapy I, II, III, IV (1-3, 1-3, 1-3, 1-3)

Survey of selected topics in radiation therapy. Procedure summaries, projects, literature reviews. May be taken concurrently with RTTH 371-374 for credit toward the baccalaureate degree.

RTTH 401, 402, 403, 404 Advanced Clinical Procedures I, II, III, IV (3, 3, 3, 3)

Credit for full-time, postcertification clinical practice in a radiation therapy service. Periodic evaluations by the clinical supervisor.

CONJOINT

See CONJOINT COURSES, section III General Information, for course descriptions.

COGNATE**DTCS 301 Human Nutrition (3)**

Fundamentals of normal nutrition. Carbohydrates, proteins, fats, vitamins, minerals; their roles in human metabolism. Introduction to nutrition in the life cycle. Per week: lecture 3 hours.

EMMC 314 Introduction to 12-Lead ECG Interpretation (1)

Development of basic ECG interpretation skills. Focus on anatomy and physiology, underlying pathophysiology, basic rhythm recognition, and overview of related treatments. Special emphasis on skills needed by bedside practitioner to differentiate between benign and life-threatening dysrhythmias.

EMMC 484 Legal Issues in Health Care (2)

Introduction to the legal system as it pertains to health care professionals. Concepts of malpractice, litigation, consent for and refusal of medical treatment, advanced directives, and patient confidentiality. Discussion of employment issues, including discrimination and sexual harassment. Development of health and safety programs per OSHA regulations, risk management, legal issues in vehicle operations and equipment, and EMS and law-enforcement interactions.

HPRO 443 Writing for Publication (2)

Writing by health professionals for popular, lay, or professional publications. Selection of journal or magazine, writing of query letter, preparation of abstract and manuscript in final form for submission. Includes preparation of camera-ready art. Not a remedial writing course.

RELE 457 Christian Ethics and Health Care (2)

Ethical issues in modern medicine and related fields from the perspective of Christian thought and practice.

SPEECH-LANGUAGE PATHOLOGY AND AUDIOLOGY

SPEECH-LANGUAGE PATHOLOGY—Certificate

SPEECH-LANGUAGE PATHOLOGY AND AUDIOLOGY—Bachelor of Science

KEIKO KHOO, Chair

FACULTY

Noha S. Daher
Keiko I. Khoo
Jean B. Lowry
Karen J. Mainess
Jan McFarland
Paige Shaughnessy
Susan Steffani

CLINICAL FACULTY

Melissa K. Backstrom-Gonzales
Juli A. Baer-Spiller
Marcia B. Hill
Yoomi S. Kim
Gary A. Lucas
David G. McGann

Speech-language pathologists are concerned with evaluating and treating children and adults with communication disorders. Difficulties in the areas of speech, language, fluency, and voice are associated with a variety of disorders, including developmental delay, hearing impairment, cleft palate, cerebral palsy, stroke, and head injury. Audiologists are concerned with prevention, identification, assessment, and rehabilitation of hearing disorders. For both professions, it is important that the student have an interest in working with people.

OPPORTUNITIES

Employment opportunities for speech-language pathologists and audiologists exist within speech and hearing clinics, public schools, hospitals, universities, health departments, skilled nursing facilities, home-health agencies, rehabilitation centers, industry, and private practice. These fields allow for considerable flexibility relative to personal interest within the profession. There is ample opportunity for employment.

GRADUATE PROGRAM

A program leading to the Master of Science degree in speech-language pathology is described in the BULLETIN of the Graduate School. An abridged list of Graduate School courses for this department is provided at the close of this section.

SPEECH-LANGUAGE PATHOLOGY—Certificate

Any individual with a bachelor's degree from an accredited institution is eligible for the certificate program. This program permits completion of undergraduate pre-requisites before entering the graduate program. The individual must have a bachelor's degree from an accredited institution with a G.P.A. of 3.0, and GRE scores will be required before admission to the graduate program. It is recommended that the applicant take the GRE before applying to the certificate program. Completion of the certificate program does not guarantee admission into the graduate program.

**PROGRAM OF INSTRUCTION
SPEECH-LANGUAGE PATHOLOGY—Certificate**

SPPA	201	Observation of Clinical Management in Speech Pathology	1
SPPA	277	Development of Speech and Language	4
SPPA	304	Hearing Science	4
SPPA	314	Language Science	3
SPPA	317	Acoustic, Physiological, and Transcription Phonetics	2
SPPA	318	Transcription Phonetics	3
SPPA	324	Language Disorders of Children	4
SPPA	334	Phonological and Articulation Disorders	4
SPPA	376	Anatomy of Speech-Hearing Mechanism	4
SPPA	377	Bilingualism and Biculturalism I	1
SPPA	424	Adult Language Pathology	4
SPPA	434	Disorders of Fluency	4
SPPA	444	Organic Speech Disorders	4
SPPA	454	Hearing Problems and Basic Audiometry	4
SPPA	485	Procedures and Materials in Speech-Language Pathology	3
SPPA	486	Diagnostic Methods in Speech-Language Pathology	4
SPPA	499	Independent Study: Voice Disorders	2

Students who plan to complete a Clinical Rehabilitative Services Credential-Language, Speech, and Hearing will need to take the following additional course:

PSYC	305	Psychological Foundations of Education	4
------	-----	--	---

Students who plan to complete the requirements for the Certificate of Clinical Competence from the American Speech-Language Hearing Association will need to have their undergraduate course work reviewed by the faculty adviser.

Honored to be in such a rewarding career, our full-time Speech-Language Pathology and Audiology Program staff and faculty exchange ideas and solutions during their weekly staff meeting. Standing are Jeanne Stoddard (department secretary), Kay Khoo (department chair), Susan Stefanni, and Yoomi Kim. Seated are Jean Lowry, Karen Mainess, and Paige Shaughnessy.

SPEECH-LANGUAGE PATHOLOGY AND AUDIOLOGY—Bachelor of Science

THE PROGRAM

The Speech-Language Pathology and Audiology Program, leading to the Bachelor of Science degree, begins with the Autumn Quarter of the junior year. The freshman and sophomore years, which are taken at an accredited college or university, afford the fundamentals of a liberal education. The emphasis in the junior and senior years is on professional courses and practical experience.

Clinical experience

Supervised clinical practicum is an integral part of the student's education. Completion of specific theoretical courses precedes placement for practicum.

Accreditation

The program is approved by the Educational Standards Board of the American Speech-Language-Hearing Association, 10801 Rockville Pike, Rockville MD 20852; 301/897-5700.

PREPARATION FOR CREDENTIAL

The Speech-Language Pathology and Audiology Program is approved by the Commission on Teacher Credentialing to prepare students for the California Clinical Rehabilitative Services Credential in Language, Speech, and Hearing. Requirements for this credential include the completion of specific academic and clinical work at the graduate level.

A student preparing for a career in California schools should consult the department regarding specific course and practicum requirements for this credential.

THE PROGRAM OBJECTIVES

Upon completion of the program, the graduate should be qualified to:

1. Demonstrate a basic knowledge of the human communication processes, including:
 - the anatomic and physiologic bases for the normal development and use of speech, language, and hearing;
 - the physical bases and processes of the production and perception of speech, language, and hearing;
 - the linguistic variables related to normal development of speech, language, and hearing;

2. Demonstrate a basic knowledge of the major types of human communication disorders.
3. Demonstrate ethical behavior in their personal and professional lives.
4. Demonstrate a commitment to the communicatively handicapped community and to the betterment of humankind.

and

5. Seek employment for positions that require a college degree or are indirectly related to speech-language pathology and audiology, or
6. Seek admission to a graduate program in speech-language pathology or audiology or related disciplines.

PROFESSIONAL REGISTRATION

In most states, including California, graduate study is required before entering the profession. After satisfactorily completing the Master of Science degree, the graduate is eligible to take the qualifying examination for licensure in the state of California and for the Certificate of Clinical Competence. After completing a one-year clinical fellowship, the individual is eligible to apply for licensure and for certification by the American Speech-Language-Hearing Association (ASHA).

STUDENT PROFESSIONAL ASSOCIATION

Students are eligible for membership in the National Student Speech-Language-Hearing Association. The student is encouraged to become a member, read the journals, and attend local meetings. The national office address is the National Student Speech-Language-Hearing Association, 10801 Rockville Pike, Rockville, MD 20852.

ADMISSION

To be eligible for admission, the applicant must have completed a minimum of 96 quarter units at an accredited college or university. The student completes (1) the General Education requirements and (2) the speech-language pathology and audiology core. Electives to meet the needs of the individual student are selected from existing courses after consultation with the department chair.

Prerequisites for Speech-Language Pathology and Audiology, B.S.

20 units minimum in humanities (choose a minimum of two areas from: history, literature, philosophy, foreign language, art/music appreciation/history)

Religion required, 4 units per year of attendance at a Seventh-day Adventist college or university

Human anatomy and physiology, complete sequence

Introductory physics, one quarter/semester (recommended)

Select a total of 12 quarter units natural sciences, including anatomy and physiology, and physics. Select from chemistry, geology, biology, physics, mathematics. (No more than 6 units may count toward one area.)

Two years high school mathematics with grades of C or above **or** intermediate algebra in college

General psychology

Cultural anthropology **or** an approved course dealing with cultural diversity

Human growth and development **or** developmental psychology

English composition, complete sequence

Speech

Personal health **or** nutrition

Two physical education courses

Electives to meet a minimum total requirement of 96 quarter units

For total unit requirements for graduation, see Division of General Studies, LLU GENERAL EDUCATION REQUIREMENTS (section V).

PROGRAM OF INSTRUCTION

**B.S. DEGREE IN SPEECH-LANGUAGE PATHOLOGY AND AUDIOLOGY—
CORE COURSES**

SPPA 201	Observation of Clinical Management in Speech Pathology	1
SPPA 217	Beginning Sign Language	3
SPPA 277	Development of Speech and Language	4
SPPA 284	Introduction to Speech-Language Pathology and Audiology	3
SPPA 304	Hearing Science	4
SPPA 314	Language Science	3
SPPA 317	Acoustic, Physiological, and Transcription Phonetics	2
SPPA 318	Transcription Phonetics	3
SPPA 324	Language Disorders of Children	4
SPPA 334	Phonological and Articulation Disorders	4
SPPA 376	Anatomy of Speech-Hearing Mechanism	4
SPPA 377	Bilingualism and Biculturalism I	2
SPPA 415	Intermediate Sign Language	2
AHCJ 305	HIV/AIDS and the Health Provider	1
AHCJ 328	Portfolio Practicum	1
AHCJ 351	Statistics for the Health Professions	3
AHCJ 461	Research Methods	2
AHCS 498	Portfolio Practicum II	1
PSYC 305	Psychological Foundations of Education	4
PSYC 404	Psychological Tests and Measurements	3
PSYC 460	The Exceptional Individual	3
ENGL 478	Theory and Application of Linguistics	4
PSYC 479	Human Neuropsychology	4

Select 23 units from:

SPPA 424	Adult Language Pathology	4
SPPA 434	Disorders of Fluency	4
SPPA 435	Voice Disorders	4
SPPA 444	Organic Speech Disorders	4
SPPA 454	Hearing Problems and Basic Audiometry	4
SPPA 467	Speech-Language Pathology and Audiology Practicum	1-4
SPPA 477	Bilingualism and Biculturalism II	2
SPPA 485	Procedures and Materials in Speech-Language Pathology	3
SPPA 486	Diagnostic Methods in Speech-Language Pathology	4

A minimum grade of C (2.0) is required for all courses in the program.

COURSES

For information about units of credit and course numbers, see the beginning of section III of this BULLETIN.

SPPA 201 Observation of Clinical Management in Speech Pathology (1-2)

Attendance at scheduled sessions to observe clinical management of the communicatively handicapped. May be repeated once for additional credit.

SPPA 216 Deaf Bicultural Bilingual Development (2)

Issues important to speech, language, and literacy development. Clinicianship that is sensitive to deaf culture.

SPPA 217 Beginning Sign Language (3)

Focus on learning American sign language (ASL) for conversational purposes. Students learn finger-spelling, acquire a sign vocabulary of approximately 500 words, and explain and demonstrate the basic grammatical rules of ASL. Opportunity provided to use ASL with native signers. Students discuss ASL in contrast to the various sign systems currently being used in educational settings in this country.

SPPA 277 Development of Speech and Language (4)

Normal speech and language development of children, including social dialects as well as standard English. Influencing physiological and environmental factors.

SPPA 284 Introduction to Speech-Language Pathology and Audiology (3)

Major types of disorders. Etiology and treatment. Survey course for students majoring in speech-language pathology and audiology, prospective teachers, and others who may encounter speech-language or hearing disorders in their professions.

SPPA 304 Hearing Science (4)

Introduction to basic theories and laboratory exercises in acoustics, psychoacoustics, and physiological acoustics.

SPPA 314 Language Science (3)

Introduction to techniques of linguistic analyses used in the study of phonology, morphology, syntax, and semantics.

SPPA 317 Acoustic, Physiological, and Transcription Phonetics (2)

Acoustic and physiological correlates of speech-sound production.

SPPA 318 Transcription Phonetics (3)

Development of transcription skills using the international phonetics alphabet.

SPPA 324 Language Disorders of Children (4)

Impairments of language development in children. Formal and informal assessment of children. Program planning and remediation procedures.

Prerequisite: SPPA 277.

SPPA 334 Phonological and Articulation Disorders (4)

Definition, classification, etiology, diagnosis, and treatment of phonological/articulation disorders.

Prerequisite: SPPA 318.

SPPA 376 Anatomy of Speech-Hearing Mechanism (4)
Anatomy and physiology of auditory-vocal communicative process.

SPPA 377 Bilingualism and Biculturalism I (2)

Explores the psycholinguistic views of bilingualism in childhood. Advantages of the dual linguistic systems for problem solving, and disadvantages due to the less-than-well-developed primary language. Introduces the applied linguistic views of adolescent and adult speakers of second languages, and discusses major methods currently used in facilitating balanced bilingualism.

SPPA 415 Intermediate Sign Language (2)

Further development of sign language skills, with emphasis on ASL grammar. Introduction to deaf culture and various perspectives on deafness or approaches to aural rehabilitation.

SPPA 424 Adult Language Pathology (4)

Impairment of language and speech related to organic neuropathology.

Prerequisite: SPPA 376.

SPPA 434 Disorders of Fluency (4)

Characteristics, theories of etiology, and principles of management of stuttering and other fluency disorders.

SPPA 435 Voice Disorders (4)

Definition, classification, etiology, diagnosis, and treatment of voice disorders. Pitch, intensity, quality, and resonance.

Prerequisite: SPPA 376.

SPPA 444 Organic Speech Disorders (4)

Introduction to the classification, cause, manifestations, assessment, and treatment of craniofacial disorders/cleft palate, tongue thrust, dysarthria, apraxia of speech, and dysphagia.

Prerequisite: SPPA 376.

SPPA 454 Hearing Problems and Basic Audiometry (4)

Anatomy and physiology of the auditory mechanism. Nature of the acoustic stimulus, disorders of the ear, problems of the hard-of-hearing. Pure-tone audiometry. Applicable toward California audiometric certification.

SPPA 467 Speech-Language Pathology and Audiology Practicum (1-4)

Supervised practice in diagnosis and therapy. Minimum of thirty clock hours required for each unit of credit.

Prerequisite: SPPA 324, 334, 485, 486.

SPPA 477 Bilingualism and Biculturalism II (2)

Addresses the clinical competencies and cultural sensitivity needed in dealing with bicultural and bilingual clients. Discusses the impact of such knowledge on assessment and intervention.

SPPA 485 Procedures and Materials in Speech-Language Pathology (3)

Principles and procedures of speech-language therapy within and across disorders. Methods of determining treatment effectiveness. Regulations governing public school services.

SPPA 486 Diagnostic Methods in Speech-Language Pathology (4)

Purpose for assessment. Procedures employed in describing and diagnosing speech-language impairments.

Prerequisite: SPPA 318, 324, 334.

SPPA 496 Workshops in Speech-Language Pathology and Audiology (1-4)

May be repeated with new content for additional credit.

SPPA 499 Speech-Language Pathology and Audiology Independent Study (1-2)

Project or paper to be submitted on a topic of current interest in an area related to speech-language pathology and audiology. Regular meetings to provide the student with guidance and evaluation. Elected on the basis of need or interest.

CONJOINT

See CONJOINT COURSES, section III General Information, for course descriptions.

COGNATE**ENGL 478 Theory and Application of Linguistics (4)**

Introduces general linguistics. Covers the core linguistic areas of syntax, phonetics, phonology, morphology, and semantics. Also peripheral linguistic areas such as sociolinguistics, pragmatics, and psycholinguistics.

PSYC 305 Psychological Foundations of Education (4)

Studies psychological development as it relates to the learning process and to evaluation techniques for learners in elementary and secondary schools.

Prerequisite: General psychology.

PSYC 404 Psychological Tests and Measurements (3)

Develops competencies and understandings for selecting, administering, and interpreting the major types of standardized tests and inventories used in psychology and education. Presents theoretical principles and issues together with hands-on applications. Practicum required.

PSYC 460 The Exceptional Individual (3)

Study of the determinants, characteristics, problems, and adjustments of individuals who deviate markedly from the norm in their mental, physical, emotional, or social aptitudes, traits, and tendencies. Emphasis on education and career planning. Open to upper-division undergraduate and postgraduate students only.

PSYC 479 Human Neuropsychology (4)

Introduction to brain-behavior relationships, including cerebral asymmetry, disconnection syndromes, disorders of memory and language, biological substrates of affective behavior, motor and perceptual dysfunction, and drug actions.

GRADUATE

The program leading to the Master of Science degree in speech-language pathology and its descriptions for the following courses are provided in the BULLETIN of the Graduate School.

SPPA 523 Early Childhood Language Disorders (3)**SPPA 525 Preschool and School-age Children's Language Disorders (3)****SPPA 535 Voice Disorders (3)****SPPA 544 Cleft Palate (3)****SPPA 554 Swallowing Disorders (3)****SPPA 564 Aural Rehabilitation and Hearing Aids (3)****SPPA 567 Clinical Practice in Speech-Language Pathology and Audiology, Advanced (1-6)****SPPA 568 Clinical Practice in Speech-Language Diagnostics (1-3)****SPPA 575 Instrumentation in Speech and Hearing (1)****SPPA 576 Instrumentation in Communication Disorders (4)****SPPA 577 Applied Psycholinguistics (3)****SPPA 585 Professional Aspects of Speech-Language Pathology and Audiology (2)****SPPA 586 Advanced Diagnostics in Speech-Language Pathology (3)****SPPA 587 Counseling in Communication Disorders (3)****SPPA 588 Directed Teaching in Speech-Language Pathology (3-6)****SPPA 596 Workshop in Speech-Language Pathology / Audiology (1-4)****SPPA 598 Research Methods and Professional Literature (3)****SPPA 679 Seminar: Motor-Speech Disorders / and Augmentation (3)****SPPA 682 Seminar: Traumatic Brain Injury (3)****SPPA 684 Seminar: Adult Language Disorders (3)****SPPA 685 Seminar: Stuttering (3)****SPPA 687 Seminar: Open Seminar (2-3)****SPPA 688 Seminar: Articulation (3)****SPPA 697 Research (2-4)**

IV

FACULTY OF RELIGION

Mission Statement

Courses

Faculty of Religion

MISSION STATEMENT

The Faculty of Religion is committed to the following four tasks as informed by the teachings and practice of the Seventh-day Adventist heritage and mission:

1. To promote Christian wholeness for faculty and students in their personal and professional lives and witness.
2. To provide a religion curriculum with the following emphases:
 - Foundational Studies (biblical, theological, mission, and historical).
 - Ethical Studies (personal, professional, and social).
 - Relational Studies (applied theology, clinical ministry, and psychology of religion).
3. To foster and support research in the foundational, ethical, and relational disciplines.
4. To serve the University, the church, and the larger world community by personal involvement in fostering deeper spirituality, theological integrity, and social justice.

COURSES

FOUNDATIONAL STUDIES

BIBLICAL STUDIES

RELF 404 New Testament Writings (2-3)

Interpretation of selected letters and passages of the New Testament, with a view to their theological and practical significance for today.

Additional project required for third unit.

RELF 419 Gospel of John (2-3)

Key passages and themes in John, with an exploration of its message for today.

Additional project required for third unit.

RELF 424 Hebrew Prophets (2-3)

Selected books, passages, and themes in the writings of the Old Testament prophets, with an exploration of their theological and practical significance for today.

Additional project required for third unit.

RELF 426 Mission and Message of Jesus (2-3)

Study of the healing ministry and redemptive message of Jesus, with application to health professionals.

Additional project required for third unit.

RELF 428 Gospel of Mark (2-3)

Key passages and themes in Mark, with an exploration of its message for today.

Additional project required for third unit.

RELF 429 Gospel of Luke (2-3)

Key passages and themes in Luke, with an exploration of its message for today.

Additional project required for third unit.

RELF 439 Gospel of Matthew (2-3)

Key passages and themes in Matthew, with an exploration of its message for today.

Additional project required for third unit.

RELF 464 Paul's Letter to the Romans (2-3)

Chapter-by-chapter interpretation of Paul's most influential letter, in which the good news of God's salvation is applied to the issues of Christian life and community.

Additional project required for third unit.

RELF 468 Daniel (2-3)

Nature, purpose, and message of the apocalyptic book of Daniel.

Additional project required for third unit.

RELF 469 Revelation (2-3)

Nature, purpose, and message of the apocalyptic book of Revelation.

Additional project required for third unit.

RELF 474 Love and Sex in Biblical Teaching (2-3)

Study of Scripture on the reality, nature, and challenges of love, both divine and human; and of key biblical passages on the goodness, meaning, and distortions of human sexuality.

Additional project required for third unit.

RELF 475 Spirituality and the Contemporary Christian (2-3)

Exploration of the meaning of spirituality in the light of Scripture and Christian thought, and study of practices and disciplines that form and mature an individual's spiritual life.

Additional project required for third unit.

RELF 476 The Bible and Ethics (2-3)

Ways in which the Bible and ethics are related. Major ethical themes in biblical teaching.

Additional project required for third unit.

RELF 499 Directed Study (1-3)

Prerequisite: Consent of instructor.

RELF 558 Old Testament Thought (3-4)

Introduction to the literature and key theological themes of the Old Testament.

Additional project required for fourth unit.

RELF 559 New Testament Thought (3-4)

Introduction to the literature and key theological themes of the New Testament.

Additional project required for fourth unit.

RELF 699 Directed Study (1-6)

Prerequisite: Consent of instructor.

THEOLOGICAL STUDIES

RELF 406 Adventist Beliefs and Life (2-3)

Fundamental tenets of Seventh-day Adventist faith and the lifestyle that such faith engenders.

Additional project required for third unit.

RELF 415 Philosophy of Religion (2-3)

Philosophical study of religion, including the nature and function of religious language, evidence for the existence of God, the problem of evil, and religious diversity.

Additional project required for third unit.

RELF 416 God and Human Suffering (2-3)

Suffering and evil in relation to the creative and redemptive purposes of God for this world.

Additional project required for third unit.

RELF 417 Christian Beliefs and Life (2-3)

Introduction to what is basic to Christianity, in terms of beliefs and lifestyle.

Additional project required for third unit.

RELF 437 Current Issues in Adventism (2-3)

Selected theological, ethical, and organizational questions of current interest in Adventism, with the goal of preparation for active involvement in the life of the Seventh-day Adventist church. Recommended for students with a Seventh-day Adventist background.

Additional project required for third unit.

RELF 538 Doctrine of Humanity (3-4)

The Christian understanding of the nature and destiny of human beings.

Additional project required for fourth unit.

RELF 539 Doctrine of God (3-4)

Study of the nature and attributes of God, the trinitarian concept of God, and God's relation to the temporal world.

Additional project required for fourth unit.

RELF 557 Theology of Human Suffering (3-4)

Suffering and evil in relation to the creative and redemptive purposes of God for this world. Focus on formation of student's theology of human suffering.

Additional project required for fourth unit.

RELF 604 Seminar in Religion and Science (3-4)

Research seminar in the relation between religion and science.

Prerequisite: Consent of instructor.

RELF 615 Seminar in Philosophy of Religion (3-4)

Examination of the concept of God, arguments for the existence of God, the relationship of faith and reason, and the nature of religious language.

Additional project required for fourth unit.

MISSION STUDIES

RELF 440 World Religions (2-3)

Survey of the origins, beliefs, and contemporary practices of the world's major religious systems. Attention to the interaction between specific religions and their cultures and to similarities, differences, and potential for understanding among the religions.

Additional project required for third unit.

RELF 444 Christian Mission (2-3)

Biblical theology applied to defining the concerns, structures, and methods of Christian mission. Concept of the Church, the definition of missionary, and the priorities of mission.

Additional project required for third unit.

RELF 447 Crosscultural Ministry (2-3)

Study of the challenges of serving crosscultural situations from a Christian mission perspective, using the insights of missiology and cultural anthropology as they relate to personal and professional growth, social change, and effective intercultural communication and service.

Additional project required for third unit.

RELF 534 Anthropology of Mission (3-4)

Study of Christian mission, applying the findings of anthropology as they relate to cultural change. Processes of religious development, means of diffusion, factors affecting religious acculturation, and analysis of programs intended to effect changes in religion.

Additional project required for fourth unit.

HISTORICAL STUDIES

RELF 407 Comparative Religious Experience (2-3)

Examination of the religious experience held by adherents of various Christian confessions.

Additional project required for third unit.

RELF 423 Loma Linda Perspectives (2-3)

History and philosophy of Loma Linda University as a Christian health-sciences institution that fosters human wholeness.

Additional project required for third unit.

RELF 425 Contemporary Religious Issues (2-3)

Analysis of prominent topics in religion discussed in contemporary journals.

Additional project required for third unit.

RELF 436 Adventist Heritage and Health (2-3)

Origin and development of Seventh-day Adventist interest in health, from the background of nineteenth-century medicine and health reform to the present.

Additional project required for third unit.

RELF 555 Adventist Experience (3-4)

Introduction to the beliefs and values that shape the Seventh-day Adventist community.

Additional project required for fourth unit.

ETHICAL STUDIES

RELE 448 Christian Business Ethics (2-3)

Christian and other perspectives on ethical issues in business, and their pertinence to health care delivery and administration.

Additional project required for third unit.

RELE 455 Christian Understanding of Sexuality (2-3)

Interpretations of human sexuality in ancient, medieval, and modern Christian thought, with emphasis on contemporary issues such as marriage, divorce, homosexuality, and artificial human procreation.

Additional project required for third unit.

RELE 456 Personal and Professional Ethics (2-3)

Introductory exploration of the foundations, norms, and patterns of personal integrity in professional contexts.

Additional project required for third unit.

RELE 457 Christian Ethics and Health Care (2-3)

Ethical issues in modern medicine and related fields from the perspective of Christian thought and practice.

Additional project required for third unit.

RELE 458 Ethical Issues in Health Care (2-3)

Discussions of ethical issues in modern medicine and related fields. (For off-campus program only.)

Additional project required for third unit.

RELE 499 Directed Study (1-3)

Prerequisite: Consent of instructor.

RELE 505 Clinical Ethics (3)

In-depth, case-based analysis of bioethics, with emphasis on clinical applications. Background conceptual and historical readings orient students to the issues highlighted by classic cases in bioethics.

RELE 522 Bioethical Issues in Social Work (3-4)

Theoretical and practical dilemmas in contemporary biomedical ethics. Emphasis on the distinctive contributions social workers can make to the identification, clarification, and resolution of these dilemmas.

Additional project required for fourth unit.

RELE 524 Christian Bioethics (3-4)

Advanced analysis of ethical issues and options in medicine and related fields. Contributions of Christian thought and life. Topics selected in part by student priorities.

Additional project required for fourth unit.

RELE 525 Ethics for Scientists (3-4)

Ethical presuppositions and obligations of scientific research, particularly in the physical and biological sciences. Identification, clarification and resolution of ethical issues in scientific research, with emphasis on Christian contributions.

Additional project required for fourth unit.

RELE 534 Ethical Issues in Public Health (3-4)

Theoretical and practical appraisals of the ethical issues and alternatives encountered by public health administrators, educators, and investigators.

Additional project required for fourth unit.

RELE 548 Christian Social Ethics (3-4)

Implications of Christian belief for selected problems in social ethical theory and practice.

Additional project required for fourth unit.

RELE 554 Clinical Intensive in Biomedical Ethics I (4)

Theories and applications of clinical biomedical ethics.

RELE 555 Clinical Intensive in Biomedical Ethics II (4)

Theories and applications of clinical biomedical ethics.

Prerequisite: RELE 554.

RELE 577 Theological Ethics (3-4)

Primary theological legacies of Western culture. Relationships between doctrinal formulations and interpretations of health and healing; possible contribution of each legacy to contemporary therapeutic endeavors.

Additional project required for fourth unit.

RELE 588 Philosophical Ethics (3-4)

Critical analysis of the basic theories propounded in Western philosophical ethics. Study of writings of major ethical theorists, including Plato, Aristotle, Kant, and Mill. Philosophical ethics compared with Christian faith.

Additional project required for fourth unit.

RELE 589 Biblical Ethics (3-4)

Exploration of the nature of biblical ethics and the contribution which the Bible makes to ethical reflection and action.

Additional project required for fourth unit.

RELE 624 Seminar in Christian Ethics (3-4)

Advanced study of selected topics in Christian ethics.

Prerequisite: Consent of instructor.

RELE 699 Directed Study (1-6)

Prerequisite: Consent of instructor.

RELATIONAL STUDIES**APPLIED THEOLOGY****RELR 404 Christian Service (1-2)**

Participation in approved service learning with written reflection on the Christian reasons for service.

Additional project required for second unit.

RELR 448 Leadership in the Church and Community (2-3)

Theology and practice of lay church involvement and leadership by health care professionals.

Additional project required for third unit.

RELR 528 Christian Citizenship and Leadership (3-4)

Christian principles for fostering healthy communities and transforming the institutions of society. Study will include the function of religion in society and the significance of Christian faith for public leadership and social policies.

Additional project required for fourth unit.

RELR 565 Introduction to Pastoral Theology (3-4)

Study of the biblical, theological, and historical foundations for the practice of ministry.

Additional project required for fourth unit.

RELR 567 Introduction to Pastoral Counseling (3-4)

Overview of theology, history, theory, and practice of pastoral counseling.

Additional project required for fourth unit.

RELR 574 Introduction to Preaching (3-4)

Exploration of the theology, content, and practice of Christian proclamation, with emphasis on the development of basic skills for the preparation and delivery of biblical messages in a variety of settings.

Additional project required for fourth unit.

CLINICAL MINISTRY**RELR 398 Practicum in Integrative Health Care (2)**

Practical study of knowledge, values, attitudes, and skills contributing to student's personal growth and to healing of the patient. Special attention to personal wholeness, including physical, mental, relational, and spiritual dimensions.

For off-campus program only.

RELR 409 Christian Perspectives on Death and Dying (2-3)

From a Christian perspective, consideration of the meaning of death, including: the process of dying, cultural issues regarding death and dying, grief and mourning, suicide, and other related issues.

Additional project required for third unit.

RELR 427 Crisis Counseling (2-3)

Crisis phenomena, current crisis theory, a Christian model of crisis care, and the dynamics and practices of crisis care.

Additional project required for third unit.

RELR 475 Art of Integrative Care (2-3)

Principles, concepts, and practices that affect the ministry of health care and the Christian witness in the clinical setting.

Additional project required for third unit.

RELR 524 Clinical Pastoral Education (6-12)

Twelve-week course including supervised experience with patients, lectures by hospital staff, hospital rounds with physicians, seminars and conferences. Five eight-hour days per week. [Limited enrollment. Credit earned in this course is recognized by the Association for Clinical Pastoral Education, Incorporated.]

RELR 525 Health Care and the Dynamics of Christian Leadership (3-4)

Focus on the components of leadership principles in the practice of health care. Exploration of the imperative of moral leadership in the community, administrative, and clinical setting.

Additional project required for fourth unit.

RELR 527 Crisis Counseling (3-4)

Crisis phenomena, current crisis theory, a Christian model of crisis care, and the dynamics and practices of crisis care.

Additional project required for fourth unit.

RELR 568 Care of the Dying and Bereaved (3-4)

Study of the biblical, theological, cultural, relational and psychological aspects of dying and death.

Additional project required for fourth unit.

RELR 575 Art of Integrative Care (3-4)

Examination of the attitudes and actions of the health care professional relative to personal spirituality and patient witnessing.

Additional project required for fourth unit.

RELR 694 Seminar in Clinical Ministry (3-4)

Principles and practice of effective interaction with patients, parishioners, inmates, and other populations.

Additional project required for fourth unit.

PSYCHOLOGY OF RELIGION**RELR 408 Christian Perspectives on Marriage and the Family (2-3)**

From a Christian perspective, an overview of the family lifecycle.

Additional project required for third unit.

RELR 415 Christian Theology and Popular Psychology (2-3)

From a Christian perspective, exploration of the psychological principles, concepts, and practices apparent in popular American culture; and their effect on the general public.

Additional project required for third unit.

RELR 429 Cultural Issues in Religion (2-3)

Study of similarities and differences between European–American culture and “minority” cultures in America, and the differences pertaining to the way religion is perceived and practiced.

Additional project required for third unit.

RELR 499 Directed Study (1-3)

Prerequisite: Consent of instructor.

RELR 535 Spirituality and Mental Health (3-4)

Explores interrelationship between spirituality and mental health. Seeks to enhance understanding of the term spirituality—and of its therapeutic effects—within the context of religious traditions.

Additional project required for third unit.

RELR 564 Religion, Marriage, and the Family (3-4)

The family in theological, historical, and ethical perspectives, with a Christian assessment of contemporary theories regarding the family.

Additional project required for fourth unit.

RELR 584 Culture, Psychology, and Religion (3-4)

Introduction to the major contours of Western culture as they relate to various schools of psychological thought and the influence of religious beliefs.

Additional project required for fourth unit.

RELR 585 Psychological Study of Religion (3-4)

Psychological research of religion from an eclectic approach. Faith development, ethnographic varieties of religious experiences, narrative analysis, and crosscultural religious experiences.

Additional project required for fourth unit.

RELR 586 Psychology of Moral and Faith Development (3-4)

Study of logical, moral, and faith reasoning from a cognitive–developmental perspective. How cultural and religious norms affect moral thinking.

Additional project required for fourth unit.

RELR 699 Directed Study (1-6)

Prerequisite: Consent of instructor.

GENERAL RELIGIOUS STUDIES**RELG 504 Research Methods (2-4)**

Examination of the presuppositions and procedures for graduate research in religious studies. Use of libraries and research centers. Ways and means of preparing and presenting term papers, theses, and scholarly articles.

Additional project required for fourth unit.

RELG 674 Reading Tutorial (3-4)

Reading course for graduate students in religious studies. Topics vary depending on student and instructor interests.

Additional project required for fourth unit.

Prerequisite: Consent of instructor.

RELG 695 Clinical Internship (400 clock hours)

Supervised clinical internship. At least one hour of individual supervision per week and a final evaluation from the supervisor at the completion of 400 hours of clinical internship.

Prerequisite: Consent of instructor and of student's adviser.

RELG 696 Project (1-4)

Prerequisite: Consent of instructor and of student's adviser.

RELG 697 Independent Research (1-8)

Prerequisite: Consent of instructor and of student's adviser.

RELG 698 Thesis (1-4)

Prerequisite: Consent of instructor and of student's adviser.

DIVISION OF GENERAL STUDIES

LLU Philosophy of General Education

Criteria for LLU General Education Course

LLU General Education Requirements

LLU General Education Courses Booklet

General Education Courses Offered by the School

Division of General Studies

The Division of General Studies, directed by the dean of the Graduate School, coordinates the offering of courses that apply to the Bachelor of Science degree programs in the Graduate School and in the Schools of Nursing, Dentistry, Allied Health Professions, and Public Health. These courses contribute to the fulfillment of General Education requirements.

LOMA LINDA UNIVERSITY PHILOSOPHY OF GENERAL EDUCATION

As a Seventh-day Adventist health-sciences institution, Loma Linda University seeks to exemplify a life of service and sensitivity beyond the requirements of academic excellence within a professional discipline. With its rich spiritual heritage, the University places special emphasis on educating its students for a life of service in a global community.

General education at Loma Linda University is therefore unique. In addition to the basics of cultural heritage and diversity, scientific inquiry and analysis, communication, and wellness, the curriculum emphasizes the University's spiritual heritage as well as moral and ethical decision-making that is grounded in Christian principles. Thus, general education is considered to be the cornerstone upon which students begin cultivating their abilities to:

1. Understand the fundamental Christian principles and Adventist heritage that undergird Loma Linda University.
2. Make informed moral and ethical decisions.
3. Incorporate critical thinking skills into personal and professional experience.
4. Value individuals with diverse capabilities and ideological, ethnic, gender, and generational perspectives.
5. Communicate effectively.
6. Undertake scientific inquiry and analysis.
7. Appreciate the contributions of the arts and humanities to society.
8. Examine the historical basis of the health sciences professions.
9. Develop self-awareness through balance of mental, physical, social, and spiritual aspects of daily living.
10. Model servant-leadership in health care as exemplified by Jesus of Nazareth.

The Loma Linda University philosophy of general education creates a unique learning environment committed to the concept of human wholeness. Faculty are selected who embrace the spirit as well as the specifics of general education and who purpose to extend its goals into all aspects of university life—from the residence hall programs to the core of professional studies—thus adding an invisible curriculum to the required course offerings. It is

this spirit in tandem with the specifics of a liberal arts education that inspires students to achieve academic excellence, value diversity, pursue lifelong learning, and live to bless others.

CRITERIA FOR LLU GENERAL EDUCATION COURSE

1. The course assists the health-sciences student in cultivating abilities in one or more of the ten aspects described in the Loma Linda University Philosophy of General Education for B.S. degrees.
2. The primary focus of the course deals with the knowledge and understanding of a subject area within one of the following domains described in the Loma Linda University General Education requirements for B.S. degrees.
3. The course contributes to relevant knowledge and understanding within one of the domains described in the Loma Linda University General Education requirements, expected of a health sciences B.S. graduate entering today's society.
4. The course reflects an area of content within the domains described in the Loma Linda University General Education requirements that is global to the health-sciences professions and is open to all appropriately prepared B.S. degree students of Loma Linda University for General Education credit.
5. The course is based on appropriate prerequisites, particularly when offered at the upper-division level.
6. Courses transferred to Loma Linda University for General Education credit from another accredited institution must fall within one of the domains described in this University's General Education requirements for the B.S. degree and/or must ordinarily be approved for such credit at the other institution.

LLU GENERAL EDUCATION REQUIREMENTS (68 QUARTER CREDITS)

In harmony with its commitment to wholeness, Loma Linda University requires all students graduating with a baccalaureate degree to complete a minimum of 68 quarter credits of general education, which are integrated into the entire undergraduate program. Requirements are organized into five domains, as outlined in the following pages.

DOMAIN 1: SPIRITUAL AND CULTURAL HERITAGE (28-32 quarter credits)

Study of spiritual heritage must include a minimum of 4 credits in religious studies per year of full-time course work (or the equivalent) while attending a Seventh-day Adventist college or university and must include a religion course dealing with the spiritual heritage of the philosophy and mission of Loma Linda University. Four of the units in religious studies may include a course dealing specifically with the religious, moral, and ethical questions of health care. Other courses may be selected from such content areas as Christian ethics; clinical ministry; comparative religions; and doctrinal, historical, and systematic theology. Required credits in spiritual heritage must be earned from the Seventh-day Adventist institution.

The study of cultural heritage must include a minimum of 12 credits. The credits in cultural heritage must be selected from two of the following areas: civilization/history, fine arts, literature, modern language, performing/ visual arts (not to exceed 2 quarter credits), or philosophy.

DOMAIN 2: SCIENTIFIC INQUIRY AND ANALYSIS (24-32 quarter credits)

Scientific inquiry and analysis encompasses both the natural and social sciences. Content areas from which students must choose 12-16 credits within the natural sciences include biology, chemistry, geology, mathematics, physics, and statistics. No more than 6 credits in any one area may count toward the natural sciences requirements.

The study of social sciences must include one course (or components integrated into several courses) dealing specifically with issues of human diversity among peers. The remainder of credits in the social sciences must be selected from the following content areas: anthropology, economics, geography, political science, psychology, and sociology.

DOMAIN 3: COMMUNICATION (9-13 quarter credits)

Course work in communication must include a complete sequence in freshman English which meets the baccalaureate degree requirements of a four-year college or university. Other areas of study in communication may include courses in computer information systems, critical thinking, and public speaking.

DOMAIN 4: HEALTH AND WELLNESS (2-6 quarter credits)

To encourage the pursuit of lifelong leisure activities and wellness, the study of health and wellness must include at least two different physical activities totaling a minimum of 1 quarter credit, and one course in personal health or nutrition. Additional credits may include other areas of health, nutrition, and physical fitness.

DOMAIN 5: ELECTIVES

Electives from the previous four domains may be selected to complete the General Education minimum requirements of 68 quarter credits.

LLU GENERAL EDUCATION COURSES BOOKLET

A complete listing of courses offered at this University to meet General Education domain requirements is included in the *Loma Linda University General Education Philosophy, Requirements, and Courses* 12-page booklet. For access to the booklet and its description of each General Education course, the student should consult his/her academic adviser.

GENERAL EDUCATION COURSES OFFERED BY THE SCHOOL

DOMAIN 2: SCIENTIFIC INQUIRY AND ANALYSIS (24-32 quarter credits) NATURAL SCIENCES

AHCJ 235, 235L Essentials of Human Anatomy and Physiology, Lecture and Laboratory (4, 1)

Study of the structure and function of the human body, including organ systems. Lectures and demonstration laboratory. (Prerequisite to many certificate and associate degree programs, e.g., coding specialist/certificate, occupational therapy assistant/A.A.).

AHCJ 240 Microbiology (4)

Designed for students in the health sciences. History, classification, morphology, growth, control, transmission, and pathology of selected bacteria, viruses, fungi, rickettsia, and parasites. Host defenses against microbial pathogens, including specific and nonspecific immunity. Lecture, 30 hours; laboratory, 30 hours. Course covers two quarters.

AHCJ 250, 251 Anatomy and Physiology (4, 4)

An 8-unit course (4 units Winter Quarter plus 4 units Spring Quarter) which covers structure and function of human biology. For students entering two- and four-year health professional programs such as physical therapy, occupational therapy, cardiopulmonary sciences, speech-language pathology and audiology, radiation technology, nursing, and other programs with an anatomy and physiology prerequisite.

AHCJ 318 Physiology I (4)

Physiology of the human body, including cellular, neuromuscular, cardiovascular, respiratory, gastrointestinal, renal, and endocrine physiology.

AHCJ 319 Physiology II (3)

Detailed study of neuromuscular physiology.

AHCJ 351 Statistics for the Health Professions (3)

Fundamental procedures in collecting, summarizing, analyzing, presenting, and interpreting data. Measures of central tendency and variation, probability, binomial and normal distribution, hypothesis testing and confidence intervals, t-tests, chi-square, correlation, and regression. Introduction to SPSS statistical package for computer data analysis.

AHCJ 402 Pathology I (4)

Fundamental mechanisms of disease, including cell injury; inflammation; repair, regeneration, and fibrosis; vascular, cardiac, respiratory, gastrointestinal, hepatobiliary, urinary, reproductive, endocrine, and integumentary pathologies.

AHCJ 403 Pathology II (3-4)

Fundamental mechanisms of disease, including the central and peripheral nervous systems, bone and joint, skeletal muscle, developmental, genetic, infectious, and parasitic pathologies; neoplasia. Additional unit requires two autopsy viewings and written report.

Prerequisite: AHCJ 306.

AHCJ 461 Research Methods (2-3)

Introduction to the scientific method of research. Focus on the major steps of the research process as these steps relate to research report evaluation, proposal writing, literature review, development of conceptual framework, identification of variables, statement of hypotheses, research design, and analysis and presentation of data.

Prerequisite: AHCJ 351.

SOCIAL SCIENCES**AHCJ 305 HIV/AIDS and the Health Provider (1)**

Current issues on HIV/AIDS, with special emphasis on the epidemiology and etiology of the disease. Psychosocial, economic, ethical, and legal concerns. Education for prevention and impact on the health care worker. Resources available. Risk factors and precautions for blood-borne pathogens, HIV, hepatitis, and tuberculosis.

AHCJ 324 Psychosocial Models and Interventions (2)

Orientation to the major models in psychology and how they relate to medical care. Development of a psychological model for interpretation of needs of the person in crisis. Understanding the roles of psychiatrists, psychologists, social workers, and family therapists. Suicide intervention. Critical-incident debriefing. Support factors in providing temporary, adequate psychological care for all involved in medical crisis.

AHCJ 328 Portfolio Practicum I (1)

Introduction to the goals for a graduate of Loma Linda University. Students demonstrate progression towards effective communication, teamwork, support of diversity, ethical behavior, appreciation of human worth, balanced work-rest-leisure within a spiritual atmosphere, and commitment to long-term personal and professional growth.

AHCJ 407 Financial Management (2)

Financial aspects of health care involving prospective reimbursement system, analysis of various health-care reimbursement schemes, and hospital financial disbursements. Budget variance analysis, analysis of cost components, operating statements, and productivity related to a department budget. Special projects may be assigned as needed.

AHCJ 408 Health Care Management (4)

Management theory: planning, organizing, directing, and controlling (including budgetary controls). Department productivity and theories of work simplification. Preparation of resumes, interviewing skills, professional attitudes, group theory, and group dynamics. Students spend the last two to three weeks doing special projects designed and supervised by their departments. (Department of Nutrition and Dietetics students register for a 2-unit practicum in conjunction with this course.)

AHCJ 415 Educational Psychology for Health Professionals (3)

Psychological factors relating to learning processes in professional and higher education. Emphasis on the role of communication skills in learning settings, gender influences on learning, objective setting and course design, stimulating higher level thinking, motivation, and retention.

Prerequisite: AHCJ 409.

AHCJ 421 Psychology of Physical Disability (2)

Psychological reactions to illness or disability. Methods of dealing with these reactions considered with reference to the clinical situation. Seminar approach to professional responsibilities for health care.

AHCJ 498 Portfolio Practicum II (1)

Continued progress towards the goals for a Loma Linda University graduate.

1 unit: Development of portfolio that illustrates the potential graduate's ability to meet the goals set by SAHP for graduates of baccalaureate and master's degree programs.

2 units: Requires a research abstract. Course covers three quarters (AU, WN, SP). IP grade will carry through each quarter until completion of third quarter, at which time grade is issued.

**DOMAIN 3: COMMUNICATION
(9-13 quarter credits)****AHCJ 308 Professional Communications (1-2)**

Forms of written and verbal communication routinely required in the performance of the health care-manager's duties. Projects include memos, letters, confidential FAX cover design, short reports, meeting notices, minutes, and creation of an agenda.

AHCJ 311 Medical Terminology (1-2)

Language of medicine, including word construction, definitions, and the use of terms related to medical science. Course organized by body systems.

1 unit: includes four body systems with weekly quizzes and a final comprehensive examination.

2 units: includes six body systems with evaluation in the form of homework, weekly quizzes, and midterm and final examinations.

AHCJ 331 Personnel Management (3)

Theory and practice of the management of people at work. Organizational behavior concepts and the problems of employee procurement, training, and motivation. Job evaluation, wage administration, employee benefits, and negotiating with labor unions. Preparation both for managing people and directing a department in a complex organization.

AHCJ 405 Dynamics of Learning and Teaching (1-3)

2 units: Examination of the theories of learning applied to teaching process. Includes evaluation of current research and methods of instruction.

3 units: Includes requirements for 2 units plus a refereed research paper.

AHCJ 409 Adult Learning Styles (3)

Theories and styles of learning, personality factors relating to learning, implications of effective intellectual, emotional, and social functioning included within the context of structuring education for the adult learner. Analysis of the teaching process from setting of objectives, selection of content, and design of classroom and clinical teaching strategies, with emphasis on alternatives to lecturing.

AHCJ 426 Introduction to Computer Applications (1-3)

Hands-on instruction in Word, Excel, and PowerPoint. Lectures, laboratory, assignments, quizzes, projects, and a written and practical examination. Required number of units determined by challenge test given by instructor.

3 units: Students taking course for third unit required to do an additional project.

AHCJ 431 Database Management I (3)

Introduction to database management concepts, with emphasis on medical information. Microsoft Excel used as a flat database. Data management and presentation using the sorting, reporting, and charting functions of Excel.

Prerequisite: Introductory computer course.

AHCJ 432 Database Management II (2)

Theories and steps of database development using Microsoft Access. Topics include but are not limited to relationships, form building, advanced queries, reporting, and macros. Required project creating a basic medical-information database from scratch.

Prerequisite: AHCJ 431 or consent of instructor.

AHCJ 433 Special Projects in Computer Applications (2)

Computer systems and applications designed to the specific professional needs and interests of the student. Emphasizes use of databases with health care data and on-systems design, as needed.

Prerequisite: AHCJ 431, 432.

AHCJ 464 Group Process and Dynamics (3)

Introduction to principles and techniques of group theories, processes, and dynamics, as applied to the health professional setting. Concepts include group functions, roles, structures, and characteristics; group membership, norms, dynamics, and relations. Theoretical perspectives on group development, dynamics, and conflicts. Practical issues, including educational applications, negotiation, observation, and diagnosis. Leadership issues, facilitation, expedition, and termination. Simulation exercises, active learning, and flexible choices of study and application.

AHCJ 465 Seminars in Leadership (2)

Seminar in contemporary leadership topics designed to prepare graduates for entry into the new work requirements. Through observation and participation, students explore the responsibility of the employee of today for successful integration into customer and community service and social responsibility.

DOMAIN 4: HEALTH AND WELLNESS (2-6 quarter credits)**AHCJ 458 Stress in Health Professional Education (3)**

Evaluates effects of stress on individuals, families, students, and health professionals in the educational setting. Analyzes biopsychological foundations, social systems, technological influences, life-development factors, and unique aspects of health professional education. Explores coping strategies, i.e., nutrition, exercise, humor, time management and organization, cognitive therapies, relaxation, and imagery.

DTCS 301 Human Nutrition (3)

Fundamentals of normal nutrition. Carbohydrates, proteins, fats, vitamins, minerals; their roles in human metabolism. Introduction to nutrition in the life cycle. Per week: lecture 3 hours.

DTCS 311 Human and Clinical Nutrition for Nursing (4)

Fundamentals of normal nutrition. Carbohydrates, proteins, fats, vitamins, minerals; their roles in human metabolism. Investigating the role of nutrition at various stages in the life cycle of the individual in health and disease. Nutrition intervention in the prevention and treatment of disease in the clinical setting.

DTCS 312 Clinical Nutrition for Nursing (2)

Nutrition intervention in the prevention and treatment of disease in the clinical setting.

We want you to be part of the smiling, friendly faces you will see around Nichol Hall!

 Terri Rouse, B.S., Recruitment Coordinator

NUTRITION AND DIETETICS

Bert C. Connell, Ph.D., Department Chair and Program Director; Bachelor of Science, Nutrition and Dietetics; Certificate, Dietetics
Kenneth I. Burke, Ph.D., Associate Chair
Georgia W. Hodgkin, Ed.D., Program Director; Dietetic Technology
Maxine Taylor, M.S., Academic Coordinator of Clinical Education; Nutrition and Dietetics Program
Elaine K Fleming, MPH, Associate Professor, Nutrition and Dietetics
Cindy Kosch, M.S., R.D., Assistant Professor, Nutrition and Dietetics
Joni J. Pagenkemper, M.S., R.D., Assistant Professor, Nutrition and Dietetics; Certificate Coordinator
Crystal G. Whitten, M.S., R.D., Assistant Professor, Nutrition and Dietetics

OCCUPATIONAL THERAPY

Liane H. Hewitt, M.P.H., Department Chair; Program Director, Associate in Arts, Occupational Therapy Assistant; Program Director, Post-Professional Master of Occupational Therapy
Esther Huecker, M.A., OTR, BCP, Program Director, Entry-Level Master of Occupational Therapy
Ruth N. Jeffries, B.S., Academic Coordinator for Fieldwork Education, Occupational Therapy Assistant Program
Judith A. Palladino, M.A., Academic Coordinator for Fieldwork Education, Occupational Therapy Program
Terese R. Pfeiffer B.S., Program Coordinator; Distance Learning, Fresno

PHYSICAL THERAPY

Edd J. Ashley, Ed.D., Department Chair and Program Director; Post-Professional Master of Physical Therapy and Doctor of Physical Therapy Science
Howard W. Sulzle, Ed.D., Associate Department Chair
Lawrence E. Chinnock, Ed.D., Program Director; Entry-Level Master of Physical Therapy and Entry-Level Doctor of Physical Therapy Science
Everett Lohman III, D.P.T.Sc., Program Director; Progression Master of Physical Therapy
Jeannine Stuart-Mendes, M.P.T., Academic Coordinator for Clinical Education; Entry-Level Master of Physical Therapy and Entry-Level Doctor of Physical Therapy Programs
Antonio Valenzuela, Ed.D., Academic Coordinator for Clinical Education; Progression Master of Physical Therapy
Desmyrna R. Taylor, M.P.T., Program Director; Associate in Science, Physical Therapist Assistant
Carol J. Appleton, M.P.H., Academic Coordinator for Clinical Education; Physical Therapist Assistant Program

RADIATION TECHNOLOGY

Arthur W. Kroetz, Ph.D., Department Chair and Program Director; Certificate, Nuclear Medicine Technology
Mark J. Clements, M.A., Associate Department Chair and Program Director; Associate in Science, Radiation Technology
Laura Alipoon, Ed.S., Program Director; Bachelor of Science, Radiation Sciences
Steven L. Leber, B.S., Program Director; Certificate, Special Imaging
Marie M. DeLange, B.S., Program Director; Certificate, Diagnostic Medical Sonography
Carol A. Davis, M.A., Program Director; Certificate, Radiation Therapy Technology
Gregory E. Watkins, M.D., Medical Adviser; Medical Radiography Program
Glenn A. Rouse, M.D., Medical Director; Medical Sonography Program
_____, Medical Director; Nuclear Medicine Technology Program
James M. Slater, M.D., Medical Director; Radiation Therapy Technology Program

SPEECH-LANGUAGE PATHOLOGY AND AUDIOLOGY

Keiko Khoo, M.A. M.S., Department Chair
Jean B. Lowry, Program Director; Master of Science, Bachelor of Science, and Certificate, Speech Language Pathology and Audiology
Yoomi Kim, Academic Coordinator for Clinical Education, Speech-Language Pathology and Audiology Program

THE FACULTY**Full-time Faculty**

- LAURA L. ALIPOON, Assistant Professor of Radiation Technology
Ed.D. La Sierra University 2001
- RUEL A. ALIPOON, Instructor in Cardiopulmonary Sciences
A.S. East Los Angeles College 1976
- DONNA MIDORI ANZAI, Assistant Professor of Occupational Therapy
M.B.A. California State University, San Bernardino 1988
- CAROL J. APPLETON, Assistant Professor of Physical Therapy
M.P.H. Loma Linda University PH 1974
- LYNN MURPHEY ARRATEIG, Assistant Professor of Occupational Therapy
M.A. Loma Linda University SE 1988
- EDD JAN ASHLEY, Professor of Physical Therapy
Ed.D. Boston University 1972
- L. CHRISTINE BILLOCK, Assistant Professor of Occupational Therapy
M.A. University of Southern California 1998
- GLEN BLIX, Professor of Cardiopulmonary Sciences
Dr.P.H. Loma Linda University PH 1987
- KENRICK C. BOURNE, Assistant Professor of Cardiopulmonary Sciences
Dr.P.H. Loma Linda University PH 1987
- KENNETH IBER BURKE, Professor of Nutrition and Dietetics
Ph.D. Florida State University 1973
- KENNETH A. CANTOS, Assistant Professor of Pathology and Human Anatomy SM
M.D. Loma Linda University SM 1993
- LAWRENCE EDWIN CHINNOCK, Associate Professor of Physical Therapy
Ed.D. La Sierra University 1996
- KENT CHOW, Instructor in Allied Health Professions
M.B.A. Claremont Graduate School 1995
- MARK JAN CLEMENTS, Assistant Professor of Radiation Technology
M.A. University of Colorado 1970
- BERTRUM CLAUDE CONNELL, Professor of Nutrition and Dietetics
Ph.D. University of Missouri, Columbia 1981
- NOHA SALIM DAHER, Assistant Professor of Research and Statistics
M.S.P.H. Loma Linda University PH 1992
- MARILYN HOPKINS DAVIDIAN, Assistant Professor of Health Information Management
M.A. Claremont Graduate School 1996
- KATHERINE G. DAVIS, Instructor in Clinical Laboratory Science
B.S. Loma Linda University AH 1973
- NICCETA DAVIS, Assistant Professor of Physical Therapy
Ph.D. American University 1999
- DOROTHY I. DONESKY, Instructor in Cardiopulmonary Sciences
M.P.H. Loma Linda University PH 1994
- INTITHAR S. ELIAS, Instructor in the Office of the Dean
M.S. Loma Linda University GS 1979
- ELAINE KUESTER FLEMING, Assistant Professor of Nutrition and Dietetics
M.P.H. Loma Linda University PH 1975
- BONNIE J. FORRESTER, Assistant Professor of Physical Therapy
M.S. Loma Linda University GS 1989
- STEVEN M. GREEN, Assistant Professor of Cardiopulmonary Sciences
M.D. University of California, San Diego 1985
- DEBRA L. HAMADA, Instructor in Health Information Management
B.S. College of Saint Scholastica 1984
- DARRYL GORDON HEUSTIS, Associate Professor of Clinical Laboratory Science
M.D. Loma Linda University SM 1973
- LIANE HINAZUMI HEWITT, Assistant Professor of Occupational Therapy
M.P.H. Loma Linda University PH 1985
- GEORGIA WILLEY HODGKIN, Associate Professor of Nutrition and Dietetics
Ed.D. La Sierra University 1991
- JOYCE WILSON HOPP, Dean; Distinguished Professor of Health Education
Ph.D. University of Southern California 1974
- ESTHER MOLDER HUECKER, Assistant Professor of Occupational Therapy
M.A. University of Southern California 1993
- SUSAN MATTOON HUFFAKER, Assistant Professor of Physical Therapy
M.P.T. Loma Linda University AH 1996
- W. WILLIAM HUGHES, Professor of Basic Sciences
Ph.D. Loma Linda University GS 1978
- RUTH JEFFRIES, Instructor in Occupational Therapy
B.S. Loma Linda University AH 1983
- ERIC GLENN JOHNSON, Assistant Professor of Physical Therapy
M.P.T. Loma Linda University AH 1992
- ANNE MARIE KERI, Instructor in Clinical Laboratory Science
B.S. Loma Linda University AH 1987
- KEIKO INADA KHOO, Associate Professor of Speech-Language Pathology and Audiology
M.S. Loma Linda University GS 1979
M.A. University of California, Los Angeles 1987
- RENATE KRAUSE, Assistant Professor of Health Education
Ph.D. University of Alberta 1991
- ARTHUR WILLIAM KROETZ, Assistant Professor of Radiation Technology
Ph.D. University of Southern California 1999
- GLEN R. KUCK, Assistant Professor of Cardiopulmonary Sciences
M.S. University of Southern California 1999

- STEVEN L. LEBER, Instructor in Radiation Technology
B.S. Loma Linda University AH 1985
- EVERETT B. LOHMAN III, Assistant Professor of
Physical Therapy
D.P.T.Sc. Loma Linda University AH 1998
- DAVID LOPEZ, Assistant Professor of Cardiopulmonary
Sciences
M.A. La Sierra University 1997
- JEAN BOYD LOWRY, Professor of Speech-Language
Pathology and Audiology
Ph.D. Kent State University 1973
- JEAN EILEEN MAKI, Associate Professor of Speech-
Language Pathology and Audiology
Ph.D. Michigan State University 1975
- KAREN J. MAINESS, Assistant Professor of Speech-
Language Pathology
M.S. Loma Linda University GS 1986
- CYNTHIA SLATER MALINOWSKI, Assistant Professor
of Evaluation and Portfolio
M.A. Loma Linda University SE 1990
- ARTHUR BOHDAN MARSHAK, Instructor in
Cardiopulmonary Sciences
M.S. University of Southern California 2000
- HELEN HOPP MARSHAK, Associate Professor of
Physical Therapy
Ph.D. University of Washington 1991
- BRADFORD D. MARTIN, Associate Professor of Physical
Therapy
Ph.D. Loma Linda University GS 1984
- JAN MCFARLAND, Instructor in Speech-Language
Pathology and Audiology
M.S. Loma Linda University GS 1995
- DIANA S. MEDAL, Instructor in Health Information
Management
B.S. Loma Linda University AH 1993
- SONIA P. NEIDIGH, Instructor in Cardiopulmonary
Sciences
M.S. Walla Walla College 1997
- RICHARD D. NELSON, Assistant Clinical Professor of
Cardiopulmonary Sciences
M.D. 1995
- EHREN NGO, Instructor in Cardiopulmonary Sciences,
M.S. University of Maryland 1999
- JONI JENSEN PAGENKEMPER, Assistant Professor of
Nutrition and Dietetics
M.S. Texas Women's University 1988
- MARLENE O. OTA, Assistant Professor of
Cytotechnology
B.S. University of Redlands 1981
- JUDITH A. PALLADINO, Assistant Professor of
Occupational Therapy
M.A. California State University, Long Beach 1984
- KAREN MILLARD PENDLETON, Assistant Professor of
Occupational Therapy
M.A. La Sierra University 1997
- AFSANEH KAZEMI PETROFSKY, Clinical Instructor in
Physical Therapy
B.S. California State University, Long Beach 1991
- JERROLD S. PETROFSKY, Professor of Physical
Therapy
Ph.D. St. Louis University 1974
- TERESE R. PFEIFFER, Instructor in Occupational
Therapy
B.S. Pacific Union College 1983
- RONALD M. REA, Assistant Professor of Physical
Therapy
M.P.T. Loma Linda University AH 1994
- TERRI ROUSE, Clinical Instructor in
Health Information Management
B.S. Loma Linda University AH 1994
- GAIL T. RICE, Professor of Physical Therapy
Ed.D. Loma Linda University SE 1983
- ERNEST R. SCHWAB, Associate Professor of Physical
Therapy
Ph.D. Loma Linda University GS 1989
- FRANK SIRNA, Clinical Instructor in Cardiopulmonary
Sciences
B.S. Medical College of Georgia 1986
- PAIGE SHAUGHNESSY, Assistant Professor of Speech-
Language Pathology and Audiology
Ph.D. University of Utah 1985
- CHARLES BUD SPEARMAN, Assistant Professor of
Cardiopulmonary Sciences
M.S.Ed. University of Southern California 1994
- DAVID MORGAN STANTON, Assistant Professor of
Cardiopulmonary Sciences
M.S. Loma Linda University GS 1991
- SUSAN STEFFANI, Associate Professor of Speech-
Language Pathology and Audiology
Ph.D. University of Oregon 1992
- JEANNINE STUART-MENDES, Assistant Professor of
Physical Therapy
M.P.T. Loma Linda University AH 1995
- HOWARD WINSTON SULZLE, Assistant Professor of
Physical Therapy
Ed.D. La Sierra University 1995
- MEL D. SUNDEAN, Assistant Professor of
Cardiopulmonary Sciences
M.B.A. California State University, San Bernardino
1991
- JAMES MICHAEL SYMS, Assistant Professor of Physical
Therapy
M.P.T. Loma Linda University AH 1995
- DESMYRNA R. TAYLOR, Assistant Professor of Physical
Therapy
M.P.T. Loma Linda University AH 1995
- MAXINE J. TAYLOR, Assistant Professor of Nutrition
and Dietetics
M.S. Case Western Reserve University 1972
- DONNA GREGORY THORPE, Assistant Professor of
Physical Therapy
M.P.H. Loma Linda University PH 1992
- ANTONIO VALENZUELA, Assistant Professor of
Physical Therapy
Ed.D. Loma Linda University SE 1990
- ARDIS E. WAZDATSKEY, Assistant Professor of
Research and Statistics
M.A. La Sierra University 1998
- CRYSTAL G. WHITTEN, Assistant Professor of Nutrition
and Dietetics
M.S. Loma Linda University GS 1988

ROBERT LEROY WILKINS, Professor of
Cardiopulmonary Sciences
Ph.D. University of Southern California 1996

MARILYN WRIGHT, Assistant Professor of Occupational
Therapy
M.P.H. Loma Linda University PH 1991

GRENITH J. ZIMMERMAN, Professor of Biostatistics
Ph.D. University of Minnesota 1970

Part-time Faculty

ROBERT S. BLADES, Clinical Instructor in Health
Information Management
M.B.A. Widner University 1977

JAMES A. BRANDT, Instructor in Clinical Laboratory
Science
M.S. Loma Linda University 1982

GAIL A. BRENNAN-POLVOORDE, Assistant Professor
of Physical Therapy
M.P.T. University of Southern California 1989

DAVID DEAN CHRISTENSON, Instructor in
Cardiopulmonary Sciences
A.S.. Loma Linda University AS 1979

GARY A. COLEMAN, Instructor in Physical Therapy
M.O.M.T. Ola Grimsby Institute 1993

CAROL A. DAVIS, Clinical Instructor in Radiation
Technology
B.A. California State University, San Bernardino 1995

MARIE MUNGO DELANGE, Clinical Instructor in
Radiation Technology
B.S. University of Redlands 1988

ELIZABETH J. DICKINSON, Associate Professor of
Cardiopulmonary Sciences
M.P.H. Loma Linda University PH 1993

MONIQUE K. GILBERT, Instructor in Clinical
Laboratory Science
B.S. Loma Linda University AH 1989

JOSEPH GODGES, Assistant Professor of Physical
Therapy
M.P.T. Baylor University 1981

SALLY PALANOS GREENBECK, Assistant Professor of
Clinical Laboratory Science
M.P.H. Loma Linda University PH 1996

JENNIFER L. GUERRERO, Instructor in Health
Information Management
B.S. Loma Linda University 1997

BENNY HAU, Assistant Professor of Cardiopulmonary
Sciences
M.D. Loma Linda University SM 1991

RONALD H. HILLOCK, Associate Professor of Clinical
Laboratory Science
Ph.D. University of Alabama 1972

BARBARA S. HOLSHOUSER, Instructor in Radiation
Technology
Ph.D. Loma Linda University GS 1983

YOOMI SHOU KIM, Assistant Professor of Speech-
Language Pathology and Audiology
M.S. Loma Linda University GS 1995

CINDY KOSCH, Assistant Professor of Nutrition and
Dietetics
M.S. Loma Linda University GS 1986

JOHN E. LEWIS, Professor of Pathology and Human
Anatomy SM
Ph.D. University GS 1969

THOMAS PAUL MALINOWSKI, Instructor in
Cardiopulmonary Sciences
B.S. Loma Linda University AH 1980

THUAN H. NGUYEN, Instructor in Clinical Laboratory
Science
M.P.H. Loma Linda University PH 1975

SHARON PAVLOVICH, Instructor in Occupational
Therapy
A. A. Loma Linda University AH 1992

DAVENA D. PETERS, Clinical Instructor in
Occupational Therapy
A.A. Loma Linda University AH 1990

RODNEY M. ROATH, Instructor in Clinical Laboratory
Science
M.B.A. California State University, San Bernardino
1991

WILLIAM ESMOND WALTHALL, Assistant Professor of
Physical Therapy
M.Div. Biola University 1983

MELANIE A. WESTBERG, Instructor in Physical
Therapy
M.P.H. Loma Linda University PH 1992

STEPHEN WILLIAM ZECHER, Assistant Professor of
Physical Therapy
M.P.T. Loma Linda University AH 1995

Clinical/Voluntary/Adjunct Faculty

CAROLINE ROSS ADAME, Clinical Instructor in
Nutrition and Dietetics
M.S. Loma Linda University GS 1975

RITA C. AGUILAR, Clinical Instructor in Nutrition and
Dietetics
M.P.H. Loma Linda University PH 1981

MOHAMMED R. AL FAGIH, Instructor in
Cardiopulmonary Sciences
M.B., Ch.B. Baghdad Medical College 1971

JENNIFER E. ANDERSON, Clinical Instructor in
Cardiopulmonary Sciences
A.S. Victor Valley College 1985

SHARON POTTER ANDERSON, Associate Professor of
Physical Therapy
Dr.P.H. Loma Linda University PH 1995

STEVEN ERIC ANDERSON, Assistant Professor of
Health Administration
M.B.A. Tarleton State University 1990

CRAIG E. AUSTIN, Clinical Instructor in Clinical
Laboratory Science
B.S. Loma Linda University AH 1983

MELISSA KATHERINE BACKSTROM-GONZALES
Clinical Instructor in Speech-Language
Pathology and Audiology
M.S. University of Redlands 1987

- JAMES ROBERT BAER, Clinical Instructor in Radiation Technology
M.D. Temple University School of Medicine 1996
- JULI ANN BAER-SPILLER, Clinical Instructor in Speech-Language Pathology and Audiology
M.S. University of Redlands 1976
- CAROL S. BAKER, Assistant Clinical Professor of Nutrition and Dietetics
M.S. Loma Linda University GS 1984
- SUSAN BAKER, Assistant Professor of Physical Therapy
D.P.T.Sc. Loma Linda University AH 1999
- DOUGLAS H. BARR, Clinical Instructor in Clinical Laboratory Science
M.S. California State University, Dominguez Hills 1980
- ARDIS S. BECKNER, Instructor in Nutrition and Dietetics
M.S. Loma Linda University GS 1963
- JACQUELINE BELL, Clinical Instructor in Physical Therapy
M.P.T. Loma Linda University AH 1998
B.S. Mount St. Mary's College 1985
- LEE STANLEY BERK, Associate Clinical Professor of Clinical Laboratory Science
Dr.P.H. Loma Linda University PH 1981
- AMY BOLIN, Clinical Instructor in Health Information Management
B.S. Loma Linda University AH 1997
- MARY D. BOOTH, Clinical Instructor in Nutrition and Dietetics
B.A. San Diego State 1970
- SUSAN HUTCHERSON BRESSLER, Clinical Instructor in Clinical Laboratory Science
B.S. Loma Linda University AH 1979
- DENNIS K. BROWN, Adjunct Clinical Instructor in Cardiopulmonary Sciences
B.A. Massey University, New Zealand 1992
- LINDA S. BUCKERT, Clinical Instructor in Clinical Laboratory Science
B.S. University of Illinois 1980
- AUREA BURGOS, Clinical Instructor in Nutrition and Dietetics
B.S. Puerto Rico University 1955
A.S. Victor Valley College 1995
- MARGIE I. CARSON, Clinical Instructor in Nutrition and Dietetics
B.S. Western Michigan University
- MARIA CARRILLO CASTILLO, Clinical Instructor in Clinical Laboratory Science
B.S. Texas Women's University 1970
- SANDRA M. CEGIELSKI, Clinical Instructor in Cardiopulmonary Sciences
A.S. Victor Valley Community College 1989
- JEFFERY GEORGE CHAMBERS, Clinical Instructor in Clinical Laboratory Science
M.B.A. California State University, San Bernardino 1989
- ANDY CHEUNG, Clinical Instructor in Clinical Laboratory Science
M.A. Central Michigan University 1975
- ANDREW CHIA, Clinical Instructor in Clinical Laboratory Science
B.S. Union College 1984
- MEI LEE CHIU, Instructor in Physical Therapy
B.S. Loma Linda University AH 1984
- JERE EUGENE CHRISPENS, Assistant Clinical Professor of Health Information Management
M.A. University of California, Los Angeles 1966
- SHERYL L. CLEMONS, Clinical Instructor in Occupational Therapy
B.S. Loma Linda University AH 1988
- LOUIS J. COTA, Clinical Instructor in Clinical Laboratory Science
B.S. California State University, Dominguez Hills 1981
- NILSA VALLES CRUZ, Clinical Instructor in Nutrition and Dietetics
M.S. Loma Linda University GS 1984
- LAURA L. DARNELL, Clinical Instructor in Nutrition and Dietetics
M.S. University of Nebraska 1971
- CAROL A. DAVIS, Clinical Instructor in Radiation Therapy
M.A. Loma Linda University GS 1997
- MICHAEL K. DAVIS, Clinical Instructor in Occupational Therapy Assistant
M.B.A. University of Redlands 1997
- LORI G. DEVOE, Clinical Instructor in Occupational Therapy
M.S. San Jose State University 1990
- BARBARA BRISTOW DICKINSON, Clinical Instructor in Nutrition and Dietetics
M.S. Loma Linda University GS 1982
- ELIZABETH J. DICKINSON, Associate Professor of Cardiopulmonary Sciences
M.P.H. Loma Linda University PH 1993
- GERALD A. ELLIS, Clinical Instructor in Cardiopulmonary Sciences
M.B.A. University of LaVerne 1990
- LAURENCE ALAN FEENSTRA, Clinical Instructor in Cardiopulmonary Sciences
B.S. California State University, San Bernardino 1974
- VIRGILIA PAGALA FERNANDEZ, Clinical Instructor in Clinical Laboratory Science
B.S. Manila Central University, Philippines 1968
- LINDA FERRY, Professor of Cardiopulmonary Sciences
M.D. Loma University SM 1979
- JEANETTE STOCKETT FISCHER, Clinical Instructor in Occupational Therapy
M.A. Webster College 1981
- LORRAINE WHEATON FISHER, Clinical Instructor in Nutrition and Dietetics
M.S. Loma Linda University GS 1983

- DEXTER FREDERICK, Instructor in Cardiopulmonary Sciences
M.D. Loma Linda University SM 1997
- DANETTA FROST, Clinical Instructor in Nutrition and Dietetics
B.S. Loma Linda University AH 1966
- HENRY GARCIA, Instructor in Physical Therapy
A.S. Loma Linda University AH 1990
- CONSTANCE L. GARRETT, Clinical Instructor in Nutrition and Dietetics
M.S. Case Western Reserve University 1974
- DOTTIE GIBSON, Clinical Instructor in Nutrition and Dietetics
B.S. Pacific Union College 1966
- JOEL C. GILLMORE, Clinical Instructor in Clinical Laboratory Science
B.S. Cal Poly Pomona 1969
- ALEIDA E. GORDON, Clinical Instructor in Nutrition and Dietetics
M.B.A. University of Redlands 1992
- LUELLA M. GRANGAARD, Clinical Instructor in Occupational Therapy
M.S. University of Puget Sound 1983
- JEFF GRANGE, Assistant Professor of Cardiopulmonary Sciences
M.D. Loma Linda University SM 1994
- LINACEL V. GUTIERREZ, Clinical Instructor in Clinical Laboratory Science
B.S. Loma Linda University AH 1997
- BRYAN L. HADDOCK, Assistant Professor of Physical Therapy
Dr.P.H. Loma Linda University PH 1997
- DEBRA L. HAMADA, Instructor in Health Information Management
B.S. College of St. Scholastica 1984
- DIANE S. HARDY, Instructor in Occupational Therapy
B.S. Loma Linda University 1979
- KENNETH HARTMAN, Clinical Instructor in Clinical Laboratory Science
B.S. Cal Poly Pomona 1976
- RUBY SHIROMA HAYASAKA, Clinical Instructor in Nutrition and Dietetics
M.A. University of Redlands 1987
- SONDRA D. HENDERSON, Clinical Instructor in Nutrition and Dietetics
M.P.H. Loma Linda University PH 1981
- RONALD A. HERSHEY, Emeritus Associate Professor of Physical Therapy
M.A. University of Southern California 1962
- MARCIA B. HILL, Instructor in Speech-Language Pathology and Audiology
M.A. Western Michigan University 1984
- MELISSA HINGULA, Clinical Instructor in Health Information Management
A.S. Cypress College 1987
- PATRICIA AIKO HOKAMA, Clinical Instructor in Physical Therapy
B.S. Loma Linda University AH 1969
- BRENDA SUE HOLDEN, Clinical Instructor in Radiation Technology
M.B.A. University of Redlands 1989
- JULIETTE KAPUA HOLLANDS, Clinical Instructor in Clinical Laboratory Science
B.S. California State University, Pomona 1984
- JOYCE HOOPAI, Clinical Instructor in Occupational Therapy
B.S. Loma Linda University AH 1975
- NORMA HUCKABY, Clinical Instructor in Physical Therapy
B.S. Loma Linda University AH 1980
- MARY ANN HUGHES, Clinical Instructor in Clinical Laboratory Science
M.S. University of California, Riverside 1967
- DYHALMA IRIZARRY, Adjunct Professor of Occupational Therapy
Ph.D. Pennsylvania State University 1990
- RICHARD A. JACOBS, Clinical Instructor in Nutrition and Dietetics
Ph.D. University of Michigan 1971
- LEOTA JANZEN, Instructor in Physical Therapy
B.S. Loma Linda University AH 1954
- CHRISTINE JAYNES-EDDOW, Clinical Instructor in Physical Therapy
M.P.T. University of Southern California
- BONNIE G. JOHNSON, Clinical Instructor in Occupational Therapy
B.S. University of North Dakota 1963
- RONALD SCOTT JOHNSON, Clinical Instructor in Clinical Laboratory Science
B.S. University of California, Riverside 1981
- JOHN WILLIAM KERR, JR., Assistant Clinical Professor of Occupational Therapy
B.S. Loma Linda University AH 1971
- JAMES D. KETTERING, Professor of Clinical Laboratory Science
Ph.D. Loma Linda University GS 1974
- TONIA A. KIMBER, Clinical Instructor in Occupational Therapy
B.S. Loma Linda University AH 1992
- HELEN J. KING, Clinical Instructor in Radiation Technology
A.S. El Camino College 1967
- R. NADINE KNIGHT, Instructor in Cardiopulmonary Sciences
B.S. Loma Linda University AH 1995
- MERRILL L. H. KING, Clinical Instructor in Nutrition and Dietetics
M.P.H. Loma Linda University PH 1996
- SONIA D. LAING, Clinical Instructor in Clinical Laboratory Science
M.S. California State University, Long Beach 1991
- DOROTHY LAJOM, Clinical Instructor in Clinical Laboratory Science
B.S. University of Santo Tomas, Manila 1970
- LEO M. LANGGA, Clinical Instructor in Cardiopulmonary Sciences
B.S. Loma Linda University AH 1988

- KEVIN D. LARSON, Clinical Instructor in Physical Therapy
M.P.T. Loma Linda University AH 1993
- TUYHOA THI LE, Clinical Instructor in Clinical Laboratory Science
B.S. Philippine University College, Philippines 1971
- EVONNE J. LEISKE, Clinical Instructor in Nutrition and Dietetics
B.S. Pacific Union College 1970
- SUSAN LEWIS, Clinical Instructor in Nutrition and Dietetics
M.P.H. Loma Linda University PH 1983
- PHILLIP LIANG, Clinical Instructor in Clinical Laboratory Science
M.B.A. University of Redlands 1994
- BETTY LICHIARDO, Clinical Instructor in Nutrition and Dietetics
M.P.H. Loma Linda University 1991
- RAY LIN, Clinical Instructor in Radiation Technology

ACCREDITATION STATUS

THE UNIVERSITY

Founded as College of Evangelists 1905-06. Chartered as College of Medical Evangelists by the state of California December 13, 1909. Accredited by Northwest Association of Secondary and Higher Schools April 7, 1937. Accredited by Western Association of Schools and Colleges (prior to January 1962, Western College Association) February 24, 1960. Became Loma Linda University July 1, 1961. Professional curricula started and approved as indicated.

THE GRADUATE SCHOOL: Started in 1954. Accredited through University accreditation.

THE PROFESSIONS

CLINICAL LABORATORY SCIENCE (FORMERLY: MEDICAL TECHNOLOGY): Started in 1937. Approved by the Council on Medical Education of the American Medical Association since August 28, 1937. Currently approved by the Commission on Accreditation of Allied Health Education Programs in collaboration with the National Accrediting Agency for Clinical Laboratory Sciences.

CYTOTECHNOLOGY: Started in 1982. Initial approval by the Commission on Accreditation of Allied Health Education Programs in collaboration with the Cytotechnology Programs Review Committee January 20, 1983.

DENTAL HYGIENE: Started in 1959. Approved by the Commission on Dental Accreditation of the American Dental Association since September 7, 1961.

DENTISTRY: Started in 1953. Approved by the Commission on Dental Accreditation of the American Dental Association since May 23, 1957.

DIAGNOSTIC MEDICAL SONOGRAPHY: Started in 1976 as diagnostic medical sonography. Approved by the Joint Review Committee on Education in Diagnostic Medical Sonography October 24, 1985.

DIETETIC TECHNOLOGY: Started in 1988. The Dietetics Technology Program is currently granted accreditation by the Commission on Accreditation for Dietetics Education of the American Dietetics Association April 25, 1988.

EMERGENCY MEDICAL CARE: Started in 1993 as a baccalaureate degree program for paramedics, respiratory therapists, and other allied health professionals desiring education, science, or management credentials in emergency medical services.

ENDODONTICS: Started in 1967. Approved by the Commission on Dental Accreditation of the American Dental Association since December 1969.

HEALTH INFORMATION MANAGEMENT: Started as medical record administration in 1963. Approved by the Council on Medical Education of the American Medical Association since December 1, 1963. Currently approved by the Commission on Accreditation of Allied Health Education Programs in collaboration with the American Health Information Management Association.

MEDICAL RADIOGRAPHY: Started in 1941 as radiological technology. Approved by the Council on Medical Education of the American Medical Association November 19, 1944. Currently approved by the Joint Review Committee on Education in Radiologic Technology and the state of California Department of Health Services.

MEDICINE: Started in 1909. Approved by the Association of American Medical Colleges and the Council on Medical Education of the American Medical Association since November 16, 1922.

NURSING: Hospital school started at Loma Linda in 1905. Hospital school added at Los Angeles in 1924. Degree school organized in 1948. Accredited by the National Nursing Accrediting Service December 10, 1951, with approval continuing under the National League for Nursing. Initial 1917 approval of the California State Board of Health extended until college program approved July 1, 1952, by the California Board of Registered Nursing. California Board of Registered Nursing approval since 1952. Public health nursing preparation recognized, 1959.

NUTRITION AND DIETETICS: Started in 1922 as a certificate program; baccalaureate degree conferred 1932-54; graduate program offered since 1954. Internship program continuously approved by The American Dietetic Association from 1957 through 1974; reestablishment of baccalaureate degree program authorized October 1971. Since 1974 the Coordinated Program in Dietetics has been granted accreditation by the Commission on Accreditation for Dietetics Education of the American Dietetics Association.

OCCUPATIONAL THERAPY: Started in 1959. Initial approval by the Council on Medical Education of the American Medical Association June 10, 1960. Full approval March 30, 1962. Currently approved by the Accreditation Council for Occupational Therapy Education.

OCCUPATIONAL THERAPY ASSISTANT: Started in 1988. Approved by the Commission on Accreditation of Allied Health Education Programs in collaboration with The American Occupational Therapy Association (AOTA) April 13, 1989. Currently accredited by the Accreditation Council for Occupational Therapy Education of the AOTA.

ORAL AND MAXILLOFACIAL SURGERY: Started in 1978. Approved by the Commission on Dental Accreditation of the American Dental Association since 1981.

ORTHODONTICS AND DENTOFACIAL ORTHOPEDICS: Started in 1960. Approved by the Commission on Dental Accreditation of the American Dental Association since May 1965.

PEDIATRIC DENTISTRY: Started in 1993. Approved by the Commission on Dental Accreditation of the American Dental Association since December 1972.

PERIODONTICS: Started in 1979. Approved by the Commission on Dental Accreditation of the American Dental Association since December 1972.

PHLEBOTOMY: Started in 1994. Accredited/approved April 1997 by the California Department of Health, Laboratory Field Services; and by the National

Accrediting Agency for Clinical Laboratory Science (NAACLS).

PHYSICAL THERAPIST ASSISTANT: Started in 1989. Approved by the American Physical Therapy Association April 4, 1990.

PHYSICAL THERAPY: Started in 1941. Initial approval by the Council on Medical Education of the American Medical Association June 6, 1942. Currently approved by the American Physical Therapy Association.

PHYSICIAN ASSISTANT: Started in 2000. Provisional Accreditation granted October 20, 2000, by the Commission on Accreditation of Allied Health Education Programs (CAAHEP). Effective January 1, 2001, CAAHEP was succeeded by the Accreditation Review Commission on Education for Physician Assistant (ARC-PA).

PROSTHODONTICS: Started in 1993. Approved by the Commission on Dental Accreditation of the American Dental Association since February 1995.

PUBLIC HEALTH: Started in 1948; reorganized in 1964. Approved by the American Public Health Association June 23, 1967. Currently approved by the Council on Education for Public Health.

RADIATION THERAPY: Approved by the Council on Medical Education of the American Medical Association December 1, 1974. Currently approved by the Joint Review Committee on Education in Radiologic Technology.

RESPIRATORY CARE: Started in 1971. Initial approval by the Council on Medical Education of the American Medical Association September 1972. Full approval June 1973. Currently approved by the Commission on Accreditation of Allied Health Education Programs in collaboration with the Joint Committee on Accreditation for Respiratory Care Education.

SPEECH-LANGUAGE PATHOLOGY AND AUDIOLOGY: Approved by the American Speech-Language-Hearing Association June 1, 1991.

SURGICAL TECHNOLOGY: Started in 1995. Approval by the Council on Medical Education of the American Medical Association December 1972. Currently approved by the Commission on Accreditation of Allied Health Education Programs in collaboration with the Accreditation Review Committee on Education in Surgical Technology.

ACCREDITING AGENCIES

THE UNIVERSITY

Loma Linda University is accredited by WASC.

Accrediting Commission for Senior Colleges and Universities of the Western Association of Schools and Colleges

985 Atlantic Avenue, Suite 100
Alameda, CA 94501

Phone: 510 / 748-9001

THE UNIVERSITY LIBRARIES

Major library resources

Four major library resources on campus support the University's academic programs. These are:

- the Del E. Webb Memorial Library,
- the Jorgensen Learning Resources Center,
- the Jesse Medical Library and Information Center, and
- the Veterans Administration Library Services.

In addition to these facilities, specialized libraries are located in various medical and school departments on campus.

Central library

The Del E. Webb Memorial Library is the central library of Loma Linda University. Its historical roots go back to 1907, when a small library collection was started in a room of the old Loma Linda Sanitarium. In 1953 the growing collection was moved to its own building on the Loma Linda campus. Then in 1981, a new library building was built from a grant by the Del E. Webb Foundation, giving the library a total floor space of 87,670 square feet. This structure now houses the main library, while the old structure is now shared between the Department of Archives and Special Collections and the bound retrospective journals. As of June 2001, the library has a total collection of 410,807 books, bound and current journals/periodicals, and media items (197,303 books; 125,577 bound journals, 1,420 current periodical subscriptions, 349 nonsubscription periodicals; and 84,158 media items).

Library mission

The mission of the Library is to stimulate and support the information needs of the University's instructional, research, and service programs. To this end the Library provides a full range of information support services, including, but not limited to, reference, circulation, reserve, access to the internet, and hundreds of online databases, e.g., full-text, selective, automatic dissemination of information services (SDI); database end-user training programs; library orientations; interlibrary loans; photocopy and pull services; a microcomputer laboratory; a learning service resource center; class-integrated library instruction programs; and services that support distance education and University outreach programs.

Worldwide access

The Library provides access to other collections worldwide using internet technologies. It also participates in a number of national and regional networks. One of these is the National Network of the Libraries of Medicine, founded by the National Library of Medicine. This structure is divided into eight regional sections, one of which is the Pacific Southwest Region. The Del E. Webb Memorial Library belongs to this region and is the designated medical resource library for San Bernardino and Riverside counties. Local library cooperatives include the IEALC (Inland Empire Academic Library Cooperative) and SIRCULS (San Bernardino, Inyo, Riverside Counties United Library Services). Membership in these cooperatives gives our students, faculty, and staff access to the collections of these libraries. Archives and special collections

Archives and special collections

The Department of Archives and Special Collections is the central repository of information on the history of Loma Linda University, the health sciences, and major collections on Adventism. In addition to print materials which include rare books, theses, and dissertations, there are microforms, sound recordings, and several thousand photographs. Searchable digitized indexes for various document files are also available via the Library's website. The collection also includes 14,000 linear feet of archival materials, which include papers of various denominational and University officials, as well as the congressional papers of the Honorable Jerry and Shirley Pettis.

ELLEN G. WHITE ESTATE LOMA LINDA BRANCH OFFICE

Also located in the Library is a branch office of the Ellen G. White Estate. It contains 60,000 typewritten pages of Ellen G. White's letters and manuscripts; 4,600 of her published articles; and several different files of materials pertaining to various aspects of her life and ministry. A computerized concordance to her published writings is available to researchers. A link to a bibliography of the different variant editions of her works is available on the Library's home page.
